

Hello Guys welcome to my channel. My name is Dagmawi Esayas. I'm a high school student(11thG) and I've created this channel to share my life with you. I have a lot of hobbies, like photography, making vines & making musically, I write poems and philosophies as well. I love psychology, technology and science. I am a terrific software programmer and I'll share some of my work with you too. So enjoy! ☺☺☺

Aren't you tired? chained to this device, 24 hours wired posting all these pics so you can get admired searching for motivational quotes hoping to get inspired am I the only one feeling tired? #Tired #BabiQuotes

I took this photograph a while back. It's really beautiful to me. Only the window having color suggests of standing out. And the way it's fully open while having bars is nice. #Window #Photography

"You can always kill something, but you can't always bring it back!" From the series Fringe. Fringe is a nice series. It has this weird scientific twist to it and it's really interesting. And that's where I got this nice quote from. It simply means you can do something bad but it's hard to undo that. #Quotes

This cracks me up every time! ☺☺ #BabiMemes

Don't you wanna use your brain? I mean I know you do but not just to plug your phone when the battery drain or to find your sit on a flying plane. But to create something that's actually worth the pain something so big that the whole world knows your name. If you don't do it, then you'd probably regret it on your deathbed don't blame me, blame your deadhead. So get up, set free, defy gravity and use your brain to it's full capacity! #UseYourBrain #BabiQuotes

Don't do it! That's right, don't do it! Don't buy that rope don't lock your self in a room with no hope don't stand on that stool and stretch out the rope don't tie it on your neck, you're making a mistake! Don't jump down. I have news for you to take. Whatever you're going through you just gotta face it wide awake it didn't just come to break but also to make. The world offers a lot, so that rope on your neck take it off,pull it down, go outside and burn it for God's sake. It was about to take what wasn't his like an earth quake. Stand up tall and smile like never before it's time for you to edit your life and restore or may be go out into the woods and explore. So don't do it, be a living miracle and shine bright cause what was going to be your last night just made you a knight with a shining armor and light! #DontDolt #BabiQuotes @Dagmawi_Babi

The pain you've caused me I wish I could describe it to you! Sleepless nights not just a few but 7 days in a week! Sleepless nights filled with tears that's how I was all these years! So weak and tired couldn't ever face my fears! Covering my face with my blanket so nobody has to see my

tears! Making the music so loud that I don't have to hear my own thoughts but it's hurting my ears. Became so sensitive that the slightest things make me so upset depressed and sad wishing it was onset! Wishing it would be okay,when I'm offset! You don't know who you are, but look closer dear! Misery loves Misery somehow I lost the way to victory. Everybody can see the scars you put on me,the injury! Defined and is clear, it is not a mystery. Hopeful and adventurous, that was our history! And we went through that path where it was all slippery. Never have I thought that you'd lose me there, but my vision became so blurry! It felt so bitterly! Thinking and knowing for sure that I'll never see you again,wasn't my favorite memory! Did you find yourself?! Does knowing someone fully make us love them or hate them? This boggles my mind all the time, When I think about loving people. But the idea I've came across is that God knows us to the fullest and he's the highest claimer that no one loves us more than him. So may be that's the answer. May be knowing someone to the fullest makes us truly love them. Share your thoughts @DagmawiBabiBot ☺☺ #InsideThoughts @Dagmawi_Babi

Here are the bots I use: @emojibot this will translate texts into emojis. @billion_seconds_bot this will count how many seconds you have lived. @buildstickerbot this will create stickers from

results back. ☐ So the plan for yesterday was to get results back and go on a date with Seada and Hewan. My two BFFs. ☐

So I went to class, got my exams back. Which by the way were horrible! ☐ So Sead and Nani changed cloth so we can go out into the city....

I was hungry ☐ so I asked nani and sead to goto out to my home and also to change cloth. We walked☐☐☐☐☐☐from school to my home. With a couple of pauses in bn. We were talking and joking and stuff. ☐

We arrived home ☐ and sead met my mom in person for the first time. They were talking and stuff. ☐ Then mom made us food and we started eating. Then while we were doing that....

The outside door ☐ of our house ☐ was knocking and my lil sis asha went to open it. I thought it was someone from our neighbors but I wasn't....

Philipos walked into the living room. And I was shocked AF. ☐☐Cause I didn't expect him. Then a whole ton of people came.....Kibur Hermi Elu Kal Yab Mish Neju Azi Jo walked in with cake ☐ and drinks ☐and balloons ☐and stuff ☐.

It was a huge surprise. I didn't expect it at all! They surely surprised me!

Then they prepared the stuff and all gathered. They told me to change my uniform and stuff! Then I did! Then went back out to them.

Then they all gathered and just when I was bout to cut the cake ☐ they started taking parts of the cake and started to smash it all over my face ☐☐ and each other's faces! ☐☐☐☐☐

Then we went on dancing ☐☐and then went on pouring coca on each other and then back to dancing ☐☐then back to dancing ☐☐

Oh the dancing was so hoooot. First time I ever grinded btw. ☐☐☐ I was so horrible at dancing. But Yab and Kal were killing it!!! ☐☐ and Elu...oh my that skinny angel was shaking her booty! ☐

Well there was a master dancer there tho....Mish an.... That girl can dance! That girl can really dance!! ☐☐☐☐☐

So Kal was the DJ and damn I heard some dope ass Ethiopian EDMs... ☐ ☐

It was the greatest day of this year. ☐There was no day like this before. It was so sweet. ☐☐I will never forget this! Imma miss all my high school friends. 9 years of being in the same school!

They put a lot of thought and time into this and thank you ☐ won't even express how happy I felt!

Kibure Philip Elluye Hermi Jo Azi Kal Yab Naju Mish Nani & Sead. And Redi Afi Kal! Thank you! Won't even say how much I love you guys and how much I was happy bout yesterday! ☐☐

Story Time..... So yesterday I had a date with one of the smartest girl 🧠in our school, Beti Megabiaw. We go out a lot of times 🧠 and yesterday was supposed to be our last 🧠So we met at 4 o'clock in Avanti.

She looked fabulous 🤩 and cute 🧠 And I complimented her on that. 🧠 NB: Always compliment a girl 🧠 So we ordered drinks🧠and we were talking like hell. We were talking almost about everything. It was so great 🧠

Then we decided to eat lunch 🧠 in the hotel beside us called Deset. So we payed the bill and went out. We were fooling around and stuff. I remember her joking about buying 🧠 for lunch and stuff. 🧠

Then we got to deset. Then all of a sudden I saw Micky one of my bffs and I was shocked 🧠 cause he told me just the day before that he had gone to Gondar. And then when I turned around I saw Ibrish 🧠and Sami🧠 and Hana🧠. And I was like "What the hell"🧠🧠

And then I knew it was a surprise party 🧠 Then we all ate pizza 🧠 joked around. And Nami 🧠 came and we took lots of selfies and stuff 🧠 It was a great day. Dave and Nakom were supposed to be there too. But they didn't make it! 🧠I wish they were there 🧠but I knew they'd have been there if they could! 🧠I hope to see them soon! 🧠 They're all some of the greatest friends I've made in high school! I'm lucky 🧠 to have you guys! Thank you guys! 🧠🧠🧠🧠

I love you guys!!! 🧠🧠

unusually beautiful☺ I saw u in the stars With all ur tears and scars I found u way beyond All the
fear left u flawed Loneliness and yearning Above ur head, soaring Deep sorrow and far cries
Were of ur closest pals I met u in the shadow Ur heart deserted meadow But still i figured the
real u Ur truth was all due Behind ur sadness lies A girl looking for happy times Behind curtains
of ur shyness I found ur crown ur highness Next to ur lonesome days And all ur unsaid pains I
saw ur soul growing With spotlight on it, glowing A dazzling sparkle That made all hearts settle
That beauty behind the madness Ur gaze ur talk ur calmness I had nothing to say My words left
me astray I choked I struggled I fought To tell u what I thought "Exquisite..." "....that's what u
are..." "...unusually beautiful." #UnusuallyBeautiful @Dagmawi_Babi

So today I was supposed to meet up with my geeky ☺ friend Mikias. Then when I got there
Medhanit ☺was with him. And then we went to some place to eat fish. ☺

We started eating and when we finished. They told me they got a gift ☺ for me I was so ☺ ☺!

Then they told me to close my eyes ☺ and I did. Then they gave me one of the gifts. It was a
drawing of me. They drew me on a separate paper and glued it and laminated it back to back. It
was sooo good. Oh Mike's drawing was sooo good ☺ too. Yemr he put effort into it rasu. Like he
added a cloth colored the same as the shirt I was wearing at the pic he draw. And he added
actual hair to it and it was amaziing. ☺☺☺☺☺☺☺

They drew this picture

Here's Mike's drawing! ☺☺☺☺☺

And at the back was Med's drawing ☺☺☺☺☺

Ik they're really good.☺☺☺☺

And then they told me to close my eyes again. ☺ Then they gave me another gift ☺ And I was so
fuckin' shocked!! ☺☺ It was Marshmello's head mask. Med actually made that! It was sooo good ☺.
Like unbelievably great. Specially the perfection of it! Beka let me just show u it! ☺☺☺☺☺☺☺☺

River Eminem Featuring Ed Sheeran ☐☐☐☐☐☐☐☐☐☐ I've been a liar, been a thief Been a lover, been a cheat All my sins need holy water, feel it washing over me Well, little one, I don't want to admit to something If all it's gonna cause is pain Truth and my lies right now are falling like the rain So let the river run [Verse 1: Eminem] He's comin' home with his neck scratched, to catch flack Sweat jackets and dress slacks, mismatched On his breath's Jack, he's a sex addict And she just wants to exact revenge and get back It's a chess match, she's on his back like a jet-pack She's kept track of all his Internet chats And guess who just happens to be movin' on to the next Actually, just shit on my last chick and she has what my ex lacks 'Cause she loves danger, psychopath And you don't fuck with no man's girl, even I know that But she's devised some plan to stab him in the back Knife in hand, says their relationship's hangin' by a strand So she's been on the web lately Says maybe she'll be my Gwen Stacy, to spite her man And I know she's using me to try to play him, I don't care Hi Suzanne, but I shoulda said "Bye Suzanne" After the first night, but tonight I am [Chorus: Ed Sheeran] I've been a liar, been a thief Been a lover, been a cheat All my sins need holy water, feel it washing over me Well, little one, I don't want to admit to something If all it's gonna cause is pain The truth and my lies now are falling like the rain So let the river run [Verse 2: Eminem] A one-night stand turned a two-night stand It was "come sunlight, scram," now we hug tight, and... He found out, now she feels deserted and used 'Cause he left, so what? He did it first to her too Now how am I supposed to tell this girl that we're through? It's hard to find the words, I'm aloof, nervous, and Sue Don't want this to hurt, but what you deserve is the truth Don't take it personal, I just can't say this in person to you So I revert to the studio, like hole-in-the-wall diners Don't have to be reserved in a booth I just feel like the person who I'm turning into's Irreversible, I preyed on you like it's church at the pew And now that I got you I don't want you Took advantage in my thirst to pursue Why do I do this dirt that I do? Get on my soapbox and preach, my sermon and speech Detergent and bleach is burnin' the wound 'Cause now with her in the womb We can't bring her in this world, shoulda knew To use protection 'fore I bit into your forbidden fruit Fuck! [Chorus: Ed Sheeran] I've been a liar, been a thief Been a lover, been a cheat All my sins need holy water, feel it washing over me Well, little one, I don't want to admit to something If all it's gonna cause is pain The truth and my lies now are falling like the rain So let the river run [Bridge: Eminem & Ed Sheeran] My name's (ooh), my name's (ooh) River (ooh), river run Call me (ooh), call me (ooh) River (ooh), we'll let the river run [Verse 3: Eminem] Always the bridesmaid, never "The bride, hey!" Fuck can I say? If life was a highway And deceit was an enclave, I'd be swerving in five lanes Speeds at a high rate, like I'm slidin' on ice, maybe That's why I may have came at you sideways I can't keep my lies straight But I made you terminate my baby This love triangle left us in a wreck, tangled What else can I say? It was fun for a while Bet I really woulda loved your smile Didn't really wanna abort, but fuck it What's one more lie, to tell our unborn child? [Chorus: Ed Sheeran & Eminem] I've been a liar, been a thief Been a lover, been a cheat All my sins need holy water, feel it washing over me Well,

little one (I'm sorry) I don't want to admit to something (I fucked up) If all it's gonna cause is pain
The truth and my lies now are falling like the rain So let the river run #Lyrics #River #Eminem

Question: If you got lost in somewhere ☹️ and you were really hungry ☹️Would it be okay to cut off my leg and eat it? ☹️I will have food ☹️and I will have one less body part that needs food. ☹️
Answer: The problem is the trauma/pain ☹️your body will endure with the loss of your leg will greatly exceed the benefit you'd get from eating that food! Because the body's process of using reserved energy is more efficient than the process of digestion. So don't cut of your leg and eat it! ☹️ #Vsauce @Dagmawi Babi

There was a study done on 100 elderly people facing death, close to their last breath. They were asked to reflect about their life's biggest regret. The following spoken word is one of my favorite spoken word by Prince EA. It's about school. Read it till the end to be wowed. I even wrote it in Amharic too.

"Everyone's a genius. But if you judge a fish by it's ability to climb a tree, it will spend it's whole life believing it's stupid!" - Albert Einstein If a doctor prescribed the exact same medicine to all of his patients, the results would be tragic. So many people would get sick! Yet when it comes to school. It's exactly what happens. Where one teacher stands in front of 40 students. Each having different needs, different skills, different strength, different gifts and different dreams. And teach the same thing the same way!! Teachers have the most important jobs in the world and yet they're underpaid!! Curriculums are made by policy makers. Most of which have never taught a day in their life. They think bubbling in a multiple choice question will determine success! "These tests are too crude to be used and should be abandoned" - Frederick J. Kelly Countries like Finland are doing impressive things. Teachers make decent wages. They have shorter school days. Homeworks are non existing! And they focus on collaboration than competition. #PrinceEA #SpokenWord @Dagmawi_Babi

If you sleep in a bed with another person for an entire year. Your body is actually exposed to 1 milligram more radiation than someone who sleeps alone! #Radiation #ScienceSaturdays @Dagmawi_Babi

What if the Earth 🌍 were twice as big? Here are a couple of points that might happen. 1. Gravity will be really different. Meaning it will be hard to walk 🚶 and ur weight will be twice as much. And since your spinal cord will be affected by more gravity you will actually lose height. But as much as the gravity has increased it will not be enough to actually attract the moon 🌙 In order for that to happen the moon has to be within the Earth's 🌍 Roche limit, which is the minimum distance

the moon can approach the Earth with out losing control. And if the moon goes beyond Roche's limit. The Earth will tear the moon apart and giving us a rocky ring just like Saturn's 2. The Earth will heat up See there would be more unstable elements in the crust and interior so there will be much more volcanos. 3. Plants will not grow as much. See there's a limit for how tall a tree should grow. Usually it's 120 meters or so. And this is affected by gravity. Since the taller the tree is the more energy is required from the root to the top. If the amount of energy the plant gets from photosynthesis is more than the energy used to transport the water, it will grow. But if not it won't. #WhatIf #EarthTwiceAsBig #HypotheticalQuestions #ScienceSaturdays @Dagmawi_Babi

Do Birds Pee? Mammals remove excess nitrogen from their bodies by converting it to a dilute
solution of urea, stored in the bladder. Birds convert nitrogen to uric acid instead: this is
metabolically more costly but saves water and weight, as it is less toxic and doesn't need to be
diluted so much. Birds therefore don't have a urethra, and don't pee - all waste leaves via the
anus. #Birds #Urine #ScienceSaturdays @Dagmawi_Babi

Why is the sky blue? When sunlight passes through the atmosphere, the shorter wavelengths
get scattered more, something called Rayleigh scattering. However, wavelengths that are too
short (such as x-rays and most uv) get absorbed by air, so the light from the sky is most intense
at about the boundary between violet and ultraviolet. Since the human eye's peak sensitivity is
in the middle of the spectrum (yellow-green) we see the sky as blue, because that's about the
midpoint between what we can see best and what the sky actually is. #Sky #Blue
#ScienceSaturdays @Dagmawi_Babi

What if we shot a gun in space? Guns can shoot in space, and this allows for all kinds of absurd
scenarios. If you're in the vacuum between galaxies, pulling the trigger will send you and your
bullet careening through space literally forever. If you shoot a gun in the solar system, your
bullet will get sucked toward the sun or one of the giant planets. And if you shoot a gun toward
the horizon while standing on a mountain on the moon, you could theoretically shoot yourself in
the back #WhatIf #Space #Guns #ScienceSaturdays @Dagmawi_Babi

What if the sun ☹️was half as big? 1. The sun's ☹️temperature, color and diameter are determined

by its mass. Bigger stars are hotter and bluer than the whitish-yellow sun, while smaller stars are cooler and redder. 2. The sun would be what we call a "Red Dwarf" And the habitable zone might be is debatable. Smaller stars produce more frequent blasts of radiation called flares, which would bombard close-in planets. 3. The habitable zone would shift closer to the star; if the Earth orbited at the same distance, our water would freeze solid. #WhatIf #Sun #ScienceSaturdays @Dagmawi_Babi

What if all toilets were flushed simultaneously? If we coordinated the simultaneous flushing of all toilets in the world, there would likely be pipe explosions in some places caused by a shortage of water for refilling all the bowls (and thus, air entering the pipes, causing pressure changes). But for the most part, crisis would be averted by a technicality: Each toilet is located a different distance away from the main sewage line, so simultaneous flushes are actually staggered when it comes to delivering their water to the main. Rather than a peak in sewage flow, the system would receive a smooth curve of commode contributions. #Whatif #Toilets #ScienceSaturdays @Dagmawi_Babi

What if the sun was smaller than the Earth? 1. If, hypothetically, the Sun was smaller than the Earth, our solar system would look completely different. The bad news is, the Earth would be uninhabitable, and the Sun... well, this massive star may no longer be a star 2. Since the Sun is the source of gravity that keeps us in orbit, all planets, the Earth included, would float away into space in search of another anchor. #Whatif #Sun #Size #ScienceSaturdays @Dagmawi_Babi

What if the world lost oxygen for 5 seconds? 1. In just 5 seconds, the Earth would look completely different. Without oxygen, you can say goodbye to the Hoover Dam, the Pantheon Dome and anything else made out of concrete. These structures would instantly collapse. Oxygen acts as a special binding agent to concrete. Without it, concrete is just dust. 2. Speaking of buildings, any untreated metal would be instantly fused together. This is because there's a layer of oxidation on metals that prevents them from welding together. Without that layer, metals would instantly bind to each other. 3. If you happen to be relaxing at the beach at the time expect a severe sunburn. The ozone layer, our protection against the sun's UV rays, is made of oxygen. Three oxygen atoms that have bonded to create ozone. Take away the oxygen, and the Earth would get extremely hot. There would be nothing protecting us from the sun's UV rays. 4. In addition to a sunburn, our inner ear would explode. Losing oxygen means losing 21% of our air pressure. A change in air pressure that drastic is equivalent to being at sea level and dropping down 2000 meters instantly. Our ears wouldn't have enough time to adapt. 5. Having a good time yet? Well, don't expect it to last long. Without oxygen, there's no fire – the combustion process in vehicles won't be able to occur. Any mode of transport that isn't electric will automatically fail. Planes will fall from the sky, and millions of cars will be stopped in their tracks. 6. The sky would be completely dark. Before it hits the earth, light from the sun bounces off multiple particles in the air. Without oxygen in the atmosphere, there are less things to bounce off, and the sky will appear dark... almost black. 7. Oh yeah, and while all this is happening, the Earth's crust would completely crumble. That's because Earth's crust is made up of 45% oxygen. Without oxygen involved in the surface there wouldn't be much left. The crust would crumble, and continue to crumble until there's nothing left, sending you and everyone on the planet into a free-fall. #Whatif #Oxygen #ScienceSaturdays @Dagmawi_Babi

It's long msg but just try to read once BERNARD SHAW while smoking his cigarette, he puffed out some smoke into the air and said: 'God, that's for you.' He died at the age of 32 of LUNG CANCER in a horrible manner. The man who built the Titanic After the construction of Titanic, a reporter asked him how safe the Titanic would be. With an ironic tone he said: 'Not even God can sink it' The result: I think you all know what happened to the Titanic Marilyn Monroe (Actress) She was visited by Billy Graham during a presentation of a show. He said the Spirit of God had sent him to preach to her. After hearing what the Preacher had to say, she said: 'I don't need your God'. A week later, she was found dead in her apartment Bon Scott (Singer) The ex-vocalist of the AC/DC. On one of his 1979 songs he sang: 'Don't stop me; I'm going down all the way, down the highway to hell'. On the 19th of February 1980, Bon Scott was found dead, he had been choked by his own vomit. Campinas (IN 2005) In Campinas , Brazil a group of friends, drunk, went to pick up a friend..... The mother accompanied her to the car and was so worried about the drunkenness of her friends and she said to the daughter holding her hand, who was already seated in the car: 'My Daughter, Go With God And May He Protect You.' She responded: 'Only If He (God) Travels In The Trunk, Cause Inside Here.....It's Already Full ' Hours later, news came by that they had been involved in a fatal accident, everyone had died, the car could not be recognized what type of car it had been, but surprisingly, the trunk was intact. The police said there was no way the trunk could have remained intact. To their surprise, inside the trunk was a crate of eggs, none was broken Christine Hewitt (Jamaican Journalist and entertainer) said the Bible (Word of God) was the worst book ever written. In June 2006 she

was found burnt beyond recognition in her motor vehicle. Many more important have forgotten that there is no other name that was given so much authority as the name of God. Many have died, but only God appeared again, and is still alive & around .. 'Great ...!! PS: If it was a joke, you would have sent it to everyone. So are you going to have courage to send this?. I have done my part, God said 'If you are embarrassed about me, I will also be embarrassed about you before my Mercy.' I'M TOLD THIS WORKS!!!! Just repeat this prayer and see how God moves!! 'God I love you and I need you, come into my heart, and bless me, my family, my home, and my friends. #Spiritual @Dagmawi_Babi

Pray Sam Smith ft. Logic 🎧🎧🎧🎧🎧🎧🎧🎧🎧🎧 They never knew my struggle Rose above the rubble
Rather live inside they bubble, than go through the trouble Of having their double double vision
corrected They just neglect it and— I been thinking lately Will the Devil take me? Or will God
protect me? I know I ain't perfect, but you should respect me They don't want me happy They
don't want to let me live [Verse 2: Sam Smith] I'm young and I'm foolish, I made bad decisions I
block out the news, turn my back on religion Don't have no degree, I'm somewhat naïve I've
made it this far on my own But lately, that shit ain't been gettin' me higher I lift up my head and
the world is on fire There's dread in my heart and fear in my bones And I just don't know what to
say [Chorus: Sam Smith] Maybe I'll pray, pray Maybe I'll pray I have never believed in you, no But
I'm gonna pray [Verse 3: Logic] I am me I'm a man, I'm a sinner But understand, aren't we all? So
when it comes to passin' judgements I don't think that you're the one to make the call Heaven
want to cast me out for being me I know there's others like me that'll break the fall I know you
hater motherfuckers just can't relate at all If I'm the first one to the line that's fine, I'll take it all
Well Logic, He gon' let 'em know I ain't perfect, but I'm worth it I'm alive, I deserve it I been
praying, I ain't playin' I don't think you hear the words that I'm sayin' I don't think you know the
weight on my shoulders That gets heavier as I get older Callin' anybody, callin' anybody "Can you
hear me?" I pray that you hear me I pray that you hear me [Chorus: Sam Smith] Maybe I'll pray
(Lord), pray (Lord), maybe I'll pray I've never believed in you, no, but I'm gonna... [Bridge: Sam
Smith] Won't you call me? Can we have a one-on-one, please? Let's talk about freedom Everyone
prays in the end Everyone prays in the end Oh, won't you call me? Can we have a one-on-one,
please? Let's talk about freedom Everyone prays in the end Everyone prays in the end [Outro:
Sam Smith] Oh, I'm gonna pray I'm gonna pray I'm gonna pray Pray for a glimmer of hope Maybe
I'll pray, pray Maybe I'll pray I've never believed in you No, but I'm gonna pray #Lyrics

Guys listen to Machine Gun Kelly's diss then Eminem's diss and vote for who won? For me it's
Eminem 🎧🎧 #MGKvsEminem @Dagmawi_Babi

Rap Devil (Eminem Diss) Machine Gun Kelly ████████████████████ Oh my god, Ronny Ayy somebody grab him some clippers (Zzz) His fucking beard is weird Tough talk from a rapper paying millions for security a year "I think my dad's gone crazy," yeah Hailie you right Dad's always mad cooped up in the studio yelling at the mic You're sober and bored, huh (I know) About to be 46 years old, dog Talkin' bout "I'ma call up Trick Trick" Man you sound like a bitch, bitch Man up and handle your shit (Ugh) Mad about something I said in 2012 Took you six years and a surprise album just to come with a diss Homie we get it, we know that you're the greatest rapper alive Fucking dweeb, all you do is read the dictionary and stay inside Fuck Rap God, I'm the Rap Devil Coming bear face with a black shovel Like the Armageddon when the smoke settle His body next to this instrumental I'm saying I'm sick of them sweatsuits and them corny hats, let's talk about it I'm sick of you being rich and you still mad, let's talk about it Both of us single dads from the Midwest, we can talk about it Or we could get gully I'll size up your body and put some white chalk around it Let's talk about the fact you actually blacked balled a rapper that's twice as young as you (Let's talk about it) Let's call Sway, ask why I can't go on Shade 45 because of you (Brr) Let's ask Interscope how you had Paul Rosenberg trying to shelf me (Huh?) Still can't cover up the fact your last four albums is as bad as your selfie Now tell me, what do you stand for? (What?) I know you can't stand yourself (No) Trying to be the old you so bad you Stan yourself (Ha) Let's leave all the beefing to 50 (Please) Em you're pushing 50 Why you claiming that I'ma call Puff? When you the one that called Diddy (Facts) Then you went and called Jimmy (Facts) They conference called me in the morning (What?) They told me you mad about a tweet You wanted me to say sorry (What?) I swear to God I ain't believed him (Nah) Please say it ain't so (No) The big bad bully of the rap game can't take a fucking joke Oh you want some fucking smoke (What?) But not literally, you'll choke Yeah I'll acknowledge you're the GOAT But I'm the Gunner bitch, I got you in the scope (Brra) Don't have a heart attack now (No) Somebody help your mans up (Help) Knees weak of old age The real Slim Shady can't stand up I'm sick of them sweatsuits and them corny hats, let's talk about it I'm sick of you being rich and you still mad, let's talk about it Both of us single dads from the Midwest, we can talk about it Or we could get gully I'll size up your body and put some white chalk around it Hello Marshall, my name's Colson You should go back to Recovery I know your ego is hurting just knowing that all of your fans discovered me (Hi) He like "Damn, he a younger me Except he dresses better and I'm ugly Always making fun of me" Stop all the thuggery Marshall, you living in luxury (Damn) Look what you done to me, dropped an album just because of me Damn, you in love with me You got money but I'm hungry I like the diss but you won't say those lyrics out in front of me Shout out to every rapper that's up under me Know that I'll never do you like this fuckery Still bitter after everyone loves you Pull that wedgie out your dungarees (Hey) I gotta respect the OGs and I know most of 'em personally (Aye) But you're just a bully acting like a baby so I gotta read you a nursery (Nursery) I'm the ghost of the future and you're just Ebenezer Scrooge (Facts) I said on Flex, anyone could get it I ain't know it would be you I'm sick of them sweatsuits and them corny hats, let's talk about it I'm sick of you being rich and you still mad, let's talk about it Both of us single dads from the Midwest, we can talk about it Or we could get gully I'll size up your body and put some white chalk around it Riding shotty cause I gotta roll this dope It's a fast road when your idols become your rivals Never hesitate to say it to your face, I'm an asshole Bitch ass motherfucker Oh my god, Ronny We know you get nervous, Rabbit I see momma's spaghetti all ov

er your sweater I wish you would lose yourself on the record that you made a decade ago, they were better According to them you're a national treasure To me you're as soft as a feather The type to be scared to ask Rihanna for her number, just hold her umbrella-ella-ella "I'm not afraid," okay Oscar the Grouch, chill on the couch (Fuck) You got an Oscar, damn can anyone else get some food in their mouth? (For real) They made a movie about you, you're in everybody's top

ten You're not getting better with time It's fine Eminem, put down the pen Or write an apology about the simple fact you had to write a diss to acknowledge me I am the prodigy, how could I even look up to you You ain't as tall as me 5'8" and I'm 6'4" Seven punches hold your head still Last time you saw 8 Mile was at home on a treadmill You were named after a candy I was named after a gangster (brr) And don't be a sucker and take my verse off of Yelawolf's album, thank you (Thank you) I just wanna feed my daughter You tried to stop the money to support her You the one always talk about the action Text me the addy, I'm pulling up scrappy And I'm by fucking myself, what's happenin'? EST captain, salute me or shoot me That's what he's gonna have to do to me when he realizes there ain't shit he could do to me Everybody always hated me, this isn't anything new to me Yeah there's a difference between us, I got all of my shit without Dre producing me (Aye) I know you're not used to me Usually one of your disses should ruin me But bitch I'm from Cleveland, everybody quiet this evening, I'm reading the eulogy (Shh) Dropped an album called Kamikaze, so that means it killed him Already fucked one rapper's girl this week, don't make me call Kim I'm sick of them sweatsuits and them corny hats, let's talk about it I'm sick of you being rich and you still mad, let's talk about it Both of us single dads from the Midwest, we can talk about it Or we could get gully I'll size up your body and put some white chalk around it #Lyrics #RapDevil #MGK #MGKvsEminem @Dagmawi_Babi

KillShot Eminem You sound like a bitch, bitch Shut the fuck up! When your fans become your haters You done? Fuck, your beard's weird Alright You yellin' at the mic, you weird beard We doin' this once You yellin' at the mic, your beard's weird Why you yellin' at the mic? (Illa) Rihanna just hit me on the text Last night I left hickies on her neck Wait, you just dissed me? I'm perplexed Insult me in a line, compliment me on the next Damn, I'm really sorry you want me to have a heart attack Was watchin' 8 Mile on my NordicTrack Realized I forgot to call you back Here's that autograph for your daughter, I wrote it on a Starter cap Stan, Stan, son, listen, man, Dad isn't mad But how you gonna name yourself after a damn gun And have a man-bun? The giant's woke, eyes open, undeniable Supplyin' smoke, got the fire stoked Say you got me in a scope, but you grazed me I say one call to Interscope and you're Swayze Your reply got the crowd yelling, "Woo!" So before you die let's see who can out-petty who With your corny lines ("Slim, you're old") -ow, Kelly-oooh But I'm 45 and I'm still outselling you By 29 I had three albums that had blew Now let's talk about somethin' I don't really do Go in someone's daughter's mouth stealin' food But you're a fuckin' mole hill Now I'ma make a mountain out of you, woo! Ho, chill, actin' like you put the chrome barrel to my bone marrow Gunner? Bitch, you ain't a bow and arrow Say you'll run up on me like a phone bill, sprayin' lead (brrrt) Playin' dead, that's the only time you hold still (hold up) Are you eating cereal or oatmeal? What the fuck's in the bowl, milk? Wheaties or Cheerios? 'Cause I'm takin' a shit in 'em, Kelly, I need reading material ... Dictionary... Yo, Slim, your last four albums sucked Go back to Recovery, oh shoot, that was three albums ago What do you know? Oops Know your facts before you come at me, lil' goof Luxury, oh, you broke, bitch? Yeah, I had enough money in '02 To burn it in front of you, ho Younger me? No, you're the wack me, it's funny but so true I'd rather be 80-year-old me than 20-year-old you 'Til I'm hitting old age Still can fill a whole page with a ten-year-old's rage Got more fans than you in your own city, lil' kiddy, go play Feel like I'm babysitting Lil Tay Got the Diddy okay so you spent your whole day Shootin' a video just to fuckin' dig your own grave Got you at your own wake, I'm the billy goat You ain't never made a list next to no Biggie, no Jay Next to Taylor Swift and that Iggy ho, you about to really blow Kelly, they'll be putting your name Next to Ja, next to Benzino-die, motherfucker! Like the last motherfucker sayin' Hailie in vain Alien brain, you Satanist (yeah) My biggest flops are your greatest hits The game's mine again and

ain't nothin' changed but the locks So before I slay this bitch I, mwah, give Jade a kiss Gotta wake up Labor Day to this (the fuck?) Bein' rich-shamed by some prick usin' my name for clickbait In a state of bliss 'cause I said his goddamn name Now I gotta cock back, aim Yeah, bitch, pop Champagne to this! (pop) It's your moment This is it, as big as you're gonna get, so enjoy it Had to give you a career to destroy it Lethal injection Go to sleep six feet deep, I'll give you a B for the effort But if I was three foot 11 You'd look up to me, and for the record You would suck a dick to fuckin' be me for a second Lick a ballsack to get on my channel Give your life to be as solidified This mothafuckin' shit is like Rambo when he's out of bullets So what good is a fuckin' machine gun when it's out of ammo? Had enough of this tatted-up mumble rapper How the fuck can him and I battle? He'll have to fuck Kim in my flannel I'll give him my sandals 'Cause he knows long as I'm Shady, he's gon' have to live in my shadow Exhausting, letting off on my offspring Like a gun barrel, bitch, get off me! You dance around it like a sombrero, we can all see You're fuckin' salty 'Cause Young Gerald's balls-deep inside of Halsey Your red sweater, your black leather You dress better, I rap better That a death threat or a love

letter? Little white toothpick Thinks it's over a pic, I just don't like you, prick Thanks for dissing me Now I had an excuse on the mic to write "Not Alike" But really, I don't care who's in the right But you're losin' the fight you picked Who else want it, Kells? Attempt fails, Budden, L's Fuckin' nails in these coffins as soft as Cottonelle Killshot, I will not fail, I'm with the Doc still But this idiot's boss pops pills and tells him he's got skills But, Kells, the day you put out a hit's the day Diddy admits That he put the hit out that got Pac killed, ah! I'm sick of you bein' whack And still usin' that mothafuckin' Auto-Tune So let's talk about it (let's talk about it) I'm sick of your mumble rap mouth Need to get the cock up out it Before we can even talk about it (talk about it) I'm sick of your blonde hair and earrings Just 'cause you look in the mirror and think That you're Marshall Mathers (Marshall Mathers) Don't mean you are, and you're not about it So just leave my dick in your mouth and keep my daughter out it You fuckin'... oh And I'm just playin', Diddy You know I love you #Lyrics #KillShot #Eminem #MGKvsEminem @Dagmawi_Babi

This is the highest resolution picture in the world at 365 Gigapixels! #TechnologyThursdays @Dagmawi_Babi

I made this AI that plays a game and after you train it it will not be beaten. The game is text based and it's all about dictionaries. For Example: If the key is A:Z Then if the game gave an out out of A then the AI must reply with Z or it's game over. #TechnologyThursdays @Dagmawi_Babi

This is the start of the GUI one. #TechnologyThursdays @Dagmawi_Babi

If you just start the game without training it it will lose right away cause I used the entire alphabet as keys to the dictionary! #TechnologyThursdays @Dagmawi_Babi

This is fast training which takes it about 500-1K generations of the AI. The slow one takes about 2K-6K of it. After training is completed the AI is 100% unbeatable. #TechnologyThursdays @Dagmawi_Babi

Here's the AI not losing a single thing! #TechnologyThursdays @Dagmawi_Babi

You can also reset the AI's memory so it has no idea how to play it. #TechnologyThursdays @Dagmawi_Babi

Here's the terminal version. Which u could see everything in real time. #TechnologyThursdays @Dagmawi_Babi

Here's the GUI version with simplicity! #TechnologyThursdays @Dagmawi_Babi

So its means your are ANONYMOUS 2 Connecting To Public Wifi Yeah like everybody connect to every free public Wi-Fi connections and use for free. But the answer is a BIG-FAT-NOOOO. connecting to public WiFi connection is a serious crime and may putted on jail upto 4 years. 3 Streaming TV-Shows With Only certified TV streamers like Hulu & Netflix only can stream TV showas Legally. But if you stream TV shows with out certified condition, you are going to face BiG-Problem 4 Using Social Media Before Your Age Some social medias like Facebook , WhatsApp & Even YouTube Channel have age restrictions. For example, You cant use WhatsApp if you are not atleast 16. And also you cant use Facebook at the age of 10. You cant have Youtube channel before 17, But if you got a permission for your parents, you can. This kids today take this things as #Unfair. But it is law & you have to respect!! 5 Using Fake-Name On Social Medias You may got a lot of followers on Instagram by using fake username. But this is again BIG-Fat-Nooooo. Using fake name takes like hacking and you may face Big Problem As F^^^ 6 Sharing Social Media Password You may tell your friend your Facebook password to let him/her use by your acc. But Again this is A-Big-Fat-Nooooo. With out having permission from the social media, you cant share your password with your friends. This is because the media won't take risk by your problem. @TheDailyTechNews ©CopyRighted Sep.20/2018 #TechnologyThursdays @Dagmawi_Babi

So today I got an awesome gift ☐ It's one of the special gifts ☐I got. See I've moved ☐ from Bahir Dar to Addis Ababa. And my sweet ☐ friends have been giving me something to remember them by and today another one of the gifts ☐ got here. @Dagmawi_Babi

So after school today I met up with a sweet angel ☐called Shalom from Omega school and received my gift ☐ She brought it all the way from Bahir Dar ☐ We opened it and we talked a lot and stuff. She's pretty fun. @Dagmawi_Babi

@Dagmawi_Babi

@Dagmawi_Babi

So this is the gift. It's a dope ass shirt. On the front side it has the brand name which is "DE" which stands for Dagmawi Esayas(Me) ☐☐ Then below it, it has all the name of the people ☐ who gave money ☐for the making of the shirt. But most of all I loved ☐ the art in the center. @Dagmawi_Babi

@Dagmawi_Babi

@Dagmawi_Babi

I'd like to say thanks to Hannah, Micky, Betty, Nakom, Sami, Ibro, Nami, Dave & Yeshe for this incredibly special gift ☐ It truly is sweet ☐Sending it all this way just to make me smile☐ is something different. And I love you guys....ALOT!! ☐☐☐ All I can say is thanks so Thank you guys!! ☐☐ ☐☐ ☐☐ #Gift @Dagmawi_Babi

This joke cracked me up: Bob and Martha have been married for 15 years. Each and every morning of those 15 years, Bob has woken up, farted loudly and proudly, rolled over onto his back and got out of bed to go to work... And each and every morning for those 15 years, Martha has said to him disgustedly, "One of these days, you're gonna fart your guts out!" But this has had no effect on Bob as he has continued merrily with his routine each morning. Martha is totally fed up with this and then one Thanksgiving morning when she got up early to get things

ready, she got an idea while preparing the turkey. Before Bob got up, she crept upstairs and placed the turkey innards in his pajama bottoms, giggling to herself as she did so. A little later that morning, Bob woke up and went through his usual morning ritual with glee. Martha heard a scream as Bob jumped out of bed and ran into the bathroom. She laughed to herself, but when Bob didn't reappear from the bathroom for a long time she started to get concerned. So she ran upstairs and was just about to knock on the bathroom door, when Bob opened it and came out, pale as a ghost. He said, "You were right, honey, you were right. I did fart my guts out, but by the grace of God and these two fingers I got them back up there again." 🍑🍑 #Jokes @Dagmawi_Babi

The Format "Inches And Falling" ----- I love Love I love being in love I don't care what it does to me Take these tattered boxes that used to hold your clothes Break them down Build them back up with your bones All you did was construct a mess You're good to me when only flesh You're a memory with nothing to show When we would take trips We swore we'd never take pictures Pictures only prove you can't convince Now I wish those photographs could convince you that what we had would only turn out a negative well well well If fingertips are relationships then I could barely carry your weight If fingers are mistakes Don't use this one

to point the blame Just sing sing I love love I love being in love I don't care what it does to me
These pills are fine to pass the time 'til I find my new drug Then We'll take our chances we'll last
a month we'll never speak again How I love being in love And don't pick up the line You're
dressed to have a good time you don't need him, you need to be seen so someone else can treat
you wrong so you my love can sing this song I love love I love being in love I don't care what it
does to me These pills are fine to pass the time 'til I find my new drug Then They'll take
advantage I'll claim that's what I want To be the new statistic How I love How I love How I love
being in love Take these tattered boxes That used to hold your clothes Break them down Build
them back up with your bones All you did was construct a mess you're dead to me if love is
death You're a memory with nothing to show WELL WELL WELL If fingertips are relationships
Then maybe I could use a break She smiles She points at me shes says: Baby I love how you sing
so just sing I love love I love being in love I don't care what it does to me These pills are fine to
pass the time 'til I find my new drug Then We'll take our chances we'll rise above we'll last until
the end How I love How I love How I love being in love #TheFormat #InchesAndFalling #Songs

My favorite joke: Everyone Knows Dave Dave was bragging to his boss one day, "You know, I know everyone there is to know. Just name someone, anyone, and I know them." Tired of his boasting, his boss called his bluff, "OK, Dave, how about Tom Cruise?" "No dramas boss, Tom and I are old friends, and I can prove it." So Dave and his boss fly out to Hollywood and knock on Tom Cruise's door, and Tom Cruise shouts, "Dave! What's happening? Great to see you! Come on in for a beer!" Although impressed, Dave's boss is still skeptical. After they leave Cruise's house, he tells Dave that he thinks him knowing Cruise was just lucky. "No, no, just name anyone else," Dave says. "President Obama," his boss quickly retorts. "Yup," Dave says, "Old buddies, let's fly out to Washington," and off they go. At the White House, Obama spots Dave on the tour and motions him and his boss over, saying, "Dave, what a surprise, I was just on my way to a

meeting, but you and your friend come on in and let's have a beer first and catch up." Well, the boss is very shaken by now but still not totally convinced. After they leave the White House grounds he expresses his doubts to Dave, who again implores him to name anyone else. "Pope Francis," his boss replies. "Sure!" says Dave. "I've known the Pope for years." So off they fly to Rome. Dave and his boss are assembled with the masses at the Vatican's St. Peter's Square when Dave says, "This will never work. I can't catch the Pope's eye among all these people. Tell you what, I know all the guards so let me just go upstairs and I'll come out on the balcony with the Pope." He disappears into the crowd headed towards the Vatican. Sure enough, half an hour later Dave emerges with the Pope on the balcony, but by the time Dave returns, he finds that his boss has had a heart attack and is surrounded by paramedics. Making his way to his boss' side, Dave asks him, "What happened?" His boss looks up and says, "It was the final straw... you and the Pope came out on to the balcony and the man next to me said, 'Who the fuck is that on the balcony with Dave?' 🐼🐼 #Jokes @Dagmawi_Babi

"Sorry I'm never comin' home I'ma stay for good" Then hang the phone up, and proceed to lay the wood I came fast like 9-1-1 in white neighborhoods Ain't got no shame 'bout it She think I'm spoiled and I'm rich 'cause I can have any bitch I got defensive and said "Nah, I was the same without it" But then I thought back,

back to a better me Before I was a B-list celebrity Before I started callin' bitches "bitches" so heavily Back when you could get a platinum plaque without no melody You wasn't sweatin' me One time for my LA sisters One time for my LA hoes Lane niggas can't tell the difference One time for a nigga who know Don't save her She don't wanna be saved Don't save her She don't wanna be saved Don't save her She don't wanna be saved Don't save her She don't wanna be saved I want a real love, dark skinned and Aunt Viv love That Jada and that Will love That leave a toothbrush at your crib love And you ain't gotta wonder whether that's your kid love Nigga I don't want no bitch from reality shows Out of touch with reality hoes Out in Hollywood bringin' back 5 or 6 hoes Fuck em' then we kick em' to the door Nigga you know how it go She deserved that, she a bird, it's a bird trap You think if I didn't rap she would flirt back Takin' off her skirt, let her wear my shirt before she leave I'ma need my shirt back, nigga you know how it go One time for my LA sisters One time for my LA hoes Lane niggas can't tell the difference One time for a nigga who know Don't save her She don't wanna be saved Don't save her She don't wanna be saved Don't save her She don't wanna be saved Don't save her There's an old saying in Tennessee - I know it's in Texas - probably in Tennessee that says fool me once, shame on - shame on you. If you fool me we can't get fooled again Fool me one time shame on you Fool me twice, can't put the blame on you Fool me three times, fuck the peace signs Load the chopper, let it rain on you Fool me one time shame on you Fool me twice, can't put the blame on you Fool me three times, fuck the peace signs Load the chopper, let it rain on you My only regret was too young for Lisa Bonet My only regret was too young for Nia Long Now all I'm left with is hoes from reality shows Hand her a script the bitch probably couldn't read along My only regret was too young for Sade Adu My only regret could never take Aaliyah home Now all I'm left with is hoes up in Greystone With the stale face 'cause they know it's they song She shallow but the pussy deep (she shallow, she shallow) She shallow but the pussy deep (she shallow, she shallow) She shallow but the pussy deep (she shallow, she shallow) One time for my LA sisters One time for my LA hoes Lane niggas can't tell the difference One time for a nigga who know Don't save her She don't wanna be saved Don't save her She don't wanna be saved Don't save her She don't wanna be saved Don't save her She don't wanna be saved One time for my LA sisters One time for my LA hoes Lane niggas can't tell the difference #NoRoleModelz #JCole #Songs #Lyrics @Dagmawi_Babi

Wet Dreamz JCole Cole, Cole world, yeah Let me take y'all back, man As I do so well Wasn't nothin' like that Man, it wasn't nothin' like that first time She was in my math class Long hair, brown skin with a fat ass Sat beside me, used to laugh, had mad jokes The teacher always got mad so we passed notes It started off so innocent She had a vibe and a nigga started diggin' it I was a youngin, straight crushin', tryna play the shit cool But a nigga couldn't wait to get to school Cause when I seen 'em thighs on her And them hips on her and them lips on her Got me daydreaming, man, what I'm thinkin' how she rides on it, if she sits on it, if she licks on it Make it hard for me to stand up As time goes by, attractions getting deep, and Wet dreaming, thinkin' that I'm smashin', but I'm sleepin' I want it bad, and I ain't never been obsessed before She wrote a note that said "You ever had sex before?" Damn! [Hook:] And I ain't never did this before, no And I ain't never did this before, no And I ain't never did this before, no And I ain't never did this before, no And I ain't never did this before, no And I ain't never did this before, no And I ain't never did this before, no I wrote back and said, "Of course I had sex before" Knowing I was frontin' I said, "I'm like a pro, baby," knowing I was stuntin' But if I told the truth, I knew that I'd get played out, son Hadn't been in pussy since the day I came out one But, she don't know that, so she done wrote back and told me "Oh, you a pro, homie? Well, I want you to show me My mama gone for the weekend So Saturday, baby, we can get to freakin'" That's when my heart start racing and my body start

Crooked Smile JCole I'm on my way, on my way, on my way down I'm on my way, on my way, on my way down You're the one that was trying to keep me way down But like the sun know you know I found my way back round Look They tell me I should fix my grill 'cause I got money now I ain't gon' sit around and front like I ain't thought about it A perfect smile is

more appealing but it's funny how My shit is crooked look at how far I done got without it I keep my twisted grill, just to show them kids it's real We ain't picture perfect but we worth the picture still I got smart, I got rich, and I got bitches still And they all look like my eyebrows: thick as hell Love yourself, girl, or nobody will Oh, you a woman? I don't know how you deal With all the pressure to look impressive and go out in heels I feel for you Killing yourself to find a man that'll kill for you You wake up, put makeup on Stare in the mirror but its clear that you can't face what's wrong No need to fix what God already put his paint brush on Your roommate yelling, "Why you gotta take so long?" What it's like to have a crooked smile This crooked smile I'm on my way, on my way, on my way down I'm on my way, on my way, on my way down You're the one that was trying to keep me way down But like the sun know you know I found my way back round To all the women with the flaws, know it's hard my darling You wonder why you're lonely and your man's not calling You keep falling victim 'cause you're insecure And when I tell you that you're beautiful you can't be sure Cause you see that no one wants you back and it got you asking So all you see is what you lacking, not what you packing Take it from a man that loves what you got And baby girl you're a star, don't let 'em tell you you're not Now is it real? Eyebrows, fingernails, hair Is it real? if it's not, girl you don't care 'Cause what's real is something that the eyes can't see That the hands can't touch, that them broads can't be, and that's you Never let 'em see you frown And if you need a friend to pick you up, I'll be around And we can ride with the windows down, the music loud I can tell you ain't laughed in a while But I wanna see that crooked smile I'm on my way, on my way, on my way down I'm on my way, on my way, on my way down You're the one that was trying to keep me way down But like the sun know you know I found my way back round Crooked smile, we could style on 'em (back 'round) Crooked smile, we could style on 'em (back 'round) (You're the one that was trying to keep me way down. Like the sun, I know you know I found my way back round..) We don't look nothing like the people on the screen You know them movie stars, picture perfect beauty queens But we got dreams and we got the right to chase 'em Look at the nation, that's a crooked smile braces couldn't even straighten Seem like half the race is either on probation, or in jail Wonder why we inhale, 'cause we in hell already I asked if my skin pale, would I then sell like Eminem or Adele? Yo one more time for the 'Ville And fuck all of that beef shit, nigga let's make a mil Hey officer man, we don't want nobody getting killed Just open up that cell, let my brother out of jail I got money for the bail now, well now If you asking will I tell now? Hell naw I ain't snitching cause Man, they get them niggas stitches now If you was around, then you wouldn't need a witness now How you like this crooked smile? I'm on my way, on my way, on my way down I'm on my way, on my way, on my way down You're the one that was trying to keep me way down But like the sun know you know I found my way back round Crooked smile, we could style on 'em (back 'round) Crooked smile, we could style on 'em (back 'round) (You're the one that was trying to keep me way down. The flight attendant sees a suspicious looking couple on board, so she reports it to the Captain immediately. "Sir, I think we have a case of human trafficking! There is a very pretty, hot and

sexy female passenger on board, who looks quite frightened and the man she is with is a fat old slob who looks like a lecher, very sullen, mean and dangerous!" The captain responds, "Patricia, I've told you this before. This is Air Force One..." 🐼 #Jokes @Dagmawi_Babi

There were 5 people who survived a plane crash on a deserted island, one of them was a woman, after a while they started seducing her and she likes all of them so she made a schedule that every one of them will get to sleep with her every once a week at a time, and they started fucking her, after some time she passed away. The first two months they didn't get much trouble but after that on the third they couldn't go on so they buried her. 🐼 #Jokes @Dagmawi_Babi

Here's a song from the movie Aquaman. Go and watch it, it's really nice.

Everything I Need By Skylar Grey
Born on the wrong side of the ocean With all the tides
against you You never thought you'd be much good for anyone But that's so far from the truth I
know there's pain in your heart And you're covered in scars Wish you could see what I do 'Cause
baby, everything you are Is everything I need You're everything to me Baby, every single part Is
who you're meant to be 'Cause you were meant for me And you're everything I need You can
say I'm wrong You can turn your back against me But I am here to stay (I am here to stay) Like
the sea She keeps kissing the shoreline No matter how many times he pushes her away 'Cause
baby, everything you are Is everything I need You're everything to me Baby, every single part Is
who you're meant to be 'Cause you were meant for me And everything happens for a reason It's
all a blessing in disguise I used to question who I was Well now I see The answer is in your eyes
'Cause baby, everything you are Is everything I need You're everything to me Baby, every single
part Is who you're meant to be 'Cause you were meant for me And you're everything I need

Shut up and dance. By Walk The Moon _____ "Oh don't you dare look back. Just keep your eyes on me." I said, "You're holding back," She said, "Shut up and dance with me!" This woman is my destiny She said, "Ooh-ooh-hoo, Shut up and dance with me." We were victims of the night, The chemical, physical, kryptonite Helpless to the bass and the fading light Oh, we were bound to get together, Bound to get together. She took my arm, I don't know how it happened. We took the floor and she said, "Oh, don't you dare look back. Just keep your eyes on me." I said, "You're holding back," She said, "Shut up and dance with me!" This woman is my destiny She said, "Ooh-ooh-hoo, Shut up and dance with me." A backless dress and some beat up sneakers, My discothèque, Juliet teenage dream. I felt it in my chest as she looked at me. I knew we were bound to be together, Bound to be together She took my arm, I don't know how it happened. We took the floor and she said, "Oh, don't you dare look back. Just keep your eyes on me." I said, "You're holding back," She said, "Shut up and dance with me!" This woman is my destiny She said, "Ooh-ooh-hoo, Shut up and dance with me." Oh, come on girl! Deep in her eyes, I think I see the future. I realize this is my last chance. She took my arm, I don't know how it happened. We took the floor and she said, "Oh, don't you dare look back. Just keep your eyes on me." I said, "You're holding back," She said, "Shut up and dance with me!" This woman is my destiny She said, "Ooh-ooh-hoo, Shut up and dance!" "Don't you dare look back. Just keep your eyes on me." I said, "You're holding back," She said, "Shut up and dance with me!" This woman is my destiny She said, "Ooh-ooh-hoo, Shut up and dance with me." Little Do You Know Alex & Sierra _____ [Sierra:] Little do you know How I'm breaking while you fall asleep Little do you know I'm still haunted by the memories Little do you know I'm tryna pick myself up piece by piece Little do you know I need a little more time Underneath it all I'm held captive by the hole inside I've been holding back for the fear that you might change your mind I'm ready to forgive you but forgetting is a harder fight Little do you know I need a little more time [Alex:] I'll wait, I'll wait I love you like you've never felt the pain I'll wait I promise you don't have to be afraid I'll wait The love is here and here to stay So lay your head on me Little do you know I know you're hurting while I'm sound asleep Little do you know All my mistakes are slowly drowning me Little do you know I'm trying to make it better piece by piece Little do you know I, I love you 'til the sun dies [Alex & Sierra:] Oh wait, just wait I love you like I've never felt the pain Just wait I love you like I've never been afraid Just wait Our love is here and here to stay So lay your head on me I'll wait (I'll wait), I'll wait (I'll wait) I love you like you've never felt the pain I'll wait (I'll wait) I promise you/I don't have to be afraid I'll wait The love is here and here to stay So lay your head on me Lay your head on me So lay your head on me [Alex:] 'Cause little do you know I, I love you 'til the sun dies

This next song is from NF and it's about his mother who killed her self by drug overdose. It's fuckin' heart breaking. _____ How could you leave us NF
----- How could you leave us so unexpected? We were waiting, we were waiting For you but you just left us We needed you, I needed you Yo, I don't know what it's like

to be addicted to pills But I do know what it's like to be a witness it kills Mama told me she love me, I'm thinking this isn't real I think of you when I get a whiff of that cigarette smell, yeah Welcome to the bottom of hell They say pain is a prison, let me out of my cell You say you proud of me, but you don't know me that well Sit in my room, tears running down my face and I yell Into my pillowcases, you say you coming to get us Then call 'em a minute later just to tell us you not, I'm humiliated I'm in a room with a parent that I don't barely know Some lady in the corner watching us, while she taking notes I don't get it mom, don't you want to watch your babies grow? I guess that pills are more important, all you have to say is no But you won't do it will you? You gon' keep popping till those pills kill you I know you gone but I can still feel you Why would you leave us? Why would you leave us here? How could you leave us here? How would you leave us? Why would you leave us? Oh, Hey I got this picture in my room and it kills me But I don't need a picture of my mom, I need the real thing Now a relationship is something we won't ever have Why do I feel like I lost something that I never had? You shoulda been there when I graduated Told me you love me and congratulations Instead you left us at the window waiting Where you at mom? We're too young to understand where you at huh? Yeah, I know those drugs got you held captive I can see it in your eyes, they got your mind captured Some say it's fun to get the high but I am not laughing What you don't realize and what you not grasping That I was nothing but a kid who couldn't understand I ain't gon' say that I forgive you cause it hasn't happened I thought that maybe I feel better as time passes If you really cared for me, then where you at then? Why would you leave us? Why would you leave us? How could you leave us here? How would you leave us? Why would you leave us? Hey Our last conversation, you were sat in the living room Talking 'bout my music and I brought you something to listen to You started crying, telling me this isn't you Couple weeks later, guess you were singing a different tune You took them pills for the last time, didn't you? They took you from us once, guess they came back to finish you Crying my eyes out in the studio is difficult Music is the only place that I can go to speak to you Took me everything inside of me to not scream at your funeral Sitting in my chair, that person talking was pitiful I wish you were here mama but every time I picture you All I feel is pain, I hate the way I remember you They found you on the floor, I could tell that you felt hollow Gave everything you had plus your life to them pill bottles You gave everything you had plus your life to them pill bottles Don't know if you hear me or not, but if you still watching ma Why would you leave us? Why would you leave us? How could you leave us here? How would you leave us? Why would you leave us? Hey Sometimes I think about like, sometimes I think about things like, you know, when I have kids, you won't be there, you know? You won't be there for any of that, I'll never get to see you again, sometimes I wish I would have just called you, I wish I would have just picked up the phone, wish you were here, I mean you should have been there for us, you should have been here, those pills got you, right? Them pills got you, right? I wish you were here _____ #NF #Songs #Lyrics #SongDedication #HowCouldYouLeaveUs @Dagmawi_Babi

Monalisa Lil Wayne ft. Kendrick Lamar _____ [Kendrick Lamar:] I got a story to tell You know that I cherish thee Hope it ain't too many feelings involved [Lil Wayne:] I see niggas in this bitch, stuntin', poppin' bottles Gettin' drunk with these bitches Then when they leave they get followed Fall asleep with that bitch and really don't know much about her Then she let us in, we take all of your shit And when you wake up, she help you try to find it, I love it I be with bitches that be with bitches That be with niggas with riches I tell her, "Get 'em," she say, "I got you" I say, "No, bitch, I say get him" And they so pretty, and their hair lengthy He hit it and sleep on her titties Then she give us the word, we come through with AKs It's a stick-up, she scream like a victim Now you feelin' so silly I smoke color purple, I'm up in here feelin' like Celie (Ooh) Nappy-ass dreads, what's that you say? Watch your mouth, Milli Vanilli (Ooh) You can get snaked, you can get faked Out by the bitch that you feelin' 'Cause you thought that she was an angel That bitch ain't no angel, I treat her halo like a frisbee And you tellin' your business, she tell me your business You tell that bitch what you feelin' All of the beans you be spillin' To you, she lie through her teeth cavities, fillin's She know where you hide to tell me where it's hidden She know when you're gone, tell me when to visit We break in your home and take the specifics And meanwhile, the bitch is on vacation with him So she don't get blamed, we don't snatch chains We find out addresses, and we don't leave messes You'll only know that it's gone when you check it Then your first thought is to start second guessin' She say, "What's wrong?" He say, "Nothin', keep restin'" She say, "What's missin'? ", "How you know somethin' missin'?" He scratch his head, she say, "Get back in bed" And she gave him some head Boy, you can't trust them bitches, and then she say-ooh I see niggas in this bitch stuntin', poppin' bottles Gettin' drunk with these bitches Then when they leave they get followed I be with bitches that know the bitches That's with the niggas we followin' Get them on the line, stay two cars behind And tell them hoes, "Don't be so obvious!" Mona Lisa, long hair, don't care She handle the business and don't ever tell She bite the bullet and cough up the shells She tell 'em, "Ooh, daddy, let's go to your place!" And if he say yeah, then we meet him there She feed him lies with his silverware She don't want love, she just want her share I know a bitch named Liz This nigga think she his 'cause she tell him that it is So he tell her all his secrets, he tell her all his fears And then she tell me and I be all ears And then I go and tell my people and they already know him And then I call Liz and she say he comin' over I say, "Good girl, just remember what I told ya" She gave me the salute, I say, "Girl, you're a soldier" We're waitin' outside, watch him pull up Walk up to the door and right before he knock She open the door naked, she left it unlocked They started French kissin' so he didn't see moi And then she let him in, they stopped on the couch Music up loud with his head in the clouds Turn that shit down and I scared the piss out of him Piss a nigga off, put a gun to his frown Nigga, turn around, I ain't here to fuck around I ain't here to fuck around, caught you with' your pants down You know what it is, put your fuckin' hands up Liz, that's enough, you can put your hands down And then he looked dead at her and he shook his head at her She a good actress and you a dead actor You'll be dead after we get what we're after If Liz call you daddy, she about to be a bastard, oh I got way too many bitches that do anything for me, nigga But think for me, nigga Send her to you like she ain't for me, nigga I hope you alone like bankruptcy, nigga She pour you a drink, that drink on me, nigga She slip somethin' in it, now think for me, nigga Mona Lisa, I done painted the picture Mo-Mona Lisa, out the frame on these niggas

Pussy got you out of character, nigga You fall for these hoes off your ladder, my nigga Take everything that you have 'til you don't even have an opinion We have your attention And now you're lookin' down a barrel though, nigga Now she lookin' for her pantyhose, nigga We just lookin' for the casserole, nigga But she gon' show us where you stash it though, nigga Mona [Kendrick Lamar:] Ah, every day she wake up with a different color makeup And a promise he gone take her to the movie and the mall Chillin' with the Laker, on the floor, fourth quarter Four minute on the clock, Black Mamba with the ball Paparazzi lookin' at 'em both poppin' up and take a picture, uh Probably on a Internet blog In a minute, he gon' be admittin' that he love her on his mother Man, he want to meet her mother by tomorrow Mona Lisa Pussy good enough, it got him sinnin' in the walls And he diggin' in it like he livin' in it Make a new religion with it, man a nigga 'bout to go against God Poetry in a pear tree Sweet tone like a hummingbird when she asked him Did he want to make love in a yellow taxi Never gave two fuck, jumped in the backseat Woke up in the morning to The Great Gatsby Then he dogged it again like the bitch Lassie I'm a dog in the wind, I'm a pit laughing I'ma call up again like I did last week Make good with the friend and I'm all jazzy Britney with the twin and the girl Ashley Found out that I fucked, he was unhappy Bitch, I never let the bullshit get past me Better yet, I wanna break up, don't you ask me 'Bout a motherfuckin' double standard, acting Fucking on another nigga, that's a negative alone But you sucked this dick, that's just nasty Matter of fact, bitch, gimme your phone! (No!) You fuckin' with Wayne's? (No!) Bitch, gimme your phone! (No!) Let me, let me take this call real quick (... lick me like a lollipop) He on your fuckin' ringtone? Is that the shit that you do? Touchin' yourself, lookin' at Kendrick videos Jump on the internet, watchin' his interviews I don't know what the fuck lately got into you Tell me who love you, I bet I love harder Forgot all the shit that I did for your daughter? The pampers, the Pedialyte and my momma Daycare after school and she never did charge her You scandalous as fuck and I hope you blow up You know what, I give up, let me go get my gun I got one in the chamber I'm plannin' on aimin' Goddammit, you know that the damage is done Bitch I'm emotional 'cause I'm in stress I'm not supposed to go through this, I guess So in conclusion, since you like rappers that's killin' that pussy I'm killin' myself [Lil Wayne & Kendrick Lamar:] She say, ooh, Daddy, ooh, Mona Lisa, Mona Lisa Ooh, fake smile, Mona Lisa, Mona Lisa She say, ooh, no emotion, Mona Lisa, Mona Lisa #Monalisa #Songs #Lyrics #LilWayne #KendrickLamar @Dagmawi_Babi

Holy Shit!!! ████████████████████ ————— A man is lost in the woods and it is getting dark. As he walks through the woods he comes across a small cabin. He goes up to the cabin and knocks on the door. An old Chinese man opens it. "I'm lost in the woods and I need somewhere to stay for the night," the man said. "Can I please stay here?" "Sure," said the Chinese man. "But as long as you don't lay a finger on my daughter. If you do, I'll give you the three worst Chinese tortures known to man. The man agreed to the Chinese man's conditions. However when it was time for dinner the daughter came downstairs and he saw how beautiful she was. "This old Chinese guy will never find out," the man thought to himself. So that night the man went to the Chinese man's daughter's room and they had mad passionate sex. The next day the man woke up and there was a huge rock on his chest. There was a sign on it that said "Chinese torture number 1: Rock on chest." The man laughed and thought to himself "Is this really the worst Chinese torture?" He then threw the rock out the window and started to walk towards the bedroom door and then he stopped when he saw the sign on it. It said "Chinese torture number 2: Rock tied to right testicle." The man started to panic. He decided to jump out the window with the rock because a few broken bones is better than a castration. As he fell out

the window, he saw a sign in the ground. It said "Chinese torture number 3: left testicle tied to bedpost." #Jokes @Dagmawi_Babi

There is a man, he is dying in his bed in his home. He smells something amazing. It's the smell of his favorite chocolate chip cookies. And with his last strength, he gets out of bed, and he goes to the kitchen, where his wife of 50 years, is cooking these beautiful chocolate chip cookies. And they are on a plate of four of them, just out of the oven. And with his last human strength, he reaches over to take one of the biscuits, and his wife sees him, she rushes over, she slaps his hand, and she says, "No, they are for the funeral." ☹☹☹ Oh man! ☹☹☹☹☹☹☹☹ #Jokes @Dagmawi_Babi

The Most Complex Software: The most sophisticated piece of software/code ever written would be the software that runs on the most sophisticated computer ever created. It was actually created by another computer and you've actually taken part in the project, perhaps without even knowing about it! You can read all about this in Douglas Adams' Hittchhiker's Guide to the Galaxy but I'll give you a quick summary here. A computer was created to calculate the answer to the ultimate question of life, the universe and everything. They called this computer "Deep Thought." After many, many years of calculation (seven million years, to be exact) it gave them the answer: 42 The computer insisted that this was the correct answer. The problem was that they didn't understand the question! Deep Thought designed another computer, better than itself, to tell them what the question is. They named the new computer "Earth." The new computer and its accompanying software would take four-and-a-half billion years to calculate the answer, err... question. Fifteen minutes before the calculation is complete, the Earth will be destroyed. So the most sophisticated software/code ever written is the software that runs the Earth. #Articles #TheMeaningOfLife #42 #MostComplexComputer @Dagmawi_Babi

This guy Bill has been having headaches for about 40 years.. ...He doesnt know what to do so he finally goes to a doctor for the pain. The doctor checks him and says "bill I'm not sure how to tell you this , but you have a very rare condition where your balls press up against your spine and put pressure on your head. That's why you've been getting these headaches" Bill shocked and scared asks the doctor "what should i do doc" Doctor sighs and tells Bill "im sorry only thing we can do is castrate you" . Bill is shocked , he shudders at the thought of getting his balls cut off . He tells the doctor he'll think about it and leaves. He thinks about it for sometime and finally after working up the courage he goes back to the doc and agrees to do the procedure . Finally after a long long painful surgery Bill walks out a new man. He walks around for the first time without his balls and tries not to think about his loss. He walks around and passes by a suit store he tells himself 'I am a new man today!...let me buy my new self some clothes" . He goes in and asks the owner "sir can u get me a blazer" the owner looks at him and says "one blazer coming up size 13" bill is amazed that the guy was able to tell his size by just looking at him and says

"damn how'd u know" the owner answers "been in the business 50 years" bill tells him "ok then let me get pants" the owner says "one pair of pants coming up size 35 waist" again bill is amazed he asks the guy "how did u know?" .."been in the business 50 yrs i know it all" Bill still surprised asks him "how about a pair of underwear" the owner looks at him and says "one pair of underwear size 10 coming up" bill jumps up and says "ha you were wrong im a size 8 been wearing 8 for 40 years " the owner looks at him concerned and retorts "well you shouldnt have8 is too small ,it will make your balls press up against your spine and give you a crazy headache". ☺☺☺ #Jokes @Dagmawi_Babi

Little Johnny's teacher gives the class a homework assignment, "Explain the difference between a theory and reality." Little Johnny goes home and is so stumped he asks his sisters ages 21 and 16 for help, and they can't come up with anything either. He then tries asking his father. The father thinks for a bit and replies, "Go to your older sister and ask her if she would suck a guys

dick. Then ask her if she would do it for a million dollars. Then go to your younger sister and ask her the same two questions. Write down their answers and bring it back to me." Johnny says, "Okay," and runs off to find his older sister. He asks her the first question and she responds, "Maybe, if I like him." "Would you do it for a million dollars?" She replies, "Hell yes!" He finds the younger sister and asks her the same questions. Her first reply was "Eeeew, no!" but the second answer was "Yeah, sure." Johnny writes down their answers and takes them back to his father. The father looks over them and replies, "There you go." Johnny asks, "What do you mean?" The father says, "Well in theory we have two million dollars, but in reality we have two cocksuckers."

After numerous rounds of, "We don't know if Osama is still alive" Osama himself decided to send Ted Kennedy a letter in his own handwriting to let him know he was still in the game. Kennedy opened the letter which appeared to contain a single line of coded message, 370HSSV-0773H. Kennedy was baffled, so he e-mailed it to John Kerry. Kerry and his aides had no clue either, so they sent it to the FBI. No one could solve it at the FBI, so it went to the CIA, then to the NSA. With no clue as to its meaning, the FBI finally asked Marine Corps Intelligence for help. Here's something I wrote a lil while ago: Don't do it! That's right, don't do it! Don't buy that rope don't lock your self in a room with no hope don't stand on that stool and stretch out the rope don't tie it on your neck, you're making a mistake! Don't jump down. I have news for you to take. Whatever you're going through you just gotta face it wide awake it didn't just come to break but also to make. The world offers a lot, so that rope on your neck take it off, pull it down, go outside and burn it for God's sake. It was about to take what wasn't his like an earth quake. Stand up tall and smile like never before it's time for you to edit your life and restore or may be go out into the woods and explore. So don't do it, be a living miracle and shine bright cause what was going to be your last night just made you a knight with a shining armor and light! #DontDolt #BabiQuotes #Repost @Dagmawi_Babi

@Dagmawi_Babi #2020Asteroid #Astroid_52768_1998_OR2 On April 29, Wednesday. An asteroid is going to pass really close to Earth. ☐ _____

Overview • Officially dubbed Astroid (52768) 1998 OR2, the space rock will come within 3.9 million miles (6.29 million km) of our planet - that is 16 times the distance to the Moon. • The asteroid is classified as a near-Earth object (NEO), meaning it orbits the Sun within 1.3 astronomical units (au) - about 120,842,549 miles. What do we know about the Asteroid? • The space rock was first spotted in the solar system in 1998 and has since been tracked by NASA's Center for Near Earth Object Studies (CNEOS). • With nearly 30 years of observations under its belt, the US space agency is very confident the rock does not pose any threat to Earth. It's Features and topography • The radar data confirm that 1998 OR2 is approximately 2km in diameter and rotates once every 4.1 hours, as was suggested by optical observations. • "The range-Doppler images uniquely revealed the overall shape of the asteroid and some smaller-scale topographic features, such as hills and ridges How to view it? • Just search for "2020 astroid live stream" on YouTube. #2020Asteroid #Astroid_52768_1998_OR2 @Dagmawi_Babi

It's just 12 minute ride to leave Earth's 1G gravity and to enter Low Earth Orbit(LEO) of 0G gravity.

But it takes 19 more hours to catch up to the International Space Station(ISS).

Let's hope the weather is good and that they get to the ISS safe. 🙏 #DragonCrew #SpaceX #NASA #2020RocketLaunch @Dagmawi_Babi

So this kinda keeps my mind occupied. Here's what it is. There's this mysterious 🇺🇸 energy in the vacuum of space called Dark Energy in our universe that's forcing the universe to accelerate in its expansion. So somewhen in the future, this energy will make the universe soooo significantly large, that all the galaxies 🇺🇸 in the night sky 🇺🇸 will've accelerated beyond our horizon(our field of view) And to point out, these galaxies are essential to us in our studies bout the universe. So if they accelerate beyond our horizons, the next generations will only have the stars 🇺🇸 of the Milky Way 🇺🇸 to think about. There would be an entire chapter of the universe ripped from their view. And this is what occupies my mind today, was there some previous chapter ripped from the universe it self that we can't see now?! 🇺🇸 #Thoughts #Space @Dagmawi_Babi

Underwater Waterfall Found just off the coast of Le Morne, on the island's southwest, Mauritius offers a spectacular illusion. Sand and silt on the ocean floor run off in a way that makes it look like they're pouring down a waterfall -- or like the entire island is being sucked down a vast drain. It's really just the flow of underwater currents that create the dramatic image. Ain't it so beautiful and yet feels so scary?!! ☐☐☐ #Nature #UnderwaterWaterfall @Dagmawi_Babi

Hello guys this is a fun way to calculate ur chance with ur crush using telegram chat database <https://t.me/crushcalcbot?start=303411718>

Here are some beautiful love passages...

Sometimes when I look at the ocean or an especially large mountain range, I feel overwhelmed and small, but in a good way. It's comforting to know there's something out there bigger than I am. Something large and enduring that has lasted through the ages. Through harsh weather, storms and droughts, through changes in history and climate, the ocean keeps on rolling and the mountains keep on standing tall. When I think of you and our love and how I feel about you, I feel the same way. My love for you doesn't make me feel small though, it makes me feel powerful and new. I look at you and I know that I will love you forever, through storms and droughts, through all the changes that will undoubtedly come our way. I will love you forever. There's no changing that. #LoveParagraphs #Writings @Dagmawi_Babi

Watching you walk across a room is the greatest gift. The way you move is so graceful and easy. The way you smile makes me feel at peace. Knowing you're walking towards me is a feeling so hard to describe. It's like coming home, a comfort, only the home is coming to me. I will never know such love, such peace, as you. You're my home. #LoveParagraphs #Writings @Dagmawi_Babi

I wanted to take the time to tell you just how much you mean to me. You've become a rock in my life, something solid and secure I can lean on. Knowing you're by my side makes me so eternally grateful, I can hardly put it to words. I had felt happiness before, but nothing prepared me for the happiness I feel when I'm with you. I don't know what I said or did that made me lucky enough to deserve you, but I will spend the rest of my life trying to be the best man I can be so that you can be proud. Thank you for all that you do and have done for me. You have taught me what it is to love. You've showed me how beautiful life can be. #LoveParagraphs #Writings @Dagmawi_Babi

I have for the first time found what I can truly love—I have found you. You are my sympathy—my better self—my good angel; I am bound to you with a strong attachment. I think you are good, gifted, lovely: a fervent, a solemn passion is conceived in my heart; it leans to you, draws you to my center and spring of life, wraps my existence about you—and, kindling in pure, powerful flame, fuses you and me in one. #LoveParagraphs #Writings @Dagmawi_Babi

I love you without knowing how, or when, or from where. I love you simply, without problems or pride: I love you in this way because I do not know any other way of loving but this, in which there is no I or you, so intimate that your hand upon my chest is my hand, so intimate that when

I fall asleep your eyes close. #LoveParagraphs #Writings @Dagmawi_Babi

When I was a kid I used to sit and think of what the person I loved would be like. I pictured kissing in fields or maybe on the beach. A beautiful woman who was kind. You are so much more than I could have ever imagined. I never even thought to wish for someone as beautiful, kind, sweet, funny, smart, and amazing as you. You are my life's biggest surprise. #LoveParagraphs #Writings @Dagmawi_Babi

People are like cities: We all have alleys and gardens and secret rooftops and places where daisies sprout between the sidewalk cracks, but most of the time all we let each other see is a postcard glimpse of a skyline or a polished square. Love lets you find those hidden places in another person, even the ones they didn't know were there, even the ones they wouldn't have thought to call beautiful themselves. #LoveParagraphs #Writings @Dagmawi_Babi

I've listed some fallacies that might help you identify what mistakes are being made when you're arguing!

Fallacy of Composition If it applies for the parts it applies for the whole. Fallacy of Division If it applies for the whole it applies for the parts. The Gambler's Fallacy Says streaks of bad luck or good luck exist if things happen in a pattern. Tu Quoque (Who are you to talk?) "I will do it when you do it" Straw Man Taking the argument, distorting it, then attacking the distortion instead of the real claim of the original argument. Ad Hominem Attacking the person instead of the argument. Genetic Fallacy Assuming the argument is wrong just because of its source. Appeal To Authority When the argument is based primarily on some authority that is not qualified for the report. Red herring Distracting from the main argument Appeal to Emotion Making you feel bad to agree with the argument Appeal to Bandwagon If lots of people agree it must be correct. "5 million people can't be wrong!" Appeal to Tradition "People have been doing it for thousands of years so it must be right!" Appeal to Nature A thing is good because it is natural. "Some dolphins are gay by nature therefore it must be okay for us humans to be gay too!" Appeal to Ignorance If you can't prove it false then it must be true or vice versa. Begging the question A claim is to be true but one must accept the premise to be true for the claim to be true. "Dagmawi is great, because in the Book of Greats it says so, and the Book of Greats is from Dagmawi." Equivocation Using words in different context to mean the same thing. "If law is made by legislators, and since Gravity is a law, therefore it must be made by legislators." False Dichotomy (either/or) Makes assumption that there's only two alternatives. "Either you win a Nobel Prize or you suck!" Middle Ground Fallacy "If some people think 2+2 is 4 and some people think 2+2 is 5 then the answer must lie in between!" Decision Point Fallacy (Sprites Paradox) Arguing that because a line or distortion can't be seen therefore there are no differences between them. "As Joe loses his hair, there is no point at which we can definitely say that Jo became bald precisely here. Therefore Joe is not going bald." Slippery Slope "If you get a credit card, then you will overspend, then you'll be broke, then you'll end up on the streets, then you will live in a cardboard house." Hasty Generalizations Drawing a general conclusion from a small of biased sample. Faulty Analogy Comparing things that aren't actually similar. Burden of Proof Asking the person who disbeliefs your claims to provide evidence against your claims. "I am a

ghost, and if u don't think so then tell me reasons why I am not!" Affirming the Consequent "My dog barks when there is an intruder, my dog is barking now, therefore there must be an intruder!" Denying the Antecedent "If it barks then it's a dog. And if it's not barking then it's not a dog!" Moving the Goalposts Changing the goal points after you fail to prove your case. "I can read minds, *fails to*, I can only read minds with the same frequency as mine." False Cause Correlation is not Causation "Global warming is increasing, pirate numbers is decreasing, therefore global warming is decreasing pirate numbers." Loaded Question Asking something with an assumption built in, making the answerer sound bad. "So when did you stop beating you wife?" No True Scotsman "No Ethiopian sleeps naked, if you sleep naked then you're not a true Ethiopian!" Personal Incredulity "Well it's hard for me to believe that the earth is revolving around the sun." The fallacy fallacy Just because one argument contains one or more fallacies doesn't mean they reached the wrong conclusion. #Fallacies @Dagmawi_Babi

I know that new year wishes are supposed to be short and catchy and things that rhyme but I figured you'd learn a lot from the following so here's my wish to all of you dear subscribers.... ☹️

At the dawn of the new year I'm filled with hope for what is to come, and I have thankfulness in

my heart for what has already passed. I pray that I will keep my focus where it needs to be this year and that we'll all have a year filled with joy, love and happiness. HAPPY NEW YEAR!! ☺☺

In this new year: ☐ Look Back On His Blessings • Look to the Lord and his strength; seek his face always. Remember the wonders he has done, his miracles, and the judgments he pronounced - 1 Chronicles 16:11-12 Focus On The Future, And God's Plans For You • Forget the former things; do not dwell on the past See, I am doing a new thing! Now it springs up; do you not perceive it? I am making a way in the wilderness and streams in the wasteland. - Isaiah 43:18-19 • For I know the plans I have for you," declares the Lord, "plans to prosper you and not to harm you, plans to give you hope and a future. - Jeremiah 29:11 • In his heart a man plans his course, but the Lord determines his steps. - Proverbs 16:9 Don't Worry About What Is To Come • Be anxious for nothing, but in everything by prayer and supplication with thanksgiving let your requests be made known to God. - Philippians 4:6 • Trust in the LORD with all your heart, and do not lean on your own understanding. In all your ways acknowledge him, and he will make straight your paths. - Proverbs 3:5-6 • Cast all your anxiety on him because he cares for you. - 1 Peter 5:7 Plan Ahead For The Coming Year • A wise man thinks ahead; a fool doesn't, and even brags about it! - Proverbs 13:16 Find Happiness In God This Year, And Give Thanks • Not that I speak from want, for I have learned to be content in whatever circumstances I am. I know how to get along with humble means, and I also know how to live in prosperity; in any and every circumstance I have learned the secret of being filled and going hungry, both of having abundance and suffering need. I can do all things through Him who strengthens me. - Philippians 4:11-13 • Enter His gates with thanksgiving, And His courts with praise. Give thanks to Him; bless His name. - Psalm 100:4 HAPPY NEW YEAR!! ☺☺ #Creator #HNY #2013 #2020 @Dagmawi_Babi

Here are two of my fav poems I wrote... First one is about stepping back from Suicide. And the other was inspired by a heart break. Enjoy...

Don't do it! That's right, don't do it! Don't buy that rope don't lock your self in a room with no hope don't stand on that stool and stretch out the rope don't tie it on your neck, you're making a mistake! Don't jump down. I have news for you to take. Whatever you're going through you just gotta face it wide awake it didn't just come to break but also to make. The world offers a lot, so that rope on your neck take it off, pull it down, go outside and burn it for God's sake. It was about to take what wasn't his like an earth quake. Stand up tall and smile like never before it's time for you to edit your life and restore or may be go out into the woods and explore. So don't do it, be a living miracle and shine bright cause what was going to be your last night just made you a knight with a shining armor and light! #DontDolt #BabiQuotes #Repost @Dagmawi_Babi

The pain you've caused me I wish I could describe it to you! Sleepless nights not just a few but 7 days in a week! Sleepless nights filled with tears that's how I was all these years! So weak and tired couldn't ever face my fears! Covering my face with my blanket so nobody has to see my tears! Making the music so loud that I don't have to hear my own thoughts but it's hurting my ears. Became so sensitive that the slightest things make me so upset depressed and sad wishing it was onset! Wishing it would be okay, when I'm offset! You don't know who you are, but look closer dear! Misery loves Misery somehow I lost the way to victory. Everybody can see the scars you put on me, the injury! Defined and is clear, it is not a mystery. Hopeful and adventurous, that was our history! And we went through that path where it was all slippery. Never have I thought that you'd lose me there, but my vision became so blurry! It felt so bitterly! Thinking and knowing for sure that I'll never see you again, wasn't my favorite memory! Did you find yourself?! Well I'm still lost in here with nothing but fear! #BabiQuotes #Repost #ThePainYouHaveCausedMe @Dagmawi_Babi

In the time of slavery in Colombia, hair braiding was used to relay messages. For example, to signal that they wanted to escape, women would braid a hairstyle called departes. And another style has curved braids where the curved braids would represent the roads they would use to escape. #Facts #History #HairStyles @Dagmawi_Babi

As Telegram approaches 500 million active users, many of you are asking the question – who is going to pay to support this growth? After all, more users mean more expenses for traffic and servers. A project of our size needs at least a few hundred million dollars per year to keep going. For most of Telegram's history, I paid for the expenses of the company from my personal savings. However, with its current growth Telegram is on track to reach billions of users and to require appropriate funding. When a tech project reaches this scale, typically there are two options – start earning money to cover the costs, or sell the company. Hence the question – which path will Telegram take? I'd like to make a few points to clarify our plan: 1. We are not going to sell the company like the founders of Whatsapp. The world needs Telegram to stay independent as a place where users are respected and high-quality service is ensured. Telegram must continue to serve the world as an example of a tech company that strives for perfection and integrity. And, as the sad examples of our predecessors show, that is impossible if you become part of a corporation. 2. Telegram is here to stay for a long time. We began developing our apps for our personal use over 8 years ago and have come a long way since then. In the process, Telegram changed the way people communicate in several aspects – encryption, functionality, simplicity, design, speed. This journey has just started. There's much more we can – and will – bring to the world. 3. In order to make points 1 and 2 possible, Telegram will begin to generate revenue, starting next year. We will do it in accordance with our values and the pledges we have made over the last 7 years. Thanks to our current scale, we will be able to do it in a non-intrusive way. Most users will hardly notice any change. 4. All the features that are currently free will stay free. We will add some new features for business teams or power users. Some of these features will require more resources and will be paid for by these premium users. Regular users will be able to keep enjoying Telegram – for free, forever. 5. All parts of Telegram devoted to messaging will remain ad-free. We think that displaying ads in private 1-to-1 chats or group chats is a bad idea. Communication between people should be free of advertising of any sort. 6. In addition to its messaging component, Telegram has a social networking dimension. Our massive public one-to-many channels can have millions of subscribers each and are more like Twitter feeds. In many markets the owners of such channels display ads to earn money, sometimes using third-party ad platforms. The ads they post look like regular messages, and are often intrusive. We will fix this by introducing our own Ad Platform for public one-to-many

channels – one that is user-friendly, respects privacy and allows us to cover the costs of servers and traffic. 7. If Telegram starts earning money, the community should also benefit. For example, If we monetize large public one-to-many channels via the Ad Platform, the owners of these channels will receive free traffic in proportion to their size. Or, if Telegram introduces premium stickers with additional expressive features, the artists who make stickers of this new type will also get a part of the profit. We want millions of Telegram-based creators and small businesses to thrive, enriching the experience of all our users. This is the Telegram way. It will allow us to keep innovating and keep growing for decades to come. We will be able to launch countless new features and welcome billions of new users. While doing that, we will remain independent and stay true to our values, redefining how a tech company should operate.

Have a great money making 2021!

"Life is so hard already, So instead of putting people down Telling them what they should look like or who they should be Let's accept them for who they are And lovingly encourage them to be who they could be!" -- Prince EA (on his video titled "Stop Body Shaming" #PrinceEA #Quotes @Dagmawi_Babi

Are you happy?

Do you love yourself?

Do you self harm?

Is your mental health okay?

Do you have mommy/daddy issues?

Have you ever been sexually assaulted?

Are you addicted to something and struggling to quit it?

Do you have a good relationship with your God?

Are you in a relationship, if so are you happy in it?

Have you ever attempted suicide?

If you have an ex/exes, do you want one of them back?

Do you have a terminal illness?

Are you proud of the person you are today?

Do you have peace?

Are you in love? If so do you think that person would ever love you back?

If you are currently in a relationship, have you cheated or are you cheating on them?

Do you sleep peacefully and restfully?

Are you the jealous and/or the possessive type?

Have you lost someone so dear to death?

Have you given up hope on life?

Have you hurt someone so bad that they can't recover from it?

Are you the player type? Do you mess around people and/or make the fall and leave?

Are you okay with the body you have?

Do you have a healthy self image?

Do you feel like a man or woman hoe/slut?

Do you have problem overthinking?

Do you have anxiety issues?

Do you have trust issues?

Have you done something sexual with the same sex?

Do you think or feel like you're possessed with the devil?

Did something traumatic happen to you as a child that changed your identity forever?

Man I wish I knew all the stories!!! Would you take part if I create an app just for us to vent, so we can all sign up and login anonymously and we can just vent our hearts out?

Based on the above statistics: More people are happy, love themselves, don't harm themselves, have a healthy mental state, don't have mommy/daddy issues, haven't been sexually assaulted, have a good relationship with their god, haven't attempted suicide, don't have terminal illness, are proud of the person they are today, have peace, aren't cheating on their partner, sleep peacefully and restfully, haven't done anything sexual with the same sex, don't feel like they're possessed by the devil, haven't hurt someone so bad, aren't the player type, are okay with their bodies, have a healthy self image, don't feel like they're hoey or slutty and haven't given up hope on life. But most people are addicted to something and struggling to quit it, aren't happy in their relationship, don't think the person they love will love them back, want their exes back, are the jealous and/or the possessive type, have lost someone so dear to them by death, have problems overthinking, have anxiety issues, have trust issues and sadly something traumatic happened to them as a child. #SurveyResults #Survey @Dagmawi_Babi

How to make everyone happy Kill all those unhappy. You then make the happy people sad because they have friends and families who are sad. Then you go on killing these happy people who turned sad caused by the massacre of their sad friends. This will inturn leave even more

people sad. Then u go on killing them too. This goes on till you're eventually left with yourself. Now you have no one to be with and you're just left there with a pile of dead bodies that you cant dispose of. Now you're sad. Then by your own logic you'll eventually have to kill yourself. Then once that's done, that's when true happiness is achieved. When there's no one left to feel the sad. Congratulations, total happiness achieved, your dreams achieved, and you're not there to feel the happiness of your dreams succeeding. Am I thinking too much? ☹️ Man this was dumb of me! @Dagmawi_Babi

WARNING! ☹️☹️☹️☹️☹️☹️☹️ THE FOLLOWING IS FOR EDUCATIONAL PURPOSE ONLY!! I AM SHARING THIS INFORMATION JUST SO YOU KNOW THE POSSIBILITIES OF THREATS, VIRUSES AND ATTACKS. BE CAUTIOUS OF THE FOLLOWING INFORMATION AND FILES!! USE ON YOUR OWN RISKS!! ☹️☹️☹️☹️☹️☹️☹️ #ZipBombs #Tech @Dagmawi_Babi

I'm going to introduce you to a concept called Zip Bombing. Zip bomb AKA decompression bomb or Zip of death is a malicious archive file designed to crash the program or system reading it. Rather than hijacking the normal operation of the program, a zip bomb allows the program to work as intended, but the archive is crafted so that unpacking it (e.g. by a virus scanner in order to scan for viruses) requires inordinate amounts of time, disk space and/or memory. Most modern antivirus programs can detect whether a file is a zip bomb, to avoid unpacking it. • It is simply a small sized zipped or compressed file that when unpacked, will load out a bigger size of file to fill out the memory of the system running it or if an antivirus software is scanning it, it will make the time to scan it last a long while. Here's a link to the files and documentation on the following zip bombs. #ZipBomb #Tech @Dagmawi_Babi

This file is a simple 42kb file that when uncompressed will unleash out a 5.5GB (Gigabyte) file.

This one is a 10mb file that when decompressed will release 281TB (Terabyte) [281,000GB] of data onto the system. Bigger than what most PC's are capable of containing.

This one is a 46mb zipped file that when uncompressed will release a whopping 4.5PB (Petabyte) [4,500TB or 4,500,000GB] of data onto the system. Big enough to crash most local servers.

Just a reminder to not trust files from people and from the internet. Be cautious and always doubt things! ☹️ Glad to share with ya'll. Use the files carefully! #ZipBomb @Dagmawi_Babi

How do you find this info? #ZipBomb @Dagmawi_Babi

1984 By George Orwell #NineteenEightyFour #GeorgeOrwell #Books @Dagmawi_Babi

The mind is our most powerful tool. There's nothing it can't do. According to numerous studies, it actively generates new ideas even when we rest or do nothing. Often we can come up with solutions to difficult problems simply after a full night's sleep. Just as our physical state depends on what we feed to our bodies, our mental state depends on the quality of information we feed to our brain. If we nourish our brain with real-life data that allows it to solve

fundamental problems, it will process this data in the background and come up with unexpected solutions. It is unfortunate that most people prefer to feed their minds not with real-life facts that can let us change the world, but with random Netflix series or TikTok videos. On a deep level, our brain can't tell fiction from reality, so the abundance of digital entertainment keeps our subconscious mind busy producing solutions to problems that do not exist. To be creative and productive, we must first clear from our minds the sticky mud of irrelevant content with which "recommendation algorithms" flood it on a daily basis. If we are to reclaim our creative freedom, we must first take back control of our minds.

📝 As I am turning 37, I put together a list of 3 undervalued and 7 overvalued things in life. 3📝
Undervalued 1. Sleep. Sleep gives a boost to immunity, creativity and psychological well-being. 2. Nature. Nature is the environment that we are biologically designed to feel good in. 3. Solitude. Being alone offers the freedom to make spiritual and intellectual breakthroughs. 7📝
Overvalued 1. Big cities. Big cities are sources of pollution, crime and noise. It's good to have access to their resources, but advisable to live outside their borders. 2. Restaurants. Restaurants offer the slowest and least efficient way to eat. Cooking at home allows for healthier diets and more control over ingredients. 3. Hot weather. Sunny weather can bring about not only a lax attitude, but also a risk of cancer and faster aging. Colder temperatures, on the contrary, clarify spirit, body and mind. 4. Fashion. The endless quest to conform with ever-changing trends is expensive and unnecessary. Focusing on comfortable clothes makes life simpler and frees space for things that matter. 5. Real estate. Buying real estate often limits one's choices and is a questionable investment. Renting gives more freedom to move and explore different locations. 6. Social media. The incessant flow of junk cluttering our minds from social media decreases our happiness and creativity. Disconnecting from these internet services is the best thing we can do on any given day. 7. Celebrity advice. Famous people often give unwarranted advice outside their fields of expertise. For all important things in life, it's best to rely on hard science and expert opinion.

A letter to void and loneliness. Hey you two, I hope you're as void and lonely as it gets. I heard you two got engaged and now planning your wedding. It's beautiful to hear. I'm really happy that I got invited to the wedding, ofc I expected nothing less since we all used to live together. I was delightful when I was opening the invitation package. I had to tip the delivery boy, grief, \$5 bucks cause he had to stay out at my door until I came back from work. He was a kind kid but looked a bit down as usual. But the tip did make him smile abit, can't say it was genuine tho. Anyways, I was working on my speech for the wedding. I'm reading a lot of books written by despair to inspire most of my speech. Cause I remember he used to be your favorite author back when we used to live together. I was thinking of writing about the sweet nights we had. Oh my God, do you remember those nights?? Ohw they were so awful and tearful. Just the way you two liked them. Ohw and that night we all cut so much that we had to cover our sleeves for like months. Oh my God, those nights were different. Ohw and who can forget our favorite night, where we stayed up late just talking about all the regretful and guilty nights we spent and we couldn't stop eachother from breaking down at the corners of the room. Man we had a blast back then. I always knew you two went well together. It was obvious but I guess I was too naive to notice it much. There were signs I noticed but it all makes sense now. How void always stays up late till loneliness came back from work. Ohw and how loneliness always stole your hoodies. I sometimes felt like the thirdwheel but it had to be extreme. You two always made me part of you. Loneliness would make me cry while void would tell me stories of how people left me. Void, I rmr you would always stay longer than loneliness had long gone. And I rmr asking you why but you always say what you always said, "we become aware of the void as we fill it." But that never answered my question. Cause I was always curious why the feeling of emptyness occupied so much space. Thinking of both your futures together fills me with despair and pitty. I can only

imagine how incredible your children would be. And the life all of you will lead together. I know you two are deeply in love. I know how you are the flip sides of a coin. At the end of the day, Loneliness is void begging to be filled. So void, take care of her as you took care of me and even more. And loneliness fill out void as you had filled me with tears. Yours truly! Depressed Kid.

I wrote a simple script to randomly generate a 0 or a 1 to simulate flipping a coin. And then do that multiple times to count and see what the chances of getting each number is. As most of y'all know, computer generated random numbers aren't really random but pseudorandom. They rely on a formula of multiple parameters. They're really good at what they do but with enough computing power they can be predicted. Anyways here's how good it is at generating random numbers. Only a difference of 0.03% of determining a 50/50 chance. #Stats #PseudoRandomNumbers @Dagmawi_Babi

Most people feel like bodies than souls. It's kinda sad. #Thoughts @Dagmawi_Babi

Schwarzschild Radius It is the radius below which the gravitational attraction between the particles of a body must cause it to undergo irreversible gravitational collapse. It's is the minimum distance between particles of a dense mass to cause the formation of a black hole. Basically anything, including light, inside this radius will be sucked in by the blackhole and can never leave. So for example, For a mass of 70 kg (the average human size), the average person would have to be compressed down to 1.04×10^{-23} centimeters or smaller than a neutrino, which is 2 million times smaller than an electron to form a blackhole. The person (if that's what it'll still be called) will have a gravitational attraction of greater than 1g only for objects closer than 0.02 millimeters. Science aside, I feel like most things have Schwarzschild Radius, a moment of action that once you do it you can't ever control yourself to stop doing it. #Thoughts #Science #SchwarzschildRadius @Dagmawi_Babi

Anyways what drove me into all that is the unveiling of the image of the black hole at the center of our galaxy.

Sagittarius A* Astronomers have unveiled the first image of the supermassive black hole at the center of our own Milky Way galaxy. The image was produced by a global research team called the Event Horizon Telescope (EHT) Collaboration, using observations from a worldwide network of radio telescopes. For Scale The object is a staggering 4 million times the mass of our Sun. And the ring is roughly the size of Mercury's orbit around our star. That's about 60 million km across. Fortunately, this monster is a long, long way away, some 26,000 light-years in the distance. #BlackHoles #SagittariusA #Science @Dagmawi_Babi

Daily News As some of y'all heard, the global market is plummeting. And one of the most impacted market is the crypto trading market. With people losing \$200 Billion just last night. My portfolio highly consists of Bitcoin, Ethereum, USDT, TON, DOGE, Litecoin, VeChain, Cardano, Tron, AWT and VeThor. The highest of which is Bitcoin, which is down 58% Am I going to sell them all? Is it going to keep going down? Am I going to lose all my investments? I highly doubt it. It's the crypto market, Bitcoin has crashed a bunch of times, so did the crypto market. And since digitization is ever more increasing, and giant companies still have millions and billions worth of cryptocurrencies. I won't be selling, I'll just be investing and increasing it. I know it'd all recover and flourish. #DailyNews #Crypto @Dagmawi_Babi

What y'all be posting is funny sh*t! Cracking me up 🎧🎧

Moments after my web app was launched. I challenged a community of coders to try and hack, break or spam the app in anyway possible. Soon enough, attacks were coming from everywhere. Some sent thousands of requests blocking others from posting, some sent hundreds of random notes spamming the server while others broke the UI in very weird ways. I had to take tons of

security measures, change tons of configurations, place much more design and error handlings to try and combat all of their attacks. The hackers were very nice to not do damage to the database and I did manage to keep things safe. And by the moment I find a way to block them, they find other ways and it was a blast of fun trying to keep up from their attacks. And that's what I love about all this. The challenge and the fun. Thank you all for hacking, jamming and spamming. Y'all are cool ☺ #WordsOfStrangers #Hacking @Dagmawi_Babi

Introducing My New Project 🙏 Dolores Abernathy Description I wanted to create a channel that's entirely run by a bot. So I created a new channel and built it's admin bot, Dolores Abernathy. The bot curates, manages and posts content from around the internet onto the channel at random intervals. Origin Of Name The name is taken from a show called WestWorld, that's about a futuristic Western-themed amusement park where the visiting humans interact with automatons and robots. However, all hell breaks loose when the robots begin malfunctioning. And at the forefront of that robot revolution is Dolores Abernathy. Channel Link @DoloresAbernathy7 Support Leave a star on my GitHub repo to support me 🙏 <https://github.com/dagmawibabi/DoloresAbernathy> P.S It's opensource, you can contribute and improve it. Enjoy the contents of the channel! 🙏 #DoloresAbernathy #Bots #Channel #Automation @Dagmawi_Babi

The bot scrapes the web to find content that match the following topics and tags. I made it to be more aesthetic, artistic and creative so If you like any of the following tags consider subscribing to her channel. #Aesthetic #TheWayWeWere #Sizz #Pics #ArtPorn #Art #DarkAcademia #AestheticWallpapers #ImaginaryCityscapes #ImaginaryMindscapes #ImaginaryFeels #ImaginaryTechnology #SympatheticMonsters #SpecArt #FuturePorn #ImaginaryHorrors #ImaginaryMonsters #SkyPorn #Clouds #VaporwaveAesthetics #HeavyMind #LowPoly #Cyberpunk #PixelArt #SteamPunk Subscribe to her channel 🙏 @DoloresAbernathy7 Enjoy! 🙏 #DoloresAbernathy #Bots #Channel #Automation @DagmawiBabi

Story time So yesterday I successfully deployed an entire web app onto a VPS server that I bought couple of days ago. Everything was configured well and running flawlessly. Today, I got a call from the web app users and they were complaining that it's not logging them in. So I had to check what was wrong. Going to the logs I see that there was no data to be found to match and login users. So I went to the server and checked out the database. Only to find out all the previous databases are gone and one database called "READ__ME_TO_RECOVER_YOUR_DATA" exists and I was like "wtf" and I went on and checked it out. It had a collection inside with one document called "README" So I read it. It said... "All your data is a backed up. You must pay

Tuesday, June 21, 2022 Today was June Solistice, the longest day and the shortest night of the year. ☐ A solstice occurs when Earth arrives at the point in its orbit where the North Pole is at its maximum tilt [about 23.5 degrees] toward the Sun, resulting in the longest day and shortest night of the calendar year. While today marks the longest day of the year in the Northern Hemisphere, it is the shortest day of the year in the Southern Hemisphere. And while summer officially begins in the Northern Hemisphere, winter gets underway in countries that are south of the Equator, such as Australia and Brazil. #JuneSolistice #Space @Dagmawi_Babi

Friday, June 24, 2022 Mercury, Venus, Mars, Jupiter, and Saturn have been aligning in order this month for the first time in 18 years. This week will offer the peak viewing time to see the planet parade. You won't need a telescope to see the rare grouping of planets, as they will all be visible to the naked eye. It might still be difficult to see Mercury, however, because of how dim it appears. This "parade of planets" hasn't been seen from Earth since 2004, and it won't happen again until 2040. Venus, Mars, Jupiter and Saturn will still be visible for most mornings in July, but the group of planets will spread out farther and farther as the month goes on. #PlanetsAlign #Space @Dagmawi_Babi

Time Crystals are a real thing My Simple Explanation: • Normal crystals like diamonds have an atomic formation that repeats along x,y or z axis. Time crystals have a repeating atomic formation across time periods. • They are basically like diamonds but they change shapes and atomic structure and turn into a completely different element and then get back to the original starting element and then loop forever. • They are entirely new phases of matter Check out the following resources for more. • <https://www.newscientist.com/article/2119804-worlds-first-time-crystals-cooked-up-using-new-recipe/> • <https://www.quantamagazine.org/first-time-crystal-built-using-googles-quantum-computer-20210730/> • <https://www.youtube.com/watch?v=Fzzxozmuj4I> • <https://www.youtube.com/watch?v=Fzzxozmuj4I> #TimeCrystal #Physics @Dagmawi_Babi

The longest word you can display on a seven segment display. We all know these 7 Segmented displays showing the time or various informations on clocks, calculators or other devices. They're also used to show letters too. So that got me thinking, what is the longest English word you can display using these 7 Segment displays? ☹️ To answer this I went about exploring my curiosity by writing code to display letters on a seven segment display and uploading it to an Arduino and then writing code to scan through a dictionary and find words that can be displayed on a seven segment display and then choose the longest amongst them and much more. ☹️ You can view the answer and how I got there in the following short video. ☹️ Enjoy! ☹️ Here's the TikTok link for better quality • <https://vm.tiktok.com/ZMNBfWysr/?k=1> Lower quality video ☹️ #Curiosity #Code #SevenSegmentDisplay #Arduino @Dagmawi_Babi

I just learnt that these 14 characters written and executed in bash will crash your PC. I know I tried them lol. ☹ It's called a fork bomb. It defines a function : that takes no parameters (). The body of the function {} contains a call to itself : and the output of itself is piped | into another call to itself, started as a background process :&. ; terminates the declaration and : calls the function, executing it. The function will keep multiplying exponentially until your PC cannot handle it anymore. #ForkBomb #Bash @Dagmawi_Babi

Her eyes and words are so icy Oh but she burns Like rum on the fire Hot and fast and angry as she can be I walk my days on a wire. It looks ugly, but it's clean, Oh momma, don't fuss over me. The way she tells me I'm hers and she is mine Open hand or closed fist would be fine The blood is rare and sweet as cherry wine. Calls of guilty thrown at me All while she stains The sheets of some other Thrown at me so powerfully Just like she throws with the arm of her brother. But I want it It's a crime That she's not around most of the time. The way she shows me I'm hers and she is mine Open hand or closed fist would be fine Blood is rare and sweet as cherry wine. Her fight and fury is fiery Oh but she loves Like sleep to the freezing Sweet and right and merciful I'm all but washed In the tide of her breathing. And it's worth it, it's divine I have this some of the time. The way she shows me I'm hers and she is mine Open hand or closed fist would be fine The blood is rare and sweet as cherry wine. #Lyrics #CherryWine #Hozier @Dagmawi_Babi

Will the Earth die today? CERN's Large Hadron Collider fires up for third time to unlock more secrets of the universe. And people all over the world are panicking that they will create a black hole that'll suck the earth in. But no worries my people, here's why it won't be the end of us all. See when the LHC was first built, it was explained that microscopic black holes could be created. This generated panic in the non-scientific communities that the black holes would swallow the earth. But, while black holes will be created, they are so small that they evaporate nearly immediately and pose no risk to the earth. Because these black holes are fed any mass to increase their size and power. And yet every time the LHC gets turned back on, people bring it up again, and cause havoc. #CERN #LHC #BlackHoles @Dagmawi_Babi

Also the reason any black hole actually generated would evaporate immediately is because they'd have no mass to back themselves up. At most they'd weigh something like a few

hydrogen atoms. The resulting black hole would dissipate into Hawking radiation almost instantaneously. To give an idea how much of a non issue it would be: If you took the moon and compressed it down until it became a black hole, absolutely nothing would happen to us. We'd lose the lunar cycle and animals that relied on moonlight would be f*cked up, but the black hole moon would behave just the same as it always does. It'd revolve around the earth at the same speed. The tides would stay the same. We wouldn't get sucked up into it. The event horizon (the actually dangerous part) would be about the size of a medium sized grain of sand. And that's a black hole with the mass of the moon! The LHC isn't gonna do anything to us. #CERN #LHC #BlackHoles @Dagmawi_Babi

Semonun I've been wondering who I called the most and who called me the most. Also I wanted to know the longest phone call I've had. So I built my self a little tool over the past weekend, an app that scans my call history and tells me all the data in an orderly fashion. It gave me good insights to the call records I had. So Incase any of y'all wanna use it go for it. ☐

Introducing....

☐ StatiCall - Analyze your calls ☐ Who did you call the most? Who did you have the longest call with? Who missed called you the most? Whose call did you reject the most? Introducing, StatiCall, a minimal and aesthetic app that I built that scans through your call history and gives you incredible analysis. It has the following features: • Search for a specific contact's analysis • Sort and filter calls through different parameters • Visualize data through Pie Charts and Bar Graphs. • Analyze minimum and maximum frequency and duration of calls, date range of calls and much more #StatiCall #MyApps @Dagmawi_Babi

☐ StatiCall - Analyze your calls ☐ A minimal aesthetic app to give you statistical analysis over your call history! #StatiCall #MyApps @Dagmawi_Babi

Let's see if anyone beats my record phone call. ☐ 1 hour and 26minutes (5137 Seconds) ☐ Press and hold on to a contact to see a a very minimal analysis result. Drop a screenshot down in the comments if u beat my call. ☐

First couple of images taken by the James Webb Space Telescope in 4K Incredibly gorgeous photographs of nature it self. 🌌 The images' description in order: 1. First full-colour Image of deep space 2. The Carina Nebula 3. Stephan's Quintet 4. Dying Star #JWST #Telescope #Space @Dagmawi_Babi

Here are comparisons of the pictures we used to have using the Hubble telescope 🌌 to the ones we just got using the James Webb Space Telescope. #JWST #HT #Space @Dagmawi_Babi

This image might just be pretty stars and galaxies for you but let me just shed some light on it. These stars and galaxies named SMACS 0723 are 4.6 billion light years away. That means they're soooo freaking far away that the light took 4.6 billion years to reach the telescope. That means what you are looking at is literally the past, literally the universe 4.6 billion years ago. Also looking at the past means some galaxies and stars might not be there anymore too. #SMACS0723 #JWST @Dagmawi_Babi

This image fucks with your screen. Causing trippy illusions. Explanation: Basically you see grids. Grids really can get wonky on screen because screens use grids too when making an image, grids of pixels. When you move one grid while the other one stays at the same place, sometimes grids misalign, making a trippy pattern. This is also what happens when people wear striped clothes on tv and their clothes look all swirly and weird. So yeah misaligned grids, called moiré. #Illusions @Dagmawi_Babi

One Last Hug This happened on 29 of October in the Netherlands (in Ooltgensplaat to be more precise). A crew of four was conducting routine maintenance to the 67 meter high turbine. They were in a gondola next to the turbine when a fire broke out. The fire quickly engulfed the only escape route (the stairs in the shaft), trapping two of the maintenance crew on top of the turbine. One of them jumped down and was found in a field next to the turbine. The other victim was found by a special firefighter team that ascended the turbine when the fire died down a bit. The cause of the fire is unknown, but is believed to be a short circuit. #Photographs #History @Dagmawi_Babi

And here are my most favorite ones...

The most beautiful suicide. by Robert Wiles, Evelyn McHale jumped off the 86th-floor observatory of the Empire State building. She landed on top of a parked UN limousine. She left a note that read: "I don't want anyone in or out of my family to see any part of me," the note read. "Could you destroy my body by cremation? I beg of you and my family – don't have any service for me or remembrance for me. My fiance asked me to marry him in June. I don't think I would make a good wife for anybody. He is much better off without me. Tell my father, I have too many of my mother's tendencies." Keeping with her wishes, her body was cremated and she had no funeral. #Photographs #History @Dagmawi_Babi

Hebrews 1 (KJV) ----- ¹⁰ And, Thou, Lord, in the beginning hast laid the foundation of the earth; and the heavens are the works of thine hands: ¹¹ They shall perish; but thou remainest; and they all shall wax old as doth a garment; ¹² And as a vesture shalt thou fold them up, and they shall be changed: but thou art the same, and thy years shall not fail. #Scripture @Dagmawi_Babi

Just read the book of Esther(ספר אסתר) It's a beautiful book and rich with a beautiful story and plot. It's also a short read, 10 chapters, with a sped up tone. It is also known as the book where God hides. The main takeaway of the book is to not be consumed in your own ego and the other

working. Right now the current situation men face is the total opposite and it shows.

Any fans of the iPhone 13 Pro Max? #Apple #i13ProMax @Dagmawi_Babi

Any fans of the Samsung Galaxy S22 Ultra? #Samsung #S22Ultra @Dagmawi_Babi

My primary device is the Samsung Galaxy S22 Ultra and it's magnificent in all it's glory. Every single pixel of it, every single corner of it is made to perfection. I've unboxed them both, I've used them both, I've tested them both. But the S22 Ultra is just incredible, from software to hardware. Not to mention it comes with a Stylus! The AI/ML processing is just incredible. The speed and smoothness, the polished android, the processed images, the lengthy battery life. All give a win to the S22 Ultra. The iPhone 13 Pro Max is as epic too, except that it's huge and it's really rough to hold with it's sharp edges. It feels like a flat square plate in your hands. Despite the S22 Ultra looking rectangular it's got an incredible feel to your hands, the way it curves and the material it's made is smoother and comfortable to the touch. The i13 pro max is really fast, sturdy, solid and predictable which makes it easy to use and a bit more dependable. It's got an incredible camera, that takes natural looking photographs. And an incredible speed of processing and AI/ML stuff. It's also got small gimmicks here and there that solve tiny but important problems for the average user, like you can't see what people are watching from the side; the screen blurs unless you're looking at it from the front. But even with all that, calling the S22 Ultra just a phone seems degrading to it cause of what it's able to do. I have been a long time iPhone user and a huge fan of it still. But despite all the hype and glory, I genuinely think that you get more value per dollar with the S22 Ultra than the iPhone 13 Pro Max. #MyTake #S22Ultra #i13ProMax @Dagmawi_Babi

#FilsDeJoie #Stromae #Songs @Dagmawi_Babi

Here's a simple explanation of what they're about: Papaoutai - Where are you dad? • A song about a kid missing his father cause the father had to work long hours to provide for the family. It circulates about people asking the kid where his father is. Mon Amour - My Love • It's a sweet song about a young man's love life. Carmen - Garden of God • About the bad sides of social media. The clip is insanely creative and dark too. Highly recommend you all to watch it! Santé - Cheers • A song for the people that can't party alongside other. About the cleanup crew, the security guards, the crew managers, and more. Formidable - Wonderful • A sad song about a man regretting how he's messed up his relationship. In the clip Stromae acts like a drunk and sad. And people actually donno but it's wholesome. Alors On Danse - Let's Dance • About a boring life but getting the hang of it by partying. Fils De Joie - Son of Joy • An anthem for prostitutes all around the world. Sang from the perspective of a kid defending his mother who's a prostitute. Very sad and hearttouching lyrics. And the clip is the best he's ever done. They had to design and create a fake new country for it. Just epic. #Stromae @Dagmawi_Babi

Andy Weir, is the man behind the story of the Egg. Andy Weir built a two-decade career as a software engineer until the success of his first published novel, The Martian, allowed him to live out his dream of writing full-time. He is a lifelong space nerd and a devoted hobbyist of such subjects as relativistic physics, orbital mechanics, and the history of manned spaceflight. Jasmine Bashara never signed up to be a hero. She just wanted to get rich. Not crazy, eccentric-billionaire rich, like many of the visitors to her hometown of Artemis, humanity's first and only lunar colony. Just rich enough to move out of her coffin-sized apartment and eat something better than flavored algae. Rich enough to pay off a debt she's owed for a long time. Here's the YouTube link • <https://www.youtube.com/watch?v=sY8aFSY2zv4> You also might want to put on your thinking caps on cause it's gonna take some mental power. I swear it's like reading a very beautiful book. ☐ #Podcasts #LexFridman #JordanPeterson @Dagmawi_Babi

And I just finished the entire podcast. It's a masterpiece. It's almost like reading a book, and if you listen closely it's almost like washing the insides of your mind and downloading in some new data.

Here are the rough notes I took: 1st Hour • Not only do you have to face death, but you have to face death and hell before you can get to paradise. • Beauty is daunting. • People are afraid of buying art because their taste is on display. • There are two kinds of people, thing people and person people. • We are systems of existence. • Invite in the judgement, so you can die a little bit instead of dying completely. • We can let our ideas die instead of us. • Elvis became the famous Elvis impersonator when he died. • When your influence increases that becomes a lot of responsibility. • The story of Christ is the radical acceptance of the worst possible tragedy. • The angel of death sits on every word. • What's the connection between death and hell? You're more likely to die terribly if you live in a manner that brings you to hell. • When the aristocracy catches a cold, the working class dies of pneumonia. • If the dragon that you're facing turns you into a terrified tyrant, you're not the man for the job. • Work is labouring to prevent the catastrophe's of the future, work is a sacrifice, sacrifice of the present for the future, It is the delay of gratification, it's maturity. • You become what you practice. 2nd Hour • What's the most real of what matters? Pain, cause you can't argue it away. So it's the most fundamental reality. • Is there anything more fundamental than pain? Yes, love and truth. Cause when you're in pain they're all you got. • You do want some shallow interactions most of the time despite you wanting deeper interactions. • You gotta open up to being bothered by people. 3rd Hour • You have to be properly selfish to make a relationship sustainable. • The definition of a reader, "I have lots of great dead friends" • Voluntarily Suffer. Voluntary exposure to that which freezes and terrifies you in measured proportions is curative. • Scale back the dragon till you find one that's conquerable that moves you forward and that will give you a little bit of goal. • Take on some responsibility, do something for other people. Find something to serve. Cause you are a community across time. • You can be the boss of your job. • How to fix things with partners? Please dear have the grace to allow me to do this stupidly and badly while I learn to do this at least 20 times and I'll give you the same leeway and we'll practice stupidly at least 20 times and we'll talk about it and then maybe we'll get it right for the next 10,000 times. • If I offered everything to a partner who would I be? • How to get a date? Patterns of being. Can you align yourself with the patterns of being gracefully then can you do that with her? And then can you do

that in a playful and attentive manner and can you keep your hands to yourself? • The harder you work on offering other people what they need and want, the more people will line up to play with you. • I know you're full of snakes, but let's play. • Paranoia is 100% focusing on any subtle deceit or manipulation. • The more you act out that it's good, the better it gets. • The highest value is love and truth is it's handmaiden. • How do I find out that a person is the one for me? By binding myself to them. • Truth can break the shackles of naivety. Ending Quote by Nietzsche • "You must have chaos within you to give birth to a dancing star." #MyNotes #Podcast #LexFridman #JordanPeterson @Dagmawi_Babi

They both mentioned two books that they both think are just masterpieces in every sense. So here they are for my bookworms here. ☐

Fyodor Dostoevsky is the author of both books, and he is usually regarded as one of the finest novelists who ever lived. Russian novelist and short-story writer whose psychological penetration into the darkest recesses of the human heart, together with his unsurpassed moments of illumination, had an immense influence on 20th-century fiction. #Authors #FyodorDostoevsky @Dagmawi_Babi

The Brothers Karamasov is a murder mystery, a courtroom drama, and an exploration of erotic rivalry in a series of triangular love affairs involving the "wicked and sentimental" Fyodor Pavlovich Karamazov and his three sons—the impulsive and sensual Dmitri; the coldly rational Ivan; and the healthy, red-cheeked young novice Alyosha. #Books #FyodorDostoevsky #TheKaramazovBrothers @Dagmawi_Babi

The Karamazov Brothers By Fyodor Dostoevsky #Books #FyodorDostoevsky #TheKaramazovBrothers @Dagmawi_Babi

It follows the mental anguish and moral dilemmas of Radion Raskolnikov, an impoverished ex-student in St.Petersburg who plans to kill an unscrupulous pawnbroker, an old woman who stores money and valuable objects in her flat. He theorises that with the money he could liberate himself from poverty and go on to perform great deeds, and seeks to convince himself that certain crimes are justifiable if they are committed in order to remove obstacles to the higher goals of 'extraordinary' men. Once the deed is done, however, he finds himself racked with confusion, paranoia, and disgust. His theoretical justifications lose all their power as he struggles with guilt and horror and confronts both the internal and external consequences of his deed. Here's a Ted Ed video bout it: • <https://youtu.be/Vtkv3-endYc> #Books #FyodorDostoevsky #CrimeAndPunishment @Dagmawi_Babi

Crime and Punishment By Fyodor Dostoevsky #Books #FyodorDostoevsky #CrimeAndPunishment @Dagmawi_Babi

"God is dead. God remains dead. And we have killed him. How shall we comfort ourselves, the murderers of all murderers? What was holiest and mightiest of all that the world has yet owned has bled to death under our knives: who will wipe this blood off us? What water is there for us to clean ourselves? What festivals of atonement, what sacred games shall we have to invent? Is not the greatness of this deed too great for us? Must we ourselves not become gods simply to appear worthy of it?" -- FriedrichNietzsche #Quotes #FriedrichNietzsche @Dagmawi_Babi

My fav human reflex ☺ so cute ☺ Galant reflex, or truncal incurvation reflex, is a newborn reflex, named after neurologist Johann Susmann Galant. It is elicited by holding the newborn in ventral suspension (face down) and stroking along the one side of the spine. The normal reaction is for the newborn to laterally flex toward the stimulated side. The Spinal Galant is developed in utero at approximately 20 weeks. It should be fully developed at birth and should integrate (go away) between 3-9 months of age. Its purpose is to encourage movement and develop range of motion in the hip in preparation for walking and crawling. Some authorities also believe that it prompts urination, and that this is why babies often urinate when the diaper is secured around their hips. #GalantReflex @Dagmawi_Babi

This is what the series is about for anyone curious: Selemene was a mortal woman. Invoker was & is a mortal man who has a very big brain. They fell in love and had sex. Their resultant daughter was named *Filomena*. *Filomena* has a genetic disease (a cosmic necessity in every version of the world) that has no cure and can only have its symptoms be temporarily subdued by being near a certain type of flower that only blooms under Mene's moonlight. Without Mene's flowers, *Filomena* will eventually succumb to her symptoms and die. Mene is NOT and has never been a mortal woman, she is a Goddess of the moon (a cosmic being). Selemene killed Mene and took her position as the Goddess of the moon. However, taking Mene's moon powers did not allow her to produce the same moonlight needed to bloom the flower that subdues symptoms of *Filomena*'s genetic disease. So *Filomena* dies sometime after Selemene's usurpation. Also, being the "second" goddess of the moon, Selemene creates a second moon that lies between the planet and Mene's original moon, blocking it. After Mene died, being a Goddess and not a mortal, she reincarnated in a weaker mortal form as an elf named "Fymryn". She doesn't really have memory of being Mene, participates in an elf orgy and seduces DK (who also happened to be banging another cosmic being called Mirana around the same time). Invoker is sad that *Filomena* is dead so he takes revenge on Selemene, by working with/borrowing the power of the demon Terrorblade. But clearly, revenge does not make one's loved one come back from the dead. After some time, Fymryn ascends back into her Mene form to help DK fight Terrorblade (who has at this point betrayed Invoker, but it's actually all part of the plan *wink**wink*). Invoker being Mr Big Brain tries to solve the problem. He creates a world where Selemene dies early/doesn't want to usurp Mene. So *Filomena* in this world gets to grow up. But turns out eventually the moon actually explodes at a certain point in the future (due to the conflict between Radiant & Dire), causing fragments from the moon to fall and cause a fatal meteor shower that destroys their planet. Then Mr Big Brain Voker pulls a 6D chess move to have the (now-older) *Filomena* be transported back into the world where after he killed Selemene, DK and the others (Fymryn-but-now-Mene, Mirana, Kaden, etc) have also killed the betrayer Terrorblade. In this original world, the moon also eventually explodes, but because Selemene's artificial moon exists, it blocks the fragments and prevents the fatal meteor shower. While a younger version of *Filomena* did die in this version of the world, the now older *Filomena* is safely transported over and survives (alongside Mene/Fymryn). #Dota #DragonsBlood #Anime #Series #Netflix @Dagmawi_Babi

1. Nope Two siblings running a horse ranch in California discover something wonderful and sinister in the skies above, while the owner of an adjacent theme park tries to profit from the mysterious, otherworldly phenomenon. 2. Top Gun Maverick After more than thirty years of service as one of the Navy's top aviators, Pete "Maverick" Mitchell (Tom Cruise) is where he belongs, pushing the envelope as a courageous test pilot and dodging the advancement in rank that would ground him. #MovieSuggestions @Dagmawi_Babi

By the way Get Out, Us and now Nope were all directed by Jordan Peele and they're all incredibly good movies. It was recent when I learnt of this. He is really talented. And I'm so lucky to be good friends with these kinds of people. I don't have much to be boastful about, but next to God himself, I can definitely see me boasting about the incredible circle of close friends I had the privilege of making from all different fields. Hanging out with them, talking to them about different projects that we're all doing, discussing tons of mind provoking thoughts isn't something I will exchange for anything. It's truly a gem to befriend them all. And most of you are in this channel, so know that this actually rocks and I love you all!

Interesting Shower Thoughts I read • Our phobias may just be how we died in a previous life • Baby butterflies don't exist. • Lotto is where a whole lot of financially irresponsible people put their money together, in order to randomly reward one financially irresponsible person. • Sleep is somewhat crazy, you just lay there for hours and just breath. Then it struck me, half the world is always asleep on our planet. Billions of creatures just away from reality and breathing. Always. #ShowerThoughts @Dagmawi_Babi

It reflects you back just as you are but with a catch! It will randomly pick a wholesome affirmation from a 300+ collection of the most impactful English and Amharic affirmations and show it to you. All you have to do is open the app and just look in the mirror, it will present to you a delightful affirmation every 20 seconds or you can just click on the texts and it will change. It has the following features: • Dark and Light Mode • Custom Affirmations • Change Position of Text • Surprise Confetti It's open source too so you can use it however you like don't forget to drop a star too ☹ • <https://github.com/dagmawibabi/GoodMirror> App Link: • https://t.me/Dagmawi_Babi/6531 Hope you love it! ☹ #GoodMirror #MyApps @Dagmawi_Babi

Notes I took from Life lessons for teens by Ali Abdaal. 1. Think about the game you're playing

and think about other victory conditions of that game. 2. Pay attention to your posture. Before you regret your illnesses later on. 3. Take more photos than you think you should. Some parts of your life won't come back again and you'll be happy you have memories of it. 4. Be more of a documentarian. When you read a book or listen on a podcast write some notes. 5. Try and be a connector that connects different groups of friends. 6. Go to Events, clubs and societies. You'll meet gems of people. 7. Don't be mean to people. 8. Buy Bitcoin and never sell it. 9. Nothing good ever happens after 2AM/8PM Local Time. 10. Do a little bit of work and studying everyday. It compounds to something bigger and easier to remember. 11. Seek forgiveness rather than permission. Just do it! 12. Stop worrying about what other people are thinking about you. Everyone's got their own anxieties to not think about you. 13. It's okay to fall behind. Most people are pretending they're not. But use all available time we'll. 14. Try and develop passive incomes. 15. Enjoy the journey and don't get lost in the destination. Smell the roses along the journey. 16. Share your work, life lessons and yourself with your friends without any expectations back. 17. Don't worry about the things you can't control and focus on what you can. God granted me the strength to accept that which I cannot control, the courage to change what I can, and the wisdom to know the difference. #MyNotes @Dagmawi_Babi

Do people in heaven know hell exists? Do people in hell know heaven exists? What power does hell have if those imprisoned there couldn't dream of heaven. What is part of the enjoyment of heaven is the knowledge that other people are suffering in hell. It's not enough to just be heaven, it's also the knowledge that other people aren't. #Thoughts #Philosophy @Dagmawi_Babi

Can't Help Myself By Sun Yuan and Peng Yu In this art work commissioned for the Guggenheim Museum, Sun Yuan & Peng Yu employ an industrial robot with visual-recognition sensors, and software systems to what seems to be the robot mopping back the dark red hydraulics oil back into it's core. There's something sad I feel bout it everytime I see it. It's the constant struggle to be alive, pursuing one purpose only. In an effort to clean up the constant mess, the robot only makes matters worse by leaving smudges of the liquid on the floor, the walls, and itself. Much like some of us do, ruining other things to keep surviving. What's even more sad is the fact that the robot doesn't need the hydraulics oil. It functions through electricity. So it spent it's 3 years collecting oil it didn't need. In opened up in 2016 as "Can't help myself" but now that it died in 2019, it's called "Couldn't help myself" #Art @Dagmawi_Babi

For decades, Vivian Maier wandered around New York and Chicago, surreptitiously taking tens of thousands of photographs of people and scenes she encountered on the street. But her photography was unknown until 2007, two years before her death, when she fell behind on payments for a storage locker and the belongings inside were auctioned off. She worked as a professional nanny for more than 40 years, during which she secretly took more than 150,000 photographs. She often took the children she cared for on "shooting safaris," which involved wandering around on the streets, often through poor neighborhoods, while wearing "funny, old-fashioned" clothes. In 2007, Chicago real estate agent John Maloof bought one of those lockers, fell in love with the photographs inside and began a lengthy quest to learn more about Maier. He then set up a website to show off her pictures: • <http://www.vivianmaier.com/> I promise you'll love it. ☐ #InterestingThings @Dagmawi_Babi

This was what the scene was like at the African Tech Expo @ Skylight Hotel. Honestly compared to other tech expos I've been here in Addis, it's actually underwhelming and not even that interesting. Tho it was nice seeing some new products that were actually cool. Cybersecurity companies were a handful, banks rolled out pretty new interesting apps too, and e-commerce and delivery was obviously everywhere. If I had to pick my favorites I'd say Loline Magazine with their exceptional web app and a new app from Abysinia Bank called Apollo that entirely moves the entire banking process from creating an account to transactions just to your phone and finally Aramex; an international delivery service. #Events #AfricanTechExpo @Dagmawi_Babi

The Ethereum Merge was successfully completed. The era of Ethereum mining has come to an end - the second largest blockchain in the world has moved from Proof-of-Work to Proof-of-Stake. This means that now only validators who have blocked part of their coins in staking will be able to mine new coins. The Ethereum merge has been planned since 2017, but has been repeatedly delayed. The Ethereum Foundation estimates that switching to PoS mechanism will reduce the electricity consumption by 99.95%. Source: • <https://t.me/TechnologyBoxs/5474>

I'm just seriously and genuinely worried about AI these past couple of weeks. It's haunting me tbh! The way AI is advancing is just fucking with me, partly cause I'm not doing much AI related things and I don't understand the technical details of many AI programs and partly cause it's advancing so much that we just can't keep up with it. It's almost like a black box. We have incredible self balancing, controlling and navigating robots from Boston Dynamic, we have beautiful and smoothly navigating Tesla full self driving cars, We have human looking and gesture producing robots like Ameca and let's not even get started with Google and what it can do. And most recently we have DALL-E which can produce never before seen photorealistic images and then GPT-3 which can understand and hold a conversation using Natural Language. All that's missing is someone to bring them all together. That's it! And as much as epicly crazy that is, it scares the shit outta me! #Thoughts #AI @Dagmawi_Babi

I asked this on Instagram and the replies I got are worth the read! If you have the same question and want to hear people's perspective from each and every side. I highly recommend you go there right now and read them all! Or if you have something to say you can DM me there too. People are engaging with it incredibly so you'd really have a profound understanding of it like I'm having! Just updated my telegram. Got this new feaureess for normal users. 1. Infinite Reactions. All users get a new expandable reaction menu – and dozens of new reactions in groups and 1-on-1 chats. Premium users can react with thousands of custom emoji, using up to 3 different reactions on each message. 2. Prioritize Downloads. In the Download Manager, press and hold an item in the list to reorder them and change their priority. 3. Themed App Icon. Users on Android 13 and higher can set their app icon to match their system theme colors. #Telegram #Tech #News @Dagmawi_Babi

I was having conflicting ideas on whether I should party, get drunk, get high, use drugs, fuck around or whether I should keep my current life style of sobriety. I was feeling left out, missing out on all the fun most of my good and close friend of mine were having and I started questioning my ways of life and that's when the internal thought conflict overwhelmed me and I sought for external point of views to settle the debate in my head. So knowing I was surrounded by story-worth people I asked them all and they did not disappoint. They gave me their honest most helpful advices about the topic. The ideas were so profound I felt the need

to collect and organize it into this mini-bookish book so it can be permanently saved and easily shared with others like me who need lessons on these topics. I hope you learn so much from it as I have! Share it will people you think need it! Enjoy! #MyBooks #ConflictingSobriety @Dagmawi_Babi

Minecraft in Minecraft with redstone! Somethings to note: • Features include an 8x8x8 fully 3D-rendered world with 16 different block types, 32 different items, and dozens of game mechanics including mining, crafting, smelting, building, chests, random ticks and more! • While all the redstone can run on vanilla Minecraft, it would run at a frame every few days, and hence in order to make it playable a server called MCHPRS (Minecraft High Performance Redstone Server) is used to speed up the game to over 10,000x normal speed. That brings the framerate to a much more reasonable 0.1fps, so the long timelapses in the video only took 9 hours to record in total. One of Goku's special moves for beating up the bad guys is the spirit bomb, which requires Goku to gather energy from every living thing, and then throw at the bad guy. In one of the final episodes, Goku has to convince the whole universe to give him enough energy to beat the last bad guy, And they all raise their hands in the air to give their energy. #Reddit #Award @Dagmawi_Babi

Hackers could have full access (!) to everything on the phones of WhatsApp users. This was possible through a security issue disclosed by WhatsApp itself last week. All a hacker had to do to control your phone was send you a malicious video or start a video call with you on WhatsApp. You are probably thinking "Yeah, but if I updated WhatsApp to the latest version, I am safe, right"? Not really. A WhatsApp security issue exactly like this one was discovered in 2018, then another in 2019 and yet another one in 2020 (tap each year's link to see the corresponding vulnerability). And yes, in 2017 before that. Prior to 2016, WhatsApp didn't have encryption at all. Every year, we learn about some issue in WhatsApp that puts everything on their users' devices at risk. Which means it's almost certain that a new security flaw already

exists there. Such issues are hardly incidental – they are planted backdoors. If one backdoor is discovered and has to be removed, another one is added (read the post "Why WhatsApp will never be secure" to understand why). It doesn't matter if you are the richest person on earth – if you have WhatsApp installed on your phone, all your data from every app on your device is accessible, as Jeff Bezos found out in 2020. That's why I deleted WhatsApp from my devices years ago. Having it installed creates a door to get into your phone. I'm not pushing people to switch to Telegram here. With 700M+ active users and 2M+ daily signups, Telegram doesn't need additional promotion. You can use any messaging app you like, but do stay away from WhatsApp – it has now been a surveillance tool for 13 years.

This is incredible news. ☺☺ This is AI quiet literally finding out the formulas we came up with, by itself. And on top of that surpassing our formulas and creating its own, more efficient ones. Starting from scratch, AlphaTensor gradually improves from finding the “class-room” algorithm to discovering historical algorithms such as Strassen’s - eventually surpassing them. They adapted AlphaTensor to specifically find algorithms that are fast on a given hardware. These algorithms multiply large matrices 10-20% faster than the commonly used algorithms. You can imagine how this 10-20% improvement will affect your game graphics. This work is an example of how AI can advance the field of algorithmic discovery. So it's been 2 months since I started meditating. And if you take my advice seriously you should meditate as well. At first I thought it was something either weak people or just girls do. But it isn't until my personal issues started being unbearable and I started meditating and it started working that my view shifted entirely. It is incredible in every sense. I used to think letting the mind go wild with thoughts, letting thoughts and idea overwhelm me, listening and accepting everything the mind said was a clever and smart thing BUT nah nah it's self harming and chaotic. And nowhere near a healthy mind. I have great friends and an amazing girlfriend who kept on advising me to meditate cause they do too. But I never really did. But 2 months ago I just decided to. And you have no idea how peaceful, controlled and calm my mind and mood feels day by day. The energy I get, the sense of focus and calmness my mind experiences is just peaceful in every sense.

Now as I'm advising you to start meditating I should tell you some good things about it and the science of it all. We can't control the conditions of our mind but as we practice meditation more we come to know these conditions and understand how to feel comfortable with it's conditions even in it's worse cases. And an incredible fact about meditation is that more than psychological effects, it has physical effects too. Scientists have shown how new neurons and new connections are formed in the brain during meditation. And that is incredible because a healthy set of connections in the brain means a healthy path of thoughts and reactions. Now we can't eliminate stress and anxiety but we can change how we interact with them. Instead of having a very reactive mind, it's preferable to have a calm and collected mind. So that in every single thing you do your brain makes the best of decisions, has the best of ideas, feels the best of feelings and takes of situations in the best of ways. We tend to think that what we think is who we are but that's not true! We are not our thoughts. Thoughts are just random chaotic things that pop up and disappear and we're just there to experience them. Meditation is also a

practice. It's not a one time medicinal solution. It's almost a way of life. The more you do it the better you'll feel day by day. So if you struggle with any form of mental blurriness or focus problems, OCD, ADHD, Depression, BPD, Anxiety, Suicidal thoughts, Self Hate and so many more bad mental issues you might be having. It's an incredible relief for you.

One other thing I've done ever since I was a child was to journal. I always journaled and kept a diary ever since I was a child. It helped put my thoughts and ideas in order. It helped me see the bigger picture. Now that I started meditating a while back, and then adding my old ritual of journaling to it. They go hand in hand so well it feels heavenly; almost like the definition of what a healthy mind is. So this is your sign to start either writing a diary or journaling your thoughts and ideas. Trust me I'm telling you testimonial evidence in my life on how it has helped me and I'm sharing this lovely simple secret with you. Get an empty notebook. And just write what you're feeling or what a certain someone is making you feel or what you yourself is making yourself feel. Write about some events in the past, tackle childhood traumas, write about some pain you've faced. Write secrets you haven't told anyone. And so much more.

Ofc as always I'm gonna hold your hands and provide you with the necessary resources to get you started and keep you going.

Headspace: Guide to Meditation Is a 1 season, 8 episodes, each 20 minutes long introduction and guide to meditation for beginners. It will take you from 0 to a junior meditator. Each episode starts with an idea, like anger management, pain, gratitude and so many more. So for the first half (10 mins) it explains to you with evidence why you should be doing that form of meditation and how it will affect you. Then for the remaining half (10 mins) it will guide you step by step while you follow along. Even after 2 months of meditation and reading mindful books, I found so many new things from it. And I just followed along with it and it helped so well too. This is an animated series and the animation is incredibly well done and outstanding.

Long ago I held out this survey for you guys. And I'm doing it again. So feel free to respond however you like. And we'll finally analyze the state of people's lives at the end. There is no definition or explanation for the questions. Just answer them the way you'd define it. So for the following questions please react with a thumb up 👍 or thumbs down 👎 emoji

Are you happy?

Do you love yourself?

Do you self harm?

Is your mental health okay?

Do you have mommy/daddy issues?

Have you ever been sexually assaulted?

Are you addicted to something and struggling to quit it?

Do you have a good relationship with your God?

Are you in a relationship, if so are you happy in it?

Have you ever attempted suicide?

If you have an ex/exes, do you want one of them back?

Do you have a terminal illness?

Are you proud of the person you are today?

Do you have peace?

Are you in love? If so do you think that person would ever love you back?

If you are currently in a relationship, have you cheated or are you cheating on them?

Do you sleep peacefully and restfully?

Are you the jealous and/or the possessive type?

Have you lost someone so dear to death?

Have you given up hope on life?

Have you hurt someone so bad that they can't recover from it?

Are you the player type? Do you mess around people and/or make them fall and leave?

Are you okay with the body you have?

Do you have a healthy self image?

Do you feel like a man or woman hoe/slut?

Do you have problem overthinking?

Do you have anxiety issues?

Do you have trust issues?

Have you done something sexual with the same sex?

Do you think or feel like you're possessed with the devil?

Did something traumatic happen to you as a child that changed your identity forever?

Based on the above statistics: More people are happy, love themselves, don't harm themselves, have a healthy mental state, don't have mommy/daddy issues, haven't been sexually assaulted, haven't attempted suicide, don't have terminal illness, are proud of the person they are today, have peace, aren't cheating on their partner, sleep peacefully and restfully, haven't done anything sexual with the same sex, don't feel like they're possessed by the devil, haven't hurt someone so bad, aren't the player type, are okay with their bodies, have a healthy self image, don't feel like they're hoey or slutty and haven't given up hope on life. But most people are addicted to something and struggling to quit it, aren't happy in their relationship, don't think the person they love will love them back, want their exes back, are the jealous and/or the possessive type, have lost someone so dear to them by death, have problems overthinking, have anxiety issues, have trust issues and sadly something traumatic happened to them as a child. The one thing that changed from the last survey is that more people have a bad relationship with their God compared to the past. And the very close resulted ones are that almost an equal number of people have and don't have mommy/daddy issues, are and aren't proud of the person they are today, are and aren't the jealous and/or the possessive type, have and haven't lost someone so dear to death. #SurveyResults #Survey @Dagmawi_Babi

Recently I wrote down a huge list of questions I wanted to ask my parents. Just so I can document their lives and so I can learn them in depth. I also asked online for question suggestions and also questions people wish they could ask their parents and I added those to my list too. And I asked both of my parents, individually and separately, all of the questions. It was one of the hugest learning experiences I've ever had. And also an incredible insight to their minds since the questions were so personal and so difficult too. I believe in love being understanding someone and I can say I love them more now that I understand the reasons why they did certain things or how they came to be themselves. If you can do the same. The Beta version of Telegram for Android lets you create "topics" inside group chats. Which literally a direct competition to Discord topics. Topics are several small subchats within a group, in each of ones chat members will be able to join all sorts of discussions. What is already known about topics: • Topics will only be available to groups with more than 200 members. • Topics cannot be activated in channel-linked groups yet. • Most likely, only the owner of the group will be able to activate topics in the group. • Any user emoji can be set as an avatar for a topic (Premium subscription required). • If desired, topics can be closed, reopened, or deleted. • You can set your own notification conditions for individual topics within a group. • Users will be able to view any threads after joining a group. • There is a switch for topics management in the chat members permissions settings. #Telegram @Dagmawi_Babi

On October 9, astronomers discovered an extremely intense and persistent pulse of high-energy radiation that sent shockwaves to Earth. A surge of X-rays and gamma rays swept through the solar system triggering detectors on NASA's Fermi Gamma-ray Space Telescope, Neil Gehrels Swift Observatory, and Wind spacecraft, among others. The burst was detected by Orbiting High-energy Monitor Alert Network (OHMAN). The burst was detected for nearly 10 hours and astronomers believe that the explosion was closer to us. Scientists have named it GRB 221009A. It originated from the direction of the constellation Sagitta. This phenomenal has ionized parts of the Earth's atmosphere and even managed to break some satellites. #Space #Earth #GammaRay #BlackHoles @Dagmawi_Babi

Say cheese! ☺ Yesterday, NASA's Solar Dynamics Observatory caught the Sun "smiling." Seen in ultraviolet light, these dark patches on the Sun are known as coronal holes and are regions where fast solar wind gushes out into space. While the 'smiling Sun' certainly makes for a fascinating picture and a remarkable phenomenon, experts say it could spell trouble for the

Earth. These coronal holes are sending a stream of solar wind towards the Earth. Because of that, there is a chance a solar storm could hit the Earth on Saturday (October 29). #Sun #Earth #Space #SolarStorm @Dagmawi_Babi

and are not clothed. If it's natural to kill, why do men have to go into training to learn to do it? I'm so fed up to the nose with old men dreaming up wars for young men to die in. Just saying that the wars we haven't had saved many lives. And it's such a shame that we don't realize how the more we sweat in peace that the less we bleed in war. And you can be delusional and shit and say I die for my country but it's fact that the objective of war isn't to die for your country but to make the other bastard die for his! War makes thieves and peace hangs them! And it is forbidden to kill; therefore all murderers are punished unless they kill in large numbers and to the sound of trumpets. I'm remotely a nationalist, and try to be a pacifist over the simple fact that there is no flag large enough to cover the shame of killing innocent people. People who enjoy waving flags over the corpses of their dead brothers don't deserve to have one! Having one king, one god, one belief, one region, one country, they can act single-mindedly. #Thoughts @Dagmawi_Babi

I've said it a bunch of times before how TON is my most favorite crypto and Blockchain. And their latest update is just insane!! After a community vote among validators, the "t.me" domain was added to the root TON DNS smart contract. This news means that "t.me" owners now have the following opportunities: • You can assign the username.t.me format to your TON crypto wallet, allowing users to send Toncoin to your Telegram username. • Product creators can assign smart contracts to Telegram usernames. They can also assign usernames to decentralized TON sites. • Moreover, you can store your username in your crypto wallet, sell it, and even put it up for auction, but your ownership rights to your "t.me" will always be recorded on the blockchain. In other words, "t.me" owners have received access to all the possibilities offered by TON DNS technologies. #TON #Telegran @Dagmawi_Babi

In short what all that means is you can link your username to the TON blockchain and u can auction them and sell them. #TON #Telegram @Dagmawi_Babi

I feel particularly excited about today's Telegram update. It adds topics to large groups, transforming these linear chats into slick mobile-friendly versions of good old Internet Forums. Ironically, the very first popular internet service I built around 20 years ago was also an Internet Forum – a message board for students of my university, which eventually grew into the biggest student portal in the region. 16 years ago I again incorporated forums into the Communities section of VK, a social network I founded. Since VK was the most popular communication platform in Russia, Ukraine, Kazakhstan and other countries, tens of millions of people used the forum feature there. I feel nostalgic about those times: I had yet to learn the skill of hiring engineers and designers back then, so I programmed and designed everything on my own, working 20 hours per day. Today I am fortunate to have the best coding team in the world to recreate the forum experience for hundreds of millions across all platforms in a more modern, fast and accessible form. Telegram will now support organized conversations where thousands of people can concurrently discuss different subjects in the same group. Topics today come packed with lots of features – including the ability to close and pin topics, flexible notification options and lots of fun animated emoji to be used as topic icons. But this is just the start. Taking advantage of the two-week delay caused by Apple's review, we have begun to expand these new threaded groups into something even more powerful.

Been vibing with this song these days Becky Hill - Remember • <https://t.me/c/1156511084/118> #Songs #BeckyHill #Remember @Dagmawi_Babi

Astro Boy was my hugest inspiration and just over all one of my most favorite animation movies ever made. It pushed me into tech, it showed me love and family problems, along with identity crisis. It was perfectly made. #AstroBoy #Movies @Dagmawi_Babi

Meet the Robinsons was also such a really good movie. I'd still rewatch it. It's still that good. The story was so well done, the tech, the animation. Just so flawless. The hat was my fav tool in there. #MeetTheRobinsons #Movies #Nostalgia @Dagmawi_Babi

Robots was also so amazing. It was sooo lovelyyyy to be in a robot world. I felt at home. It was soo clanky and broken and rusty. I love it. #Robots #Movies #Nostalgia @Dagmawi_Babi

Flubber was beautiful and wholesome. It had a lovely story and I used to love the science and robots. #Flubber #Movies #Nostalgia @Dagmawi_Babi

My Life As a Teenage Robot Was such a sweetheart beast. I wanted to build my self one of her, she was soooo cute and adorable. #MyLifeAsATeenageRobot #Shows @Dagmawi_Babi

I, Robot Was also very interesting. It was really realistic for me. I saw robots differently ever since. #IRobot #Movies #Nostalgia @Dagmawi_Babi

Robotboy was sooo cool, it wasn't as techy but a robot was the star of the show. It was incredible. #RobotBoy #Shows @Dagmawi_Babi

Atomic Betty was sooo lovely. I loved her tech and science. It was so inspiring. #AtomicBetty #Shows @Dagmawi_Babi

MI High was soooooo freaking cool. That pencil call, that secret double life. It was just perfect. The pencil still haunts me ☹️ #MiHigh #Shows @Dagmawi_Babi

Spy Kids Undoubtedly my most favorite sequence of movies ever made. I've rewatched it so many times I lost count. So much story, so much depth, so much tech. Ughhhhh ☹️ #SpyKids @Dagmawi_Babi

Zoro: Generation Z Was decent too. I actually wanted to make his gadget weapon. It was really multipurpose and amazing. #Zorro #Shows #Nostalgia @Dagmawi_Babi

Special Agent OSO was such a lovely show too. I genuinely enjoyed his devices and tools. So wholesome too. #SpecialAgencyOSO #Shows #Nostalgia @Dagmawi_Babi

Totally Spies, was one of my most favorites. I loved every episode. I loved their make up mirror, it was such a techie device. #TotallySpies #Shows #Nostalgia @Dagmawi_Babi

Finally, here's a show that no one ever knows. It's called Wicked Science. I've never ever found anyone who's watched it. But it was genuinely so perfect. It introduced me to love and relationships too aside from so much theoretical science. #WickedScience #Shows #Nostalgia @Dagmawi_Babi

That's enough for today. But basically I was raised by all these shows, tho there are so many more I couldn't remember or find. Eventually I'll add them. But I guess these are enough. Hope

Will be dropping an amazing project tomorrow ☺ Stay Tooned (tuned) ☺

Introducing my new project ☺ ☺ The Unity Project Mural ☺ This is the biggest and most diverse collaboration art where people can share their arts in a way that connects to all art pieces surrounding it telling the story of how we, as humans, are all entwined, entangled and connected to one another in different aspects of life. I absolutely love art and this project is my contribution to the art community. The canvas is painted over by 25 of the most incredible, talented and well known digital artists all over Ethiopia. This is a gorgeous experiment proving what we humans as a collective can achieve working together. How so many art styles can connect seamlessly and flow magically all around each contributing to the beauty of the bigger picture. If you are a digital artist wanting to contribute, follow the steps on the site and you'll be more than appreciated to do so. University Fellowship >>>>>> Sunday Church Service #Thoughts @Dagmawi_Babi

I sometimes lose my sense of identity, my purpose in life. I struggle to see the good in my way of life, in what I keep doing despite not wanting to, and what I keep depraving myself from despite wanting to do them. Trying to be the absolute best I can be. I dissolve in the masses and struggle to find out my individuality. With this external fight going on, my insides then take a turn and suffer from internal conflict. An endless battle of trying to argue for or against the things I do and the decisions I make. It is genuinely tough being me, as I am sure is tough being you. If you are anything like me, messing up feels almost like your identity. So if you're trying to do and be good for yourself, the world and God, life feels like an endless pursue of self error correction. Anyways, throughout my loss of self. The following book always had something to say to put me back inline, to give me a sense of purpose. To pick a side for me. To explain and clarify the conflicting thoughts in my head. It is wise and intelligent in every wording. So if you want to give it a shot I highly suggest you to read it. It is quiet literally my fav (#1) book. It has hard to comprehend chapters but nonetheless incredibly life changing. Enjoy...

Lessssss Gooooooooo..... ☐

The blockchain industry was built on the promise of decentralization, but ended up being concentrated in the hands of a few who began to abuse their power. As a result, a lot of people lost their money when FTX, one of the largest exchanges, went bankrupt. The solution is clear: blockchain-based projects should go back to their roots – decentralization. Cryptocurrency users should switch to trustless transactions and self-hosted wallets that don't rely on any single third party. We, developers, should steer the blockchain industry away from centralization by building fast and easy-to-use decentralized applications for the masses. Such projects are finally feasible today. It took only 5 weeks and 5 people including myself to put together Fragment – a fully decentralized auction platform. We were able to do this because Fragment is based on The Open Network, or TON – a blockchain platform that is fast and efficient enough to host popular applications (unlike Ethereum, which unfortunately remains outdated and expensive even after its recent tweaks). Fragment has been an amazing success, with 50 million USD worth of usernames sold there in less than a month. This week, Fragment will expand beyond usernames. Telegram's next step is to build a set of decentralized tools, including non-custodial wallets and decentralized exchanges for millions of people to securely trade and store cryptocurrencies. This way we can fix the wrongs caused by the excessive centralization, which let down hundreds of thousands of cryptocurrency users. The time when the inefficiencies of legacy platforms justified centralization should be long gone. With technologies like TON reaching their potential, the blockchain industry should be finally able to deliver on its core mission – giving the power back to the people.

Loved the teaser trailer and gameplay of this game. Can't wait to try it out. 🎮 The game's called Wizard with a Gun. It's an online coop sandbox survival game set in a magical wilderness wrought with dangerous creatures and arcane mysteries. It's a journey to collect, craft, and outfit your wizard however you see fit as you explore the unknown. Carefully design weapons, bullets, and furnishings for your tower home but try not to burn it all down as the magic you wield escalates beyond your control. Stardew Valley is one of my most favorite indie games. It's an open ended farming RPG developed by Eric "ConcernedApe" Barone. You take the role of a character who takes over his deceased grandfather's dilapidated farm in a place known as Stardew Valley. It allows you to grow crops, raise livestock, fish, cook, mine and forage, and socialize with the townspeople, including the ability to marry and have children. It allows up to four players to play online together. Barone developed Stardew Valley by himself over four years and released on it Feb 26/2016 It's a paid game but here's a cracked version • <https://t.me/c/1156511084/186> #StardewValley #EricBarone #Games @Dagmawi_Babi

Uploading the last row of The Unity Project Mural...

Uploaded! 🎉

The 5th and last row of this season's The Unity Project Mural is out now. 🎉 Completing the month long art contribution & collaboration event & ending it gorgeously. 🎉 It features pretty unique and original works from some of the most incredible artists I've ever met. 🎉 It was such an honor and privilege meeting all the kind and creative artists that originated and contributed to the Mural. 🎉 Be sure to show all of them love and support when you're visiting the site. 🎉 The Unity Project Mural • art.dagmawibabi.com Enjoy! 🎉 #TheUnityProjectMural @Dagmawi_Babi

A letter of gratitude 🎉 To the artists: Hey artists who've contributed 🎉 I'd like to thank you all for collaborating and submitting your original works. You are all wonderful and epic. I'm a huge fan of each and everyone of you! Thank you for fulfilling my curiosity and also for blowing my mind with your creativity. People have loved your works, in fact 10,300+ of them showed up to the site to check them out. And it's all because of you! The site is completely void and blank if it wasn't for the beautiful colors you all put in! Thank you all so very much! 🎉 To my supporters: Hey you lovely people 🎉 I'm very glad that thousands of you visited the site everyday and showed your love and support to me and all the artists. We did it all to show your eyes beauty and to fill your heart with unity. We are so happy that you loved our works. It meant everything to us! Thanks for being loyal supporters and fans. You are all beautiful. 🎉 #TheUnityProjectMural @Dagmawi_Babi

The last ending row features pretty gorgeous pieces that flow and connect so smooth. The originality and creativity is just insane! 🎉 Go and check the fifth row out now in higher quality on The Unity Project Mural and on your way out there support the artists. 🎉 Link • art.dagmawibabi.com #TheUnityProjectMural @Dagmawi_Babi

One of my absolute most favorite open source project is called SerenityOS which is a love letter to 90's UI with a custom Unix-like core. Roughly speaking, the goal is a marriage between the aesthetic of late 90's productivity software and the power-user accessibility of late 2000s. I love the project mostly because of the main maintainer called Andrew Klang who is an incredible engineer and a recovering addict. His life story is really inspiring. Which got me hooked up on his story and connection to SerenityOS and LadyBird browser. Links • SerenityOS.org #SerenityOS #AndreasKling #OSS @Dagmawi_Babi

"At that moment the curtain of the temple was torn in two from top to bottom. The earth shook, the rocks split" - Matthew 27:51 The curtain symbolized the separation of God and man. Only the high priest and direct descendant of Aaron could walk through the curtain on the Day of Atonement to sprinkle the blood of the atoning sacrifice. Because of our sin, man is not worthy to stand in the presence of our Holy God. When the veil was torn during the crucifixion, that meant the separation between God and humanity was done. The blood of Jesus on that cross broke down the enmity between us and God #Spiritual @Dagmawi Babi

I've prepared this precise and short article informing you about how governments handle internet censorships. So Ethiopia signed an agreement a couple of years ago during the Internet Governance Forum (IGF) to not ban internet access in the country, the agreement and event was held in Addis Ababa. Now here's the twist. The government doesn't really turn off access to the internet because that would be a direct violation of the agreement but what they do is shift to a method called Throttling. Throttling is when our ISP, Ethio Telecom, intentionally limits our connection's bandwidth. Providers do this for several reasons, and it usually manifests as a sloth-

like connection. So it looks like your apps and sites are still running while infact the interference level is at a high level that makes using the internet painful. So content becomes so low res or loads indefinitely. This method is so good that even network engineers that monitor internet censorships find it difficult to trace and pin point. So don't expect your data to be turned off but instead connect so horribly bad you basically have no access to the internet. I am constantly surrounded with people that have incredibly different beliefs, religion, way of life and habits than me. I chose this life. But I've found it pretty chaotic, hectic and even damaging at times. I've found myself alone and lonely because no one around me is trying to go after the same kind of goals, or trying to live the same way of life. It's very challenging to form my own identity being overwhelmed by so many ideas and life styles. Having relationships with people (friends, family, partner) that have the same religion, belief, goals and life style as you can be a very therapeutic and easy way of life. There won't be huge gaps of beliefs, religion, way of life or habbits to be an extra obstacle in your attempt to bond and connect. If you date, date someone who's got the same religion as you, if u have friends, be surrounded with higher achieving people that have the same goals as you. It makes life incredibly easy and takes the tension off your mind of trying to fit in, bond and connect. I constantly make my life harder and have been choosing conflicting paths most of my adult life. It's pretty chaotic in my head, but I've found beauty in the trying to understand this chaos and I've found strength and patience in going the extra mile needed to connect and bond with my friends, partner and family. I do wish things were easier so connecting and bonding can come off super easy, but love is love. I've loved the conflicting and different people I'm surrounded with and going that extra walk to reach connections and bond has been my normal that I've found rest in it. #Advices #Thoughts @Dagmawi_Babi

Instead of coming to earth as a pampered, privileged ruler, Jesus was born in meekness, as one of us. He is approachable, accessible, available—no palace gates bar the way to Him; no ring of guards prevents our approach. The King of kings came humbly, and His first bed was a manger. “And she brought forth her firstborn son, and wrapped him in swaddling clothes, and laid him in a manger; because there was no room for them in the inn.” — Luke 2:7 (KJV) Merry Christmas. ☐ #Christmas @Dagmawi_Babi

Here's a very profound but easily overlooked concept. You don't have to give up smoking, drinking, drugs sex, stealing, lying, cheating, addictions, and so many more bad habits to be a Christian. You become a Christian just as you are right now. You meet Jesus just the exact way you are. With your filth, addictions, issues, history, habits, and much more. You do not clean up to take a shower. It is the shower that cleans you up. You do not become a better person then start being a Christian and going to church. You become a Christian then you become a better person. God loves and accepts you just the way you are, but he doesn't want you to stay the same. And he will point the wrong things out as you walk with him. And he will also give you the power, grace and love to overcome all of those. It is better to sin with Jesus around than to sin with the devil around. #Thoughts #Advices @Dagmawi_Babi

It would be pretty odd to be thirsty in a world where drinks don't exist. It would be pretty peculiar to be hungry in a world where food doesn't exist. It would be quiet weird to crave God in a world where God doesn't exist. #Thoughts @Dagmawi_Babi

Well I guess Imma have to introduce you to the app and keep you updated. ☺ This'll be fun.

☺☺☺

So let me introduce you to the app. I have no official name for it so far but I call it Philomena as a placeholder (based on the name of the daughter of the Invoker in Dota the series) I am planning to build a secure social app where anonymity is also promoted. I want it to be an all in one social app where users get everything all in one place. I want it to have a very minimal design and navigated by the simplest gestures. I want all the features to be placed so well keeping the minimal design that they only exist when you really want them to. In terms of tech, I'm using flutter for the frontend and NodeJS and MongoDB for the backend. #Philomena #MyProjects @Dagmawi_Babi

So far I've created some basic functionalities and some tools inside it. The following is a list of functionalities I've implemented and are working well. 1. Sign up and Login 2. Posting Text 3. Liking/Disliking Posts 4. Deleting Posts 5. Searching Posts & Accounts 6. Like Notifications 7. Fetching Current News Headlines, Trending Movies and Crypto Prices 8. A minimal weather app 9. A Basic Music Player 10. Tagging Posts as NSFW, Spoiler or Hidden #Philomena #MyProjects @Dagmawi_Babi

These are the main pages of the app 1. Sign Up Page 2. Login Page 3. Main Feed 4. New Post Page 5. Comments Page 6. Search Page 7. Chats Page 8. Notifications Page 9. Self Profile Page 10. Other's Profile Page #Philomena #MyProjects @Dagmawi_Babi

Post Related Functionalities 1. You can post text only so far [Pic 1, 2 & 3] 2. You can add tags and flair like NSFW, Spoiler and Hidden to your posts [Pic 4] 3. The tagged posts are displayed hidden in the feed but reveal themselves when you click on them and enter the comments Page [Pic 6] 4. Clicking the 3 dots on each post brings out a glassmorphic design preview of the post with more options [Pic 7] 5. In the future there will be a bookmarking or saving button to save posts [Pic 8] #Philomena #MyProjects @Dagmawi_Babi

Search Page Related Functionalities 1. You can search for accounts and posts [Pic 1] 2. You can click on the News Pill Button and you get the current headlines around the topics of General, Entertainment and Tech. Clicking on each news will open the news in full screen. [Pic 2 & 3] 3. Clicking on the Movies Pill Button brings out trending movies and series. You can sort by daily or weekly. You can click on each movie/series to get detailed info and rating about the movie/series. And if you like their poster you can also download it. [Pic 4, 5, 6, 7, & 8] 4. If you click on the Crypto Pill Button you will get the current price of all cryptos. Clicking on any of them brings out a glassmorphic designed page showing that specific crypto's prices, and other stats. [Pic 9 & 10] #Philomena #MyProjects @Dagmawi_Babi

Chat Page UI This page only has the basic UI done. 1. Chats List & Add New Chat Button at the

bottom [Pic 1] 2. What opening New Chats would look like [Pic 2] 3. What chats and selecting texts would look like. [Pic 3] #Philomena #MyProjects @Dagmawi_Babi

Weather App 1. The Main Feed Page shows the current weather of your current location in a small banner at the top of all posts. [Pic 1] 2. Clicking on the Weather Bar brings out a glassmorphic designed page where more useful information about the current weather is displayed. Wind speed, humidity, UV Index, Sunrise, Moonset and so much more. [Pic 2] #Philomena #MyProjects @Dagmawi_Babi

Music Player App 1. When you play music from chats or posts or device the music player hovers at the bottom of the screen with the most basic information and control. [Pic 1] 2. Clicking on the Music Bar will take you to the music player's fullscreen page enabling complete control over the music. [Pic 2] 3. Currently you can browse and play only device music. But streaming music is soon to be done. [Pic 3] 4. There will be a mini player page that makes it aesthetic for screenshots and sharing cause most people do take screenshots of their current fav songs and post on other socials. [Pic 4] #Philomena #MyProjects @Dagmawi_Babi

So as you can see the app is at it's earliest of versions. I've only been coding this for just two weeks on and off due to exams and class. But other than that, I plan on polishing it to the edge of it and I'll be implementing your feedbacks and comments. So that it becomes a very beautiful but subtly powerful app for us to use. I will be posting updates as I build them up. But in the mean time please don't hesitate to text me your feature ideas and design improvements. I'm not focused on making it make money for now, I just want it to be used well enough that it solves lots of problems for most of us. My Link • @DagmawiBabi #Philomena #MyProjects @Dagmawi_Babi

Here's a (blurry) screen recording of the app on my device. The app is more aesthetic in person than the screen recording but you'll get the functionality and some animations of the app. Enjoy 📺 #Philomena #MyProjects @Dagmawi_Babi

Here's a higher quality screen recording of the app on my device. The app is still more aesthetic in person than the screen recording but I guess you can see details of the UI better and enjoy the animations more smoothly. Enjoy! 📺 #Philomena #MyProjects @Dagmawi_Babi

The 12 Jewels that build up the New Jerusalem in the Bible. Rev 21 (AMP) ----- ¹⁸ The wall was built of jasper, while the city pure gold, clear and transparent like glass. ¹⁹ The foundation of the wall of the city were ornamented with all of the precious stones. The first foundation was jasper, the second sapphire, the third chalcedony (or white agate), the fourth emerald, ²⁰ The fifth onyx, the sixth sardius, the seventh chrysolite, the eighth beryl, the ninth topaz, the tenth chrysoprase, the eleventh jacinth, the twelfth amethyst. ²¹ And the twelve gates were twelve pearls, each separate gate being built of one solid pearl. And the main street (the Broadway) of the city was of gold as pure and translucent as glass. #Scripture @Dagmawi_Babi

“פחד יהוה חכמה” — Job 28:28 “The fear of the Lord, that is wisdom” — Job 28:28 I love how this scripture mixes FEAR with WISDOM. Fear is portrayed as something bad and evil. As if we should all be FEARLESS. And if you fear something you are wrong. But this goes on and says that FEARING the right things is part of being WISE. FEAR isn't bad, it's guiding. #Scripture @Dagmawi_Babi

Communities UI 1. Communities will be a big part of this social media and so I made them a beautiful discord-like UI where you can browse through communities and groups. 2. You can click on any community and check out general info about them like the number of members, profile pictures, descriptions and so on... 3. Communities can also set introduction messages, Rules and FAQ section to be displayed for new comers. #Philomena #MyProjects @Dagmawi_Babi

Linkified Texts 1. You can now post text that contains clickable links. 2. When clicking the links, the app will open each type of link to their respectable apps or browser. #Philomena #MyProjects @Dagmawi_Babi

Profile View 1. You can now go through and check all accounts that you follow or that are following you. 2. The following and followers number updates in realtime. 3. New profiles will start with boilerplate profile placeholders #Philomena #MyProjects @Dagmawi_Babi

Microsoft has unveiled a new version of its Bing search engine and Edge browser with technology from OpenAI. The new Bing, which runs on the OpenAI language model, a more advanced model than ChatGPT, can switch in and out of chat mode. The new Edge browser adds

an AI-powered Bing bot for chatting and texting, which can summarize Web pages and respond to queries in conversational form. Responses are accompanied by links to sources so users can see where the information came from. The new version of Bing is still available as a trial, but the company hopes to give full access to millions of users in the coming weeks, Bloomberg.

I had final exam and final projects these past two weeks and will continue having them the coming week. So I couldn't do alot of updates to Philomena, I only implemented one major feature and some minor performance improvements...

Books Search • You can search for books using their titles, published dates, titles, authors and so many ways • You can get previews about the books and read a couple of pages • You can get an overview description of the books • You can checkout the languages, the publishers, the numbers of pages and many more information about the books #Philomena #MyProjects @Dagmawi_Babi

Here's how it looks with the animations I've implemented. #Philomena #MyProjects @Dagmawi_Babi

This's just a very early version of the books category, it's one of the sub features I want to advance incredibly by adding features like bookmarking books, downloading them, having audiobooks integrated, sharing books, reviewing them and so much more. ☐ But for now this's enough for a first iteration. And I know the UI isn't my best, so I will eventually improve upon it. ☐ Till then, hope you like it. ☐ #Philomena #MyProjects @Dagmawi_Babi

So in AASTU we have a subject called IETP which stands for Integrated Engineering Team Project. You are basically teamed up with other students from other fields and you're required to come up with a product or service that you'll build up and get evaluated. There were 100 groups this time, each getting a budget of 10,000 birr to buy whatever your idea required to make a prototype. Each group is composed of architectural, software, civil, electrical, mechanical, chemical and environmental students. And each have to make some part of the project. And here's what me and my group made...

We decided to make a Smart Dorm. Here are the models. So the features are • Every dorm is locked and unlocked by an RFID card/bracelet • Each dorm has a motion detector that locks the door for you if you forgot to lock it or if it senses motion • You can control the lights and door through wifi using an app • There's a display inside that shows you the room's temperature and humidity. Which also warns you if it's in toxic state #AASTU #IETP #SmartDorm @Dagmawi_Babi

Here's the real life scale model of our dorms in AASTU. And our civil and arch teammates made it #AASTU #IETP #SmartDorm @Dagmawi_Babi

Here are the components I bought for the project, cost about 7,000 birr #AASTU #IETP #SmartDorm @Dagmawi_Babi

Here's the circuit and prototype I made...

I built the whole circuitry. Which involved a Servo, RFID scanner, Motion Sensor, Sound Sensor and DHT11 • The Servo is what closes and opens the door. • The RFID scanner is at the door and allows people in and out • The ultrasonic sensor measures distances and checks proximity to the door and hallway • The sound Sensor senses sounds and turns the lights on and off • A DHT11 sensor which measures humidity and temperature • An OLED screen which shows all the room information and status #AASTU #IETP #SmartDorm @Dagmawi_Babi

Here is the project integrated and working. • Shows the automatic door opening and closing • The motion detection and security warning • The RFID door opening and locking • Wirelessly controlling the door and lights of the dorm through an app • The temperature and humidity status of the the room • Turning the lights of the dorm using sound #AASTU #IETP #SmartDorm @Dagmawi_Babi

This is me and my teammates meeting up and presenting our ideas and features to our advisor before we present to the evaluators. #AASTU #IETP #SmartDorm @Dagmawi_Babi

This's a simple bracelet key used to open and close the dorms #AASTU #IETP #SmartDorm @Dagmawi_Babi

This is the printed banner we made about our project. #AASTU #IETP #SmartDorm

@Dagmawi_Babi

We then made a 3 minute video, and finally presented everything we made to our evaluators this evening. And they questioned us and they tested our system and they evaluated the structure, the components, the electronics, the software and business side of the project much more stuff. And they loved it, and it went really good. The picture and video is of me and my teammates right after the presentation and demonstration. 📷 #AASTU #IETP #SmartDorm @Dagmawi_Babi

If you want to read more details about the project, you can read this file and get details of the project or visit our website #AASTU #IETP #SmartDorm @Dagmawi_Babi

Here's the 3 minute video one of our teammates made to generalize our project and to show certain parts of it. #AASTU #IETP #SmartDorm @Dagmawi_Babi

When talking about forgiveness from God. It feels easy. Do I just confess my sins and repent and that's it? I'm forgiven? And that being true makes it look soo easy. But one thing we often miss looking at is that this is easy for you and me. To just confess and repent. It's easy for us but the amount of pain and suffering Jesus had to go through to make it this easy for us to be instantly forgiven is unmentionable. What made it possible for God to forgive us this easily is the fact that Jesus suffered insanely. It wasn't easy for him to go through all that, but he did make it easy for us to be forgiven and accepted. This forgiveness is made free for all of us, but it isn't cheap. It was paid for by the blood and tears of Jesus Christ. ☐ #Spiritual #Thoughts #Lessons #LifeLessons @Dagmawi_Babi

And connected to this is the constant bothering of the devil in your ears. Telling you that it can't be this easy, to be forgiven this fast. He'll often come and tell you that there's no physical proof of your forgiveness. He'll tell you that you're just the same person, guilt tripping you into thinking how many times you're going to keep sinning and keep asking for forgiveness. He'll often make the case that sin isn't external, but it is what you are. That you are fighting yourself and your identity when you're asking for forgiveness. Making you think that you are being apologetic for being yourself. But the case isn't that. The devil may put in some sprinkle of truth, but he's inevitably a liar. It's what he does, it's what he is. So even if you feel like he's being honest, he's lying to you. And so, even if you feel like you can't keep sinning and asking for forgiveness, no one is keeping count of your sins except the devil and you. The moment you ask for forgiveness, you are forgiven and God's looking at you like you had never sinned before, with new eyes. And I know it's not easy to picture that cause we often fail to look at people the same after we forgive them. But for God it's made possible cause the amount of sacrifice he made for us makes it possible. And so when the devil whispers just know that the grace of God is much more than what you or the devil can count. #Spiritual #Thoughts #Lessons #LifeLessons @Dagmawi_Babi

You can't know God through Bible Study. Bible study gives you knowledge about God, But it is Obedience that gives you knowledge of God. And it is far better to have knowledge of God than to know about him. #Spiritual #Lessons @Dagmawi_Babi

Uploading this week's Philomena update soon...

Network is being annoying for me. I guess I'll post it tmo. Sorry guys. ☐

So as promised here is this week's Philomena update...

Reddit Search Category ☐ ☐ You can now browse your favorite subreddits from Philomena. The following are the new features 0. No Ads. You can browse reddit with no distraction of ads getting in between posts. 1. You can search for any subreddit you want and it's content will be present to you smoothly 2. You can swipe and browse through a preset list of aesthetic and

graphical subreddits 3. You can sort by time (hourly, daily, monthly, yearly) and by ratings (new, rising, top) to filter out your feed to your needs 4. The minimal layout gives distraction free browsing experience by only showing you the content you want. So if you're an artist for example, you can just get inspired as it presents only the content to you. I have to say that I've had much more fun browsing my favorite subreddits this way. And the aesthetics and theming is genuinely beautiful and comfortable. #Philomena #SideProjects @Dagmawi_Babi

Choosing Search Categories This's one of the suggestions you guys asked for and it's now implemented. So just like you suggested; Instead of always having all the search categories, you can choose which ones you'd like to use and pin them and all the rest will hide away to better customize your search and add to the minimal design. Each category is color coded for aesthetics and better identification. #Philomena #SideProjects @Dagmawi_Babi

Here's how it looks with the animations I've implemented. It genuinely looks beautiful in person. ☺ I'm personally loving it. ☺ #Philomena #SideProjects @Dagmawi_Babi

Just got access to Bard. Will try it out and tell you #Bard #Google #AI @Dagmawi_Babi

Some of the first prompts I tried on Bard. Here are some of my impressions • To be honest I like it. It's significantly fast but the weird thing is it feels fake. I can straightaway tell if I'm talking to an AI or not. It feels less genuine maybe because it doesn't have the typing animation or because the answers come at instant or stg. • It sucked when writing code too. It got a lot of things wrong. But that's not blamable because it was trained on a much smaller dataset than GPT-4. • Not only does it come up with answers almost at an instance but it also comes up with multiple iterations of the answer too, up to three different drafts. So that's cool. • "The Lord is my programmer and I shall not crash" cracked me up ☺ #BardAI #Google #AI @Dagmawi_Babi

• It is the least bit creative. I get more no's and I cant's than results. Ofc it's in experimental mode but it's still very weak. #BardAI #Google #AI @Dagmawi_Babi

• It feels like a bot or as if someone prewrote the answers to it. It feels very meh to be honest. • It doesn't keep context, and I think every single prompt is run through another set of prompts cause when I asked it to remember what I asked it, it only presented things I didn't ask, but things the owners would've asked it to act correctly • And I think it's the fact that it's not integrated seamlessly to use other Google resources that it made it this weak. If it really did use some of Google's services I think it would be really cool. • And the last Amharic Joke it generated is dark asf. ☹ #BardAI #Google #AI @Dagmawi_Babi

The following are the comparisons of Bing's Image Creation using Dall-E and Adobe's Firefly. I used the same prompt: A human with a cat head eating Sushi. And the results are as follows...

So I was curious why these image generating AI's mess up when it comes to hands and fingers. So I tried researching about it and here's what I found: AI image generators such as DALL-E, Midjourney, and Stable Diffusion are notorious for adding one too many fingers or morphing digits together, making them look nightmarish. Part of the reason AI image generators do so badly with hands is that in the datasets used to train the image synthesizers, humans display their extremities less visibly than their faces, according to Stability AI spokesperson. "Hands

also tend to be much smaller in the source images, as they are relatively rarely visible in large form.” The 2D image generators also struggle to conceptualize the 3D geometry of a hand. “They’ve got the hang of the general idea of a hand. It has a palm, fingers and nails but none of these models actually understand what the full thing is,” #AI #AIArt #Hands #AIHands #Questions @Dagmawi_Babi

So I've had members from this channel approach me in person and talk to me about why I'm hating on Elon and stuff. So I should may be address this here. I'm not just hating on Elon, I'm trying to show you how flawed he is, and how manipulative he could be. He is quiet literally a hero of mine, I admire him, and aspire to achieve things he has. But I don't want to be blinded by that, and so shouldn't you. Yes, it's true, he did incredible things, and will keep doing so. But that doesn't mean he has the right intentions or is honest in most most of his ways of doing those things. That's why I'm showing you all the evidences of him saying something people would love, gains their support, then does totally the opposite and does whatever tf he wants despite what anyone else wants. So support and like him, but don't think he's entirely good, or in anyway better than most top 3/5 billionaires or tech influencers. You up?

I've been spending the past few days learning Machine Learning, Neural Nets and AI stuff. And this's the first properly working project I did. It's basically equivalent to GPT-2 but horribly optimized and specifcily training on one material. So I wrote this neural net, line by line, understanding it all, and finally trained it on all of Shakespeare's works to generate infinitely more Shakespeare lines. #AI #NeuralNets #MyProjects #GPT @Dagmawi_Babi

And finally based on what I learned so far, I changed up some parameters and trained the neural network on the King James Version of the Bible. Unlike the Shakespeare model which uses 32 blocks of characters to predict the next character in the sequence. This uses 100 characters to predict the next character, and at the same time doing 50 parallel trainings at the same time instead of 16. It is currently training like this for 10,000 times to hopefully predict a 500 character long "bible verse". I tried running this model on my PC but took forever. So I'm running it in the cloud and it's still taking so long, almost an hour and it's only 3000 training rounds in. Will update you on what it generates. #AI #NeuralNets @Dagmawi_Babi

So to put things in perspective [Pic 1] What my model generated after just 100 rounds of training, using 32 blocks of characters each time to predict the next character to generate the 500 charactee long Shakespeare quote. [Pic 2 & 3] What my neural net produced after training for 10,000 times. With the same 32 long block of characters to predict each sequence of characters. [Summary] So you can see how lengthy trainings affect the output of the neural net. It basically went from trying to make normal sentences to actually being legible, make sense and even mimic the style of Shakespeare. #AI #NeuralNets @Dagmawi_Babi

Update on training my neural net on the King James Version of The Bible. Training at 4000th round. 100 characters at once, 50 sets of 100 characters in parallel. Now I'm just worried that I didn't give it more training rounds since the content is just so much more than just Shakespeare's works. To compensate for that I did try to make the context 100 characters long. So we'll see. So I'm just scared that it might not generate pretty specific and mind blowing results. But I could be wrong. #AI #NeuralNets @Dagmawi_Babi

Update ☐ Training at 8000 round Next update is going to be the result. #AI #NeuralNets @Dagmawi_Babi

Training finished ☐ Uploading result...

This is the result of my neural net training on The King James Version of The Bible. ☐☐ #AI #NeuralNets @Dagmawi_Babi

With no further Ado Here are some original AI generated bible verses and chapters. #AI #NeuralNets @Dagmawi_Babi

Here are some more legible and slightly more coherent AI generated bible verses. I tried making the output a bit legible and tried making the model generate entire chapters at once, with each verse having a random token length from 100 to 250 characters. And each chapter having around 10 verses So this's prolly the best 10,000 training rounds and 100 contextual references get. #AI #NeuralNets @Dagmawi_Babi

I've now started training the models 100,000 rounds and the ShakespearAI will use 500 characters to predict new characters while the KJVBibleAI one will use 1000 characters ☐ It's gonna take so long, hopefully it finishes by tomorrow and shows us much more coherent and sensible verses. ☐ Will show you results tmo. ☐ Good night ☐ #AI #NeuralNets @Dagmawi_Babi

So Google Colab has been running so slow to train my neural net model. Been taking forever and it's also been shutting down and what not. So I just left it alone and just spent the day learning about other ML concepts. And it was just now while I was browsing inside Google Colab that I found that I could've used a GPU or a TPU.🦟🦟 So now I'm watching it train 10k rounds in like 10 minutes which took about 40 minutes on CPU. Well I guess I can finally train my model at 100k rounds and 1000 token blocks. #AI #NeuralNets @Dagmawi_Babi

The training has halted after 95,900 training rounds. 🦟🦟 But I've managed to make a log file of the training so we can see 1000 character long generated "scriptures" at 100 intervals of the training. Here's the long file...

You can see how it drastically changed from jibereish to, Bible sounding sentences at 50k training, and then very specific and really great quotes at around 95k trainings.

So you browse through the training log and see it form sentences at each interval. And then sound more biblical. And more specifically KJV. #AI #NeuralNets @Dagmawi_Babi

Someone from our community asked me to try it on Amharic Content, and so here it goes. I found an Amharic News Headlines dataset and formatted it a bit to make it trainable for my Neural Net. I got lazy so I didn't remove some symbols and stuff but this'll do. So I've started training on a 175MB text file of Amharic News Paper Headlines. I'm keeping a log file so we can see how it's improving even if it stops. I'm running 100k rounds, uses 600 block of characters to predict each coming character and 16 parallel GPU computations to make it a bit faster. Will update you on the result. #AI #NeuralNets @Dagmawi_Babi

Here's the training log up until it stopped. You can see it actually did generate really nice coherent Amharic phrases and sentences. Here's the full log...

So you can browse through the training log and see it form sentences at each interval. And then sound more sensible and then become more News-Like #AI #NeuralNets @Dagmawi_Babi

Yesterday morning, I discovered an incredible podcast. And what's cool is each episode is a story of its own, you can listen in any order you want. ☺️ It's called Welcome To Night Vale. It's a delightfully bizarre podcast that takes you on a journey to the fictional town in the desert called Night Vale, where strange occurrences are the norm. ☺️ With a blend of humor, horror, and surrealism, it invites you to join the town's radio host, Cecil Palmer, as he delivers the news and updates on the community's bizarre happenings. ☺️ It feels like tuning in to a community radio station from another dimension, where the impossible is just another day in Night Vale. ☺️ Highly addictive listening experience. So if you're interested start with Episode 13. It's perfection ☺️ Then move into 1, 19, 20, 25, 28, 33, 49, 71, 87. Or anyother you feel like you'd like. I couldn't stop listening to it all-day long. ☺️ #WelcomeToNightVale #Podcasts @Dagmawi_Babi

"Death is only the end if you assume the story is about you." "No one is alone in Night Vale. We all have our own ghosts and monsters to face." "You are beautiful when you do beautiful things." "The future is always several hours later than you think it is." "The Sheriff's Secret Police would like to remind all citizens to ignore the signs of the coming apocalypse and remain calm." "We are all of us monsters. We are none of us monsters." "The sunsets here are gorgeous, and I'm grateful for them. But it's hard to appreciate something when you know it could kill you." #NightVale #Quotes @Dagmawi_Babi

"The sunsets here are gorgeous, and I'm grateful for them. But it's hard to appreciate something when you know it could kill you." "The truth is a horrible thing, but not compared to the lies we tell ourselves." "In Night Vale, reality is not what it seems, and neither are you." "We are all temporary arrangements of atoms, dancing for a brief while in the spotlight of consciousness." "The past is gone, and cannot harm you anymore. And while the future is fast coming for you, it always flinches first, and settles in as the gentle present." "We are not at war with the desert. That's impossible. We are simply reorganizing it." "The world is full of magic things, patiently waiting for our senses to grow sharper." "Do not be afraid of the dark, for that is where the real magic lies." "We do not look back here in Night Vale. We do not look ahead. We look at what is, what is right here, right now, in front of us." #NightVale #Quotes @Dagmawi_Babi

So I got that podcast fever and wrote a pilot episode for a funny horror podcast, same style and format as Night Vale. But it's centered around AASTU. And instead of a radio show it feels like a morning announcement. So I need feedback. I'll post it here, and can anyone who reads read it and tell me what you think?

Read it out and comment under here with what you think about it? And what to improve? #AASTUNights #MyPodcasts @Dagmawi_Babi

Go on, let me know, don't be shy. ☐

Alright and now, the podcast version. I've been cringing listening to it. But let's see what y'all think?...

Listen to it and tell me what to change.

Here's the cover art of the podcast. It kind of gets the eerie horror night vibes of AASTU.

Made this little poster

What my lovely lil cousin made. ☐ So lovely. Thank you nochaye. ☐

So I launched the podcast, in one of AASTU's most popular channels that I manage. Let's hope they like it. ☐

AASTU Nights A funny horror podcast based on AASTU. The podcast feels like you're listening to the morning announcements of school. Where your host, that goes by the name THE HOST, talks about the latest news and events that are happening in AASTU. The format is pretty lively. It has the following sections: • Mystery Stories • University News • Club Announcement • Event Advertisements • Interview with Students • The Weather, which is a song recommendation • And so much more dark stories So sit back and enjoy, as THE HOST, guides you through the university. ☐ #AASTUNights #MyPodcasts @Dagmawi_Babi

Episode 1 - Orientation Join in this week's announcement where we welcome fresh students and tell them all about the quirky, dark, mysterious and terrifying places and events at AASTU. Some announcement from our Art club and a reminder from the university police are included. Timeline • 00:32 - Welcome Freshmen • 02:53 - Art Club Event • 03:53 - Weather • 07:38 - After Weather • 10:22 - University Police Notice The Weather was "The blackest bouquet" by Leonell Cassio Enjoy. ☐ #AASTUNights #MyPodcasts @Dagmawi_Babi

They loved it. My DM's were blowing up from people wanting to write bits for the episodes. So I guess now we make a witty horror podcast. ☐ This's gonna be fun. Let's see how I can add another task to my already busy life. ☐ I'm glad it inspired. So I'm gonna make it limited to see how capable I am. So I'm going to produce 10 episodes. With stories contributed from them and me. And You'll hear it here too. ☐ Thanks for the feedback and compliments you guys. ☐ I'm super lucky that I have a community like u where I can test run my sites, apps, and other cringe stuff too. And get real good feedback. Nurulgn ☐ #AASTUNights #MyPodcasts @Dagmawi_Babi

Well.....

LLMs just hit a major milestone with the release of the new "Generative agents" paper. By using LLMs, generative agents were able to simulate human-like behavior in an interactive sandbox inspired by The Sims. The agent architecture extends Language Models to store a complete record of the agent's experiences using natural language, synthesize those memories over time into higher-level reflections, and retrieve them dynamically to plan behavior. Demo • https://reverie.herokuapp.com/arXiv_Demo/# In Short • They basically simulated an entire society, and each individual is an AutoGPT #AI #AutoGPT #Games @Dagmawi_Babi

Here's the research paper The paper describes the development of generative agents that simulate human behavior in interactive environments. They have the potential to improve our understanding of social dynamics and enhance the design of interactive systems. The authors highlight their various applications and argue for responsible and transparent design practices. #GenerativeAgents #AI @Dagmawi_Babi

This is what an AutoGPT is TL;DR: • In short AutoGPT uses GPT-4 and GPT-3.5 via API to create full projects by iterating on its own prompts and by critically reviewing and building upon them in each iteration. It is able to read and write files, browse the web and review the results of its own prompts, as well as combining it with the said prompt history. AutoGPT extends the capabilities of GPT by providing a more automated approach to fine-tuning the model for specific tasks, such as text completion, question answering, and text classification. It uses a technique called neural architecture search (NAS) to automatically discover the best architecture for the task at hand, and then fine-tunes the model using a combination of supervised and unsupervised learning. Demo and Code • <https://github.com/Torantulino/AutoGPT> Features • Internet access for searches and information gathering • Long-Term and Short-Term memory management • GPT-4 instances for text generation • Access to popular websites and platforms • File storage and summarization with GPT-3.5 #AutoGPT #AI @Dagmawi_Babi

Went component shopping again. Finally bought an ESP32, and an ESP32 Cam. Gonna be making pretty cool projects ☺ #Electronics @Dagmawi_Babi

I'm going to summarize what y'all voted for in our yesterday's would you rather game, as I usually like to summarize surveys 🐼 But before the summary, I'd like to tell y'all that y'all are fucked up 🐼 But here it goes... So most of y'all would like to be fluent in all languages, drive a Tesla, are living in a robot ruled post apocalyptic world with super powers to control time and ability to communicate with animals. Most of you would love to witness the birth of universes, while understanding complex concepts. Would like to know the exact date Christ returns, and would love to witness past biblical events. Most of you are genetically enhanced as in you'd have fingers as long as legs, vaginal palms, have teeth for pubes, dick sized nipples, a horizontal butt crack but cuts all over your body (probably due to living in a robot ruled apocalyptic world) But I guess living in that kinda world, with that kinda body would fuck y'all up psychologically since you'd fuck ur girlfriend in your mom's body and would get mind-numbing BJ's from your dad. Then would also guide your dad into your mom. You'd also fuck a dog, and somehow cum when scared. Would fuck a mermaid, and to end your day of all this miserable life you would drink a glass of piss and milk. 🐼 #Survey #WYR #CommunityGames @Dagmawi_Babi

Grab a beer with your dad and dip into nostalgia with your pirate ship which's in the living room. Look at him growing into an old man. Meanwhile, your mom's sitting on the other side making morbid faces while we talk about snakes they found in the countryside. She often complains how soon I've grown when I grabbed my second beer. She says a few years back, I had no interest in either coffee nor any alcoholic beverages even my food taste has changed. You're always a child to your mother. She bathed you and wrapped you in her arms ever since she brought you to this world. During thunderstorms, you used to fall asleep with her caressing your head and all of a sudden you're fond of the rainy season—because deep in your heart, you yearn to feel loved that intensely. Your dad tells you to chug your third beer and she tuts and the conversation keeps going. Even though it has always been vivid how my constant rage is similar to his, his moments of joy and his expressions and his loud voice also depicts we are not far apart after all. "Back when I used to chop grass to feed the cattle..," he shrieks and keeps on reminiscing how he once was a little boy afraid of the gnawing jaws of the big world he came unto. He laughs every now and then and waves his hands uncontrollably to make gestures as visual aids. It's entertaining being part of it. And, once in a while, you can see gloom in his eyes when he mentions his parents whom departed when he was just a little boy. He then snaps back to his drunken tales. Back when he was a young lad, when the world was in the grip of his palms and when he was the ladies man and all. It's funny how fast time strides forward. Forty years

ago, he was just a helpless orphan who had a heavy knot in his heart. Thirty five years back, he came to the city to live by his uncle and try to sustain himself. Twenty three years ago, he got married. And, with just a snap, here we are now. The present. As much as it feels surreal, the uncertainties he has stumbled upon are markers which help me have faith that I'll end up somewhere in the future. Mom gives me a stare when I opened my fifth bottle and she also proceeds to tell us how she was the smartest girl in her class and about her childhood friends and gets lost in wonderment of where they could've been right now. From her sudden engagement till now, all she did was care for her children. But she was free back then, she had all kinds of hopes and plans. I sometimes wish if my mother was relieved from her duties and proceeded to pursue her career and was left to build a life of her own. She truly deserves every bit of it. But, back here, everyone looks happy. Everyone carrying their own mended hearts abused by brutality throughout the decades. Maybe it wasn't so bad to be here after all.

This brings tears to my eyes. ☹️ Join his channel, melancholy and sadness is guaranteed. He's my friend and in real life he's as chill as ice, then he opens his phone writes something like this. Like goddamn. ☹️

It hits when you realize that most parents are better than their parents. And that they're doing the best they can with what they know. Show them love. They're temporary. ☹️

Since I won't be meeting the hype of today's posts. I'll be posting AASTU Night's second episode tomorrow night. ☐ Just a teaser: the title is Missing Professors ☐

Just saw an incredible video by Tom Scott. ☐ It's crazy. It's the Matrix, but for locusts. • <https://>

www.youtube.com/watch?v=KRIBVykhpc4 Researchers are putting locusts into simulated worlds, both virtual and physical, in the hope that they can figure out how devastating swarms form and move. #Locusts #TomScott @Dagmawi_Babi

You take the blue pill... the story ends, you wake up in your locust swarm and believe whatever you want to believe. You take the red pill... you stay in Wonderland, and I show you how deep the locust sphere goes.

I'm tired. This will be my last post for a bit of while. Hang in there. ☺

Hello ☺

Hey everyone ☺ Thank you so much for all the loving and caring texts and calls you've sent. You all are very wholesome and comforting. That's the kind of stuff that saves lives. I'm glad I've found a person in you all. ☺ I've been busy with so many things, multitasking tons of work, focusing on everything except me and it just took so much soul out of me. And I just started crumbling down in the most important aspects of my life, which are my spirituality and my

relationship with the people I loved. And so I just had to take a break from all work and projects and focus on me, God & the people I loved. ☐ I was also prioritizing everything else above God. And if God loves you, he'll intervene and show you what a life that doesn't prioritize God looks like. I started studying the book of Job during my break and it just showed me everything I am not but should've been. All loss means nothing when with God. So that's another thing I'm going to work on prioritizing. God > every aspect of life. ☐ It is incredible how it was God who stood by my side, through long dark nights and comforted me and talked to me. And that genuinely filled the void in my soul. That's a relationship I can't just runaway from but pursue in commitment. ☐ Another being my digital life. Keeping up on the latest developments in all aspects of life is a chase I can't finish. Digital life is poisonous and I just can't tell you how restful it is staying away from all socials and just doing other things. ☐ One thing I have to tell you is that breaks are important and should be done more often. They're moments of reinventing your self, healing your self and taking a pause and reflecting on your life. And they're key to reorganize the priorities of your life. To set them straight and to work on them. ☐ I seem to be in a very stable state and I've gained back my energy and creativity, and I'll be back to posting healthily soon. ☐ It meant a lot, reading all your comforting texts. It healed some parts of me and I've learnt so much. Thank you all. You are incredible people. ☐ I love all of you who've reached out and comforted me in one way or another. It meant a lot. ☐

TL;DR It's so good to be back baby. ☐

First order of business. Gotta change this dark profile to something really positive and heart warming. And since it was y'all that made my last profile, ahunm go ahead and sketch whatever positive, wholesome and sweet doodle you can. Send them down in this post's comments and let me set it up here. Tho it is mother's day I wanted to point out one of the most powerful scriptures I've ever read:

Isaiah 49 (NLT) ----- 15 "Can a mother forget her nursing child? Can she feel no love for a child she has borne? Can she refuse to care for the child she has born? No, she will not refuse. 16 See, I have written your name on my hand. Ever before me is a picture of Jerusalem's walls in ruins. In simple terms, God is more loving, caring, nurturing and affectionate than even the most sacrificial of mothers. "

"Never! Can a mother forget her nursing child? Can she feel no love for a child she has borne? But even if that were possible, I would not forget you! 16 See, I have written your name on my hand. Ever before me is a picture of Jerusalem's walls in ruins. In simple terms, God is more loving, caring, nurturing and affectionate than even the most sacrificial of mothers. "

#Scripture @Dagmawi_Babi

So for anyone who's not right with their mothers, who's lost a mom, who's been hurt by one, who's felt abandoned and betrayed by a mother. These verses are for you. There's a greater love to experience than a mother's. And for those who think there's no love and sacrifice above a mother's; there is. It is God's love. As he knew us before he made us in the womb: "Before I formed you in the womb I knew you, before you were born I set you apart; I appointed you as a prophet to the nations." — Jer 1:5 (NIV) "As a mother comforts her child, so will I comfort you" — Isa 66:13 (NIV) #Scripture @Dagmawi_Babi

Fall 2025... • The US government combines DeepMind and OpenAI into one Top Secret AI lab. •
Every mention of open source AI models are scrubbed from the internet. • Consumer GPU sales
are halted and the military tracks down unregistered GPU clusters. • The military goes door to
door taking all GPU's from private holders • All communication between the major powers of
the world is cut off. • Sam Altman hasn't been heard from for months • Access to GitHub
repositories containing machine learning source are provoked • Andrej Karpathy has been
taken into a safe house guarded by the navy • Alexa, Siri, Cortana have been shut off • Everyone
is broadcasting their worries using their Neuralink implants • Development of unreal engine
has been ordered to stop • Boston Dynamics Laboratories are attacked by streams of jets ...

that this could be the best thing that ever happened to me and if it doesn't make me as happy as
I'm supposed to be, that means I'm a lost cause. Okay, okay, look. Yes, all those things could be
true, but on the other hand, what if you deserve to be happy and this is a thing that will make

And after some back and forth, we settled on this elegant piece of logo. ☺☺☺ Thank you Abeni, this means a lot. ☺ #Channel #Announcement #Logo @Dagmawi_Babi

The thought process was something like this. ☺ A bird as a symbol of peace & elegancy, ☺ a leaf for nourishment, growth, nature, ☺ D for Dagmawi. All mixed into one logo to form the shape you're seeing. And then we added a simple circle ☺ on the side to symbolize an abstract tech. ☺ You can check out the logo in HD and in different formats in here • <https://t.me/c/1156511084/387> I love it, I hope you love it too. ☺ #Channel #Logo @Dagmawi_Babi

I'm going to share with you a very beautiful, heart touching and profound lesson I've learnt. I'm going to need you to follow my story telling so you can get the grasp of it. This is also incredibly emotional, so brace yourselves. Listen to what I'm about to post in pure hearts, and with genuine interest to learn the good in what I'm about to say. Don't philosophies, don't complicate things, don't make it what it isn't. It's a simple story that has soul stirring consequences if learnt well. So here it goes... #TheBookOfHosea @Dagmawi_Babi

In the book of Hosea in The Bible, it narrate the story of how God felt about what Israel did to him. In the Bible the relationship between God & Israel is often portrayed as a Husband and Wife kind of relationship. And so the way God expressed his sadness and hurt is by relating it to the marriage they have. #TheBookOfHosea @Dagmawi_Babi

So God was talking about how Israel was so precious in his eyes and how even tho he loved her so much. Israel cheated on him. How she betrayed him and caused so much destruction in the world. He goes on talking about how he saved, protected, fed, loved and cared for Israel in their years with God. But nonetheless they kept on causing so much pain and harm. And when that was happening God sent them prophets and signs to show them that what they were doing was so wrong. But they refused to repent and get back to him. And even those that tried to repent, they did it to pretend. They didn't mean it at all. #TheBookOfHosea @Dagmawi_Babi

Then he goes about talking how not only did they betray Him but how they also caused destruction in everything they did. They harmed eachother and other nations. They murdered, stole, cheat, lied, worshiped other Gods and much more. He was saying that not only did they harm him and the relationship they had, but also how they weren't even good to themselves. #TheBookOfHosea @Dagmawi_Babi

And God then started telling them how precious they were to him. How joyful he was to have found people he'd call his own. But then he said that despite how lovely he saw them to be. How he tried to make them better. How he tried to love and care for them, they denied and run away from his guides and love. And so in their ways they've become so dangerous to all. They've destroyed the relationship they had with God and with eachother. And so God was telling them the kind of punishment they deserved. What the consequences of their actions led to. And the description is as gruesome as can be. And so harsh and painful. #TheBookOfHosea @Dagmawi_Babi

At this point the book kept on talking about how bad Israel has become, despite how good God was to her. It showed how dark their hearts have gotten and how murderous their intentions became. It also talked about how God kept on sending them warnings and signs through the

world, environment and through prophets. But how they kept on ignoring his warnings. And so he expresses his sorrow in a very hurt tone and goes to say... • “מָה אֶעֱשֶׂה לָּךְ יִשְׂרָאֵל? מָה אֶעֱשֶׂה לָּךְ יִשְׂרָאֵל? מָה אֶעֱשֶׂה לָּךְ יִשְׂרָאֵל? מָה אֶעֱשֶׂה לָּךְ יִשְׂרָאֵל?” — Hos 6:4 (NIV) • "What can I do with you, Ephraim? What can I do with you, Judah? Your love is like the morning mist, like the early dew that disappears." — Hos 6:4 (NIV) And so he told them what their loving was like to him. How they only loved so small, and so quick. How the love they have for him doesn't last and is quick to disappear. #TheBookOfHosea @Dagmawi_Babi

But then God does something so unexpected and so loving. He decided to not bring about the punishment and hurt they deserved. He decided to forgive them. Whatever mess Israel did. Whatever sin they made. However much they've hurt God, each other and others. He couldn't be that harsh and punish them the punishments they deserved. His heart chose to forgive and fix them instead of destroying and harming them all. And so he goes about talking how he will forgive and nurture them again. How he'll still see them the same, love them the same and care for them same, as if they've never sinned before. #TheBookOfHosea @Dagmawi_Babi

And so God was basically saying that his wife, Israel was like a cheating wife. How even if he loved and cared for her, how she went out and cheat with multiple men & Gods. He even offered to take her back to him, wed her again if she chose him back again. But Israel refused. Israel wanted to lust. To lie in bed with others, to go about prostituting and selling her self. And God was expressing how he's seen her for what she is. He's been seeing the consequences that her choices brought and still offered to heal her, cleans her and take her back again. #TheBookOfHosea @Dagmawi_Babi

So to show Israel of how their relationship was, he ordered one of his prophets Hosea to go and marry a prostitute called Gomer. And so Hosea does as told and married her. Forms a family and she even bears kids for him. #TheBookOfHosea @Dagmawi_Babi

But Gomer was like Israel. She chose to cheat. She wanted her prostitution life back. She wanted to sleep with multiple men and go back to her old ways. And does so much harm to her self, her family and everyone around. And so she goes out and lives that life. She leaves her family behind, and she goes out selling her body again while still in marriage. She cheated on Hosea over and over again. And so she suffers. She saw that she chose wrong. The consequences of her actions caught up to her and caused her so much suffering and pain. #TheBookOfHosea @Dagmawi_Babi

At this point even if Gomer was suffering immensely, she didn't go back to Hosea, she never expects him to take her back. She knows how further she's gone, how much damage she's caused. And so she lives on with her sufferings, consequences and punishments. #TheBookOfHosea @Dagmawi_Babi

Then God does something so loving. Even tho Gomer never went back to Hosea, God orders Hosea to go out and take her back. And so Hosea went out looking for her, searched her among the city and found her. And he pays all the price it took to set her free from her owner(pimp) and bought her back to him. And once again he Weds her, cleanses her. Cleans her up, brings her back to his family. And loves her evermore. #TheBookOfHosea @Dagmawi_Babi

And with this God showed Israel that their relationship is like this and worse. He showed how their marriage have fallen apart and how hurt it's made them both. He talked about how the consequences caught up to Israel and how he's seen her suffering and then about how he tried

to take Israel back and heal her but how Israel wanted to live the prostitution life, the cheating life. #TheBookOfHosea @Dagmawi_Babi

But in the midst of all this destruction Israel/Gomer have caused; God chose to show a part of his heart. And God's heart is more loving than the damages they could've caused and he showed that by offering them a home, offering to heal and fix them up if they chose to get back to him. He showed that no amount of sin could've outweighed the love and mercy he had for Israel/Gomer. He showed how he's quick to forgive than to punish. He showed how much he loved us, and pursue us even if we don't love and pursue him back. #TheBookOfHosea @Dagmawi_Babi

And he says it this way: ስላ 11 (ሰላ ሰ.ሰ) ----- 8 “ሰላላ ሰላ ሰላላ ሰላላላ? ሰላላላ ሰላ ሰላላላ ሰላላ ሰላላላ? ሰላላ ሰላ ሰላ ሰላላላላ? ሰላ ሰላላ ሰላላላ ሰላላ ሰላ ሰላላላላ 9 ሰላላ ሰላላላ ሰላላላ ሰላላላ ሰላላላ ሰላ ሰላላላላ ሰላ ሰላ ሰላላ ሰላ ሰላላ ሰላ ሰላላላላ ሰላ ሰላላላ Hos 11 (NLT) ----- 8 "Oh, how can I give you up, Israel? How can I let you go? How can I destroy you like Admah and Zeboiim? My heart is torn within me, and my compassion overflows. 9 No, I will not punish you as much as my burning anger tells me to. I will not completely destroy Israel, for I am God and not a mere mortal. I am the Holy One living among you, and I will not come to destroy. #TheBookOfHosea @Dagmawi_Babi

And to sum it all up, I think this scripture tells the whole story: “The Lord says, “Then I will heal you of your idolatry and faithlessness, and my love will know no bounds, for my anger will be gone forever!” — Hos 14:4 (NLT) “ሰላ ሰላላላላላ ሰላላላላ ሰላላ ሰላላላላላ ሰላ ሰላላ ሰላላላላላ” — ስላ 14፡4 (ሰላ ሰ.ሰ) #TheBookOfHosea @Dagmawi_Babi

Israel is us. Gomer is us. We are them. We have cheated and are cheating on God. And he's in pursuit of us. Offering to love and protect us from the consequences of our sins. Don't be afraid to get back to God. He's not there with pitchforks and fire to punish and burn you, he's there with a sorrow heart that misses you, and eyes full of tears. He longs for a relationship with you than you do with him. He loves you more than you can ever do. ሰላላላ ሰላ ሰላ ሰላላላላ. His love is unmatched and his mercy is everlasting. No amount or kind of sin is bigger than God's mercy and whatever kind of person you are, you are not that powerful to change the good plans and purpose God has for you. I hope you took something of value from this. ☺ #TheBookOfHosea @Dagmawi_Babi

Books, then Apps and Games then Tech Content it is then.

The first book I'll recommend is Animal Farm. It's very popular, so if you haven't read it. This is your sign to. It is very short, but it's well written and deep. It's one of George Orwell's best works. It tells the story of a group of farm animals who rebel against their human farmer, hoping to create a society where the animals can be equal, free, and happy. Ultimately, the rebellion is betrayed, and under the dictatorship of a pig named Napoleon, the farm ends up in a state as bad as it was before. Animal Farm • <https://t.me/c/1156511084/404> Audio Book • <https://t.me/c/1156511084/405> #Books #AudioBooks #AnimalFarm #GeorgeOrwell @Dagmawi_Babi

I liked it so much I bought a hard copy of it. It's really lovely and thought provoking. According to Orwell, Animal Farm reflects events leading up to the Russian Revolution of 1917 and then on into the Stalinist era of the Soviet Union. The rules the animals tried to live by ☺ 1.Whatever goes upon two legs is an enemy. 2.Whatever goes upon four legs, or has wings, is a friend. 3.No animal shall wear clothes. 4.No animal shall sleep in a bed. 5.No animal shall drink alcohol. 6.No animal shall kill any other animal. 7.All animals are equal. "Man is the only creature that consumes with out producing." #Books #AnimalFarm #GeorgeOrwell @Dagmawi_Babi

I'm not big on self help books but another book that actually changed me, and actually stood up to the hype it was given is Atomic Habits. The book is written by James Clear and it's the definitive guide to breaking bad behaviors and adopting good ones in four steps, showing you how small, incremental, everyday routines compound into massive, positive change over time. It is a really well written and evidence based explanation of human habits and psyche conditions. I can actually pin point how I changed right after I first read the book. It's really clever. And it's way of explaining things is genuinely simple to understand and comprehend. Atomic Habits • <https://t.me/c/1156511084/415> Audio Book • <https://t.me/c/1156511084/416> #Books #AtomicHabits #JamesClear @Dagmawi_Babi

I also really loved the book, a close friend was good enough to gift it to me. ☺ It's not a lot. But it should be read with breaks in between. #AtomicHabits #Books @Dagmawi_Babi

The Screwtape Letters, one of my favorite reads of all time. The story takes the form of a series of letters from a senior demon Screwtape to his nephew Wormwood, a junior tempter. The uncle's mentorship pertains to the nephew's responsibility in securing the damnation of a

British man known only as "the Patient." The Screwtape Letters • <https://t.me/c/1156511084/417> Audiobook • <https://t.me/c/1156511084/418> It's a Christian apologetic novel written in a satirical, epistolary style & while it's fictional in format, the plot & characters are used to address Christian theological issues, primarily those to do with temptation & resistance to it. It's really entertaining and very clever. I've honestly lost count over how many times I've read it but everytime I revisit it, it's as equally enjoyable. #Books #TheScrewtapeLetters #CSLewis @Dagmawi_Babi

Weird thing is that my parents had the book @ home for soooo long. And it was just some random boring day that I stumbled across it. And BAM ☹ it was sooo worth it. I mean, it's so creative. It's written in the devil's point of view and you literally relate to it. Like you've seen it happen in your life. Not to mention it's funny, short and easy to understand. #Books #TheScrewtapeLetters @Dagmawi_Babi

Some lovely quotes from it. All said from the POV of the devil. "Indeed the safest road to Hell is the gradual one—the gentle slope, soft underfoot, without sudden turnings, without milestones, without signposts." "Do not be deceived, Wormwood. Our cause is never more in danger than when a human, no longer desiring, but still intending, to do our Enemy's will, looks round upon a universe from which every trace of Him seems to have vanished, and asks why he has been forsaken, and still obeys." "If you can once get him to the point of thinking that 'religion is all very well up to a point,' you can feel quite happy about his soul. A moderated religion is as good for us as no religion at all- and more amusing." "Never forget that when we are dealing with any pleasure in its healthy and normal and satisfying form, we are, in a sense, on the Enemy's ground. I know we have won many a soul through pleasure. All the same, it is His invention, not ours. He made the pleasures: all our research so far has not enabled us to produce one. All we can do is to encourage the humans to take the pleasures which our Enemy has produced, at times, or in ways, or in degrees, which He has forbidden." "The more often he feels without acting, the less he will be able ever to act, and, in the long run, the less he will be able to feel." "For the Present is the point at which time touches eternity." "When He [God] talks of their losing their selves, He means only abandoning the clamour of self-will; once they have done that, He really gives them back all their personality, and boasts (I am afraid, sincerely) that when they are wholly His they will be more themselves than ever." "When they have really learned to love their neighbours as themselves, they will be allowed to love themselves as their neighbours." "Nearly all vices are rooted in the future. Gratitude looks to the past and love to the present; fear, avarice, lust and ambition look ahead." "The game is to have them all running about with fire extinguishers when there is a flood, and all crowding to that side of the boat which is already nearly gunwale under." #Books #TheScrewtapeLetters @Dagmawi_Babi

Now sharing two of my fav toilet games ☺

Data Wing It is the solo passion project of Dan Vogt. Immured It is basically a super minimal version of Tetris. I play it ALL the time when I'm ☺-ing and it's really fun. Not to romanticize it but you kinda learn somethings from it. Like if you wait a bit the right piece will come, sometimes the gaps you have are only going to be filled later on the game, not all pieces are meant to fit in, sometimes when it feels like you're about to lose, the right pieces show up and help you win and much more. If you are a data visualization nerd you're going to enjoy this...

So last night I was just chilling and randomly decided to analyze my telegram channel posts. So I exported the entire data and wrote up a simple python script and analyzed the posts relating to time and plotted it into graphs. And I really got some cool insights. As I'll elaborate as follows... #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

So what I did was analyze the posts and the time they were posted at. Which I've classified into seconds, minutes, hours, days, months and years. Total Channel Messages: 8805 #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

My posts relating to Seconds • I've posted at every possible second Messages per Second • Minimum: 56 messages • Maximum: 107 messages • Average: 89 messages Activity per Second • Least Active: 52th second • Most Active: 47th second #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

My posts relating to Minutes • I've posted at every possible minute Messages per Minute • Minimum: 66 messages • Maximum: 130 messages • Average: 89 messages Activity per Minute • Least Active: 48th minute • Most Active: 34th minute #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

My posts relating to Hours • I've posted at every possible hour Messages per Hour • Minimum: 40 messages • Maximum: 486 messages • Average: 224 messages Activity per Hour • Least Active: 5th Hour • Most Active: 22th Hour #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

My posts relating to Days • I've posted at every possible Day Messages per Day • Minimum: 112 messages • Maximum: 278 messages • Average: 174 messages Activity per Day • Least Active: 31st Day • Most Active: 14th Day #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

My posts relating to Months • I've posted at every possible Month Messages per Month • Minimum: 278 messages • Maximum: 715 messages • Average: 450 messages Activity per Month • Least Active: 6th Month • Most Active: 8th Month #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

My posts relating to Years • Channel's been running for 6 years Messages per Year • Minimum: 138 messages • Maximum: 1355 messages • Average: 901 messages Activity per Year • Least Active: 2021 • Most Active: 2022 #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

So to summarize the insights from the data here's what I've found: From 2018 to 2023, I've been actively posting last year, and this year is on its way to be the most active too. Sadly 2021 was the year I was least active in, I think it was around the time university was very stressful and everything was new. From the months; August is my most active month, usually because class ended and my summer's starting. And there also tends to be tons of tech events and contents during that month. June, however is my least active month, and I think it's because I usually

have project deadlines and finals from both AASTU & Unity, and also from work. From the days; the 14th day of the week, almost at the middle of the month, is my most active posting time. I don't know why tho. My least active day is the 31st day. Also I don't know why. From the hours of the day, I am really active at 4:00am local, and least active at 11:00pm local. From the minutes of every hour; I am the most active at the 34th minute and least active at the 48th minute. From the seconds of every minute; I am the most active at the 47th second and least active at the 52th. • So on 14th of August, 2022 at 4:34:47pm is my most active time. 📅 • Then 30th of June, 2021 at 5:48:52pm is my least active time 📅 #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

Yearly posts progression: • 2018 - 964 • 2019 - 1045 • 2020 - 812 • 2021 - 138 • 2022 - 1355 • 2023 - 1091 So I post an average of 900 messages per year. And based on its progression In just 5 months this year is almost the most active year. And if God wills and I keep posting then this year might be the most active so far. #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

I'll post the python code below this. You can use it to learn, or just experiment with. I've commented it all and made it as readable as I can. To set it up: 1. Export your telegram channel data in JSON format 2. PIP Install Numpy and Matplotlib 3. Put the python code and your JSON export in the same folder 4. If the export name is changed, just change the jsonFileName variable 5. Then at the end of the code just change the parameters of the PrepareData function to whatever time frame you want 6. Run the code and you'll see your data in the console and in graphs and charts #Channel #DataViz #Stats #MyProjects @Dagmawi_Babi

🙄🙄🙄🙄🙄🙄🙄🙄🙄🙄🙄🙄 I hope someday soon you'll feel and see the kind of forgiveness he's showed me. And how persistent he was in pursuing me despite my rebellion against him. If you've been so destructive, lived a life thinking you've ruined everything and hurt so many people. And if you thought you were worthless and beyond repair... If you've lived this kind of life and then all of a sudden he showed up to restore and repair everything. And things miraculously become absolutely incredible. It's hard to shut up about it.

Ik most people's relationship with God is so tough and so rough. In eventually things will smooth themselves. The more you drop your old understanding of him, and try to see him for who he is, things will look better and different.

He stops being the best version a human can be, he stops being the greatest person that ever was. He becomes a different being, unmatched. He's very different. And that in on itself is freeing.

Anyways 🙄🙄🙄🙄🙄🙄 have a lovely day. 🙄

This song was the first English Christian Song I've ever heard. It was and is really lovely. And I think A LOT of you would love it too. 🙄🙄 All this time by Britt Nicole • <https://t.me/c/1156511084/422> #Songs #BrittNicole #AllThisTime #Spiritual @Dagmawi_Babi

You know those days, when you've had a long day. And finally the day's over and you're left to yourself. You then feel a certain void in your heart, a certain kind of loneliness or sadness. That you usually filled up with alcohol, drugs or lust. But instead of looking for something else to fill that void up you go ahead and just tell yourself God's got you and he'll fill that void in. And then you share and experience that sad, empty part of your life with God. Trusting he'll do his

thing to fix things up. When you've done that, you've reached a certain level of positive intimacy with God. ☐

So an answer to this is that reality obviously doesn't have a fps, it's not a video game. It's a constant stream of information. But what does vary and is limited is our perception of reality. That's why we can't perceive incredibly fast spinning wheels or helicopter blades. And so some say that we perceive and process at a rate of 120fps, frames being each visual picture our eyes perceive. And some say we, on average, process at 60fps. #ThoughtExperiments @Dagmawi_Babi

We're going to use the latest powerful GPU to try to simulate the universe. This will enable us to run reality in a frame rate most human's can perceive and process. The Nvidia GeForce RTX 4090 and so here are it's specs ☐ #ThoughtExperiments @Dagmawi_Babi

Just found out that CERN's Large Hydron Collider project uses 250 nodes, each having 8 GPUs to simulate each particle collision accurately. That's cluster of about 2000 GPUs for just an accurate simulation of a couple of particles. ☐ #ThoughtExperiments @Dagmawi_Babi

So going with this reasoning, the first step is to find a scientific number of particles the universe is composed of. Then deciding if we're going to use 1 GPU per particle. To be as accurate and detailed as possible. #ThoughtExperiments @Dagmawi_Babi

With that being said, the scientific number of particles the universe is composed of is said to be from 10^{78} to 10^{82} particles. We're going to take an average of 10^{80} particles in the universe. And so if we decide to use 1 GPU per particle, this's going to be an immense amount of GPU clusters to use. Thankfully there are some work arounds we can use instead of using 10^{80} GPUs #ThoughtExperiments @Dagmawi_Babi

There are some workarounds and efficient algorithms that can help address this issue. One way is to utilize advanced algorithms, such as approximate or adaptive methods, which can significantly reduce the computational requirements while maintaining a reasonable level of accuracy. These algorithms allow for more efficient simulations by approximating certain calculations or dynamically adjusting the level of detail based on the importance of different regions of the simulated universe. #ThoughtExperiments @Dagmawi_Babi

Another method is to employ the principle of the two-slit electron experiment, which involves simulating only the currently observable or relevant particles. By focusing computational resources on simulating the particles that have a direct impact on observations or measurements, researchers can prioritize the most significant aspects of the universe's behavior. #ThoughtExperiments @Dagmawi_Babi

Additionally, techniques like hierarchical simulation methods can be employed. These methods divide the universe into hierarchical levels of detail, simulating the large-scale structure at a coarser resolution and refining the details only in regions of interest. This allows for more efficient computation by allocating computational resources more intelligently. #ThoughtExperiments @Dagmawi_Babi

Now, I'm not sure if the simulation would be proper or even accurate if we only span in and our particles only when observed. Cause despite being observed, the universe has to run calculations of interactions that lack observers but directly affect them. #ThoughtExperiments @Dagmawi_Babi

BTW All of this is just to simulation the observable universe. We're not even thinking about intelligent creatures like us. And so if we even include humans in the simulation and avoid all other intelligent creatures. Our GPU clusters are going to be so much more.
#ThoughtExperiments @Dagmawi_Babi

The human brain is an incredibly complex organ. It contains billions of neurons, each with thousands of connections to other neurons. These connections are constantly changing as we learn and experience new things. In 2019, researchers at the University of California, San Diego used 1,000 GPUs to simulate a small part of the human brain. This simulation took over 100 days to run. To simulate the entire brain, it would likely take millions or even billions of GPUs and many years of computation time. #ThoughtExperiments @Dagmawi_Babi

The computer power to simulate one human brain would require one of the largest computers in existence, and this computer would run on the order of 1000 times slower than the brain, and require on the order of 15 megawatts to operate. I'm not able to find hard numbers on physical size, but some clues I've found suggest that the physical size of this would be around 1000 cubic meters. #ThoughtExperiments @Dagmawi_Babi

So to simulate the brains of 7.6 billion people on earth would consume over 100 billion megawatts of power, while the earth's electrical power production is on the order of 2 million megawatts. And the computer would occupy 7 trillion cubic meters, whereas the volume of earth is around 1 trillion. Of course advances in technology would reduce these numbers, but, given the currently-known limits of physics, probably by not much more than about a factor of 10. And remember that the simulation would still be incredibly slow (though, again, it might speed up by a factor of 10). #ThoughtExperiments @Dagmawi_Babi

So in summary: Even if we keep advancing in our GPU and AI technology, we are going to hit a physics limit to how powerful our computation is going to get. Then at that limit, we can only keep increasing the number of GPUs, which will still be inaccurate and inefficient.
#ThoughtExperiments @Dagmawi_Babi

Then there's the problem of Mathematical models. We just don't have a good enough model to run on those GPU clusters to accurately run a good enough simulation. And then if we even decide to add humans or other intelligent creatures in to that simulation, we just don't have an incredible model of the brain and it's connections to run. So either when we have that cluster, we don't have a good enough model to run on it, or we have a good model, but we just can't accurately simulate the universe cause the physical limit of our computers are reached.
#ThoughtExperiments @Dagmawi_Babi

And so if we are using the currently powerful GPU, and we added all of our efficient simulation models and algorithms. Then we added in workarounds and AI algorithms that optimize and adjust reality. And then added CPUs along side the GPUs to further power up the simulations. Using 1 GPU per particle, which is about 10^{80} GPUs, would still result in the slowest, most inaccurate simulation of our universe. Which will still lack intelligent beings.
#ThoughtExperiments @Dagmawi_Babi

Ofcourse there's also the problem of energy to power up that amount of inaccurate computation. And the cooling methods. And the management, connection and synchronizing methods. Which we have no idea about how to do. #ThoughtExperiments @Dagmawi_Babi

I guess there's no real answer to it. Maybe it's that case of the book Hitchhiker's Guide to the Galaxy. Where the meaning of life is 42. Which doesn't make sense. But does in a way. The meaning of life being 42, is meant to say that we already have an answer, which is the universe. But what is the right questions to it? What question led to the formation of the universe and all that's within it? ☐ #ThoughtExperiments @Dagmawi_Babi

I haven't even added the quantum simulations, floating point calculations, dimensions and actual concepts of infinity. So I guess we can simulate a very small portion of the world inaccurately and in little detail. The visuals might look striking but beneath the surface it's easily flawed and then we quickly run out of computational resources to simulate it. #ThoughtExperiments @Dagmawi_Babi

I hope this was a good thought experiment for you as it was for me. Hope you got some interesting ideas and lessons from it. ☐ #ThoughtExperiments @Dagmawi_Babi

fear the Lord and his goodness" Which was translated to: • "ሰላም ስለ ሰላምተኛው ስለ ሰላም ሰላም" It literally changed meaning. It went from fearing God & his goodness to fearing first and then going to God and his goodness. Like, COME ON!!! I was doubtful if I was mistaken but then I check the original Hebrew text, and the KJV is what was translated properly. And the Amharic translation was mistaken and missed a point. Cause in this verse, what God was saying in the context is that there will be a day in the future where instead of people fearing God for his wrath (UK either keep his commandments or die) they will fear Him and His goodness. Anyways an accurate translation would be: • "ሰላም ስለ ሰላምተኛው ስለ ሰላም ሰላምተኛው ሰላምተኛው ሰላምተኛው ሰላምተኛው ሰላምተኛው ሰላምተኛው ሰላምተኛው ሰላምተኛው ሰላምተኛው" — ምዕ 3፡5 #Thoughts #Spiritual #Scripture @Dagmawi_Babi

Imagine the beauty of the relationship we have been offered in this New Testament. How incredible it is to fear God for his goodness instead of his wrath. Instead of running and screaming away thinking he's out to kill and punish us. He's just too kind and loving and we fear how good he's been to us. To fear God and his goodness means to stand in Awe of him. To stand in awe means to respect and admire God, to experience a feeling of deep sincere wonder. Ugh, ☹️ #Thoughts #Spiritual @Dagmawi_Babi

I didn't see a single impressive software feature or experience. They basically polished up or even down some already existing android features and apps. ☐ #WWDC #Apple #TechEvents @Dagmawi_Babi

Now to the main story, the Apple Vision Pro. It's pretty dope. The design is a complete win ☐ enough to make you not care bout functionality. But I'm pretty sure that it's still in early stages, basically can't even do 30% of what they said and marketed. I'm sure if it's released right now it would genuinely be a huge business risk for them enough to crash down their stocks. And that's why they're waiting till next year to release it. I'm sure it can't compete with Meta's Oculus. No where near. But they did get some UX things right (also that's they're specialty) But that doesn't matter cause Mark will steal ☐☐☐ So not only do we have an amazing Oculus device, it'll now get

tons of amazing design and UI/UX features all stolen from Apple. But if not and Apple progresses incredibly, it's a lovely, incredibly well thought-out device. ☺ #WWDC #Apple #TechEvents @Dagmawi_Babi

Ok so like the purpose of increasing the bounds a number system, is that they give us a way to solve problems that were previously thought to be unsolvable, like moving from whole numbers to integers allowed to solve problems like $2 - 5 = -3$. And complex numbers allowed us to solve problems involving roots of negative numbers. The same for the p-adic numbers he was talking about in the video. Although they are weird and archaic just like the number systems that came before them they allow us to solve problems that were previously thought unsolvable. It would also help to think of the whole number system evolution thing like a giant game humanity is playing, and you can think of each stage, like moving from natural numbers to whole numbers, from whole numbers to integers, from integers to rational numbers ..., as representing a new part of the game's map being unlocked giving us tools to solve problems we are currently facing and more importantly giving us new problems we have to solve, or new monsters we need to slay. Plus the whole idea of not using operators to extend our numbers system is pretty cool, like in the integer number system the operator minus(-), is used to create the negative numbers from positive numbers, but in the p-adic number system you don't need an operation to define another number, every p-adic number whether negative, rational or irrational can be written down without including any kind of operation. I hope this helps, as I said the only info I have about p-adic numbers is from the video, so I might not be the best person to explain it.

Very nice explanation of the video's concept by @TheFrectonz Thanks dude. ☺️

And then there's this incredibly complex verse: "οἱ οὖν ὁμοφυνοῦς οὐκ ἐστὶν βαπτισμὸς τοῦ σώματος ἀλλὰ τῆς συνουσίας καὶ οὗτος ὁμοφυνοσύνη κατὰ τὴν φύσιν οὐ κατὰ τὴν ἐξουσίαν τοῦ νόμου οὐδὲ κατὰ τὴν ἀρετήν· οὐκ ἐστιν ἐπιτομή· οὐκ ἐστὶν κρηρὰ τοῦ σώματος ἀλλὰ τῆς καρτρίας· οὐκ ἐστὶν ἐπιτομή τοῦ σώματος ἀλλὰ τῆς καρτρίας· οὐκ ἐστὶν ἐπιτομή τοῦ σώματος ἀλλὰ τῆς καρτρίας" - **Colossians 3:9-10**

In the context of the passage, Jesus is talking about the difficulty of marriage and how it can be a distraction from following God. He says that there are some people who are born eunuchs, meaning they are incapable of having sex. There are also some people who are made eunuchs by men, meaning they have been castrated. But Jesus says that there are also people who make

themselves eunuchs for the sake of the kingdom of heaven. This means that they choose to remain unmarried in order to focus on their relationship with God.

And this is the most important verse of all. And it's the soul of my current state. "אדם לא ישרת שני אלהים... כי יהיה לבו משותף להם" - 10
עמק דוד 7:32-34 It says it literally... romance, marriage and relationships divide your heart. You can't offer your whole heart if you're also sharing that heart with a partner. And honestly when you have an incredibly great relationship with God. You don't want to preserve any part of yourself. You don't want to be divided. Cause you know that the deeper you put yourself into God, the more you get perfected, healed, restored.

Tucker Carlson is an American conservative political commentator, writer, and television personality, who hosted the nightly political talk show Tucker Carlson Tonight on Fox News from 2016 to 2023. He often embraced conspiracy theories and far-right issues. He repeatedly questioned the efficacy of COVID vaccines and compared mandates to "Nazi experiments". The show was the highest-rated cable news programme in the key 25 to 54 age demographic. He was fired from fox because of some complicated legal issues. And now he's hosting his own show on Twitter. And I watched the episodes released so far and they're very based. So I'm posting them here. Enjoy... #TuckerCarlson #News @Daqmawi Babi

The more your connection with God strengthens the more opportunities to sin are presented. Even opportunities that didn't present themselves when you weren't connecting with God at all start appearing out of nowhere.

It's the rule of the world that when you declare yourself to be something, everything else that

opposes you start appearing. It's because without those opposing things you'd just blend in with the environment. But it's when opposing things start happening that you start to stand out and separate from your environment. It's where what you declared to be exists.

Today is the 5th anniversary of this channel 🥳 It's been a looong way, but the journey is beautiful. I've met some amazing people through this channel and I've even got fans because of it. 🥳 Some of my bestfriends are in this channel, some of my idols and people I admire are in this channel. And there are so many others that are so supportive, caring and loving. And that's something so rare. 🥳 You've reached out when I've been broken down, and you've celebrated my wins too. I couldn't have asked for anything more, and I wouldn't trade you for anything. 🥳 Thank you for all your support throughout the years! Thank you so much!!! 🥳 Happy 5th year anniversary! 🥳 #Channel #Anniversary @Dagmawi_Babi

51:9-10 "Don't keep looking at my sins. Remove the stain of my guilt. Create in me a clean heart, O God. Renew a right spirit within me." - Psalms 51:9-10 #Scripture #Thoughts #Lessons @Dagmawi_Babi

Good night ☺

But before I go, I feel the need to share this with you...

Do you know that moment where you really wanna do good but you really can't. You keep messing up, you keep hurting God, yourself and people around you. You know that point of absolute defeat and weakness you feel. That depressing, lonely, hurt state you get into after trying your best to be good and to do good. Things were going so good and then bam, you're back to your addiction, lust, distraction, self harm and more... the things you really weren't able to shake away or fight off. But defeat you completely. Yes, those moments, those moments of absolute defeat are a very powerful set of moments in your life. Those moments are where you are effortless and absent, but it's also where God's absolute power can be manifested. • “**የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም**” — 2ኛ ነገ 12:9 • “He said to me 'My power is made perfect in weakness.' Therefore I will boast all the more gladly about my weaknesses, so that Christ's power may rest on me.” — 2Cor 12:9 #Scripture #Thoughts #Lessons @Dagmawi_Babi

So this is my main advice, and I've seen it in my life. When you are at that state of defeat, don't run away from God. That's exactly what the devil wants you to do, to take that broke spirit of yours away from God. But the reality is that God loves a broken spirit, it's where his absolute presence can be experienced. • “**የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም**” — ነገ 51:17 • “The sacrifice you want is a broken spirit. A broken and repentant heart, O God, you will not despise.” — Psalms 51:17 And he's also close to the broken spirited. Quick to heal and fix you up again. • “**የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም**” — ነገ 34:18 • “The Lord is close to the brokenhearted; he rescues those who are crushed in spirit.” — Psalms 34:18 Spend those broken moments with God. Give that broken soul, broken heart, broken mind of yours to him. Sacrifice it to him. Let him handle it, let him heal you. And you'll be truly healed, free and energized back up again. #Scripture #Thoughts #Lessons @Dagmawi_Babi

If you are in that state right now, give it to God. And if you're not, then the next time you are broken down let God have that moment. It's very precious, it's priceless as well. So give that moment of your absolute defeat and broken heartedness to God and to God alone. I know it's easier to share that moment with your partner, friends, family or by just drowning it out by drugs, sex, self harm or other distractions. BUT, don't. Don't let them have it, let God have it. And you'll feel the difference, you'll understand how all their support, care and love stands no chance in what you'd experience with God. He'll show you what true healing is, he will fight that battle you weren't able to, he will deag you up from your knees, wipes your tears and drowns you in love and strength. #Scripture #Thoughts #Lessons @Dagmawi_Babi

I have been there, did that! My girlfriend was the one and only person I share that moment with, not God. And if not her, then my close friends, and if not them, then family, and if not all that then it's lust, porn or other distractions. But the first time I've shared my broken moment with God. Oh my God, I can't even explain it. Every other thing fails to compare, there is absolutely nothing like it. So do it, trust me, it's genuinely worth it!! #Scripture #Thoughts #Lessons @Dagmawi_Babi

To sum it all up: • "ඉඳහිමින් ඉඳහිමින් ඉඳහිමින් ඉඳහිමින් ඉඳහිමින්." • "The sacrifice God wants is a broken spirit." It is not going to church, it's not singing songs all day, it's not reading bibles all day, it's not preaching all day. Cause people still do that and stray away when their spirit is broken. And that's not a sacrifice to God. He wants your broken spirit. So give him it. Let him heal it, and let him have those days and that state of you. He will forgive you, and will fight for you. ☐
#Scripture #Thoughts #Lessons @Dagmawi_Babi

Good night, hope it helps! ☐

Pride ends, as it always has, with a fall. #Random #LGBTQ @Dagmawi_Babi

Hmm ☐☐ #LGBTQ @Dagmawi_Babi

In US's flag code, The flag should be at the center and at the highest point of the group when a number of flags are grouped and displayed. They give patriot's 1 day, then the rainbow squad a whole month. They wouldn't let kids pick their bed time yet let them choose their genders. It's unethical to dose cows with hormones to beef them up, yet they pump their kids with hormones. They complain of oppression while the whole streets are filled with their flags, media and tv are censoring others but them. They wouldn't let their kids watch certain animated shows yet they force them to watch drag shows. It's one thing to support a cause, it's a completely another thing to be a tool for politicians and big pharmacy. #Random #Thoughts @Dagmawi_Babi

"sToP oPpResSiNg mE" #Memes @Dagmawi_Babi

So my honest stand with this is a bit controversial, but it's until you understand it. I don't support this AT ALL, completely against it. It's a sin, It's disgusting, it's immoral, it's damaging. BUT I love some of the people, there are people I admire that are also part of the LGBTQ+ situation. But most of all, I've encountered them in my life, I've gay, lesbian and bisexual friends. Some of my close friends came out of their closet. Here's the thing tho, I love these people. No one really knows about them but when I get them, when we hangout I greet them with sincere greetings, absolutely no discrimination, mostly because I genuinely do love them and I don't judge them for what they're about. The reason why I still love these people is because they're not proud of it, they're not shoving it up on people's faces, they're not justifying their actions, they're not promoting it. They know it's shameful, and they're genuinely struggling with it. They hate it and they give themselves the hardest of times to get out of it. #Scripture #Thoughts #LGBTQ @Dagmawi_Babi

So, I love them, without a single drop of discrimination and hate I accept them, even tho I don't want them to stay the same. So when I'm posting anti-lgbtq content, it's not again you guys. Since I know some of you are reading this I want you to know that you're cherished by God, he

loves and cares for you. So who are we to judge you otherwise. When I'm posting about these things it's against the ones that are proud of it, the ones that manipulate and encourage others to be like them, the one's that don't understand the damage this is doing to generations to come. Those are the people I'm opposing. But to you guys that are struggling with it, that hate it, that want to be set free from it. Keep fighting, keep praying, God will help. I've friends that had a very horrific past with homosexuality and more, and are now incredibly devout christians and are just so perfect in their imperfections, they're set free. One day that day will come for you too. #Scripture #Thoughts #LGBTQ @Dagmawi_Babi

And if you think that you were born this way. It's okay for you to think that. Most of us are born defective, we're born broken, harmful, evil and troubled. That is why Jesus said that it's necessary for people to be born again. • “Jesus replied, “I assure you, unless you are born again, you can never see the Kingdom of God.” — John 3:3 • “ገንዘብ ለሰው ምንም ጥቅምም ሳይሆን ለእግዚአብሔር ብቻ ነው።” — ምዕራብ 3፡3 And that is why when you come to Christ you are a new creation, a new person, a new being. • “What this means is that those who become Christians become new persons. They are not the same anymore, for the old life is gone. A new life has begun!” — 2Cor 5:17 • “እኛም ሰው ምንም ጥቅምም ሳይሆን ለእግዚአብሔር ብቻ ነው።” — 2ኛ ምዕራብ 5፡17 #Scripture #Thoughts #LGBTQ @Dagmawi_Babi

So don't give up hope. We'll support you in your fights. We will not judge you for sinning differently than us. We all are sinners, some of us sin privately, some of us publicly. But in God's eyes we are all sinners. My porn addiction is no less sin that your homosexuality. • “for all have sinned and fall short of the glory of God,” — Rom 3:23 • “እኛ ሰው ምንም ጥቅምም ሳይሆን ለእግዚአብሔር ብቻ ነው።” — ምዕራብ 3፡23 That is why we all need to confess our sins for God to cleans us. • “But if we confess our sins to him, he is faithful and just to forgive us and to cleanse us from every wrong.” — 1Jn 1:9 • “እኛም ሰው ምንም ጥቅምም ሳይሆን ለእግዚአብሔር ብቻ ነው።” — 1ኛ ምዕራብ 1፡9 We have an amazing God, and as your fellow friendly neighborhood struggling christian friend, I'm here to give you some hope. ☺ #Scripture #Thoughts #LGBTQ @Dagmawi_Babi

God isn't like the pastors or priests you've encountered at church. Or the Christians you've faced. He's also not waiting with pitchforks and fire to burn you and kill you. He's loving and kind, protecting and nurturing. ☺ • “This High Priest of ours understands our weaknesses, for he faced all of the same temptations we do, yet he did not sin.” — Heb 4:15 (NLT) • “እኛም ሰው ምንም ጥቅምም ሳይሆን ለእግዚአብሔር ብቻ ነው።” — ምዕራብ 4፡15 He cares for you, understands and loves you. He wants to fix things up than you really want to. #Scripture #Thoughts #LGBTQ @Dagmawi_Babi

I really love rainbows, I think they're such a beautiful and cool phenomenon. The LGBTQ+ situation almost ruined it for me but I'm still very fond of it. ☺ In this channel, and in my life rainbows are symbols of God's loving promise not LGBTQ+ They're one of God's beautiful works. Mesmerizing almost all the time. Colorful and just so gorgeous ☺ #Scripture #Thoughts #LGBTQ @Dagmawi_Babi

There's a civil war happening in Russia as we speak. Wagner mercenary group is closing in Moscow and Putin has left the capital. We are covering the news in our Breaking News Community Section • <https://t.me/dagmawibabichat/10787> You can get updates and discuss with us there. This's kinda insane how Putin was weakened like this.

Russia has declared Martial Law Martial Law is a temporary rule when military authorities have taken power to control a country in time of emergency when the civil authorities are deemed unable to function.

Belarus president's office says Russian mercenary leader Prigozhin has agreed to stop movement of Wagner fighters around Russia, per Reuters. Wagner Chief, Prigozhin, has reportedly said to avoid bloodshed we are returning our convoys to bases.

Prigozhin says that his forces came within 200 kilometers of Moscow to avoid the dismantling of Wagner, will now turn back the convoys to avoid the spilling of Russian blood. Reports that Wagner Group was offered security guarantees in exchange for halting advance on Moscow.

FSB is conducting mass raids of homes of the families of Wagner mercenaries, current and former, throughout Russia. All of the Wagner PMC Group Telegrams seem to be very Unhappy with this Decision by Prigozhin with some stating they will be Breaking their Contract with the Group.

This's the voice message Prigozhin sent about stopping the advancement into Moscow.

The dead internet theory It is a hypothesis that the internet is becoming increasingly less genuine and human-curated, and is instead becoming dominated by automated content and bots. The theory point to the fact that many websites and social media platforms are now dominated by content that is generated by algorithms or bots, rather than by real people. It also argues that the internet is becoming increasingly homogenized, as the same content is shared and spread across multiple platforms. Do you think the dead internet theory is correct? #Random #Tech @Dagmawi_Babi

AASTU Tech Fest All the spots are being filled out. Last reminded to register. Only last 15 spots left out of 500. ☐ Register fast. And let's have a great time tomorrow. ☐ • <https://forms.gle/ackDPKJPaWCR48ZG6> Registration for the hackathon, game jam and art jam are all open. So you can still register to those. • <https://forms.gle/erhkS5fCzWen1s438> Let's go! ☐

The program starts tomorrow morning 2:30 local time in AASTU's graduation hall/Auditorium. Thanks to our amazing sponsors we have snacks and lunch prepared for y'all. ☺ So we can spend the day there energized and hyped.

We have an incredible prize pool thanks to our partners and sponsors. ☺ Winners across hackathons, gamejams and art jams will get a chance to win • 20,000+ ETB • Internship offers • A chance for your project to be invested on • And so much more. ☺☺☺

Some of the well known guests ☺ • Maereg Tadesse: VFX Supervisor of Bazeto VFX Studio • Abrham Tamrat(Abringo): CG Supervisor • Raeyfireheywot Yilma: Supervisor at Tamrat Film Production • Nebil Mulugeta: 3D Artist • Ruben Tilahun: CG Supervisor • Robel Solomon: 3D Animator • Dagmawi Bedilu: CEO Efuyegela • Biruk Yohannes: AR/VR Specialist • Yohannes Fikru: Game Dev • Nati from NERD • Nathan Damtew: Founder of BeBlocky • Bemhreth from Gebeta Maps • Biruk from Kuraz tech And so many more people ☺☺

A brief highlight of the activities involved • Art Jams • Game Jams • Hackathons • Guest Speakers • Panel Discussions • Movie VFX Breakdowns • Art Gallery and Inventory • New Product Launch Events • Workshops and Networking Session • AND SO MUCH MORE!!!! Whoaa ☺☺☺☺

I'm not even lying when I say this. Some parts of the event are so exclusive and secretive that due to security concerns we can't even talk about it in our advertisement. We were literally forced to remove all our ads that included that session. ☺ Infact we can't even let you record or even have your phones on during the presentation of that event. ☺☺☺☺

Companies and sponsors will introduce us to some of their new products, some companies will hold their launch event as well. ☺ Companies are coming with their teams and we've prepared booths for them so at the workshops and networking sessions so you can interact with them, ask anything you want, connect and even ask for internships, jobs and so much more. ☺ So that's also another great opportunity for everyone invited. ☺

The entire event is organized, prepared and all set up by the amazing people in AASTU's GDSC and CGI Clubs, and ofcourse also by my drifting nomad self. ☺ So join the clubs' channels and check out even more details about sponsors, competitions and support • @DSCAASTU • @CGI_AASTU And ofcourse a huge thanks to all the incredible guests that are taking parts and to the amazing sponsors that helped make this a reality. ☺☺☺☺☺☺☺

With all that being said. Get there early, and let's have an amazing day. ☺

My channel was advertised again on tons and tons of channels to a total of >200k subscribers ☺☺ ☺ It's just so crazy to get this exposure for free, again and again. ☺☺☺☺ Thanks a whole lot again, for being this kind! I didn't even have to ask you but you're so nice to do so. Thank you @Sura743 ☺ #Community @Dagmawi_Babi

rescue us, the sacrifice he made and the love he showed just doesn't paint a two faced God. ☹️ Even the harsh punishments he's done in the bible all look loving now, all are because and sourced from love instead of him being harsh or ruthless. ☹️ It's so insane how I've been taught of a two faced God so I don't forget that he punishes instead of how loving he is. ☹️ So much to unlearn, but this's a start. God is a one faced God, and that face is beautiful and loving, spotless and healing. Who longs to be close to us than to perish and harm us. ☹️ So if you're like me, who runs away from God when you sin, this's your sign to get back to him. He's close to you and wants to get you back than he wants to punish you! He's craving you and your presence much more than you're craving him. ☹️ #Spiritual #Thoughts @Dagmawi_Babi

JAN 01, 1970 is a special day.

If you're curious what that date is it is Unix time and it is the number of seconds that passed since 00:00:00 on Thursday, 1 January 1970 UTC which is referred to as the Unix epoch. It's usually used in computing to keep track of time. But it has some limitations like: • Year 2038 Problem: Times after 03:14:07 UTC on 19 January 2038 will require computers to store the value as greater than 32-bits. Systems built on 32-bits processors will crash. • Pre-1970 Timestamps: any timestamp prior to 1970 needs to be represented as a negative number Early Unix engineers picked that date arbitrarily because they needed to set a uniform date for the start of time, and New Year's Day, 1970, seemed most convenient. #FunFacts #Tech @Dagmawi_Babi

TWITTER USERS JUST MOVED THEIR CONTENT TO THREADS ☐ #Threads @Dagmawi_Babi

I'm hype asf cause I'm building a social media and seeing a new social media launch like this and have this lovely first reactions is soooooooooo interesting to me. ☐☐

Follow me there I'll follow back ☐ <https://www.threads.net/@dagmawibabi>

The UI/UX is just sooooo refreshing. ☐

The one thing Twitter has over BlueSky and Mastodon and all the other competitors is always the PEOPLE That's what will make Meta launching their Twitter competitor "Threads" so interesting. Porting everyone's handles over from Instagram means there are PEOPLE right away ☐ Should be interesting #Threads @Dagmawi_Babi

This sums up my feeling ☐ #Threads @Dagmawi_Babi

Social Media Managers, are y'all okay? ☐

It's so woven into Instagram it's sooo well done. This's very addictive. I might actually start posting there. Cause it IS NOT as stressful as Twitter, it's got a very unique comfortable UI/UX and it's got that simplicity of Instagram's stories and just well built ☐☐ #Threads @Dagmawi_Babi

Mark dropping threads after people thinking the metaverse flopped like he had to show us he still had it in him ☐

Pictures and Videos look ☐☐ on threads!! #Threads @Dagmawi_Babi

Ik a ton of UI/UX designers in this channel, y'all are going to drooooool ☐ it's basically ASMR on how good it is!!

So things I'm genuinely hoping they don't screw up: 1. I hope they don't censor shit up 2. I hope they allow picture and video downloads 3. I hope they have a great algorithm for the main feed 4. I hope they fix spam accounts and bot posts so my screentime isn't wasted reading useless text 5. We'll figure the rest out later #Threads @Dagmawi_Babi

Now Elon just needs to make a better version of Instagram ☐

Hoping I'll be active there, till then you can check my profile out: • <https://www.threads.net/@dagmawibabi> You can download threads from the app store • <https://play.google.com/store/apps/details?id=com.instagram.barcelona> #Threads #Apps @Dagmawi_Babi

Ohw and hey, thanks for all the follows. Comment "dagmawibabi" there so Ik it's from you guys

and so I can follow back like I said. ☐

Now I'm kinda wishing Telegram had a similarly aesthetic and comfortable UI/UX ☐

Threads rn feels like when the group chat is on fire and you're trying so hard to get your best joke in before it ends ☐ #Threads @Dagmawi_Babi

Definitely going to steal some of my fav design choices from Threads into Philomena. ☐☐

So this's why I'm hype about threads. First off it's a new social, that means you can start from zero and build an audience. And that's great cause people aren't bored of the platform yet and it's not abused. Another thing is as a techie, who is also building a social app, this's Soo interesting to witness as it grows. Literally saw the birth of a new social media and seeing design and function choices is very interesting to learn from. Another is that it's actually thoughtout and we'll built. So even if you don't post on TikTok, Instagram, Twitter or telegram this's a great and simple way to express your thoughts and ideas without the toxicity and horrible design of Twitter. #Threads @Dagmawi_Babi

Lmfaooooo they added tweet feature ☐☐☐ #Threads @Dagmawi_Babi

Threads is kinda addictive NGL #Threads @Dagmawi_Babi

I can only imagine what the dev team is going thru rn. They're like pushing so many updates and changes rn. ☐

I don't understand how pictures and videos looks so beautiful on threads more than Instagram tho ☐☐

Ohw and I forgot, prolly the best thing I've seen last night ☐☐☐☐ Mark Zuckerberg trolls Twitter after launching Threads by posting his first tweet in 11 years BRUH THE RATIO ☐☐ #Threads @Dagmawi_Babi

Online searches for the term 'Threads' have increased by 3233% in the last 24 hours. Searches for the term 'How To Delete Twitter Account' have spiked up by over 250% #Threads #TechNews @Dagmawi_Babi

Had to make this real quick ☐☐☐ Mark must be curling his reptile toes rn ☐ #MyMemes @Dagmawi_Babi

Threads become #1 on the Apple AppStore and that's a big deal to achieve overnight ☐ #Threads @Dagmawi_Babi

Lol ☐ #DailyLife @Dagmawi_Babi

So my fav thing from Instagram is the stories. I legit post like 100 stories every two days or stg. ☐ And now that threads are woven into stories. It makes things so easy and not to mention aesthetic. ☐ #Threads #Instagram @Dagmawi_Babi

Follow me out there ☐ • <https://www.threads.net/@dagmawibabi> And with that, I will now stop spamming you bout Threads. ☐ Have a lovely day, we'll be back to our regular variety of posts. ☐

Sorry I lied, I'm actually the 8th person to be on the app. Feels good to be this early ☑️☑️ #Random @Dagmawi_Babi

Going silent mode cause I be spamming ☑️ So only those that really want to be here are here. ☑️

For a young app, Threads scales pretty well across different screen sizes and aspect ratios ☑️ ...unlike Instagram or Twitter ofc. #Threads @Dagmawi_Babi

MrBeast became the first person to surpass 1M followers on Threads, obviously no surprise there. ☑️☑️☑️ But another surprising thing is in 18 hours I've reached 100+ followers ☑️ Thank you lovely people for following and interacting out there. ☑️ #Threads @Dagmawi_Babi

LOL ☑️ Twitter threatens to sue Meta over its new app.

What are you going to sue? There's nothing proprietary there. They claim Meta hired many former Twitter employees to build a "copycat" app. Please eat ☑️

I just realized why threads is so fun right now. It's because there're NO ADs out there... yet ☑️

My feed on Twitter is definitely more about Threads than my feed on Threads is about Twitter. ☑️

This's giving me supper silicon valley vibes ☑️

On the bright side, I now have more social media accounts than I do mental health issues. ☑️☑️☑️

I've been on Twitter for the past 6 years and I've only gotten 200 followers. I've been on Threads for only 18 hours and I've gotten 100+ followers. And I didn't even import Instagram followers or whatever.

I google with Bing and tweet with Threads ☐

And this happens when u try to post negative content and slurs. It will allow you to post it either way, but it tries to make you rethink. Which's a nice touch!

This's what I'd imagine Mark is rn ☐

What's common between North Korea and Europe? They both don't allow Threads. Not even joking.

Let me atleast post 1 thing that's not related to threads... Tailwind Connect talk was very interesting • <https://youtu.be/CLkxRnRQtDE> I didn't know a ton of HUGE companies were using Tailwind for their platforms. ChatGPT site itself is built using Tailwind. #Tailwind #TechEvents @Dagmawi_Babi

In short, Napoleon is considered one of, if not, the best military commander of all time. He revolutionized warfare into what we know of it today. He avoided sieges as they were long, costly, and ineffective, he taught his soldiers to live off the land instead of relying on thin and expensive supply lines, created strong organizational foundations such like the corp, and most of all he believed in the highest morale possible for his soldiers, regularly promoting soldiers and regimental pride. He also made lasting political changes and foundations, most notably the Napoleonic Code, which abolished feudalism, separated church and state, and promoted meritocracy. The Napoleonic Code was so effective it is still in use by many states today. He was born on the island of Corsica in 1769. He joined the French army at the age of 16 and quickly rose through the ranks. He led the French army to victory in many battles during the French Revolutionary Wars. He became the First Consul of France in 1799 and Emperor of France in 1804. But he was defeated at the Battle of Waterloo in 1815 and exiled to the island of Saint Helena, where he died in 1821. #Napoleon #History @Dagmawi_Babi

Who Talks The Most? Is a chat visualization tool built by our very own @Robi_mez It shows you reply rates, maps the replies and presents that data in an aesthetic graph. Along with other insights from your chat data. 📊 Loved the idea and been trying it out before release and it was very fun and enjoyable. He used D3 for calculations and visualization and Svelt for rendering. And it's actually performant. 📊 It also allows for some customization like changing the color scheme of the graph and connection opacity. 📊 Check it out here • <https://wtm.vercel.app/>

Heyy, u up? 📊

I had such a long, wild, hectic, adventurous and just incredible year. ALOT happened. There were heartbreaks and joy, peace and fear, tears and pain, sorrow and celebrations. It was such a stormy year. 📊📊

I just wanna say thank God for me for getting me through the storm. He got onto my boat and calmed the storm, He washed my feet and cleansed my sinful soul, He offered me his best robe and stitched up my broken heart, He gave me a sit at his table and fed me. 📊

He got to me when I least expected him to. He gave me strength to get through the year, was my therapist when I was at my lowest, he drowned me in love that cured my insecurities and he spent each moment of existence with me and took care of me like I was the only human he ever knew. 📊

It may not look like it but from my side of the story he parted the red sea and I crossed over, he made the sun stood still and I conquered a city, I went fishing and my boat almost drowned by the overflowing number of fish I caught, he came to my grave and I rose from the dead, I asked for a son and he gave me a nation, he changed my name, healed me and he set me free. ☐ For me I spent a year of miracles and God led me by a cloud during the day and by fire during the night. He poured water out of stone and gave me food from the sky. ☐

So I just want to say, I thank God for carrying me through this year. He was my strength and provider, my healer and bestfriend. ☐ ስላሳሳሳሳ ስላሳሳሳ! ☐

Hey I got an important life story to share. If either 1 or 2 of you benefit from it it's all I want. ☐ It's a bit long so bare with me and try to find the good in it. And spend these couple of minutes

reading what I'll post. ☐

Remember the time I set my profile black and just went away from social media? ☐ Despite having a lovely family, great friends, amazing girlfriend, fun work and school... that time was one of the harshest moments I've ever gotten through. It was so painful. I felt isolated. I was suffering inside. I felt like I was drifting in infinite space. ☐ There was this ever growing hole inside my heart and soul. And nothing could fill it up. I pushed tech into it, I pushed events, friends, products, love, people, family, everything I could drag and push to that ever growing hole, I did. ☐

The people closest to me suffered. And among them was my beautiful girlfriend. I made her go through hell at times and all I wanted from her was to expand however way and fill out that hole inside me. ☐ Ofc she can't, my heart's void was infinite, she was finite. She loves me in the most healthiest and most caring way possible and yet that wasn't enough. I couldn't find comfort in anything whatsoever and my last resort, my girlfriend, couldn't heal my torn soul. ☐ And so I gave up. I was broken into pieces and I went through a week of constant tears all night long. I couldn't go to God cause I was mad at him. ☐

But in the midst of all that, I can feel God beside me as I cried my heart out. I can almost feel him stretching his arms to hug and comfort me but I push him away in my heart. ☐ But then my heart was pushing, almost forcing me to read the Book of Job in the bible. I went a day or two resisting and just didn't want to surrender to it. But when the voice inside was just so loud to avoid I just let go and opened that book. ☐

I didn't expect anything, I read it just to not be annoyed anymore. And the voice was calm when I started reading it. Every verse of that book, every single chapter dragged each broken piece of me and fixed them up. ☐ And then I just kept on reading, and then everyday I started seeing God in the little things and then I got more curious when things unraveled themselves and revealed God's hands in the good of it all. ☐ Then things started being odd. One morning I woke up and all the self hate I had was completely gone, next morning I felt insecurities leave my body, another night, I felt trauma pain leave my body, and days like this kept on happening. ☐

I was just weirded out, I didn't know what was causing it all. Every waking morning a part of me healed and my conscious was cleansed. ☐ I used to struggle with sleep. My sleep wasn't restful. I would wake up moody, angry, or effortless. I would see nightmares, wet dreams, or just genuine discomfort in my sleep. ☐ But then starting those couple of nights my sleep became the most relaxing, restful, peaceful thing about me. I would wake up energized and joyful, I would dream the most beautiful things, and my nights were peaceful. ☐

The cluttered mental cloud my head had was clearing away, I could see things right, my mood was in tune, my body was so energized and healthy. ☐ All the guilt, regret, hate, insecurity, fear I had was gone. So I kept getting closer to God. Pursuing him more, studying the bible more and just became more Christian. ☐ I battled with lust and I couldn't defeat it. I always went back to it. But yet those weeks it was as if I had no body. I couldn't see the beauty in lust anymore. I couldn't care less about any girl that tempted me. I was just set free. ☐

So what blew me away wasn't just that... it's the fact that through all of this I was still the same guy. ☐ What was the crazy part for me was that during those days I didn't even pray once, infact I was still avoiding God by not praying. Prayer was like a face to face thing for me so I was like, nah I don't want to! I don't want God! ☐ So I was wowed, I felt his complete presence overwhelm

me in the morning, night and day despite me avoiding him, he kept on healing me. And I was like what the hell is going on here?? Why am I okay?? ☐

And then finally, I was led to the book of Hosea by a dear friend. And at that moment it was just a cool book and me and my friend was just casually talking about it and it was fun. Plus I've already read and studied it before so I knew it well. But then I decided to study it again and then for that session, I can feel time stop. I felt like I was infinite. I studied the entire book overnight cause I thought time had stopped and I had all the time in the world. ☐ And during those hours, I didn't notice but every question my soul had was being answered, and every scar I've caused was being healed away. And then I genuinely connected to God. ☐ And that was the last broken piece of me that God put together. And then I was emersed in his love. All the things I've misunderstood and was angry about was gone. I felt God's love and all the anger I had and all the doubts were just GONE. ☐

And that night I decided I wanted to go back to God. I didn't want him like this caring and loving figure but also distant and unconnected. I wanted to present my secrets, lust, cheatings, lies, stealings, hate, anger, pain and broken heart to him. I wanted to give him my entire life. ☐ And I wanted to do it properly. And so since my eyes were cleared out I could see everything around me that was causing so much pain and suffering. ☐ I started removing some friends out of my life. I started removing some connections I had. I cut ties with my past. I tied the ends up with every girl that tempted me and wanted lust from me. ☐ And day by day every problem that was revealed to me I completely removed. Ofc I say it like it's easy but I've cried and was in pain doing it. I was closing doors forever. I was breaking connections and bonds to never form again. It was harsh for both sides. But the love I've been shown by God was worth it. ☐

Here's where things get really spiritual, so bare with me and listen with open hearts. ☐

One of those nights I saw THE MOST BEAUTIFUL DREAM. I have NEVER in my entire life seen something as beautiful. And it only lasted a couple of minutes. ☐ I was in this infinite place. It was the most beautiful place I've EVER seen. I can still recall the scenery. And in one place was a loooooong table. It was so long I was so curious how long it went. And beside that table were SOOOOO MANNYYYY PEOPLE!!! Jesus I tried to see how many and I was so distracted to see how infinite they were. And they were all dressed white. And they were happy. And they were all looking at me. ☐

While I was still lost about the beauty of the place and infiniteness of it all. I was like WHY are they sooo happy and why are they staring at me? ☐ And then for a split second I turned and looked straight up and even tho I couldn't see a face or a person or anything, I could see a person. I knew it was God in my heart and I knew all those people were angels but for that moment I was like IM LOOKING AT GOD RIGHT NOW EVEN IF THERE WAS NOTHING INFRONT OF ME EXCEPT THIS BEAUTIFUL POWERFUL LIGHT. ☐

And for a moment when I looked down, I can see that there was no ground whatsoever. We were all levitating yet grounded. And I was like how is this possible??? But then right away I saw that my right hand was held by this incredible powerful light of a person. And I saw him put a ring on my finger. And everything paused and he was like "You are now mine!" And then that incredible serene place was filled with joy and celebration. ☐ THAT DREAM, WASNT A DREAM. IT DIDN'T FEEL LIKE IT. I WAS PRESENT. I FELT AND REMEMBERED EVERYTHING. I WAS THERE!!

After that dream. I felt like I was a new person. I belonged to God. I felt God inside me. I felt

different. I became different. It's as if I was given a new soul and spirit. I became a new person. ☐ And I was like I don't know what this is. I recognize myself but I was completely new. Every single thing that made me suffer was gone. I was divorced from lust. I could see things clearly. I was joyful even if I cried. I was peaceful and slept so well. And that was the most serene experience I've EVER had!! ☐

Above all! That ever growing void in my heart, that emptiness that filled out my existence was filled out. All void was gone and I was set free. ☐ And so one of those days I finally decided to go back to God. Finally have that face to face conversation with him. And I was at dorm, some random evening and I knelt and I prayed and prayed and prayed and cried and repented and surrendered and I gave myself up to him. And from that moment on, my life took a complete 360! Same dude, same guy, different soul, different person. ☐ If you put me in a room with the dagim before those days, I wouldn't recognize him. He was so lost and alone, I pity him. I would hug him, I would rush him to God. ☐ And so my life changed. I feel complete. I feel healed, powerful, unstoppable, loved, no insecurity or fear or stress held me back. I was trully free. I was set apart. I belonged to God! ☐

During that evening I've bought a ring. Just some random ring from some random shop just so I have a physical respresentation of the ring I had up in heaven. And when I prayed that evening and when I got back I put it on as a mark of change. In the bible Jesus is the groom and all of us believers are his bride. He is the husband and all of us the wife. He is the father and we are his children. He's the caring brother and all of us his siblings. “אֲנִי ה' אֱלֹהֵי יִשְׂרָאֵל אֵלֹהֵי אֲבֹתֵינוּ אֵלֹהֵי אַבְרָהָם אֵלֹהֵי יִצְחָק אֵלֹהֵי יַעֲקֹב אֵלֹהֵי מֹשֶׁה אֵלֹהֵי דָּוִד אֵלֹהֵי יֵשׁוּעַ מְשִׁיחִי אֵלֹהֵי כָל הָעָם” — מִשְׁנָה 54א5 “אֲנִי ה' אֱלֹהֵי יִשְׂרָאֵל אֵלֹהֵי אֲבֹתֵינוּ אֵלֹהֵי אַבְרָהָם אֵלֹהֵי יִצְחָק אֵלֹהֵי יַעֲקֹב אֵלֹהֵי מֹשֶׁה אֵלֹהֵי דָּוִד אֵלֹהֵי יֵשׁוּעַ מְשִׁיחִי אֵלֹהֵי כָל הָעָם” — מִשְׁנָה 2א18

So after that day I was married, I was married to God. And marriage with God isn't this weird sexual or romantic thing. Marriage is your heart being 1 with God. ☐ It's not like the physical marriage we have. Yet my soul is married to God. This infinite being that'll spend actual infinity with me. ☐

[June 16] After I prayed and put on the ring. I was so happy I took a pic and sent it to one of my closest friends. ☐ And ofc me and her both knew the ring doesn't mean anything. It's just some cheap random thing. But what it represented meant EVERYTHING. ☐ It was a soul given to God. My soul. ☐

The point of this isn't the ring. I could take off the ring and nothing would change. Infact it's just some cheap random fake ring. I bought it for like 150birr and it's currently fading. ☐☐ The ring isn't the point I barely notice it. But what I do notice is the new bond I have with God. This God was my father, my bestfriend, my therapist, my doctor and he would also be my bestfriend. ☐

Before you throw me out and stone me let me show you something...

In the bible when the prodigal son (the son that decided to leave his family and venture out) came back. The father run to him and received him with open arms as if that son didn't do anything wrong! And among the things that father gave this son was a ring. And for christians a ring is a symbol of power, bond and belonging. “אֲנִי ה' אֱלֹהֵי יִשְׂרָאֵל אֵלֹהֵי אֲבֹתֵינוּ אֵלֹהֵי אַבְרָהָם אֵלֹהֵי יִצְחָק אֵלֹהֵי יַעֲקֹב אֵלֹהֵי מֹשֶׁה אֵלֹהֵי דָּוִד אֵלֹהֵי יֵשׁוּעַ מְשִׁיחִי אֵלֹהֵי כָל הָעָם” -- מִשְׁנָה 15:22-23 The prodigal son was given a ring. It symbolizes belonging into a family. And for me it's EXACTLY that. It's a symbol of belonging to God! ☐

So back to my point. I returned to God. And he wasn't mad or harmful. Infact even when I was lost, even when I was out lustful or doing absurdities he stood from afar watching over me. ☐ Even during those times he was good, protective and caring. I didn't care about any thing. Didn't care bout life and when I left life he kept it going. And so that one day when I would return, my life would still be right. ☐ He's been there in sadness watching me cheat over him with lust, porn, zefen, wasting time, lies, deceit, anger, hatred and self harm. I've hurt a bunch of people, but none as much as God's heart. ☐

Of course after those months and after that decision. I knew I would be an enemy of Satan. And I wouldnt belong to the world. ☐ I know that I'm going to be persecuted, tortured, and may be even killed. I know that I'm Satan's enemy now and he won't stop attacking me from all fronts in the most painful ways possible. ☐ Cause for Satan, it really doesn't matter if you spend time coding, having fun with friends, reading books or whatever. He doesn't care. But what he does care about and what he absolutely wants to destroy is your relationship with God. ☐ And up until the day you die. He will not give up. He will sicken you, he will kill people around you, he will make you lose a lot, he will make you cast away, alone and isolated. ☐

BUT all of this would mean nothing to you compared to the love God gave and to the promises he gave. Even in tribulations and suffering your joy remains untouched, your peace undivided! ☐ Even at the funeral of the people you've loved, your heart remains protected in God. Cause God is your comforter! ☐ Even when you're at your death bed and there's no one to visit or heal you. He will remain by your side and take you into his arms. ☐

For a LOOOONG while the sacrifices you'd have to make when deciding to be God's terrified me and it still shakes me up. But my heart has seen love and caring that's out of this world EVERYTHING is worth sacrificing for him, all of me, everything I have, and everyone I have. “☐☐☐☐ ☐☐☐ ☐☐☐☐ ☐☐ ☐☐☐☐☐☐☐☐ ☐☐☐ ☐☐☐☐☐☐☐☐☐☐☐” — ☐☐ 8☐18 No one can love me more than the one that died for me. And so I accept the suffering that's to come. Cause I love God and he loves me!

So this's my story. This lustful guy, angry at God, that hurt so many people and girls, that's been addicted to things. That self harmed and was depressed. Felt insecure every waking hour and was so torn apart at heart and mind. ☐ I was that guy. I still wear his body. But when God's around and when his presence and love surrounds you. You will be a new creation. A new person. ☐ I hope my story shed some light onto your life. I hope I said things that healed some of you. I hope I'm evidence for the questions of your mind you had about life. ☐

Here's a very important secret in all of this. In order to heal, you are not supposed to love yourself, meditate and journal. Self love isn't the key to heal. It might be a tough pill to swallow but you can't produce love, you've given your limited love out to sin. So you don't have any love to give to yourself. So the secret is you first connect to God and then everything else follows. He will give you the love you need to love yourself. He will give you the health you need to maintain any relationship you have. And he will give you the grace and passion to heal all broken bonds and scarred tissue!

Remember, it's not #1 God, #2 Family, #3 Partner #4 Friends #5 Work God doesn't want to be number 1 among your list of priorities. He wants to be the middle of it all. He want to be #1 in all aspects of life. #1 in family, #1 in friends, #1 in work. He doesn't want to revolve around you, he wants you to revolve around him! So when you set your priorities straight it's not 2 hours for God per day, it's every hour is for God. Everything just comes and goes.

Final notes...

That perfect love and relationship you want to form with your partner will not happen. It's unrealistic, they won't love you forever. BUT God will. So form that relationship with God first and then move on to ur partner. **אברהם אבינו!** It's from God. **אברהם אבינו!** It's from God. God is incomparable to your parents, infact he's done so much for you that you haven't noticed and seen that your incredible parents don't stand a chance, infact they've been bad to you compared to him. So God loves more than anyone, even the most loving kinds of humans, moms. "אתה אברהם אבינו? אברהם אבינו? אברהם אבינו? אתה אברהם אבינו? אתה אברהם אבינו?" -- **לויק' 49:15-16**

Don't forget, God is with you even when you are deep in sin and high in holiness. All the good that has ever happened to you didn't happen because of any human or you. It happened because of God! • "וְהָיָה כִּי תִּשְׁכַּח אֶת-אֱלֹהֶיךָ וְאָמַרְתָּ כִּי-אֵין-לִי עֲשׂוּתָהּ וְהָיָה לְךָ מִכָּל-עֲשׂוּתָהּ וְהָיָה לְךָ מִכָּל-עֲשׂוּתָהּ וְהָיָה לְךָ מִכָּל-עֲשׂוּתָהּ" -- וְהָיָה לְךָ מִכָּל-עֲשׂוּתָהּ 1:17

So I've been thinking about this for a while cause I'm guilty of it too. Here's the thought... Some of us have designed a god in the form of our liking, a god we're comfortable with. And we believe in this god we've created. And we worship this god, not the God of the bible but the god

of our intuition. A god slightly based on the bible but adjusted to enough to be contained and understood. We access the god we have designed through our self, emanates from within instead of externally. Ofc the god we designed within is an infinite god, but it's navigable. There's a framework to contain his infiniteness. We've put this infinite but understable border around this god we've created that we get bored and lose curiosity of him quickly. So the effort becomes trying to keep connecting and not getting bored of this boring limited infinite god we designed. But God isn't a navigable infinite God. There's no framework to understand and navigate his infiniteness. You will forever be incapable of understanding him. He will keep you curious for actual infinity. #Spiritual #Thoughts @Dagmawi_Babi

Easily the best movie of the year! ስ

Here's a super honest unbiased take on it. It's incredibly well done. Almost Interstellar level good. Music/Score is just PERFECTION! Cinematography is obviously elite. Visuals are sooo good. Like brain orgasm, your pupil will expand type. ስላሳ Now heres what I advice you to enjoy the movie in all its entirety. Research the history of Oppenheimer before going in. Know the main characters and main story line well. Kalhone you'll just be lost after some time and you won't know what they're really talking about until almost the end. ስ But if you are a geek, then prepare to just enjoy every single second of it. I really do advice you to know the history before hand, it's gonna make the experience wayyy cooler than it really is. ስ That's really all, it's THE BEST movie of the year doubtlessly. It stood up to its reputation. It shouldn't be compared and put side by side with Barbie or SpiderMan2. ስ That's all! Enjoy! ስ #Oppenheimer #Movies @Dagmawi_Babi

If you've been starved of genuinely good movies probably ever since EndGame, like I have, then Oppenheimer will hit that spot in your head. ስ Again, know your history, trust me on this. It will make your experience 100x more. I was literally a child in that cinema about how I was like omg this's Albert, this's Bohr, this's Heisenberg, omg that's Strauss, omg that's the rainy night, yoo his affairs, this's The Strong bomb, that's the H-bomb engineer, this's the fear they had.... Ughhh it's was soo enjoyable! ስ So read and research before hand, keza dissolve eza and enjoy your time. Don't record minamin, there's no spoilers at all. ስላሳ Have fun ስ #Oppenheimer #Movies #DailyLife @Dagmawi_Babi

Ohw and @GastCinema bicha new miasayew so far in Ethiopia. So look out for that.

Here's the messed up part of it all. After the US dropped the first Atomic bomb(based on Uranium)(called Little Boy) on Hiroshima, Japan was basically defeated and was going to surrender. BUT YET!! ስ Truman, the 33rd president at that time decided to drop the 2nd Bomb on Kokura JUST TO SHOW THE WORLD AND SOVIET UNION THAT THEY CAN! ስ But that city had a cloud cover when the bomber pilots got there so they changed course and dropped the second (plutonium based) Atomic Bomb (called Fat Man) on Nagasaki. Ofc I don't support BOTH the bombs. And blood is on that shitty president but the second bomb is just unjustifiable by any means necessary. Cause right after the first bomb, Japan's government told it's allies that it was going to surrender and yet they bombed them again. Infact I consider it the deadliest science experiment done on humans. Because they wanted to see what plutonium would do instead of uranium as well. MTSM! Estimates put the death toll in Hiroshima at between 80,000 and 140,000, and in Nagasaki at between 40,000 and 80,000. #History #Thoughts

Being a lukewarm Christian is the most miserable state to be in. You don't love sin enough to enjoy it's pleasures and yet you don't love Christ enough to relish his holiness. So here's a weird thing I should disclose since a lot of you (and I mean ALOT) have talked to me in private about my stand on ☐☐...

I do post secular music one moment and then I post gospel music the other. And my stand is pretty simple to be honest. I don't think secular music is a sin. But I know where the idea came from. And it's this Amharic verse: • “በሕዝብ ሕይወት ላይ የሚገኝ ስሜት በሕይወት ላይ የሚገኝ ስሜት በሕይወት ላይ የሚገኝ ስሜት በሕይወት ላይ የሚገኝ ስሜት” — በሕይወት 5፡21

It's one of those annoying parts of Amharic translations that miss the point entirely. Cause NO other bible condemns secular songs except the Amharic one. And the above verse in English and any other language would translate to this: • "and envy; drunkenness, orgies, and the like. I warn you, as I did before, that those who live like this will not inherit the kingdom of God." — Gal 5:21

This is how it's translated into amharic Orgies = Revellings = ግጥም It's such a flaw in translation it made some of our lives difficult making us fight the battles we shouldn't have when we should've been focusing on other things.

So what the bible condemns isn't **████** it's Revellings/Orgies. They are these parties that are filled with alcohol, too much singing and dancing, partying and most of all sex. Group sex and public sex and more. It is THIS that the bible condemns. NOT secular music.

So what are you saying Dagim? □□□ □□□ □□□?

I'm gonna keep this straightforward and simple. And I'll make two points. And I hope it sets you free as the truth always does.

Point 1 The same way there are bad, sinful, lustful movies and books the exact same goes for secular songs. So pick your JCole's Crooked Smile from your Cardi's WAPs, your Teddy Afro's Ethiopia from your Behailu Bayou's ሕይወቴ ምን ዓይነት! Pick the good from the bad the same way you pick the good movies and books from the bad ones.

Point 2 This isn't to encourage you to start listening to secular music. This is me explaining what I think and researched about it. So when you're reading this, if you understood what I said, and you genuinely feel freed from it. Then go ahead pick good secular music and listen without guilt. Sing to your girlfriend or wife. BUT when you're reading this and you still feel guilty about it, and deep down you believe it's a sin. Then DON'T listen or entertain secular music at all.

Cause in Christianity sin can be subjective too. If I think eating Eggs is a sin and I eat them. Then that act will be sinful for me even tho eating eggs isn't a sinful act. That's because it's the rebelling of the heart that's making it sinful. It's your heart satisfying itself despite knowing it'll upset God. And the bible says this to prove this: • “וְהָיָה כִּי יִשְׁמַע ה' אֶת-קוֹלְךָ וְיִשְׁכַּח אֶת-עֲוֹןֶיךָ וְיִשְׁכַּח אֶת-כָּל-עֲוֹןֶיךָ”

“ፍጥረትን ለማወቅ ለእኛ ሰጠው ጥቅም ሲሆን ለሌሎች ጥቅም ሲሆን” — ማቴ 14፡14

SO If after all this you think secular music is not a sin, then don't be trapped in guilt or shame go ahead and enjoy the art. BUT if after this you still believe that secular music is a sin then DO NOT LISTEN NOR ENTERTAIN IT. It is sin for you to do so!!

NOW that's my understanding of all of it. Keza let me tell you something so incredible. I still believe that ማግኘት is not a sin and ofc I'm talking about the good ones not the lustful, satanic or insulting ones. BUT YOU KNOW WHAT'S SO INCREDIBLE??? Ever since I've had THAT ENCOUNTER I told you about before I'm just not interested in listening to secular music at all. Infact I was so neutral to it I've just been listening to my favorite 5/6 Christian songs for the past couple of months.

So this's the whole point of it all. It's not about whether ማግኘት is sinful or not. It's about falling in love with God and then organizing everything around you in a way that draws you closer to Him. That's literally all.

Ene I'm a HUGE fan of Ed Sheeran and Sam Smith and Many More. And you've seen how obsessively I've posted their albums and made music players for them and stuff. BUT RIGHT NOW I feel nothing towards it. I could listen to their songs and won't feel any guilt about it. But I've lost SO MUCH interest I just wanna sing to God, confess my love to him, talk sweet to him, praise him throughout the day.

That's it guys, if you love a girl more than God, you will sing romantic songs to her. And if you love God more than anything you'd sing gospel songs to him. It's as simple as that.

So my last advice is this: Don't struggle or fight to stop listening or enjoying ማግኘት, you won't win that battle. Just let it be. Enjoy it. But instead try to know God. Draw near to him while you're still listening to ማግኘት. Get to know him, read his words, feel his love. That is the only way you're EVER going to stop ማግኘት. Fall in love with God so much that all you sing is gospel songs.

I say this about ማግኘት enji, Egziabher gar Fikir siyizen bizu negerochachn sanasbew yitefalu. Sitefum aytawekunm. And ken zefagn neberku, getan kewededku jemiro Zefen keAfe tefa.

And if you want evidence about what I'm saying is true, check out my posts on this channel for the past couple of months. Even though I was ማግኘት ማግኘት ማግኘት ማግኘት ማግኘት there's no single secular music in recent history of this channel. And that is what falling in love with God does to you! You find it better to sing and worship him than any girl or event!

That concludes today's sermon ☺ I hope you've actually learnt something spiritual and insightful. Have a beautiful night! ☺

Let me drop this verse in here. To solidify how it's the connecting to God that'll pull us away from sin. “ፍጥረትን ለማወቅ ለእኛ ሰጠው ጥቅም ሲሆን ለሌሎች ጥቅም ሲሆን” — ማቴ 14፡14 He first gives us light, and it's through that light we choose the good and bad. #Scripture @Dagmawi_Babi

The owner of the @x Twitter handle, Gene X Hwang of the corporate photography and videography studio Orange Photography, confirmed that Twitter took over his account without warning or financial compensation, telling him the handle is a property of X. In a letter, Twitter thanked Hwang for his loyalty and offered him a selection of X merchandise and a tour of X's HQ, as a "reflection of our appreciation." #Twitter #TechNews @Dagmawi Babi

This's the headline right now around tech publications. Notice how they all say that it's Twitter that took the account and NOT Elon Musk. I mean every other activity of Twitter is attributed to him directly, even the ones he had nothing to do with. Why not say "Elon Musk took @x's handle without warning or compensation"? Simple answer, they're working with him, they're supporters of him. 🤔 In fact tech crunch went the extra mile of saying "The company formerly known as Twitter, but now X" almost 10 times in their article. Almost as if they're pushing forward and helping the brand. Ofc I'm okay w them being biased, there's no media that isn't. But we all know they didn't and won't do this for Meta, (which they usually still call Facebook) 🤔 #Thoughts @Daqmawi Babi

I have come to realize that all the bad is attributed to me and you and all the good is attributed to God. Now even tho this's dark there's so muchhh beauty in it. And that is the fact that since the bad is from YOU; a finite, small and relatively incapable being; there is limit to your badness. And since all the good is from God, an infinite, all powerful, all loving, all capable God; there's no limit to his goodness. Guys □□□□□□

koy give me a moment

So I'm at a summer internship right now and I'm interning at this nice place. Anyways to my current story. So how the internship works is, you'll have a coach or a supervisor and that person will assign tasks for you and you'll have to complete them. And so I completed all my daily tasks pretty fast and moved on to other tasks or my other side projects. TURNS OUT that is a problem

☐ I thought delivering quickly for them would make EVERYONE's job super easy and better. Turns out it's unappreciated here. ☐☐☐ The team lead received actual complaints that "I'm too fast and I deliver quickly" and I was literally in a meeting with the team lead and my coach and the entire SASS team about it. ☐ And so basically "AS PUNISHMENT" I am given a legacy project of over >22k lines of react code, each page basically having ~1k lines of shitty unrefactored code. And I'm supposed to refactor and modularize it. They literally have an amazing coder here and they want to punish me for being good! ☐☐☐ So yeah, learn whatever lesson you want from this. But the point is clear. ☐ Their loss! #DailyLife @Dagmawi_Babi

☐☐☐ What my coach said in our internal comm tool after it all. #DailyLife @Dagmawi_Babi

So my only principle when it comes to all work is this: "፡፡፡፡፡፡፡፡፡ ፡፡ ፡፡፡፡ ፡፡፡፡ ፡፡፡ ፡፡፡፡፡፡፡፡፡ ፡፡፡፡፡፡ ፡፡፡ ፡፡፡፡ ፡፡፡፡፡፡ ፡፡፡ ፡፡፡ ፡፡፡፡፡፡ ፡፡፡፡፡፡፡ ፡፡ ፡፡፡፡፡፡ ፡፡፡ ፡፡፡፡፡፡ ፡፡፡፡፡፡፡፡፡ " -- ፡፡፡፡፡፡ 3:23-25 And so whenever I freelance or work, I work as if I'm doing it for my God. And I pour my heart into it and work genuinely. And I did no less than that at this internship too. #Scripture #DailyLife @Dagmawi_Babi

I'm just in a dilemma, whether I should work inefficiently and slow or keep on delivering fast. But at the bottom of it all, they want slow deliverables, that's a fact. And so I will deliver slowly. I will work on my own projects while delivering slow bits of refactored code. ☐☐☐ #DailyLife @Dagmawi_Babi

This summer's last online fellowship program is about to start in 25 minutes. You're all welcome to join. ☐

Reasons to pick this community • We're pretty small: that means you'll get everyone's focus really fast • We're pretty wholesome: no gorey/disrespectful/racist/sexist content or anything (unless you really want to) • We're pretty helpful: got a problem? we just wanna help out • We're supportive: your wins are inspirational to us so it's a safe space to discuss your wins and motivations • We're pretty nerdy and geeky: the group has some of my own smartest friends and other talented and intelligent people so there's so many great people to interact with • We don't care for numbers: We don't want just a huge group of people joining, we care about the quality of content being shared and discussed. So basically everything that gets mentions is discussed well • Different age groups: we got middle schoolers, high schooler, a bunch of young adults, and actual wise old people • We've got a well classified topics group: so if you've got anything to talk about you'll probably find somewhere to fit in • We're expansive: when you join the community you'll also get links to a bunch of other amazing communities. So join us! ☐☐ •

Here's a new channel joining us ☺ I'll be welcoming my own amazing cousin and his new channel. He's a very intelligent, pretty quirky and funny dude. At launch, it had grown to 3 product managers, 3 designers and 50 coders. It's awesome what an engineer heavy team can do. ☑ #Threads #Articles @Dagmawi Babi

Just a subtle note. I am against homosexuality, transgender stuff and all that LGBTQ+ situation. But I'm not out to kill these people. I'm seeing this trend where homosexuality is seen as the sin of all sins, the bringer of fire on sodom, the unforgivable sin. My dudes, in God's eyes he doesn't see your porn any different from their homosexuality. He sees your lust the same way he sees gender transitioning. Just because you're not kissing the same gender as you doesn't

mean you're holier than thou. And doesn't give you the right to judge and kill these people. Here's the bottom line, be a hypocrite and crucify, judge, isolate and harm all these people that lack God's love and care. BUT DO NOT SAY THAT YOU'RE DOING IT FOR GOD! ORR YOU COULD ACTUALLY REPRESENT GOD and actually inform people about how it's all a spirit, how these people lack God's understanding, and how they need to be taken care of with christian love and care and not with torches and spikes.

I say this again, the people out there murdering, torturing and harming all these lost souls are not and do not represent the loving God I preach out here. He never sent us christians to go after sinner to kill them and send them to hell. He sent us to save and rescue souls. To transform these people's lives with Christ's love.

There's this lovely quote I know that came to mind just now when I was thinking about all of this: "God has the worst PR (public relations) team." We represent him sooo badly it's made so many souls astray. And we're so murderous we try to justify our killing tendencies by claiming that we're doing it for God.

Now everyone else look away, I'm going to talk to these beautiful souls that are being persecuted. Ik that some people in the LGBTQ+ lifestyle might be members of this channel. And so I'm talking to you guys...

Hey you ☹ I know times are scary. It feels like the whole world is out to kill you for doing the things you did, for feeling the way you felt. I'm sorry about the pain you're going through. The world is defiled, it's run by hypocrites. Don't expect anything good out of this sinful world. And I'm sorry about the "christians" that use my God's words to justify their persecutions and killings against you. But what I'm here to tell you is this: It doesn't matter if you are born gay, or born in the wrong gender, it doesn't matter if you feel these feelings towards the same sex, it doesn't matter if you've spent your entire life in a homosexual lifestyle. I'm here to tell you that it's all okay. The bible says that we're all born out of sin and we're all born defiled. The same way you're born a sinner, the disciples of Christ were also born sinners. Your sins are no different than mine or anyone else's. We're all just hungry for blood that we try to justify it sanely. I sin everyday, the same way you sin everyday. Your homosexuality divides you from God, the same way my porn divides me from God. We're no different, I'm as much of a sinner as you are.

I'm here to tell you that there's always a new start. And the best of all starts is with Christ. He is a refugee for the murderers, prostitutes, homosexuals, thieves, you, me and all of us. He doesn't take delight in punishing you, he loves forgiving you more than punishing you. He craves your presence so much that as soon as he makes a good enough christian he sends them after you. None of us will make it to heaven unless we're born again. So be born again as I was. Repent of all your sins, pray to God to save you and to send you his spirit and be born again. Accept christ into your life, deny the world, deny yourself. Let the bible guide you in your steps. God is willing to save you, to give you a brand new life as he has given me. He is willing to guide your steps and to spend each existing moment of your life with you.

He loves you. He absolutely loves you. He loves you so much he came down to die for you. To give you this brand new start you needed. This's what God is: • “אֱלֹהִים הוּא יְהוָה אֵין עִמּוֹ כְּמוֹתָיו וְאֵין עִמּוֹ שִׁמּוֹתָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו” — תנ"ך 46:1 • “אֱלֹהִים הוּא יְהוָה אֵין עִמּוֹ כְּמוֹתָיו וְאֵין עִמּוֹ שִׁמּוֹתָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו” — תנ"ך 25:4 • “אֱלֹהִים הוּא יְהוָה אֵין עִמּוֹ כְּמוֹתָיו וְאֵין עִמּוֹ שִׁמּוֹתָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו וְאֵין עִמּוֹ מִשְׁכָּנָיו” — תנ"ך 1:7 So genuinely pray to him and trust that he hears and will care for you. Don't be afraid, God's love and spirit is the highest of all love and the most

protective powerful force in the universe. It's okay! God loves you, he will forgive you and will run to you with open arms and accept you back! ☐

🙏 These verses show the sheer size of God's love and care for us. “ᐅᐅᐅᐅᐅᐅᐅ ᐅᐅᐅᐅ ᐅᐅᐅᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅ ᐅᐅᐅᐅᐅ ᐅᐅᐅᐅ ᐅᐅᐅᐅᐅᐅ ᐅᐅᐅᐅ ᐅᐅ ᐅᐅᐅ ᐅᐅ ᐅᐅᐅᐅᐅ” — ᐅᐅᐅᐅ 3ᐅ17 “ᐅᐅᐅᐅ ᐅᐅᐅᐅᐅ ᐅᐅᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅ ᐅᐅ ᐅᐅᐅᐅᐅᐅ ᐅᐅᐅᐅᐅ ᐅᐅᐅ ᐅᐅ ᐅᐅ ᐅᐅᐅᐅᐅ” ᐅᐅ ᐅᐅᐅ ᐅᐅᐅᐅᐅᐅᐅ” — ᐅᐅᐅᐅ 54ᐅ10 “ᐅᐅ ᐅᐅ ᐅᐅᐅᐅᐅ ᐅᐅ ᐅᐅᐅᐅ ᐅᐅ ᐅᐅ ᐅᐅ ᐅᐅᐅᐅᐅ ᐅᐅ ᐅᐅᐅ ᐅᐅᐅ ᐅᐅᐅᐅᐅ” — ᐅᐅ 5ᐅ8 Honestly this feels like the biggest I love you I've ever heard! 🙏 #Scripture @Dagmawi_Babi

One of the most important thing I'd like to tell you about this project is that during beta testing some amazing friends of mine decided to tweak the site here and there, add super aesthetic things and even integrate a built in content management system into it. ☺ @Robi_Mez made the beautiful dynamic colored circles in the background of the pages making the site so much more aesthetic. ☺ @Blogrammer made adjustments to the responsiveness of the site to help make using the site in all platforms as comfortable as possible. ☺ @Bes0King integrated a built-in full-on content management system to allow editing all content of the blog using a graphical interface than a config file. This's just epic! ☺ I thank all of you for making the blog look, feel and function so much better. You guys are INCREDIBLE! ☺ #DBlogs #MyProjects @Dagmawi_Babi

☐ Today Telegram turns 10 years old. In just a decade, Telegram gained over 800 million active
users purely thanks to word of mouth. Through numerous updates and improvements over the
years, Telegram has redefined what a modern messaging experience should be like. The next
step for Telegram is to go beyond messaging and spearhead innovation in social media in
general. We should use our popularity to change the lives of billions for better, to inspire and
uplift people on our planet. Today's gradual roll-out of stories for all users marks the beginning
of this new stage in the history of Telegram. While this past decade was exciting, the next 10
years will be the time when Telegram reaches its true potential. ☐

You can all now post stories ☐ Also happy 10th birthday to @Telegram

Lmfao 📄📄📄📄 Absolute peak entertainment 📄 #FunnyVideos @Dagmawi_Babi

Okay, now I know what I feel about Telegram's Stories feature. It's incredible. I'm glad they copied it from Instagram (who copied it from Snapchat). So here are my thoughts: I see huge potential for marketing and for content reach. I mean my telegram stories got ~400 views in less than 12 hours which is nearly double the amount my IG stories get in 24 hours. 📄 And if it comes down to numbers, it's obvious everyone has so many "followers" in telegram than any other major social. Everytime you chat in your class group, any other community, chat with friends and so much more... Your stories will be viewed, hence getting your content so much reach. 📄 Then there's the built-well from the ground up aspect of it. Forget the detailed privacy control, forget having all the features of IG stories, forget that it's subtly designed... The mere fact that u can edit stories is a HUGE feature. (If you're an IG stories addict like me, you'd get it more - but editing stories is an absolute banger) 📄 Then there's the non-discriminatory part of it. All free features of telegram are accessible to everyone everywhere. Using Instagram is so annoying where some can post notes and you can't, some can post music while other can't post as couples. It legit feels like everyone has a different Instagram. BUT not telegram. In telegram if I can post spotify songs up on my story for free, you can too. 📄📄 My only concern is this... People have contacts they don't care about. So seeing stories from YeAskalech 3gna lij is kinda annoying and no different from spam. Keza wuchi if it's not spammy it's lovely. #Thoughts #Telegram @Dagmawi_Babi

Broooooo this reachhhh □□ #Telegram #Stories @Dagmawi_Babi

UK what I mean by this right? My story is literally worth so much more than my channel and my IG interms of reach. Both my channel and IG stories get ~200-400 daily views. My telegram stories get ~600 view. □ Meaning, my actual telegram profile is so valuable. Defo going to be sharing content there. □

Koy let me quickly sketch up the feature I want from telegram...

When forwarding posts from channels, there should be a "Add to my story" feature. □

Guys □ Let me tell you what an amazing community member discovered. This's probably the first place you'll hear about this. So M-PESA is the telebirr of safaricom. So what @UFIESLOARIF did was... After creating his account he didn't activate it. Then he just started using the normal functions like checking airtime and stuff. BUT THEN □... If your account isn't activate and if you transfer your own airtime back to your own account Safaricom will infinitely give you bonuse internet megabytes. I just tried it after he told me and i'm like pilling up bonus megabytes simply by sending my own airtime money back to me. □ #Safaricom #MPESA @Dagmawi_Babi

There's also this...

You know they have night internet package(max 1.5gb for 10 birr, daily),you just buy another package before the first package expires and it adds up

I'm being tempted to do this till I get 1GB worth of bonuses... The Christian in me won't allow me tho □□

They also give you 20ETB for signing up just so you know. #Safaricom #MPESA @Dagmawi_Babi

Are you pee? Cuz urine my heart □ #PickUpLines @Dagmawi_Babi

Today I learnt that Joachim Hossenfelder, a Lutheran theologian in Nazi Germany, was known for his support of the Nazi regime's ideology and its attempt to align Christianity with National

Socialism. He was associated with the "German Christians" movement within the German Protestant Church that sought to integrate Nazi principles into religious teachings. This movement aimed to create a "Positive Christianity" that aligned with Nazi racial and nationalistic beliefs. Hossenfelder's views were controversial and not universally accepted within the Protestant community. Theologians like Dietrich Bonhoeffer and Martin Niemöller strongly opposed the "German Christians" and their attempts to merge Christianity with Nazi ideology. #History #JoachimHossenfelder #Nazi @Dagmawi_Babi

Ofc, the sad thing I realized is that here in Ethiopia, Abiy Ahmed was preached alongside and sometimes instead of Jesus at most Sunday services. ☹☹☹

Idk how Christianity fits exactly into politics and country leading yet. But now I know it's not in the form of supporting and preaching leaders in congregations.

If you have enough faith to believe in evolution, how come you don't believe in God?

You read the complete bible and you don't believe God exists? That's like saying I read a neuroscience book and I don't believe in nerves.

Do you think randomly written code will give rise to sentient AI? NO. Careful math, science and engineering does. Why do you believe life came about out of pure randomness?

You lost someone close? You've been harmed as a child? I get you. Pain, does, exist. If pain is so evil and bad, shouldn't the complete opposite exist too?

Humans advancing in science and technology and in doing incredible feats of engineering doesn't prove that God isn't real. We parted the sea? But look how much effort and years it took you to do that? Advancement in science compliments God. The more complex the tech, the incredibleness of God is shown in his ability to do incredible thing in flesh and meat.

How does a good God allow people to starve all around the world? How do we let rich people horde so much cash in their banks that could've solved world hunger overnight?

You're so smart and intelligent? That's why you don't bother with lame backward Christianity? And you don't think science and religion can go hand in hand? My man, Albert Einstein believed in God. Richard Feynman (named smartest man alive) said there was no inconsistency between believing in science and believing in God. Please shut up.

There is no evidence for God! Believing in God, is no different than believing in Santa or the tooth fairy! Let me ask you an honest question. What evidence do you need to believe that God is real and he exists? Do you not know that the exact same miracle performed to a group of people isn't sufficient enough to convert the entire mass?

Unless you're willing to accept God. No amount of miracle will convert you. 10 plague and wrath were poured onto the Pharaoh in Moses' time. And in all of them he didn't believe in God. Even in the midst of parted seas, he didn't.

The bible has been tampered with, that's why I don't believe in what it says. Ohw okay. Read bible and early church history. Unless you do that, you are talking jibberish and nonsense.

There are so many religions in the world, why would I believe in your God? So you chose to believe in none? Isn't that like saying "There are so many fields of study to learn. So I decided to learn none of them!" Shouldn't you atleast go around and listen to what most sanely built religions and faith have to say?

I'll just cut this short. Cause honestly my aim isn't really to trigger or upset people. (Cause I literally get no benefits from it) But it's just to actually simply make simple easy cases for common beliefs. And most importantly so we can chat a bit in the comments.

Look I can literally write you beautiful, poetic, scientific arguments with fancy words to make my case up for belief in the existence of God and I can do so cause I'm incredibly intelligent (gifted from God) But I saw that most atheists are egoistics. And I didn't want to open the chance for that kind of ego rubbing conversation where we go back and forth with proving who's more

Note: don't add chocolate on eggs while cooking

I'm not saying I did. I'm just saying don't.

Loved this! ☺ If i ever had a cafe, i would have a broke-accino on my menu ... that's a cappuccino but its also coffee and milk, and its also from yesterday, and its also good with cheap cigarettes on the side. but the broke writer who always sits in the corner doesn't mind, he just wants to be in the space, and he wants to be there all the time, preferably with something warm between his hands, he has called it home, and i cant find myself to evict him. he comes before we wipe the tables so when he leaves there are dust marks the exact size of his laptop, his hands, his phone, his journal and even dust marks of his perfect tiny butt still resides on the chair. i would often go to him with his order already in my hands, and he'd lasso me into his world with his sharp tongue and his slow gestures. he doesn't look me in the eye too often but when he does, i wouldn't be able to leave. i'd move into the tiny home he has made with his thoughts in the quite shaded corner of my little cafe, preferably with a broke-acciono also in my hands. some people pay with presence more than they can ever pay in monetary value. thats the price of my broke-accino, your presence. So the world has limited servers and memory space. Physics and reality itself can't allow us to produce computer memories larger than the ones we have now. So in order to counter this problem the world resets everyone's memory every 24 days. It's just really fascinating and got me hyperfixated on it. Like there are 1.5 billion discovered knots. And if you could tie these knots around a molecule you can literally form new elements. (A small amount has been done and has given rise to new elements) So in theory, if we could do this, there are 1.5 billion elements waiting to be discovered. Imagine the possibilities of their properties and more.

Also, knots are pretty unique. So someone build this, imagine pokemon but for knots. Each knot got special properties too so it's pretty fun.

Yes, got a fan of the podcast ☺

Let's learn something about Bible translations for a moment esti...

This is the family tree of English Bible Translations #Bible #BibleTranslations #DataViz @Dagmawi_Babi

Haven't you ever wondered why there are so many versions of the bible even within the same language? Let's take a simple look into that

So the Old Testament in the Bible was written completely in Hebrew with small bits of Aramaic here and there. And the oldest and most complete version of this book is called the Masoretic Text. And almost all the time this is what scholars use to translate the Old Testament.

However when translating the New Testament things become slightly hectic mostly because there are tons of Greek Manuscripts scholars can use.

These Greek Manuscripts can be grouped into three. 1. The Western which were used in early Rome churches. And these manuscripts were used to create the Vulgate, which's the latin version of the bible that was used by the Catholic church. (You can see translations that use this in the graph colored red)

2. The Byzantine groups of manuscript AKA the majority texts. These were used by Eastern early Rome Churches. These documents were later used to create a Greek version of the bible known as Textus Receptus. (You can see translations that use this document in the graph colored blue.)

3. The Alexandrian AKA the neutral texts. These documents are considered to be the most

accurate and reliable even when including documents in recent history, within the last 100 years. These documents form the basis for the Novum Testamentum Graece AKA Nestle Aland. This greek document is what almost all scholars use to translate the new testament today. (You can see translations that use this in the graph colored yellow)

Now let's look at early English and Amharic translations as short as possible...

The earliest attempt to translate into English was done by a priest called John Wycliffe and he used the Latin Vulgate to do so. But he died before he finished and his friends had to finish it for him. (1390) The one drawback of this translation is that it used middle English, which is difficult to read and comprehend.

The first bible that used modern English was the Tyndale Bible translated by William Tyndale also using the Latin Vulgate. (1526) This action led to his execution and he couldn't finish the translation.

Ironically the king (Henry 6th) that ordered William Tyndale's execution for Bible Translation ordered a new Bible Translation after a few years. Known as The Great Bible. And this was used in all churches of England. (1539)

However, The Great Bible was still too expensive for anyone to own. That all changed when Calvinist Protestants decided to translate and publish The Geneva Bible. (1560) This Bible is different from all we've seen so far in that it used the Textus Receptus of the Byzantine Manuscripts. And also this is the first bible that uses Chapter and Number division that we still use today. This Bible was mass produced and so this was the first bible that reached the hands of the common man.

BUT the publication of The Geneva Bible made the Anglican Bishops at the time unhappy because they thought everyone having their own bible would undermine their powers. So by the grant from Queen Elizabeth 1, they made the Bishop's Bible. (1568)

So during this period, England was in a weird state where in the churches The Bishop's Bible was read but everywhere else The Geneva Bible was the main book.

Then this conflict was then solved by the publication of the most famous and still used translation of the bible called The King James Version. (1611)

During this time, there were so many manuscripts that were being found which are categorized under the Alexandrian Manuscripts. These collection of Greek Manuscripts were compiled into what's known as the Critical Texts.

Now translations that based on the critical text are considered to be some of the most accurate bible translations ever. These include the English Revised Version, American Standard Version and all those that branch from these.

The Revised Standard Version you see under the ASV is a very unique bible in the way it was translated. (1962) Tons of Scholars from different christian denominations gathered and worked together to form this book. Catholics, Protestants, Orthodox and so many more worked together into forming this bible version.

Sadly this bible version became a bit controversial in the way it translated Isaiah 7:14. The Old Version said • The Lord himself will give you a sign. Behold, a virgin shall conceive and bear a son. The Hebrew word for virgin is *almah*. Which translates to a young woman. And so they accurately translated the verse as. • The Lord himself will give you a sign. Behold, a young woman shall conceive and bear a son. Though this translation was so accurate it made a lot of people unhappy.

Now to solve this conflict a new version was made, The New American Standard Bible. (1971) This bible version is my personal favorite and it's the bible I use for most of my studies. The reason I do that is because this version is considered to be the most literal translation of the bible. It tries to translate the original texts word for word but adjusted slightly in a way it's readable.

Now, the complete opposite to the NASB is The Living Bible translation. This bible is not even a translation, it's a paraphrase. And it's entirely written by 1 person called Kenneth Taylor. This book is still significant by making the bible more readable and understandable to so many people and so it is still one of the most loved versions of the bible.

Then The New International Version was made. This translation is very profound in a way that it didn't use any previous translation and they all started from scratch using the critical texts. This bible is also clever in a way they translated. They used what's called a Dynamic Equivalence translation method. So instead of using Word for Word translation they used phrase for phrase.

Now using this same style of translation The New Living Translation was made. But this version depended on The Living Bible version that we talked about earlier. They used the same style of translation but tried to be as accurate as possible.

As you can see down in the graph. The Revised Standard Version was used for two other versions. The New Revised Standard Version and The English Standard Version. These two books are very different from each other. The NRSV is very liberal and is more gender neutral while the ESV is more conservative and is a more literal translation of the bible.

Now there are a ton more that I won't be getting into which I will leave for you to research on your own. But these are the most popular and fundamental versions.

Now to Amharic Bible Versions...

Although Christianity became the state religion of Ethiopia in the 4th century, and the Bible was first translated into Ge'ez at about that time, only in the last two centuries have there appeared translations of the Bible into Amharic.

The first translation of the Bible into Amharic was by Abu Rumi in the early 19th century. While travelling through Cairo at about 50/55 years old, Abu Rumi became very ill and was taken in by M. Jean-Louis Asselin de Cherville, a French Consul in Cairo. He provided Abu Rumi with food, lodging, and medical care. But more significantly, he also provided him with writing materials. Over a period of 10 years, Abu Rumi produced a complete translation of the Bible in Amharic before he died of the plague in Cairo.

So for me this guy is a bit shady

For 10 years, every Tuesday and Saturday, he would be alone with a few people and they would go about translating the bible into Amharic. He told the people around him that he was using an Arabic version of the bible (since Arabic was much more connected to Greek than English) but he never disclosed what Arabic version he used.

But eventually the manuscript containing his translation was purchased by William Jowett by £1250 on behalf of the British and Foreign Bible Society. He took it back to Britain where it was typeset and printed. These printed copies were later sent back to Ethiopia with a few adjustments and corrections.

A copy of Abu Rumi's translation of the Bible in Amharic was eventually found in a monastery in the early 1860s and launched a church renewal movement that eventually led to the founding of the Ethiopian Evangelical Church Mekane Yesus.

In 1935, Emperor Haile Selassie 1, during Italy's invasion of Ethiopia, he ordered a translation of a completely new bible. This manuscript was later sent to Britain and printed, but most of the copies were destroyed in a fire during the bombing of London. This translation is AKA the "Buxton" translation, because a British missionary named Alfred Buxton was instrumental in sending the manuscript from occupied Ethiopia to Britain.

This same basic translation, with some changes, was later printed in the USA, with funds raised by Rev. Donald Barnhouse. After it was printed this translation (sometimes referred to as the "Barnhouse New Testament") was found to contain a serious error in Rev. 19:10 & 22:9 (an angel commanding John to worship him, rather than prohibiting John to worship him), so most copies were destroyed.

In 1962, a new Amharic translation from Ge'ez was printed, again by the order of the Emperor. This bible is known as the 1955 Amharic Bible in Ethiopia. And it is the most used bible to this day. This version was said to be done by a council called The Bible Committee the emperor created. At first a 66 books version was released and later on the 81 books version.

Under the Bible Society of Ethiopia (a member of the United Bible Societies), a new translation was printed in 1987, translated directly from Hebrew and Greek. A revised version of this appeared in 2005. These versions contain only the 66 books of the Protestant canon, and they have not been widely embraced by the Ethiopian Orthodox Tewahedo Church.

Then in the years that followed • Living Bibles International produced a New Testament. The International Bible Society produced a complete Bible in 2001. This is a translation from the English NIV, or is at least very heavily reliant upon it. • In 2008, the Watch Tower Society produced an Amharic translation of Jehovah's Witnesses New World Translation of the Holy Scriptures.

Then for the millennium celebration on the Ethiopian calendar, the Ethiopian Orthodox Church and the Ethiopian Bible Society produced a new translation. This translation differed from recent Amharic translations in that the translators generally followed the Greek Septuagint translation for the Old Testament and the Ge'ez for both the Old and the New. It was warmly welcomed by the Orthodox, but not by Protestants.

That would be all for now. Ofcourse there are a lot more English Bible versions I haven't talked about. So you have to do your own digging after this. I'll leave you all my sources here and you

can do your own research. Sources • <https://youtu.be/Zvre1MNat-8?si=CN-gxiRKL84GiAvQ> • https://en.m.wikipedia.org/wiki/Bible_translations_into_Amharic • https://en.m.wikipedia.org/wiki/Edward_Ullendorff • https://en.wikipedia.org/wiki/King_James_Version • https://en.wikipedia.org/wiki/New_American_Standard_Bible • https://en.wikipedia.org/wiki/Easy-to-Read_Version • <https://www.biblestudytools.com/bible-versions/> #BibleTranslations @Dagmawi_Babi

Now to publish bibles using any of these versions would require licenses and copyrights. To combat this a very interesting version of the bible was made. The World English Bible.

It is a version that's freely shared online. It is basically the opensource of bible versions. Created by volunteers with oversight by Michael Paul Johnson, the WEB is an updated revision of the American Standard Version. Michael Paul Johnson felt commissioned by God 'to create a new modern English translation of the Holy Bible that would be forever free to use, publish, and distribute.'

Since he did not have formal training in this regard, he started to study Greek and Hebrew and how to use scholarly works. His first translated books were the gospel and letters of John, which he shared drafts of on Usenet and a mailing list, receiving some suggestions and incorporating them. Estimating he would be 150 years old by the time this style of work would be finished, Johnson prayed for guidance. The answer was to use the American Standard Version (ASV) of 1901 because it is regarded as an accurate and reliable translation that is fully in the public domain.

Johnson's main goal became modernizing the language of ASV, and he made custom computer programs to organize the process. This resulted in an initial draft that 'was not quite modern English, in that it still lacked quotation marks and still had some word ordering that sounded more like Elizabethan English or maybe Yoda than modern English.' This draft was soon named World English Bible (WEB), since Johnson intended it for any English speaker, and the acronym indicates that the Web is the means of distribution. Over the years, a number of volunteers assisted Johnson. The entire translation effort was deemed complete in 2020, and the only subsequent changes have been fixing a few typos.

That concludes today's lessons! I hope that was helpful and interesting. ☐

As you can see you have to choose what bible version is best for different occasions. And when you're having bible studies it's best to read multiple bible versions at the same time to cross reference and get the bigger picture of the things being said.

Which brings me to this ☐

This week's product launch is the most meaningful product for me. It means so much to me. And I'm hoping and praying it becomes an incredible tool at your disposal. ☐ I went through great length to gather resources and build it up. And it's all done with God's plan and grace. ☐ And so without further ado, here's this week's new and amazing product ☐ ...

☐ My Bible Introducing an aesthetic, minimally designed and feature rich bible app with multiple versions and study notes. ☐ This bible app is built around the idea that in order to grasp a fuller picture of the meaning of scriptures, multiple versions should be read and studied in parallel. ☐ And so this bible app is designed and built in a way that puts the bible at the center of the user

Here's something profound: King David of Israel impregnated the wife of Uriah, who was an elite commander of David's army. Then David had Uriah killed to cover up his mess. Abraham trafficked his own wife. He allowed Sarah to sleep with the Pharaoh to avoid being killed in Egypt. King Solomon was a notorious womanizer. He had 700 wives and 300 concubines. Eventually they turned his heart onto other gods. BUT You know what the bible says about these men? • David - the man after God's heart • Abraham - father of many nations • Solomon - the wisest man of all time God doesn't identify you with your sins, he gives you new identities. #Spiritual @Dagmawi_Babi

The ultimate bug isn't in your code, it's in your thinking! I learnt something great last night. Margins are horrible to use and they've actually made my life harder ever since I started using component based frameworks. The idea is simple in component structures. Build the component it self in a self contained box (encapsulation) Margins are the opposite of that, they break component encapsulation. A well-built component should not affect anything outside itself. Margins make reusability harder. Good components are usable in any context or layout. Here's a pretty amazing blog about it • <https://www.joshwcomeau.com/css/rules-of-margin-collapse/> Another great one • <https://mxstbr.com/thoughts/margin/> And TheoGG's reaction about it • <https://www.youtube.com/watch?v=KVQMoEFUee8> #Programming #Blogs #YouTube @Dagmawi_Babi

This project means so much to me! And I hope it becomes huge! ☺

Are you ready? ☐

Announcing...

☐ Ruthful Hearts • RuthfulHearts.com Ruthful Hearts is aiming to change people's lives one person at a time. ☐ We have these core principles: 1. Anonymous Donations: Because charity is all about helping the needy selflessly, we keep the identities of the donors private. We use a huge range of payment options for you to transfer money which also includes crypto. ☐ 2. For All Kinds of People: We value a person simply because each human life is valuable. We don't discriminate by any reason of division. We simply lend a hand because everyone deserves a second chance at being brand new and good! ☐ 3. One at a Time: The way we help people is by running fund raising campaigns every season of the year. Then depending on the amount of donations gathered, we invest it all on one person. We do this so a person's life instantly and drastically changes for the better! ☐ 4. Private and Graceful: We're trying to give people a brand new life and that starts by keeping their identities private within the Ruthful community. We don't share them around social medias or use them to promote this charity. We keep their dignity and respect them fully. ☐ Join the channel and start donating now ☐ • @RuthfulHearts Let's Change Lives! ☐ #RuthfulHearts #MyProjects @Dagmawi_Babi

This project isn't for me. It's not for us. It's for the people in need. This is for the ones that sleep out on the streets when it rains, for the orphan kids roaming the streets, for the poor mothers who can't feed their children, for the disabled fathers who spend their lives begging, for the students who can't keep learning, for the addicts who need help, and for so much more. ☐ This is for them. And it takes a lot of us to make changes. But even changing 1 person's life is absolutely miraculous. So let's do it! ☐ #RuthfulHearts #MyProjects @Dagmawi_Babi

FAQ 1. Where do the donations go to? • The money you guys donate will go to my account and in @RuthfulHearts channel I update how much money I've received so far. 2. Who are we helping? • Based on the amount of donation we raised, we will select a suitable person that fits the donation amount to invest all the money on. 3. What's the money goal? • As much as we are able to raise within one week of fund raising. 4. How should we trust you? • You just have to, but after a week you will see a video of me using the money to buy supplies and more to support and help someone in need. 5. How often do we fund raise? • We hold fund raising campaigns online once every 4 months per year. 6. Are we just going to give them money? • No, we're going to buy supplies, clothings, food and so much more depending on the person being helped. #RuthfulHearts #MyProjects @Dagmawi_Babi

Ruth means Compassionate 📦 Ruthful Hearts means Compassionate Hearts 📦

This fund raising will go on for a week and by the end of it we will finally help change someone's life with all the donations. 📦 Until then, I will promote in all my socials. It would be great if you share around to your channels, friends, family and more. We're all in this together to change people for the better. 📦 Website • RuthfulHearts.com Telegram • @RuthfulHearts Instagram • instagram.com/RuthfulHearts #RuthfulHearts #MyProjects @Dagmawi_Babi

And most of all don't forget to donate. You don't need to wait until you're filthy rich, win the lottery or get enough money. You just have to donate any amount from what you already have. • If you have a constant stream of income, just donate. • If you don't have a constant stream of income, just donate. Ohw and don't forget, I will match any donation from 100 and below. 📦 So your 5 birr donation will be 10. 📦 #RuthfulHearts #MyProjects @Dagmawi_Babi

1,000 Birr 📦

We've managed to raise 14,300 Birr in just 3 hours. This's just amazing! You guys are incredible! 📦

This campaign will be open for 1 whole week so don't forget to donate within this period, it will definitely be meaningful! 📦

300 Birr 📦

10 Birr 📦

Any amount from 100 birr and below I will match and double it. So keep donating however much you can donate it will mean so much! 📦

FOR EVERYONE THAT DONATED: THANK YOU SO MUCH FOR DONATING! WHAT YOU DID CHANGES LIVES! 📦📦

Everyone can help by sharing Ruthful Hearts website or telegram around, by encouraging people to donate and so much more. Every single good thing you do counts!! 📦

We have 1 week to make history. Keep sharing and donating! Let's have an amazing and blessed week of fundraising and make it count! 📦📦

High key glad that I get to be part of these lovely and incredible people. ☺☺

For the first 6-months or so, infants are helpless. They cry out and their mother gives them whatever they need without question. Mostly food, comfort and diaper changes. There is obviously no expectation that the infant do anything to take care of themselves. Women are predisposed to taking care of infants. This means that women are predisposed to providing unquestionably to their infants. Dr. Peterson's assertion, is that childless women don't have an infant to care for and instead extended this unquestioning care to other things. They don't see illegal aliens, homeless, criminals, drug addicts, etc. as people with agency, they see them as infants who need to be cared for without any return obligations. This is opposed to women and men with children who understand that those people need to be guided towards making healthy choices and learning how to care for themselves, and simply indulging them is actually harmful. The expanding numbers of childless women has led to voting for policies like open borders, open air drug use, unprosecuted crime and defunding of police. This has led to the rapid decay of society, especially in big cities. It's not good for anyone. #Random @Dagmawi_Babi

I've been talking with our community about how views on Twitter are just stupidly absurd and how they shouldn't mean anything and shouldn't be used for marketing. It's literally stupid, videos getting 350mill views within a day or something. Even YouTube doesn't do that. YouTube uses 4 seconds to count as views and even the most trending videos get a max of 60mil. Twitter says the least trendy vids get 350mill views, like bruh straight up deceived people. So they're probably using 1 second, if not less. Mr.Beast asked Elon about how views are counted, usually Elon replies almost instantly and now it's been days. Lol Shady metrics are going on in Twitter. And it's stupidly deceiving and meaningless. #Random #Thoughts #Twitter @Dagmawi_Babi

Today is the last of the first fund raising campaign of Ruthful Hearts. ☺ Let's share and spread the news, donate and encourage others to donate! ☺ Let's change someone's life. ☺ ☺☺☺☺☺☺☺

Current Stats ☺ ☺ RuthfulHearts.com Our website crossed over 1,000 visitors ☺ ☺ @RuthfulHearts Our telegram community crossed over 100 members ☺ ☺ instagram.com/RuthfulHearts Our Instagram page got over 30 followers. ☺ ☺ Donations Our donations have now crossed over a huge milestone of 2☺1☺☺0☺0☺0☺ ☺☺☺☺ We're so grateful for all the progress so far. Can't wait to end it with a banger. ☺

☺☺☺☺ ☺☺☺ ☺☺☺! ☺ All of you who are donating, sharing, and supporting the project in anyway you could. Words genuinely fail me to describe how I'm blessed to be part of a community like you! ☺ With 10 hours remaining, you're still going hard on your supports and donations. And I just wanna say thank you, keep doing what you do best and that is being good and changing for the better! ☺ Let's have an amazing last day of fund raising. ☺

On a completely unrelated note to @RuthfulHearts I'm proud to promote the following project...

Andimta Andimta is an incredible resource for enriching your Bible study sessions, heavily

inspired by Dagmawi's MyBible App. This website is specifically designed to provide seamless access to various translations, Greek and Hebrew manuscripts, as well as commentaries of the Church Fathers. With just a single click, you can explore these valuable resources. But that's not all! Andimta goes above and beyond by offering AI-generated quizzes tailored to the specific chapters you're studying. This interactive feature adds an extra layer of engagement and learning to your Bible study experience. To access Andimta, simply visit andimta.netlify.app and unlock a world of knowledge and convenience at your fingertips. andimta.netlify.app #andimta #bible #projects #MyProjects

I'll do a proper promotion later on but, to sum it up: The project is incredibly well built. I've been using it ever since @HenaCodes created it and it's been really helpful. It takes my bible app into the online realm, bringing it to your PC, tab and more. It also has so much more translations and even has the Greek and Hebrew versions. And for the new Testament it has the church fathers' commentaries. 🙏 I recommend it BETAM!! SO PROUD OF THE PERSON WHO BUILT IT IN SUCH A SHORT NOTICE. 🙏

@RuthfulHearts donations have now reached 20100605010 🙏🙏🙏 Only 30500 🙏🙏🙏 remain to cross over the next milestone of 22,000 Birr. 🙏 With less than 6 hours remaining until the funding campaign completes, let's see how high this rocket can fly. 🙏 🙏

🙏 @RuthfulHearts Last 2 hours and 50 Birr remains to cross over onto the next big milestone. 🙏 Keep sharing, donating and supporting us. 🙏

@RuthfulHearts just crossed over an incredibly huge milestone of: 20200000010 🙏🙏🙏 I'm just lost for words!

@RuthfulHearts is now at 20200500000 🙏🙏🙏 We're now aiming for 23,000 Birr 🙏

@RuthfulHearts have now crossed over 20300300000 🙏🙏🙏 With less than 1 hour remaining we are aiming towards 25,000 Birr. 🙏

I am left speechless but just want to tell you that @RuthfulHearts has reached a gigantic milestone and has now crossed over 2050002050 🙏🙏🙏 I don't know what to say! 🙏🙏

20 minutes are still available for your donations. Anyone who hasn't donated, you're more than welcome to do so. 🙏

The very first fund raising campaign of @RuthfulHearts is now complete! 🙏

I would just like to start off with ... THANK YOU SO MUCH! YOU'VE ALL DONE SOMETHING SO INCREDIBLE!! 🙏 We're left speechless by how incredibly all of you have donated, shared around, encouraged others, and supported us in all the ways you could!! With a small community raising 25,000 Birr is just unthinkable and is just absolutely insane!! It might sound small for some of us, but 25,000 Birr is like a millions dollars for those in need. So many have died because they couldn't pay their medical bills that are less than 25k birr, others are still suffering because they can't afford that medicine that cost a little less than 2,000 Birr, and some mother is out there begging and worrying over how she'll take care of her kids. This money that we've collectively gathered is meaningful, powerful, and is capable of making a permanent good mark in someone's life. And it's EXACTLY that, what we will do! You all have been wonderful in all your helps. We're so thankful for all you've done! WE THANK YOU AGAIN!! KEEP THAT

COMPASSIONATE HEART OF YOURS SAFE. KEEP BEING AND DOING GOOD! All of you have Ruthful Hearts! GOD BLESS YOU ALL!!

I'm sorry I took long, it's so hard to write a thank you note when you're left speechless! ☺

This note is from me personally... I honestly can't believe all of this and am left speechless over the blessings that's been happening in my life. 🙏 This channel started off so small and humble, and it's not even among those that have a ton of subscribers, but yet here we are raising an incredible amount of money and support from our small but nonetheless fully capable and compassionate members of our community! 🙏 God has been absolutely kind to me! I remember, I prayed about this project way before I even started building it, and he listened. I didn't even think we would get 1,000 Birr ☹️☹️ 25,000 Birr. But he blessed it and blessed it and kept on blessing it!! He was absolutely generous! 🙏 I'd just like to thank my gorgeous, lovely, wholesome, loving God who gave me the heart, the thought, the energy, the knowledge, the resources and the group of loving people to help make this project a reality. 🙏🙏 🙏🙏 🙏🙏 🙏🙏 🙏🙏 🙏🙏 Now, to all of you amazing people, I couldn't have done it without your shares, donations, encouragements and more. Some of you went around your family members and got them all donating, some of you made promotional videos and posts, some of you shared to your channels and groups, some of you got your friends to donate, and all of you donated what you could. I literally can't ask for a better, beautiful, loving and helpful community to be surrounded by than you! 🙏 You say you're a fan of me, that you admire me and all of that, but I just want to tell you that i'm a fan of you all, get so inspired by you, and just feel so much gratitude and love towards you all!!! Thank you so much!!! 🙏 To so many more epic projects! Things will only go upwards from here! Making the world a better place one step at a time. 🙏🙏🙏 #Creator #RuthfulHearts #Gratitude @Dagmawi_Babi

And so I feel bad saying this, but I honestly don't think most people I interact with are free and are basically robots programmed by the universe. And I think people that have had some spiritual encounter with God are set free, and actually truly make free decisions.

This's still a thought in progress so don't quote me on this. I will refine and polish it or break it down and remove it as I gain more knowledge and wisdom. Till then, I'd love to hear your feedback and thoughts.

To add to the thoughts I talked about earlier... While everyone of us are prisoners and slaves of the universe and our decisions are basically predictable, how does God set us free? So like I said earlier, he intervenes. And for some it's a huge revelation or spiritual encounter where he reveals himself to them or speaks to them and more. And for others it's The Bible. The Bible is literally thoughts and ideas outside of the universe. So literally anyone reading it is breaking the universe's effects of affecting your decision making. So simply put, we live in a closed universe where every decision we will ever make can be predicted accurately. We are slaves of the universe and it's motion and entropy. And so the only way to break this chain of events is by coming in contact with materials, thoughts, and ideas that are not from within this universe. So at some point in everyone of our lives, God comes in contact with us, he provides us with that link to outside the universe to allow us to make decisions that aren't entirely dependent on the closed system we are in. He also gave us a book filled with these external thoughts and ideas to set free anyone who reads it... he gave us The Bible. So a constant relationship with God means constant freedom of choice. Constant reading of The Bible means constantly being set free. I rest my case. ☐ #Spiritual #Thoughts @Dagmawi_Babi

Beautiful bible verses about freedom. Not all of them refer to the same kind of freedom I'm talking about here, but they do build my case up a lot. "Once I took up a small book and put a piece of paper into it, and I said to those very simple ones, 'Now look carefully. I take a piece of paper. It has an identity of its own, quite separate from this book. Having no special purpose for it at the moment I put it into the book. Now I do something with the book. I post it to Shanghai. I do not post the paper, but the paper has been put into the book. Then where is the paper? Can the book go to Shanghai and the paper remain here? Can the paper have a separate destiny from the book? No! Where the book goes the paper goes. If I drop the book in the river the paper goes too, and if I quickly take it out again I recover the paper also. Whatever experience the book goes through the paper goes through with it, for it is in the book."

"... you are in Christ Jesus ..." — 1Cor 1:30

"The Lord God Himself has put us in Christ, and in His dealing with Christ God has dealt with the whole race. Our destiny is bound up with His. What He has gone through we have gone through, for to be 'in Christ' is to have been identified with Him in both His death and resurrection."

One of Watchman Lee's examples in his book The Normal Christian Life.

The chapter can be summarize with these key verses 1. “ᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃᐃ” — ᐃᐃᐃᐃ 3ᐃ1 2. “ᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃᐃ” — ᐃᐃᐃᐃ 3ᐃ6 3. “ᐃᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃᐃ ᐃᐃᐃᐃᐃᐃ” — ᐃᐃᐃᐃ 3ᐃ17-18 #Scripture @Dagmawi_Babi

A little remark on the first verse is that DO NOT CONSIDER ME YOUR TEACHER!!! I AM NOT!!! I only share my notes and ideas not to teach but to share and document my journey of growth.

I'm not the right person for you to hold as a spiritual standard or a guide. ☹️ ☹️ there's so much I get confused about and every single day I get lost in so many different things. So don't hold my thoughts, opinions or information I share as words of your teacher. Take everything I say lightly and question it, doubt it and do your own research about it. 🙏🙏 🙏🙏🙏🙏🙏🙏 🙏! ☹️

I see a lot of you DMing me and asking me about this and that and that's cool and all I will share you every bit of good I have in me and show brotherly love ☹️ ☹️ I'm learning to know God just like you are, and I'm so early in that journey there's so much I don't know. Bicha remember that!

The war going on is so horrific. The amount of souls lost from both sides is just heartbreaking. And Israel ofcourse will not back down and will go full on with her attacks, not only for her safety but to prove to the world that she's powerful. And that is going to be the worst thing to happen to these people at war. Mtsm. I just feel horribly bad for them both. Honestly, if you fail don't worry much, unless you want to be a doctor or something. If you want to be anything else, university isn't worth it. AT ALL!! Infact, it's better to fail before you enter than drop out a couple of years into university. Your time is precious. Just discover your passion and hobby, get to work, intern somewhere, make connections, get into DIY and content creation, chase your dreams and passions, draw, make music, code, build stuff. As a person who wasted years in AASTU I can tell you that the benefit I've gotten from university is less than 5% there isn't anything major I can credit to AASTU. Everything I'm good at I've gotten good learning on my own with my God. And some of my most talented and incredible smart friends are like that. And I say you should do the same. People drop out of Harvard and MIT, ᐃᐃ ᐃᐃ ᐃᐃ ᐃᐃᐃᐃᐃᐃ university ᐃᐃᐃᐃᐃᐃᐃ AASTU and AAUm are the least of the bad enji lewt yelem. You're hearing this from a highly active and engaged software student in AASTU, which is by far the best university for software. I'm part of leaders of so many clubs there, I've initiated a ton of projects there and I'm even the representative for the entire software department. So what I told you should have some value. #Thoughts @Dagmawi_Babi

As you've pointed out in the comments some of you will have 0 understanding of what I just said. "ᐃᐃᐃᐃ ᐃᐃ ᐃᐃᐃᐃᐃᐃ you're about to graduate!" Might be your thought and that's fair. But it doesn't dismiss any of my observations of how useless the education in university is. I am literally the rep who misses the most classes. I literally call teachers and I'm like, I'm not coming to class today. I've cancelled so many classes me and my class only learn 2/3 days per week and only in the mornings. That's how much you can cram up the lessons. Anyways, I hope you listen, cause this's genuine solid points. And siketl, focus on your mental state, DONT KILL OR HARM YOUR SELF. If you think killing your self is the right punishment for failing to pass matric then

there's something fundamentally stupid about you. Your life is more precious than a thousand universities combined. Today you failed, tomorrow that'll be a fun story to tell. Today you feel incapable, tomorrow you inspire others. Don't lose hope, there's light at the end of the tunnel okay, I can't wait to see the beautiful things you'll be building and making in your lives!!
#Thoughts @Dagmawi_Babi

Based German Philosopher said this

Some client server communication types 1. Long Polling • Advantage: Works with existing infrastructure and is compatible with all browsers. • Disadvantage: It is less efficient than other methods due to the overhead of opening and closing multiple connections. • Use Cases: when we don't need real-time updates like when you want to fetch several users for a subscriber count 2. Web Sockets • Advantage: low latency and support for bi-directional communication. • Disadvantage: requires a specific WebSocket server implementation, and older browsers don't support it. • Use Cases: where real time data is needed like chat applications or data visualization dashboards or maps, 3. Server Sent Events • Advantage: built on top of the standard HTTP protocol, making it easy to implement. It is more efficient than long polling and is supported by most browsers. • Disadvantage: it is unidirectional, does not keep sending messages from the client to the server, and doesn't support binary data. • Use Cases: for sending data from client to server is unnecessary like some status updates or push notifications. #Tech #Lessons @Dagmawi_Babi

Aptly said. You hold the power to your own education: your own life. And if the idiots close the door to their "education", manufacture yours. It's you and your discipline that matter, not an institute that barely gives quality knowledge or proper guidance. Wherever life leads you, make sure you go with it. That's all

No joke I literally spent 4 hours playing it without recognizing the amount of hours I'm spending in it. It's THAT engaging and amazing! ☐ The game is built and maintained by ONE dude in Java, like BRUH!! ☐ There are microprocessors, displays, logic gates and so much more complex things that you can program and can basically build an entire computer inside the game if you wanted to. ☐ The tech tree is so thought-out that it makes so much sense. It's not like "grab a tree then get metal out of it" it's like "mine charcoal, burn it, take the output into a furnace, connect it to a power gate, connect a battery, supply to buildings" kind of accuracy! ☐ I love playing it on mobile tbh. It's like a little bubble of Hi-Tech universe I'm building in my pockets! ☐ Everything is open source and you can contribute to the wiki, game or translations or fork and make your version of it. ☐ Have fun, enjoy and try not to be addicted! ☐

I was programming a small memory Arduino board and GOD I love it. It's sooo constricting. I literally have to make every single token of my code count for it. The amount of C++ shorthands and algorithms I've discovered to make my code fit in this tiny memory is insane. ☐ Honestly I don't remember the last time I was having so much fun programming, it's been so long. I honestly will keep on recommending hardware engineering. It's just refreshing asf.

For context I'm programming an Arduino Nano for a which has a flash memory of 32 KB of which 2 KB is used by bootloader. Try adding some images, fonts, and animations and you basically used 99% of the storage. And so you gotta be VERY creative with your graphics. It's honestly fun, I envy electrical and mechanical engineers. ☐

Update - October 21 We've done it! We've donated! ☺ This afternoon we found the family we

were helping and we brought all the items and groceries we bought and gave it all. 🙏 We have given them the remaining cash from the donations for the rest of their problems to fill in the gaps in their lives we don't know about. 🙏 Here's their video of them receiving it • <https://t.me/RuthfulHeartsStories/10> All the blessing and gratitude goes out to all of you who've supported this project in all the ways you could! Thank you so much for easing the pain of life for this family! 🙏

The very first Ruthful Hearts donation has been completed successfully. 🙏 It has been an incredible month of fund raising, marketing and donating. We're blessed to have a helpful community like you to help us achieve an important impact onto the lives of people. 🙏 We're so thankful for every support you've shown us. We thank you so much!!! 🙏 For so many more blessings! 🙏 @RuthfulHearts

Hey guys 🙏 I just wanted to come on here and thank you personally for every good thing you're doing!! 🙏 I'm just a random person on the internet with a really small community. But yet here we are actually doing something important. 🙏 I'm incredibly blessed to have the grace and trust in front of you to be trusted with your donations and support. 🙏 I couldn't have asked for anything better. This is the kind of community I wanted to build and the kind of friends I wanted to make. And I'm so lucky for this and to have you all! 🙏 I genuinely, from the bottom of my heart, thank each and everyone of you for going the distance you've gone to support me in all my projects and initiatives. And specially for @RuthfulHearts 🙏🙏 I couldn't have been able to do any of this if you hadn't spread the word, promoted it, donated so much, encouraged your friends and family to donate as well. You guys are just breath takingly amazing. 🙏 Thank you so much! God bless you all. I hope you all receive a hundred times the blessing and goodness you've shown. I hope the donations become blessings in your life. 🙏 🙏🙏🙏🙏🙏🙏🙏!! 🙏 🙏🙏🙏🙏🙏🙏🙏🙏🙏!! 🙏 🙏🙏🙏🙏🙏🙏🙏 #RuthfulHearts #MyProjects #Gratitude @Dagmawi_Babi

Honestly for me I did all of this out of pure love for God. Ruthful Hearts for me is entirely a big "I Love You!" Letter to my God. I don't want anything back for it. I just want him to be up there in his throne and just feel the love and gratitude I have from my heart. 🙏 The way he drowns me with immense love everyday is just something I can never give back. But for @RuthfulHearts I've poured out my self and I've given entirely what I could. 🙏 I wish I could donate more and just help so many more souls. But I'm hoping God will help me to do that my entire life. Just like he gave me the idea for this project, gave me the knowledge and resources to build it out and gave me grace in front of people to get all the donations. 🙏 I can't wait to do so much more for the love of my life. My soul was poor lacking him and was drenched in sin. But God, being so rich in his goodness and mercy he came and rescued me. 🙏 I can never repay him. But I will spend my entire life given to him. I'm His. My resources, my time, my knowledge and energy is all His for Him to feel the love I have for him. 🙏 I love you 🙏🙏🙏🙏🙏🙏! 🙏 🙏🙏🙏🙏🙏🙏🙏🙏🙏! 🙏 🙏🙏🙏🙏🙏🙏🙏🙏🙏! 🙏 🙏🙏🙏🙏🙏🙏🙏🙏🙏 #Spiritual #Gratitude @Dagmawi_Babi

I'm one of the most horrific of sinners. But while I was in the midst of my sins, lost in darkness and hopeless. 🙏 The love of my life came to rescue me and not because I did anything good or not cause I deserve it BUT because he loved me and because he was good. 🙏 "But God shows his love for us in that while we were still sinners, Christ died for us." — Romans 5:8 (ESV) I have finished all the love I had into girls and tech. I had nothing left, not even for myself. BUT he poured it all onto me. Loved me like no one ever could. He drowned me in it. Washed me from my sins and gave me a brand new life. 🙏 "We love because he first loved us." — 1 John 4:19 (ESV) Nothing can match him. No girl, no tech, no person, no place, no activity. He is the love of my life. 🙏 #Scripture #Gratitude @Dagmawi_Babi

Songs of Solomon 7:4-15 "You're beautiful from head to toe, my dear love, beautiful beyond compare, absolutely flawless. ☐ You've captured my heart, dear friend. You looked at me, and I fell in love. One look my way and I was hopelessly in love! ☐ How beautiful your love, dear, dear friend - far more pleasing than a fine, rare wine, your fragrance more exotic than select spices. ☐ Dear lover and friend, you're a secret garden, a private and pure fountain. ☐ Body and soul, you are paradise, a whole orchard of succulent fruits - Ripe apricots and peaches, oranges and pears; Nut trees and cinnamon, and all scented woods; Mint and lavender, and all herbs aromatic; ☐ A garden fountain, sparkling and splashing, fed by spring waters from the Lebanon mountains." ☐

I've messed up horribly before, I've wounded people deeply, and I've broken up so many good things. And through some of those stories I've asked for forgiveness and I've gotten some. But never in my life have I broken the heart of someone these many times and was accepted. BUT God did. I don't know any forgiveness like this, but now I've seen it and I'll say this: “የሰላም ሰላም የሰላም ሰላም የሰላም ሰላም” — ምዕራባውያን 4፡31 God is good! ☺ #Spiritual #Thoughts #Scripture @Dagmawi_Babi

If you should be selfish then be selfish bout this one thing. Be selfish for your soul's desire to be with God. Let none of your sins, no one, no guilt, no blame, no judgement, no laziness, self pity, depression, anger, sadness or hate or anything else take this selfishness away. Discard them all and goto God as soon as you possibly can. “የሰላም ሰላም ሰላም ሰላም የሰላም ሰላም የሰላም ሰላም” — ምዕራባውያን 3፡4 የሰላም ሰላም #Spiritual #Thoughts #Scripture @Dagmawi_Babi

Telegram is going public Investment company BCS has sent a presentation to investors

regarding the Telegram's Pre-IPO. The broker's document indicates that Telegram is planning to conduct an IPO in Q2 or Q3 2025. As part of the Pre-IPO offering, BCS is offering qualified investors convertible bonds of Telegram Group Inc. through its subsidiary in Cyprus, with a minimum purchase amount of \$9,500. The bonds have an annual yield of 7% and are set to mature on April 22, 2026, with an option to convert the bonds into shares at an IPO with a discount: • 10% if the IPO takes place before March 2024. • 15% if the IPO takes place before March 2025. • 20% if the IPO takes place before March 2026. The document also highlights new monetization methods that Telegram may employ in the future: • Ads in Stories. • Premium features for teams in 2023 (expanded collaborative folders, shared workspaces, increased storage capacity, etc.). • Fintech services for India (a payment service for conducting P2P and P2M transactions, with negotiations currently underway with one of the major local players). In 2021 Telegram issued bonds with a total value of \$1.75 billion, and in July 2023, Pavel Durov announced an additional bond issuance of \$270 million. #Telegram @Dagmawi_Babi

Everyday the immense power of this verse blows me away. "אֲנִי יְהוָה אֱלֹהֵי אֲבֹתָיִם אֲנִי יְהוָה אֱלֹהֵי אֲבֹתָיִם" — תהילים תהלים 10:20 "אֲנִי יְהוָה אֱלֹהֵי אֲבֹתָיִם אֲנִי יְהוָה אֱלֹהֵי אֲבֹתָיִם" — תהילים תהלים 4:12 I learn so much while I'm writing things up and when I'm talking to people about God. It's like as I'm talking or texting I just sit and learn and listen just like the other person is. Just incredible what God does in his spirit to his children. ☺️ #Spiritual @Dagmawi_Babi

Hey ☺️

Got some epic tech news...

Qualcomm announced their Oryon mobile CPU chip which exceeds the performance of Apple's M2 Max chip. ☺️ Imagine a phone CPU that's more powerful and efficient than the most powerful and efficient laptop and PC CPU. The chip beats and almost doubles the performance of both M2 Max and i9-1380HX chips by performance and power consumption. They've also unveiled the Snapdragon Elite chip with so much CPU, GPU and on board machine learning processing.

90's and life is good. #Random #Thoughts @Dagmawi_Babi

Stopped building my own CPU in Mindustry cause the clock for the CPU within the game kept getting messed up whenever I copy paste logic gates. Now I moved onto Logisim Evolution, a proper logic simulator. Which is going so well so far.

I don't know the full path for building a CPU from scratch but so far this's the logical step I've seen and learnt: • Logic Gates • Half Adder • Full Adder • 4 Bit Adder • 8 Bit Adder • Binary Number Representation • Binary Addition & Subtraction • ALU • Latches (SR, JK, D) • Async Registers • Clock • Flip Flops • Sync Registers • 4 Bit Registers • 8 Bit Registers • Visualize Data In Registers • Multiplexers • Busses • Tri State Outputs • Bus Buffers • IDK AFTER THIS #CPU #DLD @Dagmawi_Babi

Good night ☾ “ᐅᐅᐅᐅ 'ᐅᐅᐅᐅᐅᐅᐅᐅ ᐅᐅᐅᐅᐅᐅ ᐅᐅᐅᐅ' ᐅᐅᐅᐅ” — ᐅᐅᐅᐅᐅᐅ 10ᐅ17

Good Friday Afternoon ☾

Found pictures of an old python project I made. After reading an article about integrating a python UI and a linux kernel, this was supposed to be the frontend to a Linux kernel based OS that I started in 9th grade or something. It has all the basic apps like calculator, paint, image viewer, music player, notes and a personal assistant called Sarah. ☾ NOSTALGIA BE HITTING HARD. ☾ #BeautifulOS #Nostalgia #MyProjects @Dagmawi_Babi

Then me and my friend went on to fully design the UI. We went all out designing the lock screen, home screen, file manager, settings notes, and so much more. ☾ Because we were kids you can see some questionable design decisions. And also and because I was working with a designer friend of mine who uses and loves Mac, you can see a huge inspiration from that. ☾ #BeautifulOS #Nostalgia #MyProjects @Dagmawi_Babi

We even went out and designed the gallery, the music player, video players, and so much more. Ofcourse with so much more questionable design choices. ☾ #BeautifulOS #Nostalgia #MyProjects @Dagmawi_Babi

Tho my designer friends @Republic_of_Injera and @JohnTesfu5 delivered epic and may be questionable designs. I didn't build it all completely. I kept on switching languages and frameworks everytime I saw the flaw and weaknesses of the languages I was using. Each change getting me closer and closer to low level languages. Finally, This was the final product before I had decided to be done with the idea of my own OS. Along with it's new name "Beautiful Surface", yes I'm bad at naming things. #BeautifulOS #Nostalgia #MyProjects @Dagmawi_Babi

All of this idea came from one project I did when I first started programming. Batch was the first language I learnt and so I used it to make almost everything. And decided I should make an OS using it. Ofc it wasn't possible and so I decided to just make a self contained mini-OS-ish thing using it. An all in one app within your OS. Calling it SynthiaX, adding on the fact that I can't name things properly. ☾ It had an insaneeee amount of terminal apps. Just insane. You won't believe me if I told you that everything was built using batch. I had gone up and down integrating it with other languages to enable more functionality, like talking the responding

back to you and so forth. It was my masterpiece when I was in 9th grade. #SynthiaX #Nostalgia #MyProjects @Dagmawi_Babi

Jeez the nostalgia is hitting me hard ☹☹

As you can imagine I was obsessed with programming. And since I'd spend most of my days in school I just sat during class writing batch code over and over and over again for my SynthiaX program. I even made a virus designer that to this day I'm terrified off. I even made my very first personal assistant hard coded AI called KRUPTOS (I have forgotten it's meaning) but it also inhabited a virtual world called GalaxyZ with shops, banks, and so much more. Which was my version of a VR world. I have 100's of pages of virus codes, batch codes, and ideas and UI designs and so much more. Reading my notes I've even built my own cryptocurrency way before I knew the incredibleness of it all. It was the biggest project I did when I started programming. Little did I know that by the end of that year I had mastered a huge ton of programming languages and tools when I thought I was just integrating batch into them. Ahhhh ☹☹☹☹ #SynthiaX #Nostalgia #MyProjects @Dagmawi_Babi

I had a very sneaky and subtle introduction to blockchains, crypto currencies, AI/ML, OSes, VR, game dev, encryption, hacking and security and so much more. And just so you know, I had NO ONE that could teach me any of these. And internet was so rare to me back then. But I had felt God teach me everything and guide and debug with me while teaching me all of this. That's why I credit my coding life entirely to him. Thank you God! ☹☹ #SynthiaX #Nostalgia #MyProjects @Dagmawi_Babi

Oh and yeah I used to be a spy back in 5th grade with 5 other of my bestfriends. We used to give each other actual spy courses and we would spy and do a whole ton of destructive but awfully fun stuff ☹ But that's a story for another time. ☹ #MyLife #Nostalgia @Dagmawi_Babi

So here's something I have learnt about God and Christianity from my life. God is a way to confront reality rather than escape it. Even though God can be an escape from reality, he

chooses not to. #Spiritual #Lessons @Dagmawi_Babi

And here's another sad thing I've observed. This century is one where we can see the following verse in full effect. • “ما نرى من الناس الا وهم يفترون الله فتنة لاولي الابصار” — سورة الاحقاف 16:26 We are seeing pure examples of people that lost their souls to gain the world. From people like Elon to Neil deGrasse, Bezos to The Weeknd and so much more we know and idolize. It's honestly sad. Like devastatingly sad to realize this from the people we love and admire. I was personally Elon's #1 fan. Way before people even knew him here. I wanted to be him more than anyone. Keza I saw his spiritual status and his relationship with God. And then we separated. He is a sad man who has gained the world and lost his soul. Hope God saves him before the end. Then, I decided what kind of person I wanted to be. I wanted to be a person who saves my soul and chose to lose the world. So God above tech, relationships, knowledge, engineering and creativity. And most of all tho, I hope YOU aren't like that. Like a person who dissolves in tech and creativity and loses their soul. #Spiritual #Thoughts @Dagmawi_Babi

“ما نرى من الناس الا وهم يفترون الله فتنة لاولي الابصار” — سورة الاحقاف 16:26 Clearly for me the price of my soul isn't tech, coding, engineering, creativity, fame or money. So I will be selfish over my soul. And as your brother, I advise you do the same! #Scripture #Thoughts @Dagmawi_Babi

France will try to make abortion a constitutional right. Making it the first country to make abortion irreversible. This won't happen, obviously. It's a mere political campaign. But even the idea of it sickens me. ☺ #News #French @Dagmawi_Babi

People who argue with me in the comments justifying abortion based on cases like rape and incest. There's something you haven't realized. There are approximately 37.8 million abortions right now. And from that less than 5% are because of rape and incest. So 35.9 million of all aborted kids are not for the reason you guys are arguing about.

Imagine 35million kids just being tormented and killed in the womb. Ohw, not to mention all the finance and funds going for abortion support and medical help can more than be able to support the lives of these kids.

I'm sorry but if you support abortion you can't be a true Christian. Tell me what conscious will bring you Infront of God and tell him you murdered a life he placed in your womb?

herein lies the truth, you believe u have the right to make the decision for another person the pride u have geez. Who are u to decide whether another human beings life is worth it or not? Who do u think u are? Take a piper people and take a humility pill, ur not a God, u have no right

to decide whether some else's life is worth living or not.

The Egyptians ordered their soldiers to kill kids and throw them into the Nile river. “וַיֹּאמְרוּ הַיִּשְׂרָאֵלִים אֶל־פַּרְעֹה וְאֶל־בְּנָיָתוֹ וְאֶל־כָּל־בְּנֵי־יִשְׂרָאֵל וְאֶל־כָּל־בְּנֵי־מִצְרָיִם וְאֶל־כָּל־בְּנֵי־כְנָעַן וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא” — Numbers 1:22 Guess what the first plague brought by God to them was? The Nile turned to blood. Showing them of their bloody hands. “וַיֹּאמְרוּ הַיִּשְׂרָאֵלִים אֶל־פַּרְעֹה וְאֶל־בְּנָיָתוֹ וְאֶל־כָּל־בְּנֵי־יִשְׂרָאֵל וְאֶל־כָּל־בְּנֵי־מִצְרָיִם וְאֶל־כָּל־בְּנֵי־כְנָעַן וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא” - Numbers 7:20-21 #Scripture #Thoughts @Dagmawi_Babi

Then during the birth of Jesus. “וַיֹּאמְרוּ הַיִּשְׂרָאֵלִים אֶל־פַּרְעֹה וְאֶל־בְּנָיָתוֹ וְאֶל־כָּל־בְּנֵי־יִשְׂרָאֵל וְאֶל־כָּל־בְּנֵי־מִצְרָיִם וְאֶל־כָּל־בְּנֵי־כְנָעַן וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא” — Numbers 20:16 Satan truly knew where Jesus was. But nonetheless ordered people to massacre so many other babies. #Scripture #Thoughts @Dagmawi_Babi

Wake up my people. Satan has been killing infants and kids throughout human lives. Why would you side with that? • The Nazis carried Jewish children off to killing fields and the gas chambers at Auschwitz. • The Aztecs and Mayans sacrificed children to their gods. • Exposing an unwanted child to the elements or wild animals was a common practice throughout the Greco-Roman world. • The Carthaginians of North Africa sacrificed their infants and children to pagan gods over a period of several centuries. Worship most times isn't as vividly clear as other things. We worship subtly in the little details of our lives. Sileza abortion seeming that it's a woman's right has evil worship intents to the devil. #Spiritual #Abortions @Dagmawi_Babi

This one is for the spirituals. It's a really cool concept. How Satan uses women to get to the society. #Spiritual @Dagmawi_Babi

I did not plan to have an argument about abortions today to be honest. I had planned a ton of other posts but I guess it was a productive discussion with a ton of the community members about this.

One tiny thing I've noticed regularly is that a lot of people think Death is much better than a possibility of life no matter how harsh. Which I am obviously against of. Because you need to reframe your perspective of what life is to get the whole picture. • Life is a probable chance of building a relationship with God and experiencing him. And so taking that beautiful possibility away from kids is plain wrong in my book. These kids could've grown and understood the nature of life, and the price God paid for them to save them from this horrible life and then built a deeper relationship with God. #Spiritual #Thoughts @Dagmawi_Babi

That's enough discussion for me today. Imma leave you with this: “וַיֹּאמְרוּ הַיִּשְׂרָאֵלִים אֶל־פַּרְעֹה וְאֶל־בְּנָיָתוֹ וְאֶל־כָּל־בְּנֵי־יִשְׂרָאֵל וְאֶל־כָּל־בְּנֵי־מִצְרָיִם וְאֶל־כָּל־בְּנֵי־כְנָעַן וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא וְאֶל־כָּל־בְּנֵי־חֵטְיָא” — Numbers 23:39 Good night guys. #Scripture @Dagmawi_Babi

Satan fell due to his pride as sin. Humans fell due to sin as well. What makes men redeemable but not Satan?

So the answer is: Since the wages of sin is death. A person who commits sin must die. “ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱ” — ᐱᐱ 6ᐱ23 And so for us mortals humans, Jesus became human and died for us. BUT for Satan and devils, they're angels, they're immortal. They can't die. So even if Jesus became an angel to die for their sins, he couldn't have died. It's mind blowing in a way. ᐱ Be grateful you're human!

Uk what would be a dope ass feature for telegram? When creating a new channel, it should make you choose what the channel is for. So for example it presents you options like photography, music, movies, apps, games, and so forth. And then based on your choice the channel's visuals and functions change completely. So a channel for movies would present the movies in a grid with their posters and allows to stream them. A channel for music would have an amazing music player, lyrics sync and so forth. That would be amazing tbh. #Telegram #Thoughts @Dagmawi_Babi

The Trolley Problem. There's a train heading straight and sadly on its path are 5 strangers you've never seen before tied to the railway. If the train continues it's path it will kill all 5 of them. But you then appear to be standing near a lever. Pulling that lever will make the train change track and onto a different one. But sadly again on the new path you've caused it to travel there's 1 stranger you've never seen before tied onto the new path. So the moral dilemma is this: would you just stand there doing nothing and let the train kill all those 5 strangers OR would you pull the lever and cause the train change path into killing the 1 stranger on the new path you set out? #TrolleyProblem #Dilemma #SocialExperiments @Dagmawi_Babi

I have an interview with Google Developers Students Club in an hour. 🙌 If you're in AASTU or part of the Google Developers Club or a techie and you want some inspiration this's pretty nice. It's mostly organized to share experiences with the new software entrees so if you're that in any campus you're pretty welcome to join. There's also an open Q&A so you're pretty welcome to ask me or anyone else anything you want. #DailyLife #GDSC #AASTU @Dagmawi_Babi

And it's starting 🙌

That was a very insightful and pretty fun session with the Google Devs Students Club (@DSCAASTU) more than 100 people tuned in and participated. That was epic. 🙌 Thank you so much for inviting me over and being so lovely and wholesome. That was productive for me as well, and I learnt so much from the other guests there. 🙌 Hope you've learnt a lot and hope what I said nurtured your growth! 🙌 And thank you everyone that was commenting, supporting and reacting to my session. You're pretty awesome! 🙌 #DailyLife #GDSC @Dagmawi_Babi

And now my DMs are literally blowing up with so many wholesome texts. 🙌 I'm sooo happy that I got admired by people and inspired them. Please stop melting my heart with some of the most wholesome texts I have EVER read.🙌 My heart will explode. 🙌 Thank you so much Ewnet! You're all very kind with your kind words and letters. 🙌

Some of my favorite texts. Ughhhhhh First one just feels like a nuclear blast on my heart because someone I also admire and look up to said that to me. 🙌 🙌🙌🙌🙌🙌🙌🙌🙌 #Community @Dagmawi_Babi

Thank you everyone! But know that I am no one that great or amazing or anything like that. I'm a pretty lazy, procrastinating, selfish, sinful, messed up person. 🙌 All the good you see on me is from God. He hides my weaknesses and clothes me with His goodness. And presents me to you. 🙌 And so ALL credits goes to Him. The lover of my soul and the one that made you all see good in me and presented me as this inspiring person. 🙌 Thank you God, for being so kind to me and pouring out your grace on me. For covering my weaknesses and pouring love into people's heart for me. 🙌 “🙌🙌 🙌🙌🙌 🙌🙌 🙌🙌 🙌🙌🙌” — 🙌🙌🙌 3🙌30

Here's an incredible list of resources I use for my bible studies. I hope this helps. If you know more resources please tell me in the comments. 📖 Bible App - Bible.com • It has a web interface and mobile apps. You can access almost all version and translations. You can read in parallel and have a great bible reading experience. Logos App - App.Logos.com • This's the most extensive bible resource I've ever found. • From bible dictionary to commentaries, from study guides to illustrations, from a library of books to research materials. Andimta App - Andimta.netlify.app • This's a fast and minimal web bible app. It pretty great cause it let's you see Greek and Hebrew verses alongside other translations. ChatGPT - Chat.OpenAI.com • I use this to compile a bunch of resources all together and for quick look ups. Though it could be pretty inaccurate at times nonetheless with some back and forth it's pretty helpful. BibleRef - BibleRef.com • It's got some awesome study resources and is very easy and comfortable to use. GotQuestions - GotQuestions.org • They've got answers to pretty much anything you're wondering about the Bible and Christianity. It is an extensive catalogue of questions and answers. My Bible App • This a super minimal and modern designed bible app I made. It's very comfortable to read bible version in parallel instantly. • https://t.me/Dagmawi_Babi/13684 Bible Ram • This's an open source app to help you memorize bible verses by training on your bookmarked verses. • <https://play.google.com/store/apps/details?id=app.bibleram> • <https://github.com/joshpetit/bibleram> Bible Project • This project makes the most visually aesthetic and deep illustrations to explain biblical concepts. They also have an Amharic version. • youtube.com/@BibleProject • youtube.com/@BibleProjectAmharic #Bible #Resources @Dagmawi Babi

At the end of the day it's doesn't matter how much of an extensive bible study resource you have; unless God is with you it won't be of any help. Probably is annoyingly exhausting to go back and forth. The good thing is if you start studying the Bible so you can know the ways of God so that you can connect with Him, then He will be present and help you study. And for those that God helps when studying. Only listening and knowing his words is meaningless. The whole purpose is to put it into action. • “**“꠆ꠗ ꠘꠐꠕꠔꠒꠑꠓ ꠘꠐꠕ ꠘꠐ ꠘꠐꠕ ꠘꠐ ꠘꠐꠕ ꠘꠐꠕꠒꠓ ꠘꠐꠕꠒꠓ”** — ꠘꠐꠕꠒꠓ 1ꠒ22 (ꠘꠐꠕ ꠘꠐ) And reading and studying his words is gonna have an incredible shift of your mind and life. Read your bibles okay! Just pick any book and read it. Farmers 2000 years ago, and people even before that understood the scriptures. The bible isn't for the highly intellects or the holy priests. It's also written so it can impact the most illiterate, uncivilized and sinful of us. Just read it my friends. ☐

This's why the apostles wrote the bible for us: "ἵνα ὁ κόσμος οὖν πιστεύσῃ ἐν τῷ υἱῷ τοῦ ἀποστόλου καὶ οὕτως σωθῇ ὅλος ὁ κόσμος διὰ τῆς χάριτος τοῦ κυρίου ἡμῶν Ἰησοῦ Χριστοῦ τοῦ ἐκλεκτοῦ τοῦ πατρὸς ὁμοδοξοῦντος τὴν δόξαν αἰῶνος ἀμήν." - 1ο Κορινθίους 1:1-4 #Scripture @Dagmawi_Babi

A song for your night. Enjoy ☺

Morning cuties ☺

I am now completely convinced that most of Christianity is spent redefining everything you've already learnt. We usually start off our spiritual journey defining spiritual terms from physical terms. But then only when your connection with God matures, that he shows you that he's much more different. Take being a father for instance. God is our father. And so is whomever is our parent. And so if Abebe is your father then you apply Abebe's characters to God. Because you think both are father's they must have some similarities. But you couldn't have been more wrong. Fatherhood, in this example, is defined reversely. But should've been defined from God to Abebe. God is the perfect father and is the standard. And so if Abebe fails being a father then it's not a character of being a father but a character of a fallen human. Summary is that try to define things from the heavens down to earth not the reverse way. And most of all start defining things in relation to God and not in absolutes. #Spiritual #Thoughts @Dagmawi_Babi

 "Do you feel it or am I the only one? To notice them is no longer fun... The urge to text you
 random things hear your voice like my church hymns The urge to hug you when you're not
 around Feel your embrace like the sun beyond the cloud Do you feel it? To see and observe
 the mundane To be part of your routine and the plain Or am I the only one? Who wants you very
 very near Hear you call me "my dear" Am I the only one?... That relive your hugs so as to
 remember your smell The scent unique, clean and masculine Tell me do you feel it?... Have the
 courage to admit I hope they fade away slowly From my mind they would flee And for my heart
 to be free." #Poems #Friends #DailyLife @Dagmawi_Babi

For my non believing friends, atheists or christians that backed away, What would it take for you to believe in God? Or what question do you have that if answered you'd believe in God?

A good friend and I were talking about life and she told me a very good lesson. Sin is expensive. And it hit me. She said, Sin is so expensive that it costs us physically, emotionally, psychologically and spiritually. And so God doesn't want us to sin for his own selfish needs but due to the huge price it costs us. And it changed me to be honestly. I was sinning at a huge expense of my self. Sin is probably the most soul draining thing I've ever experienced. And this puts a whole new light onto the concept of Sin for me. #Spiritual #Thoughts @Dagmawi_Babi

Some thoughts about God's Nature There's nothing in God that's not God and All that is in God is God. God is simple. To be simple means that something can't be broken down into smaller parts than what it already is. So diro I've read the bible muluwn. From Genesis till Revelation. And pretty much any story you could tell me I'd remember from what I've read. Since then I've fallen away and broke up from my relationship with God. And in those bad days some of the verses I read guided me through tough decisions and actions. But of course 90% of what I've read was completely gone. Now that God has saved me, even the most popular and widely known verses are brand new to me. I reread them and I'm like "WHOA has this been in this book dirom??" But most importantly, I have a horrible memory. Just plainly awful, just the worst. And so I don't expect myself to remember everything. But guess what the Holyspirit reminds me of the verses, lessons and stories when I need it. It's genuinely like having a huge harddisk with the fastest search engine that is directly linked to my brain. And not only does he remind me, he teaches me the deeper meanings and how to apply it to my current situation. It's just crazy Ewnet. 🤖 #Spiritual #Thoughts @Dagmawi_Babi

I find the existence and guidance of God perfectly aligned with our human essence, as if we were created to harmonize with His wisdom. Sometimes I contemplate that even if God were just a construct, I'd never regret believing. Choosing to follow God's word, the Bible, as my life guide feels like a win-win. I wholeheartedly believe that Christ's sacrifice on the cross paves the way for me to encounter God and discover my true self.

I don't usually post news that all the tech bros already posted about. But since nefffff sew is asking me to... Here's Google's epic new AI model Gemini. ᐱ Gemini is built natively to be multimodal. Gemini is optimized in three sizes: Ultra, Pro, and Nano. It is an impressive feat of engineering and machine learning. Even tho the demo videos are edited and adjusted to look normal, the model was slow and sometimes unresponsive. But that's minor and it will change.

Gemini beat GPT4 in different categories. Now the problem is that the metrics used to compare and get these results isn't the same. So it's basically comparing two people who took different tests. (Chain of Thought 32 for Gemini and 5-Shot for GPT-4) All in all, checkout the videos, it's pretty nice. I have my doubts for it's performance when people actually use it but I'm sure google has the hardware resources to accelerate it. So here's something I've learnt and experienced about God. First off, God listens and answers prayers. That is a fact. Second off, Even if you've forgotten the things you've prayed for God doesn't forget to answer and deal with them. So it's great to pray and to journal your prayers. As a christian you'll just pray so much and your brain will not remember all of that prayer at all. So just write it down. Then eventually, check back on your old prayers after months and years and just see how God was so faithful and dealt with what you've asked him even if you've totally forgotten about Him. This aspect of God alone shows how he's a separate person, that keeps promises and is faithful. #Spiritual #Thoughts @Dagmawi_Babi

Mixtral 8x7B was released a few days ago. It's an open weight mixture of experts model. Mixture of experts is a model where different parts specialize in different tasks, and they're combined to make predictions. Mixtral matches or outperforms LLAMA 2 70B and GPT-3.5 on most benchmarks, and has the inference speed of a 12B dense model supporting a context length of 32k tokens. Hey there 📈

As some of you might know I own a beautiful collaborative art project called The Unity Art Project. • Art.dagmawibabi.com The idea behind the project is pretty simple and that is; incredible digital artists come together and draw within a 500 by 500 pixel length box. Then another artist comes and draws beside your art connecting their art to yours in colors, lines, concepts, and more. The first round of contributions consisted of 50 unique and more than 10,000 visits. Essentially being a big portfolio project for the wonderful artists that

participated. Now this is a notice to call on all artists that want to participate on the new Mural. So vote on the pole below if you're a digital artists and would love to take part on the current season of the Mural. ☐ #TheUnityProjectMural @Dagmawi_Babi

Will be announcing the theme and design of this year's unity project mural in a few minutes...

This year's The Unity Project Mural Theme is: • The Christian Cross ☐ The mural itself will be looking like a cross on the website and the art you'll be submitting will involves christian concepts. ☐ I thought it's a gorgeous theme to participate in so let us know if you'll be participating in the poll that'll be posted below. #TheUnityProjectMural @Dagmawi_Babi

Two gorgeous art pieces are already submitted by two incredibly talented members of the community @johntesfu5 and @Se_l_am and it looks incredible. Spots are limited as always so let us know if you're gonna participate. ☐ #TheUnityProjectMural @Dagmawi_Babi

For clarification, the art creating and submission duration would be around 2 weeks. After which the mural would be published and promoted across all my socials. You have full creative freedom. You just pick a spot and reserve that and paint whatever you like that fits the theme and that connects to all the neighboring art pieces. Depending on the result of the poll I'll post the group link where the arts get to choose spots and work on their art.

Alright that'd be enough. Join the working group and choose a spot you'd like to work on The Unity Project Artists • <https://t.me/+VrGpsjEU4bdiZDE0>

Another gorgeous and hopeful looking piece was submitted by @Issanirvana aka @NirvanaLand7 ☐ #TheUnityProjectMural @Dagmawi_Babi

this is exactly what I'd advice if anyone ask me how to learn programming. Not only programming but to pick up most creative skills having something in mind you want to build will make you learn way more efficently. that's how I learnt - To play Music Instruments - Song Writing - Producing - Programming - Video Making (I forgot how to now but I used to be decent with after effect and doing video stuff) I'm not naturally talented in any of those. I haven't attended any regular education for any of those. I just wanted to make something and that's how I learnt them. And I'm as dumb as the next person. I'm not saying to make it relatable trust me I'm really average and I'm also still average in all of them I just know enough to make the thing I want.

A solid 10/10 advice!! ☐

Hi everyone! ☺ As you know, I love to explore and experiment with new technologies. Recently, I've been working with a coding copilot AI(RUNNING 100% LOCALLY) and let me tell you, it's pretty awesome! ☺ This AI is great at writing whole models and making all sorts of things happen in the background. It's like having a superpower at your fingertips! ☺ I know what you're thinking - "wow, that sounds amazing!" And you're right, it is! But don't just take my word for it - check out the demo website it I created using just the telegram channel bio! Seemed like a great way to get a glimpse of how good it is☺☺ I hope you enjoy exploring and experimenting with this new technology as much as I have. Stay tuned for more on this topic! #AI #LLMs #Copilot @dotnetWarrior

I swear if someone gets @KerVerse a GPU cluster he could do so much for us. ☺☺

I really enjoy his channel to be honest. May be because I understand most of the technical things posted there or may be because the dude is a very experimental kinda guy which's pretty dope.

@Dagmawi_Babi

We now have two very gorgeous submissions to The Unity Project Mural. ☐

This contribution was by @T3818U and it is the most unique art style ever. I don't even know what the art style is called but it looks phenomenal. You can see how great it looks across multiple iterations. 🙌 #TheUnityProjectMural @Dagmawi Babi

It looks squishy and comfy and edible. I love everything about it. ☺ And if you're wondering what the meaning behind the art is, this's what the creator said. "Soo if you put the art in the mural it creates a line connection between the lower piece and the eyes will look into the menekuse in the right edge. Bcha the main idea is that most of us are not much invested in Christianity and somehow we indulge in the world and all we need to do is to be silent and look up. The eye connecting pattern is used in Gondarian drawings but in those it is used inverted and shows a nose connection." #TheUnityProjectMural @Dagmawi Babi

Another epic piece was made by @Icebirrd and I thought it fit so beautifully. That entire raw just flows so smooth it's gorgeous!! ☐ #TheUnityProjectMural @Dagmawi Babi

I'm starting to think I like art. ☐

Although this mural is complete it lacks some connection between some pieces. I could ask the contributors to modify their art but instead this presents an opportunity to expand. ☐ And so I will now be expanding the cross to allow for MORE contribution and I will also invite artists from Instagram. ☐ Bigger Cross, Bigger Mural! #TheUnityProjectMural @Dagmawi Babi

I will post the expanded grid for the Mural in a few minutes... ☐

Here is the expanded and biggest Mural for this year's The Unity Project Mural. 📍 • Art.dagmawibabi.com I might have gone overboard with this but I'm hoping this's gonna be an epic canvas for the artists to get as creative as they can. 📍 This's your chance to contribute and show off your work in one of the biggest collaborative and popular art websites here in Ethiopia. I can't wait to see what you'll be making. 📍 The steps to join are pretty simple: 1. Join the artists' group • <https://t.me/+VrGpsjEU4bdiZDE0> 2. Pick a spot and reserve 3. Make your art 4. Submit your art for review and wait till it's published on the website Welcome aboard! 📍 #TheUnityProjectMural @Dagmawi_Babi

If you're an artist come join us you're gonna have fun and you get to meet some of the most famous digital artists in Ethiopia. Send this to your artistic friends and let them join in this marvelous mural. ☑

Then they cried to the Lord in their trouble, and he delivered them from their distress. He made the storm be still, and the waves of the sea were hushed. My boy Amanuel Atle (@Fashion_Messiah) made this pretty awesome cloth. I thought it looks pretty neat and the model be rocking it as well. Good job bruh! 🙌 Support him on IG • <https://www.instagram.com/qenaafrika> #CommunityShowcase #Fashion @Dagmawi_Babi

The promo vid is pretty epic as well. 📺 The one and only @AntenehNida made this in a few minutes after the photoshoot ended. 📺 #CommunityShowcase #Fashion @Dagmawi Babi

We have reached 2,000+ Subscribers. 🙏 🙏🙏🙏🙏🙏🙏! 🙏 This has been a milestone I wanted to cross for yearsss. Like literally for years. My channel was stuck on the 600-800 subscribers mark I thought it would never grow, and it didn't for years. 🙏 It was only after a couple of months back when my spiritual life began that my channel for some reasons without promotions and ads started blowing up and growing exponentially. 🙏 I worked hard for years until 800 subscribers, everything else above that is all credits to my loving God. I know that you're all called by God to listen to His good news that I post. 🙏 I love each and everyone of you, and I'm most grateful for the first ~800 subscribers that stuck with me for years and years. If God brought you all here without my role in any of it, then I will keep telling you the good news of our loving God. 🙏 All credits to God, thank you so much Lord. You have given me a large audience and I will tell them all the love you've taught and showed me. 🙏 Thank you all so much!!! 🙏 I love you all! 🙏

Hello ☐

This's a beautiful verse ☺ "ᲕᲗᲗᲗ ᲕᲗᲗᲗ ᲕᲗᲗ ᲕᲗᲗ ᲕᲗᲗᲗ ᲕᲗᲗᲗ" -- ᲕᲗᲗᲗ ᲕᲗᲗ 94:18 #Scripture @Dagmawi Babi

Here's a fun idea to implement: When the webpage loads it shows multiple spaced out

paragraphs. Then as the time passes a random word starts moving around and changing colors. Then more words keep doing that until every word is jumbled up and reading it is impossible. ☹

Hey there ☹ I need you guys to listen to me for a moment...

We have reached 2,000+ subscribers and this is a HUGE gathering of people. ☹ And so we are going to do something very special, very living, and very powerful. ☹ And it mimics this... "וְהָיָה כִּי יִשְׁמַע יִשְׂרָאֵל בְּיָמָיו וְיִשְׁמַע יִשְׂרָאֵל בְּיָמָיו וְיִשְׁמַע יִשְׂרָאֵל בְּיָמָיו וְיִשְׁמַע יִשְׂרָאֵל בְּיָמָיו" -- Isaiah 2:1-2

I have given God my channel, for him to tell you all His message and to heal you all and to set you free. And for the next 5 days there will be no other post, no ads, no tech, no news or anything of the usual. The next 5 days I have given God complete control of this channel. I have prayed to Him, and He has guided my heart and I know He will do wonders on the souls that will listen. The next 5 days we will be learning about God and Christianity from the basics. We will learn it in the most profound and influential way possible.

I have prayed and prepared topics for each of the following 5 days. We will talk in depth about them. Discussing with you all and sharing the beautiful story of God to all the curious souls and to everyone that wants to be set free. I will pray each and everyday, so that God can heal every sickness, every pain, every heartache and everything bad in your life so that you can fall in love with God just as much and more than I have.

Here are the topics for the next 5 days Day 1 - אֵל עֵלְיוֹן • A Broken World • We will talk about the world we live in, the story of humanity and the relationship we have with God. • The Greatest Love Story Ever Told. Day 2 - מִלְּפָנֵי הַקֹּדֶשׁ • Amazing Grace • We will talk about our sinful nature and the grace and mercy God rained on us to live a life free of sin. • Born Again and Freedom from Sin Day 3 - אֵשׁ בְּתוֹכֵנו • Fire Within • We will talk about the transformation of a christian's life and the power the holyspirit gives over sin and this broken world. • From Dust to Flames. Day 4 - אֵלֶּיךָ יִשְׂרָאֵל • Christ's Brides • We will talk in detail about what a Christian's life should be. The activities involved and how we can bible study and live the word. • Christ's Bodies, Living Proofs. Day 5 - אֵלֶּיךָ יִשְׂרָאֵל • Hope and Eternity • We will talk about the kingdom that comes, the world that prevails, the paradise that awaits believers and the full prevalence of God's Justice and Love. • A Perfect World Your Journey Begins!

My inbox will be open for anyone wanting to talk to me about God and Christianity only. @DagmawiBabi We will have a blessed 5 days of our lives. And before we proceed I would like you all to attend in the most honest, innocent and open hearted way possible. We will not be arguing, we will not be preaching religion, we will not be doing anything else other than discussing what is written in the Bible. The truth, the whole truth, nothing but the truth. As purely, as genuinely as possible. The goal of this isn't to convert you from your religion, or to change denominations, or anything else like that. The goal is to know God, ourselves and to form a relationship with Him whatever our religions and situations are in life are. To meet God, to know about him, and to fall in love with God, and to be truly set free. ☹

So the way we will proceed is very straight forward. I will prepare written lessons about the day's topic and post it here. And all you have to do is read it and then comment down your questions and thoughts. And then we will discuss them all. If you are a sinner, this is for you! If you are suicidal, this is for you! If you are a lukewarm Christian, this is for you! If you are an unbeliever, this is for you! If you have void in your heart, that no amount of alcohol, sex,

drugs, selfharm, parties, music, events, tech, friends, girls, can fill then this is for you!

“וְהָיָה כִּי יִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם” — תהלים 30:16 “וְהָיָה כִּי יִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם” — תהלים 49:15 “וְהָיָה כִּי יִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם” — תהלים 7:18-19 “וְהָיָה כִּי יִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם” — תהלים 54:10 “וְהָיָה כִּי יִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם וְיִשְׁמַע אֱלֹהִים בְּרוֹמָם” — תהלים 50:8

Good Night! ☺

Hey ☺ Who's ready for the first day?

Day 1 - ☺ ☺ ☺☺☺☺☺ A Broken World The Greatest Love Story Ever Told! We will talk about the world we live in, the story of humanity and the relationship we have with God. Our story begins not when time and space were formed but a long way before that. Before the Earth and all the beautiful galaxies were formed, before there was anything at all, at a time where only God existed, it was there and then that we existed in the mind of God. Before stars ignited and the angels sang, God longed to create us. He wanted to be our father and partner. He would wait patiently looking for the day He'd breathe life into us and we'd call Him father. You and I were beautiful thoughts to Him. Thoughts so moving he created time and space, the universe and all its wonders, guardian angels and all their powers, the Earth and a beautiful garden to place us in. We aren't any random thoughts to Him. He wanted to take His time and effort into creating us. And so He looked around and there was nothing as beautiful as He was and that's exactly how He made us, creatures that look like Him. He shared His light and beauty, His essence and personality, His emotions and mind. He made us wonderfully and fearfully! God is free and does what He wills, and even that freedom He shared with us.

A beautiful creature deserves a beautiful garden to live in. And so He placed us in Eden, the finest garden in all of the universe. We flourished in that garden as male and female, naked but unashamed, among beasts but with dominion over them. In the garden, God placed two trees; The Tree of Life and The Tree of Knowledge of Good and Evil. If anyone would eat from the tree of life, that person would live forever in their current state with God. But the tree of knowledge of good and evil was different. The tree is no more tastier or beautiful than any other tree in the garden. It was an ordinary tree, but what wasn't ordinary was what God commanded Adam and Eve of that tree. He commanded them to not eat from it. God loved them so much but He wanted to be loved back. And true love is only shown by the act of choice. No one forced Him to love us and so He never forced us to love Him back. Just as He freely chose to love us dearly, He wanted us to freely choose to love Him back.

But we didn't choose Him back. We chose to love all things but Him. We disobeyed. The fruit did nothing more than may be provide Vitamin C but the act of disobedience, the intention to love what's not good, caused death and evil within us. And God's heart was broken. He chose us but we never chose Him back. But even that didn't stop Him from loving us evermore. He would cloth us of our nakedness, not because it was shameful but because we thought it was. And He knew what must be done, He kicked us out of the garden as soon as possible. Not because He didn't want us to live in a beautiful garden, but because the tree of life was there. And if we were to eat from that tree we would've lived broken forever. And God in His betrayed state, still in love with us, planned of the most incredible thing to restore us back to what He first saw

in His thoughts about us. He saw two broken people that He so dearly loved and thought they were worth dying for to be restored. And that's exactly what He does. He told Eve that even though the seed she ate killed her, the seed she'd conceive would save her. Then all of history is about people choosing to love God or not but in both choices God was still faithful to us. He would always shine His light and love to both the saint and the sinner, He would guide and protect both the priest and the murderer. His love was never unfair. He would love all the same. History is then a repeating pattern of God choosing a person, hoping they'd choose Him back but He always ended up being betrayed over and over and over again.

But one day, as He promised Eve, a woman conceived a new seed. The seed that was to die and be buried so that it would become a tree, a tree that would be called The Tree of Life. And just like in the garden where if humans ate of the Tree of Life, they would live forever, this new Tree of Life did the same thing. This tree also had a name...it was Jesus. God saw that humanity failed to uphold their end of the promise and so He decided that He'd become one of us and uphold the promise. God became human and dwelt among us but no one knew Him. But to those that knew Him and accepted Him for who He was, the person that breathed life into them and put them in the garden, for these people He would be the Tree of Life that they'd eat from by the simple act of believing in Him. These people would then live forever restored and perfected. The first tree would make you eternally imperfect, the new one would perfect you eternally.

The day we disobeyed God was the day we chose darkness, cause it was only God that was the bearer of Light. And anyone that disobeyed/sinned had darkness in Him. And so the wages of sin is death not for any other reason but because when we sin we share a piece of that darkness. And just as darkness can never exist in the face of light, a sinful person would perish in the face of God simply out of their nature. And it is exactly that price Jesus paid for us. He took the darkness within us and became it so that He may die but we can live. So that He would perish in the face of light but we become part of it. And this is the greatest love story ever told; God became Human so that He would die instead of us for our sins. And so we can live with Him restored in paradise.

Now, all of us are faced again with similar options Adam and Eve had. But the commands have changed. It is not "Do not eat from the tree of knowledge of good and evil so you don't die" but "Eat from the Tree of Life, so you may have everlasting life." So it's up to you now, choose your true love back or turn your back on Him again. "For God did not send his Son into the world to condemn the world, but to save the world through him." - John 3:17

Hey 🌙 Who's ready for the second day?

Today's content is sooo good and extensive, I hope you genuinely take the time to read each and every sentence and understand it all. Have a blessed time...

Day 2 - 奇妙恩典 - Born Again and Freedom from Sin We will talk about our sinful nature and the grace and mercy God rained on us to live a life free of sin. Yesterday, we saw the painful history of humanity, how Adam and Eve's sin led to rebellion and darkness and how God in his infinite love and mercy sent his Son to take away our darkness. Well today we are going to explore this exact phenomena What does it mean that Jesus died for us? Why doesn't God just forgive us? These are the hard questions we must ask to truly understand God and Christianity.

Why doesn't God just forgive us? It's such a simple question, why did God have to send Jesus to save us? If he loves us, why doesn't He just forgive us? Well to understand the reason for this question, we first have to understand what or who we are talking about when we say God and his attributes: 1. God is omnipotent: meaning God is an all powerful, beyond understandable glorious God. He can do anything and everything. Nothing is beyond his power. 2. God is omniscient: He's all knowing and understands everything that ever was, is and will be. He understands every emotion you feel and everything you're going through. He understands our language and understands our history. He knows everything that has ever happened. What a glorious God! 3. God is omnipresent: God is present everywhere. He exists at every place, at all times. He's been there with you in your darkest times, He's been there at your joyous times. He's been and will be with you forever. He never leaves our presence, because it's not in his attribute. There isn't a place He can't exist. 4. God is eternal: He has no beginning and no end. 5. God is love: God doesn't just love, God is love. It is his identity. 6. God is just: God is just and righteous. He's the ultimate being of justice and righteousness, there's no ounce of favoritism or injustice in him. He always rules justly. 7. God is merciful: God is also the perfection of mercy. His mercy is beyond comprehension, his mercy is like none other. Now that we have explored a glimpse of God's attributes, it is important to acknowledge that our understanding is merely a fraction of the comprehensive nature of the divine. In fact, entire books have been dedicated to delving into the depths of a single attribute of the perfect God. However, let us now shift our focus to the concept of sin and its significance.

Sin Sin in its dictionary definition means a violation of moral laws, principles, or commands. In the simplest sense, it just means doing that which is wrong. In that definition, I hope all of you who are reading this admit that you are a sinner. Even the most righteous of people have to admit that they have done and constantly do, perhaps many times per day, that which is wrong. Things that are wrong are clear in nature. God has put in us a moral law so that we would follow it. For the skeptics out there just think, in whatever relativistic way you may see right and wrong, there are undeniable wrongs. You cannot say in any situation that raping an innocent 6-year-old child is ever justifiable. There's no cultural norm, there's nothing that can make you ever say, yeah that's morally okay. Just to prove a point lets look at just a few of the commandments of God • You shall not lie. Have you never lied? • You shall not steal. Have you ever stolen something? • You shall not covet your neighbor's house, spouse, possessions or anything. Now here covet means to have an intense desire for something that belongs to another person. So tell me have you never done that? Have you never fantasized about another person's wife? Have you never longed for and despised your friend for his accomplishment? Now the point is clear, we are all sinners, we all perform the wrong thing, we all have transgressed against the moral law and intern transgressed against the almighty God.

Debt Okayyy, we're all sinners. So what? So what we broke the moral law, the law that God put

in us? What does that have anything to do with us? You listed above that God is merciful, why doesn't He just let us live however we want, and forgive us? Well herein lies the understanding of sin. We saw that we have broken the moral law, right? So let's see what happens on Earth. Here in our judicial system what happens to someone who broke the law? Well its simple, he must pay right? If you withhold paying taxes to the government, you have now incurred a debt. You may pay that through a huge fine or maybe jail time. Whatever the case, you have now a debt you owe the government. Why doesn't our government just let the accountable people go? Don't they care about people? Well it simply doesn't work that way right, it just wouldn't be fair to just release someone without them paying their due. Let's say someone robbed your house clean and killed a family member of yours. Then the judge heard the robber's case and saw that the robber was very sorry about what he had done and told the robber that he was forgiven and that he may leave. That's ludicrous, that's insane, that is the pinnacle of injustice, wouldn't you think? It's the same exact thing with God. We have transgressed against everyone imaginable, we have broken the moral law both against God and our fellow humans. And this causes God to have this humongous dilemma between his two attributes, his everlasting love for us against his righteousness and his infinite mercy against his perfect justice. As we saw in yesterday's post, the wages of sin is death. That's the fair thing to do, that's the debt that God put on sin, whomever sins must pay in death! But then He loves us so much and He can't see us perish so what's He going to do? Just think about it the eternal God baffled between his two attributes. He wants to be just but the just thing would be for us to die. And He can't do that because He loves us with a deep intensity beyond our contemplation. So what should He do?

But I'm a good person How would it be fair for me to die for my sins if I'm a good person? I may have lied and may have done wrong and transgressed against the moral law, but I still try my best to do good, I give to the poor, I help the needy. Well to understand this, let's go back to our previous example of our justice system. Let's say you ran a red light and you were caught by the traffic and was put forth to a judge. And when the judge asks you about how you'd plead, you answer "Look I ran the red light, but I was in a hurry, I had this big meeting. But also I'm a good person you know, I do <insert good works here>, you can check." Now it doesn't matter whether you're Mother Teresa or not. The judge will look at you so weirdly asking what that has to do with anything, It's unrelated! If you only broke one of the laws of the constitution but you have obeyed every other law, you are still guilty. You still have a debt you have to pay, whatever that punishment may be. So it's good that you're a good person but you still have gone against the moral law. You are still a sinner who deserves the punishment put for a sinner.

God's Solution To reiterate, its not a problem of forgiveness; God doesn't have a problem with forgiving you. Lets look at an example... lets say you parked your car at a cafe shop, and another car scratched your car and broke your rear-view mirror. And the person was very apologetic and was incredibly sorry, he was almost down to tears that that had happened. And looking at that, you forgave the person. Now it doesn't matter if you forgave him or not, there's still something there, there's a debt incurred. You forgave him but that's only half of the story, there's still a scratched car and a broken rear-view mirror someone has to fix. Either the person that caused the damage has to pay or you have to pay or someone has to pay. Now we saw we've incurred a debt, we need to pay a price. We need to pay with our life, we deserve to die. In the above example, in the end you saw there was a debt incurred and someone had to pay it, either the guy who damaged your car or you? Here lies the grandness of God's love, here lies his everlasting love. God's solution was to pay the price himself. He paid off our debt, taking on what we rightfully deserved, so that none of us would face the death punishment.

But how was that fair? Well why can't anyone just die on behalf of everyone's sin, why did it have

to be God himself? Well it's simple, everyone has a debt to pay. Someone among us can't just come up and say that they would take the sins of all other people without already paying their own debts. Everyone has a debt to pay, we simply are not without blemish, we can't save anyone, we need to be saved ourselves. But Jesus knew no sin, He never had any debt to pay. He was perfect in every way. And since He didn't have a debt to pay himself, He paid our debt. He took away what we deserved and took it all on Himself so that all of us may not be condemned. Oh! What love was demonstrated on the cross. Imagine this, a God who loved people who hated him, we despised him, for God's sake we put him on a freaking cross. We bruised every single body part of him, while insulting and mocking Him. He didn't care, all He could say was "Father forgive them for they do not know what they're doing!" He knew even after He went through all that, we'd still insult, disobey and go against Him and the moral law. Still knowing that we'd go against Him and even looking at the pain and suffering that was to be on Him, His love surmounted that, He became the lamb of God, He became the ship upon which our iniquity laid upon.

Believe God has done His part, in fact He has done more than his part, He has done it all! He played his role and demonstrated His love abundantly. He has paid the price of our debts of Sin and has given us eternal life as a free gift. Oh! What wonderful news, oh what joyous news it is to know that the eternal God loves you and wants to spend eternity with you. But you have to open the gift, He won't force you to open it if you don't want to. He loves you too much than to force you to live with Him for eternity, you have to choose that for you! But it's simple to open the gift, so what are you waiting for, just open it already! I promise you'll love it more than anything, you'll cherish it more than any other possession. It'll give you more joy and peace than anything else.

Opening the gift is one prayer away, just one request away. God is here beside you eager to hold you in His arms. Go run into Him! 1 John 1:9: "But if we confess our sins to him, he is faithful and just to forgive us our sins and to cleanse us from all wickedness." Isaiah 54:10: "'For the mountains may disappear and the hills may become dust, but even then my faithful love for you will remain. I will make peace with you, and it will never end.' says the Lord, who has mercy on you." Isaiah 55:7: "Let the wicked forsake their way and the unrighteous their thoughts; let them turn to the Lord, and He will be gracious to them; and to our God, for He is merciful." Romans 10:9-10: "If you declare with your mouth, 'Jesus is Lord,' and believe in your heart that God raised him from the dead, you will be saved — for it is with the heart that one believes and is justified, and with the mouth that one professes and is saved." Revelation 3:20: "Behold, I stand at the door and knock. If anyone hears my voice and opens the door, I will come in to him and eat with him, and he with me." Matthew 11:28: "Come to me, all you who are weary and burdened, and I will give you rest."

Hey ☐ Who's ready for the third day?

Day 3 - ☐☐☐☐ ☐☐☐ Fire Within From Dust to Flames Today, we will talk about the transformation of a believer's life and the power the Holyspirit gives over sin and this broken world. Who is the Holyspirit? Within your family or friends, you can notice the bond you have, the certain "spirit" of that gathering. It's very identifiable cause when those groups of people get together they all act, talk and connect certain way. Their gathering has developed a particular kind of behavior. This "spirit" of their gathering is sort of like a communal personality that comes into existence, though not a real person it feels like an existing personality. Now when it comes to God, the fellowship and union God the Father has with His son Jesus is such a solid and concrete thing that this union itself is a Person, a real Person. It is in fact the third of the three Persons who are God... This is the Holyspirit.

What does the Holyspirit do? In the beginning of the Bible and of Creation, we can see God creating the heavens and the Earth. Now the Earth was formless and empty and darkness was over it's surface. Then the Holyspirit of God was hovering over the waters and then it was at this moment that God said "Let there be Light!" and there was light. I want you to notice something here, the world was shapeless and lifeless, it was dark and dead... it was chaotic. And it was on this chaos and darkness that God's spirit moved and swayed over. And it's during The Spirit's presence that this chaotic and dark world received light and life and order... This is exactly what the Holyspirit does. Though God made a perfect world, sin has entered the world through us and the same world that God moved His Spirit over and brought to order, we have moved over it bringing about chaos and bloodshed. But through God's goodness and mercy, He promised to do onto us what He did to the world long ago; to move His Spirit over us and bring order and life to our chaotic and sinful nature.

So in this world, we are powerless and chaotic. We are trapped in a dying flesh that wants to sin every hour of the day, we are in constant influence of evil spirits wanting to tempt and possess us, we are also in this broken system of the world that causes injustice and hate, we lust and kill, we lie and steal, we cheat and envy... and we do it all even if we don't want to! We are trapped and powerless to overcome any of this. But then walks the Holyspirit in to our lives. Giving us power to overcome the world and sin, to do the good we wanted to do, to fight off temptation and to cast demons out. The Holyspirit enters our life and we receive power. Power that also turns the chaos of our soul to order. So as we saw how the Holyspirit is the personified union within God, this same Spirit lives within believers so that we would also have that deep and inseparable union with God. We live within this broken world as broken people but receive the Holyspirit and be set free and set apart from this broken world and join the family and gathering of God. It is through this Spirit that we have the power to talk to God and listen to Him, to do all the miracles Jesus did and more, to preach the Gospel and to make a real change in our and other people's lives. This spirit is God living in us!

How to receive the Holyspirit? It is this same Spirit that made us holy that will also make us obedient to God's will, it is also this same spirit that gives us power over temptations and tests. Then, how does one receive the Holyspirit? The Bible teaches us that we receive the Holyspirit the moment we believe and accept Jesus Christ. To elaborate more let's look at an example. When you are texting with your friends and you send a message, your social app shows you a double tick mark to show you that the message you sent has been delivered and seen by the person you sent it to. Essentially showing you that your message have been heard. The Holyspirit is this double tick mark, when you believe in Jesus you are essentially sending a

message to God to be accepted as His child and it is when that message is seen by God that you are given your double tick confirmation of deliverance, the Holyspirit. It is quite right that you should be “all glowy” and feel that “something terrific” has happened to you... because it has! Accept these sensations with thankfulness as birthday cards from God, but remember that these sensations are only greetings, not the real gift. The sensations are not the real thing. The real thing is the gift of the Holyspirit which can't usually be and perhaps not ever be experienced as a sensation or emotion. The sensations are merely the response of your nervous system... don't depend on them. Otherwise when they go and you are once more emotionally flat (as you certainly will be quite soon), you might think that the real thing had gone too. But it won't. It will be there when you can't feel it and it may even be most operative when you can feel it least. The day you believed and accepted Jesus as your God is the day the Holyspirit dwelt in you. And you can see it's effect even if you led a sinful life after that. Sin doesn't taste as sweet as it did when you've been marked by the Holyspirit and when you sin after receiving the Holyspirit the taste of Sin bitters.

How to be filled and live in the Holyspirit? The receiving of the Holyspirit is an instantaneous thing. The moment you believed Christ is the moment you received the Holyspirit. But being filled with the Holyspirit and living in Him is a gradual thing. Let's take a snap look back at history. In an ancient city of Ephesus, pagans worshiped their god in drunken orgies. They believed that to communicate with their god and to be led by him, they had to be drunk. In this drunken state, they could determine the will of their god and determine how best to serve and obey him. Addressing this the bible tell us to be filled and drunken with the Spirit. That is to mean that we yield ourselves to the Spirit's power allowing Him to guide, influence, and govern our behavior. We carefully align our daily choices and decisions with the wisdom and truth the Scripture teaches, the same scripture the Spirit authored! So in effect, the Spirit that dwells in us is also the one who wrote the scriptures making it easy for us to live right by the scripture because we are living by the force that authored them! Essentially, the answer to live a sinless life is the Holyspirit.

The Christian life is a journey, and we are to walk it, that is to mean we are to make consistent forward progress. The biblical norm for all believers is that they walk in the Spirit. To walk in the Spirit is to surrender to His guide and influence. Those who walk in the Spirit are united with Him and are the bearers of the fruit the Spirit produces. Thus, those who walk in the Spirit walk in love; they live in love for God and for their fellow man. Those who walk in the Spirit walk in joy; they exhibit gladness in what God has done, is doing, and will do. Those who walk in the Spirit walk in peace; their lives are not defined by worry or anxiety. Those who walk in the Spirit walk in patience; they are known for having a “long fuse” and do not lose their temper. Those who walk in the Spirit walk in kindness; they show tender concern for the needs of others. Those who walk in the Spirit walk in goodness; their actions reflect virtue and holiness. Those who walk in the Spirit walk in faithfulness; they are steadfast in their trust of God and His Word. Those who walk in the Spirit walk in gentleness; their lives are characterized by humility, grace, and thankfulness to God. Those who walk in the Spirit walk in self-control; they display moderation, constraint, and the ability to say “no” to the flesh. Those who walk in the Spirit rely on the Holy Spirit to guide them in thought, word, and deed.

Fire Within The Spirit that moved over this very Earth to bring about order into chaos wants to do the same thing within you. To bring peace into your anxious minds, to heal all mental scars and physical pain. The Spirit that raised Jesus from the dead wants to dwell in you so that He may also raise you from the dead on the day of judgement. So that He may be your mark of deliverance, your ticket to heaven. Holyspirit is the forgotten God, the God that lives within us

but so unseen and unheard, avoided at all costs and never walked by. The one that's closest to your heart, to hear your deepest pains and sorrows so that He could comfort and guide you. The Spirit so close to us so He could help us in our weaknesses, in the days we don't know how to pray He will intercede for us with groanings too deep for words. This Spirit is the fire within us, that burns away the sorrows of yesterday and ignites the Joy of tomorrow. The Fire too ferocious to touch but only burns away our tormentors. The Fire that lights up the dark alley and warms us in our despairs. It is the Spirit that is present in the day we die, so that even in death we aren't separated. The Holyspirit is love set ablaze!

"You shall receive power when the Holy Spirit has come upon you." — Acts 1:8 "If the Spirit of Him who raised Jesus from the dead dwells in you, He who raised Christ Jesus from the dead will also give life to your mortal bodies through His Spirit who dwells in you." — Romans 8:11 "But the Helper, the Holy Spirit, whom the Father will send in my name, he will teach you all things and bring to your remembrance all that I have said to you." — John 14:16 "Likewise the Spirit helps us in our weakness. For we do not know what to pray for as we ought, but the Spirit himself intercedes for us with groanings too deep for words." — Romans 8:26 "Now the Lord is the Spirit, and where the Spirit of the Lord is, there is freedom." — 2 Corinthians 3:17

Hey ☺ Who's ready for the fourth day?

Day 4 - 基督的 Bride Christ's Brides Christ's Bodies, Living Proofs Today we will talk in detail about what a Christian's life should be. The activities involved and how we can bible study and live the word. But, before we do let's touch up on the definition of salvation. When a Christian believes and is baptized he is through the act saying the old man died on the cross with Christ, he is buried with Christ (when he goes into the water) and a new man has risen (when he rises back out of the water). This seems like something simple but, its actually really amazing. You see when Jesus Christ died on that cross he died pure of his own sin but, carrying our sin. Our old man hung up there with him. This meant that the debt that we owed God was paid on that cross and what rose with Christ was the new man. This new man is righteous. Righteous means to be made right with God. Think about it. Before we do anything in our christian life we are already righteous simply by accepting the work that Christ has done. That means anything we do from this point onwards is not to gain a relationship with God but, because we have him already. Its is not to get a father but, because we have one! After this the bible tells us that the spirit that gave life to Christ is also going to give life to our dead bodies. So as we grow daily in becoming the new man and in losing the old man the holy spirit gives us life. Can you imagine? First we have unearned righteousness simply because he loved us and he did the work and now he continues to provide the grace to keep going. So don't worry, Live for him because you love him, trust in his grace and ask him to teach you how to live, walk in the light and should you fail ask

him for forgiveness and start walking again. The war is already won! Battles don't change the ending.

A Christian's Life So now that we have talked about the motive with which we should fight the battle let's talk about a parable told by Jesus. The bible tells us a story of ten women waiting for a groom to come. These women did not know at what time the groom would arrive but, they were expected to wait at the gate with their lamps on. Now the lamps back then were oil lamps. They would only light until the oil in them had ended. Five of the women had extra oil, the other five did not. The story tells us that as the night progressed the fire in their lamps began to end. And the five careless women asked the other five for some of their oil. However, at the refusal of the five who were prepared they had to go out to look for oil. At this point the groom comes and he takes in the five who were present. Later in the night the five who had left came back and knocked on the groom's gate. But, when he answered the door, he tells them that he does not know them and leaves them out.

This is a terrifying story isn't it? Its actually not. The reason is because it tells us how to maintain our fires lit. Think of the fire like our christian lives. If we keep the fire stoked then it will keep burning until the very end and when the groom comes back we will be waiting at the gate. However if we do not keep it stoked eventually it will die out. What keeps it stoked you ask? Oil of course. Prayer, reading scripture, living everyday in Gods presence so that he keeps renewing us and growing the fire. That's why scripture and prayer are very important. Because they feed us. And what we feed grows. And it doesn't need to be that yearly reading plan, or the three hour bible study. Those are great, but, all God asks is for us to love the word and make an effort to read it, think about it and to ask him to teach it to us. Whether its a verse a day or 10 chapters a day isn't what makes the difference. It's that we are allowing God to teach us the word and submitting ourselves to its transformative powers through prayer and daily living. It is literally impossible to list down all the things that God likes and dislikes. But, ultimately the secret to christian living is submission to God in every way so that we are made more like Christ. If we do that, the change we hope to see, freedom from sexual sin, forgiveness for those we hate, patience, love, kindness...are all results. Fruits if you will.

So what should we do? Everyday, we should make time for the God who loves us. We should ask him our questions and allow him and no one else to answer them. We should read his word. We should analyze what it says and think about how he means it. We should form a loving relationship with scripture. We should allow it to be our measuring standard. It should have the freedom to correct us and the power to encourage us. Then we should change the things it leads us to change and we should ask God for help when we struggle with doing so. We should not justify our wayward days or use the scripture for our defense. We should read it free of our preconceptions. So that the word of God can change us. When we do this we get to see the beauty, that is scripture working in our lives.

Christ's Bodies: Living Proofs So what are we saying over all? Through the work of Christ we have been made part of His amazing family. Part of the body of Christ where He is the head. A body may have different functions but, never does it stray from the thought process of the mind. If it does there is a malfunction. We are to live in such a way that honors the body we are a part of and submits to the mind that controls the body. To be living witnesses to the amazing God we serve. To walk in the same way Christ walked. And to do so until He comes back again or we go to him. What a blessing it is. Through His work we have been made right with God and through His provision we shall continue to be made right with Him! All we have to do is submit, and keep on submitting every single day.

Simply put Christianity isn't a religion or a list of chores to do everyday, it isn't a task or an obligation. It is simply a loving relationship with God. Just you and God. It is literally the most intimate and most closest relationship you could ever form. God is often called the "Lover of your soul" and He is that. Or think of it like marriage; You were once married to darkness, it was an abusive relationship. It cost you physically, mentally, emotionally and spiritually. On the day of salvation you have been set free, divorced from darkness, and now been remarried. Your new marriage is none like you have ever seen before. You are loved sacrificially, you are cared and taken care of beautifully, you are protected and taught well. You live as if you have married the prince of Heaven (Cause you have!) The Prince's bride deserves all things royal and all things royal is what you get! See, Christianity isn't an outlined and boxed in list of ceremonies and activities, it is your union with God. If what Christ did on the cross is God's proposal to you, Christianity is your answer to His proposal. And so now you don't sin not because it's against the law of God but because you love God. And God's love language is obedience, it is by obeying Him that we show our love to Him! Remember marriages have ups and downs, they have times of quietness and miscommunication, but there are also times of surreal memories and times of love. Christianity is also like that. And like how in a marriage the wife submits and humbles herself to her husband, and if the husband was to relocate to a different city because of his Job she would move with him... Christianity is an act of submission to God's loving guidance and authority over us and an act of moving with Him. It is important to know that if Christianity is a marriage and a union with God, then God is the head of that marriage, the leader, provider and protector. The relationship is guided by Him, we do not guide Him. So take the idea you have that says that it's your role to guide your christian relationship... It is not! Your role is to humbly submit to the will of God and do what He tells us to do. Oh how loved are we to be engaged with our true love forever! A love inseparable by circumstanced or pain, suffering and death. Love beyond the graves and love that heals all wounds.

"...and we are new creations; all things have become new." — 2 Corinthians 5:17 "Therefore, if anyone is in Christ, he is a new creation: The old has gone, the new is here!" — 1 Corinthians 5:17 "And you belong to Christ" — 1 Corinthians 3:23 "Therefore it is of faith, that it might be by grace; to the end the promise might be sure to all the seed; not to that only which is of the law, but to that also which is of the faith of Abraham; who is the father of us all," — Romans 4:16 "Whoever claims to live in God must also live as Jesus did." — 1 John 2:6 "Anyone who loves me will obey my teaching. My Father will love them, and we will come to them and make our home with them." — John 14:23 "Do not fear, for I have redeemed you; I have called you by name; you are mine. When you pass through the waters, I will be with you; and when you pass through the rivers, they will not sweep over you. When you walk through the fire, you will not be burned; the flames will not set you ablaze. For I am the Lord your God, the Holy One of Israel, your Savior" — Isaiah 43:1-3

Hey ☐ Who's ready for the fifth day?

Day 5 - ☐☐☐☐ Hope and Eternity A Perfect World Over the past few days, we've tried to see in a very short manner, some topics from the essentials of the christian faith. Well today we've come to a crucial topic of the christian faith, our future hope. For us Christians, to hold fast to what we believe and not fall away by the world, it's important to know the hope that God has put forth onto us by believing in his name. The Present Age This is the age that's hard to hold fast as a christian. In this world right now, we see pain and suffering so hard to grasp. So much pain so much suffering by everyone. We see horrible wars where thousands die, many children are left orphaned. We see lethal viruses, taking away our loved ones. We see so much human evil in this world, all of us have experienced some sort of horrific act by another human. The sin of man is uncountable. It's super hard to even see hope, it's hard to fathom happiness, it makes us all deeply saddened. We all are in constant emotional turmoil by what we see in this world. Well this is because our current age is Satan's age, it is the age of the rule of sin. It is the age of darkness and evil.

Coming of the End times We are hopeful creatures always hoping to improve things. We always strive to better our lives, work hard and change the lives of our family. Heck even some of you reading this might dream about changing our extremely poor country and bring it to prosperity. But there's a sad truth about this age, it will not get better but worse. However much we labor, evil will persist in this world, Satan will rule. The ungodly, the unrighteous will get prosperity and love and adoration from the world. Sin will continue, injustice will continue. Worse wars will arise, earthquakes, volcanoes, tornadoes, and other horrific natural disasters will come. Even the church won't be peaceful, many devious teachers, people described as wolves in sheep's clothing, shall arise and trick many out of the way of the gospel. Now during this age, and the worsening of this age, even though we can't change the hurt that's incoming, we are called to be the light of this world. Other people don't have the hope we have, don't have the flowing water of our lord Jesus Christ. So we are to show them the light, so that they also might drink from the imperishable fountain. So they too might get the hope that God want's all people to have. But there's a beautiful thing about the worsening of times, however somber that might be, it is a sign of the coming of the end times. These are the signs Jesus told us to watch out for, to know that soon He will come. And they are here, the signs are incoming and there are specific signs that are happening for us to know that the coming of our Lord is near. For a simple example, a sign that has occurred is the re-establishment of the nation of Israel which was told in (Ezekiel 37:21). This happened in 1948, that's after nearly 2500 years without them having their own country. They were spread throughout the world, and magically the Jews all gathered from all around the world and formed a state. The end is for sure near.

Awaiting End Times Thanks to the grace of God, we know that for Christians the end isn't really the end. We know we have eternal life waiting. We know we have an imperishable inheritance waiting, and it is through this we can hold fast and live in light of the hope we've gotten. It's a bit like this, say you're thrown into a very dark room, with no light, no food nothing to do, but then you're told after 24 hours, we'll take you out, and you'll be the richest person in the world. Now in those 24 hours, would you be hopeless and scared and sad? Probably not, you'd be excited, you can't wait for the 24 hours to end, and you'll be joyous for what will happen after those 24 hours. Just as in the dark room example, we are in a world of darkness and evil, but we know after this world we shall have eternal paradise. We know we shall have an indescribable joy. We

know we shall have eternal happiness. So if we truly believe the things that are foretold in the bible, if we truly believe what God has promised to us, we surely should be joyous full of hope for the hope to come. Surely we shall constantly sing Maranatha (God come fast). Surely we shall constantly dream of seeing our lord in his full glory.

The Final Sign The final sign we shall get before the end is the rise of the anti-christ. The anti-christ will be a very powerful and charismatic leader who'll emerge on the global stage. He will deceive many through his charismatic words and his glorious signs and miracles. And many will be deceived. Israel will accept him as the messiah, they will take him in place of the true messiah (Jesus Christ). This time will be the most difficult for Christians, there will be persecution like none other. This will be a test like no other. It'll be the most somber and saddest of times, where it'll truly seem like evil has won, darkness has prevailed. It's normally called the tribulation period, a period of 7 years when even the bible says woe is it to those who are pregnant in those days. Because it'll truly be tribulation like none other, there will be tribulation that'll make the world wars seem like a peaceful time.

Christians But this tribulation period doesn't concern us Christians, we will pass from the hardship, the pain shall not befall us. For Christ will take away His bride the church before this period, in what we normally call the rapture. Imagine a moment when time itself seems to stand still, when the world is filled with an otherworldly stillness. In an instant, everything changes. The sky above begins to shimmer and glow with an ethereal light, a radiant brilliance that captures your attention and fills your heart with awe. Suddenly, you feel a strange sensation, as if an invisible force is gently lifting you off the ground. It's a feeling of weightlessness and freedom, as if you're being released from the constraints of this earthly existence. You look around and see that others around you are experiencing the same amazing phenomenon. In that breathtaking moment, you realize what is happening – it's the rapture! You are being caught up, snatched away from the troubles and sorrows of this world. Joy and exhilaration flood your soul as you ascend higher and higher, leaving behind the cares and worries of earthly life. As you rise, you notice a sense of transformation within yourself. Your body feels lighter, stronger, and more vibrant than ever before. It's as if you're shedding the limitations of mortality and stepping into a glorified state. You look at your hands and see that they radiate with a divine light, a reflection of the new life that awaits you.

Up ahead, you catch a glimpse of a figure, majestic and radiant beyond imagination. It's Jesus, the one who loved you and gave Himself for you. His arms are outstretched, welcoming you into His presence. As you draw near, you feel an overwhelming surge of love and acceptance, a deep sense of belonging and purpose. In the presence of Jesus, you are filled with a profound peace and joy that surpasses anything you've ever known. You realize that all the struggles, pain, and tears of this earthly journey were worth it. Every trial and hardship fades away in the light of His glory. Together with countless others, you enter into a realm of unimaginable beauty and perfection. It's a place where all things are made new, where tears are wiped away, and where love reigns supreme. You are home, surrounded by the presence of God and the fellowship of believers from all ages. As you take in the splendor of this new reality, you realize that this is just the beginning. The rapture is the gateway to an eternity of unimaginable blessings, adventures, and discoveries in the presence of the One who created you and loves you beyond measure. So, let the anticipation of the rapture fill your heart with excitement. Look forward to that glorious moment when you will be caught up in the arms of Jesus, released from the limitations of this world, and embraced by the wonders of eternity. The rapture is a breathtaking event that promises an everlasting joy beyond anything we can comprehend.

The Second Coming of Christ After the great tribulation, when the world has witnessed unprecedented turmoil and suffering, a dramatic shift occurs. The heavens open, and in a blaze of glory, Jesus Christ descends from above with power and authority. The sky is filled with the radiant light of His presence, and His arrival is accompanied by the sound of trumpets and the voices of angels. As Christ descends, the earth trembles and the atmosphere is charged with anticipation. Every eye beholds the majestic figure, clothed in splendor and majesty, riding on the clouds. His appearance is awe-inspiring, as He comes as the conquering King, the rightful ruler of all creation. At the moment of His arrival, the dead in Christ are resurrected. The graves burst open, and the bodies of believers, transformed and glorified, rise to meet their Lord in the air. Simultaneously, those who are alive in Christ are changed in an instant, their mortal bodies transformed into imperishable, incorruptible forms. As Christ's presence fills the sky, a great assembly of believers, both resurrected and transformed, gather around Him. This glorious company joins Him in His triumphal entry. The world stands witness to the fulfillment of God's promises and the vindication of His faithful followers.

With His return, Jesus establishes His millennial kingdom on Earth. He reigns as the righteous King over all nations, bringing an era of peace, justice, and restoration. The effects of sin and evil are gradually removed, and the earth begins to experience the fullness of God's redemption and renewal. During the thousand-year reign, Satan is bound, and the influence of evil is greatly diminished. The world experiences a foretaste of the perfect harmony that will characterize the eternal kingdom of God. Creation flourishes, and people live in righteousness and harmony with one another. At the end of the millennial reign, a final rebellion against God occurs. Satan, who had been bound but is released for a short time, deceives the nations and gathers them for battle against Christ and His saints. However, this rebellion is swiftly and decisively defeated by the power of God, and Satan is ultimately defeated and cast into the lake of fire.

Final Judgment After Christ's 1000 year reign, it is now the end. It's the time we shall all be eager to reach. This is the time where the righteous (people who were imputed upon Christ's righteousness) will receive their eternal reward, while the wicked will receive the punishment they deserved. The present heavens and Earth will be destroyed, and God will create a new Heaven and a new Earth where believers will dwell with the eternal God forever. This feels like a fairy tale like no other, but it's the most incredible news ever isn't it? This is the truth, this is what we will receive through Christ. This is the hope that awaits us, eternal peace with our Lord and creator.

The End is Near We all have at some point or another been asked what will you do if today is the last day you'll ever live? We all had answers, perhaps skydiving, maybe going on Mount Everest or any number of other things we might enjoy. And people usually use this as an exercise to know what they should be doing right now. Or at least the goals they have to set, or maybe the hope that pushes them while you're working to achieve your dreams. Well we all would want eternal life don't we? So that must lead us, and much more thoroughly so, to think what we must do now to get the hope of Christ, of eternal life. And this was the question, the Jews asked Jesus on John 6:28, and on John 6:29, Jesus answered them: "Jesus answered, 'The work of God is this: to believe in the one he has sent.'" This is all the work God requires you to do, believe in the one He has sent. Trust Him for and with your life, and He shall give you eternal life.

22-27: “The work of God is this: to believe in the one he has sent.” This is all the work God requires you to do, believe in the one He has sent. Trust Him for and with your life, and He shall give you eternal life.

“He will wipe away every tear from their eyes. There will be no more death or mourning or crying or pain, for the old order of things has passed away.” Matthew 24:44: “So you also must be ready, because the Son of Man will come at an hour when you do not expect him.” Matthew 6:19–21: “Do not store up for yourselves treasures on earth, where moths and vermin destroy, and where thieves break in and steal. But store up for yourselves treasures in heaven, where moths and vermin do not destroy, and where thieves do not break in and steal.”

Your Journey Begins — I hope the past five days were profound to you as they were for me. We tried looking at the story of humans, sin and grace, the Holy Spirit, a believer's life and the hope to come at a very simplistic way. But what we saw are just the tip of the ice berg, there's so much more to know, to learn and to uncover. And so because we can't cover every nuance of God and Christianity I now pass the torch to you. It is now your journey and adventure to purposefully read the scriptures, cross examine them and study them. It is now your personal journey to connect and build your relationship with God. Your path into knowing God and His ways is far more superior than any PHD or Career Path you'll ever take. It is far more vast and filled with love than any other journey. It is quite literally the most incredible journey of your life. No mountain climbing, no off-road tracking, no remote camping, no profession pursuit, no complicated project will ever come near to what this journey is.

So as your brother, and as a person who's been saved from darkness and evil, I remind you all to fully invest in this journey. To spend your entire life trying to know the God that created you and to follow the path He has set. No life is ever wasted if it's spent on God. No time ever lost if spent on Him. This is your true “I love you forever!” the love that actually lasts for eternity. Forming a Relationship with God / Christianity is such a simple thing that farmers in 200 AD and fishermen in the 50 AD were able to do it. Christianity is such an amazing thing in that it doesn't need any preliminary teaching to understand it, IT in on it self is education. Apart from being spiritual, anyone in a true relationship with God is far more wiser and smarter, that's just what the Bible and God's presence does to you, sharpens your mind.

Remember The Solas The five solas are a set of Latin phrases summarizing key theological principles of Christianity. They emphasize God's grace and the centrality of Scripture in Christian faith and practice. Here's a breakdown of each sola: • Sola Scriptura (Scripture alone): This principle emphasizes the Bible alone as the source of authority for Christians. Only the Bible was inspired by God and God-breathed. Anything taught by any religious person or any tradition that contradicted the Bible was to be rejected. — [“All Scripture is given by God. And all Scripture is useful for teaching and for showing people what is wrong in their lives. It is useful for correcting faults and teaching the right way to live. Using the Scriptures, those who serve

God will be prepared and will have everything they need to do every good work.” — 2 Timothy 3:16-17] • Solus Christus (Through Christ alone): This principle emphasizes Jesus Christ as the sole mediator between God and humanity. Salvation comes through faith in Christ alone, not through good works or any other person or means. — [“For we do not have a high priest who is unable to sympathize with our weaknesses, but one who in every respect has been tempted as we are, yet without sin.” — Hebrews 4:15] • Sola Fide (faith alone): This principle emphasizes salvation as a free gift. It states that salvation is a free gift to all who accept it by faith. Salvation is not based on human effort or good deeds. — [“For God so loved the world that He gave His only Son, that whomever believes in Him shall not perish but have everlasting life.” — John 3:16] • Sola Gratia (grace alone): This principle emphasizes God's grace as the sole source of salvation. It means that salvation is entirely a gift from God, not something we can earn or deserve. — [“For by grace you have been saved through faith. And this is not your own doing; it is the gift of God, not a result of works, so that no one may boast.” — Ephesians 2:8-9] • Soli Deo Gloria (to the glory of God alone): This principle emphasizes the glory of God as the goal of life. Rather than striving to please church leaders, keep a list of rules, or guard our own interests, our goal is to glorify the Lord. — [“So, whether you eat or drink, or whatever you do, do all to the glory of God.” — 1 Corinthians 10:31] These will keep you from going around from changing religions and churches and will serve as the basis for your own journey into Christianity. Though church attending is a great thing, personal bible studies far exceed it. Though fellowships with our christian friends are a beautiful thing, fellowship with God alone far exceeds it. What I’m trying to tell you is that without private worship, public worship is just performance.

Protect Your Heart The world is filled with false teachings and deceptive spirits. There is one true gospel, that salvation only comes by believing in Christ and no other way. Anyone teaching you any other gospel is condemned by God so do not follow it. So be very active in discerning. Pray that God keep and protect your heart safe from this. Of-course you can’t tell if a teaching is good or bad if you can’t compare it to another preset teaching. So first step is understanding Christianity from the basics then you will have a framework to examine all other teachings. Remember you are saved by what Christ did for you, He kept all the laws you couldn’t so that he could give you that perfection in the face of God He had, He also was tortured and killed on a cross instead of you, so that you can escape hell. So in believing this you are made right with God. It has stopped being all about law keeping, it not longer is that sin you did today that will keep you from heaven but your faith in God. So if you were to die right now, you are entering heaven.. there are no if’s and but’s cause salvation isn’t about your actions now. So what about the law? What about our actions? Now the law is still here to guide us but most importantly to show us what God likes and hates. So in this relationship you have with God you could put a smile on Him and show Him how much you love Him for saving you by doing the things He likes and avoiding the things He hates. So in essence, we do not lie because of the law, we do not lie because we love God. We try to learn and keep the law not to be saved but because we are!

“The Spirit clearly says that in the last times some will turn away from what we believe. They will obey spirits that tell lies. And they will follow the teachings of demons. Those teachings come through people who tell lies and trick others. These evil people cannot see what is right and what is wrong. It is like their conscience has been destroyed with a hot iron. People tell silly stories that don’t agree with God’s truth. Don’t follow what these stories teach. But teach yourself to be devoted to God. Training your body helps you in some ways. But devotion to God helps you in every way. It brings you blessings in this life and in the life to come. You are young, but don’t let anyone treat you as if you are not important. Be an example to show the believers how they should live. Show them by what you say, by the way you live, by your love, by your

faith, and by your pure life. Continue to read the Scriptures to the people, encourage them, and teach them. Be careful in your life and in your teaching. Continue to live and teach rightly. Then you will save yourself and those who listen to your teaching." — 1 Timothy Chapter 4

The Potter and The Clay The Bible says "Like the clay is in the hand of the potter, so are you in my hand." (Jeremiah 18:6) Like the potter spins, wets and shapes the clay into the item he wants to shape, we are in God's hand, God will shape us into looking like His Son Jesus. In the process of being, there is un-being. In the process of looking like Christ there is also not looking like Christ. The clay doesn't instantly turn into the item it's being made into at the instant it's in the potter's hand, and just like that We do not instantly act, feel and think like Christ the moment we are saved. So Christianity then become a journey of looking like Christ. I want you to notice something here. When a potter is shaping the clay, he doesn't throw out the clay half way through the journey because it doesn't look like the pot he's making it into. Nor does the potter go around expecting the clay to shape itself and form into the pot it's being made into. Nor is the clay responsible for not looking like the pot. Even when the potter finishes making the pot and it still doesn't look like what he wants it, he doesn't throw the clay out, he simply wets it all and starts over on it. We are the clay, we only submit and God shapes us. He's the designer of our life and the smoother of our edges. And so by believing we are put into God's hand and by obedience we are shaped into Christ.

City of Refuge In ancient Jerusalem if a person broke the law or killed someone, they were to be killed. This culture of revenge prevailed. And so during God's architecture of the cities of Israel, He guided the nation on how to form their cities. So among all the cities, God commanded them to build 6 very different cities called Cities of Refuge. The 6 cities were to be placed at half a day's journey length from the nearest city. So If you were to travel from any one of the cities of Israel in less than half a day you'd encounter one of the 6 cities of refuge. In fact, the roads that lead to these cities was to be made so comfortable to run on, clear and guided paths. Now, God told them that if anyone was to break the law or if anyone killed someone and if they run into one of these 6 cities, they were to be set free of punishment as long as they reached that city before the people that wanted to kill them and as long as he stays in that city. So the killers that were to avenge the damages can not enter these cities and couldn't kill the law breaker and murderer. The person then would go about living his life in that city as if he's a brand new person. In the old testament city of refuge was an actual place, but in the new testament Jesus is our city of refuge. Meaning, when we sin, Satan and the world now have access to come and try to kill us, and all the time they do. They drown us in guilt and depression, self hate and unholy anger. But if we run towards our refuge Jesus, we are set free. We are out of their reach. In John 8, we can see the story of a woman caught in bed with another man that's not her husband. The Pharisees caught this woman and brought her onto Jesus, asking Him to stone her to death because she had broken the law. Little did they know that they dragged the person they wanted to kill to the city of refuge, out of reach from them. And it's exactly that what happens. No one could harm her, in-fact her sins were also forgiven. This is our God, our city of refuge. When we stumble and sin, we are to run as fast as we can back to God before the killer gets to us. Because it is there with God that we receive the mercy for our sin, the healing for our brokenness and the protection from all harm. It is far better to Sin while God is in your life than to Sin without Him. Remember, if "that" sin leads you to God, Satan will stop using it!

"Above all, love each other deeply, because love covers over a multitude of sins." — 1 Peter 4:8
"I have carried you since you left your mother's womb. I carried you when you were born, and I will still be carrying you when you are old. Your hair will turn gray, and I will still carry you. I made you, and I will carry you to safety." — Isaiah 46:3
"Above all else, guard your heart, for

everything you do flows from it." — Proverbs 4:23 "For the Lord your God is he who goes with you to fight for you against your enemies, to give you the victory." — Deuteronomy 20:4 "Have I not commanded you? Be strong and courageous. Do not be frightened, and do not be dismayed, for the LORD your God is with you wherever you go." — Joshua 1:9 "This message is from the Lord: "I know the plans I have for you. I have good plans for you. I don't plan to hurt you. I plan to give you hope and a good future. Then you will call my name. You will come to me and pray to me, and I will listen to you. You will search for me, and when you search for me with all your heart, you will find me. I will let you find me." — Jeremiah 29:11-14 "May the Lord bless you and keep you. May the Lord smile down on you and show you his kindness. May the Lord answer your prayers and give you peace." — Numbers 6:24-26

Psalms 91 "You can go to God Most High to hide. You can go to God All-Powerful for protection. I say to the Lord, "You are my place of safety, my fortress. My God, I trust in you." God will save you from hidden dangers and from deadly diseases. You can go to him for protection. He will cover you like a bird spreading its wings over its babies. You can trust him to surround and protect you like a shield. You will have nothing to fear at night and no need to be afraid of enemy arrows during the day. You will have no fear of diseases that come in the dark or terrible suffering that comes at noon. A thousand people may fall dead at your side or ten thousand right beside you, but nothing bad will happen to you! All you will have to do is watch, and you will see that the wicked are punished. You trust in the Lord for protection. You have made God Most High your place of safety. So nothing bad will happen to you. No diseases will come near your home. He will command his angels to protect you wherever you go. Their hands will catch you so that you will not hit your foot on a rock. You will have power to trample on lions and poisonous snakes. The Lord says, "If someone trusts me, I will save them. I will protect my followers who call to me for help. When my followers call to me, I will answer them. I will be with them when they are in trouble. I will rescue them and honor them. I will give my followers a long life and show them my power to save." #Scripture @Dagmawi_Babi

Hey 🙋 I hope the past 5 days were incredible for you as they were for me. I have learnt so much through it all. It has genuinely changed me and added value into my life. 🙋 I know for a fact that God took over and did great things through it all and will keep doing so as he has been. I am so joyful that this channel, that was created for no good reason now serves for my God's grace and glory. 🙋 When I prayed about this, God weighed in on my heart people that'd help me. And he pulled them to me. So I'd like to thank and bless two of my beautiful friends Milikias (@Jaminux) and Salem (@SalemSebsibe) who have helped me in making the contents. God used them so much that in all the days our message flowed so well. Thank you so much and God bless you even more!! 🙋 Ofcourse that's not all, there were other people that were helping me in prayer, in support, in ideas, in lessons and in sharing these contents. Thank you so much and I pray that God blesses them even more. 🙋 I loved all the content and I loved what it changed inside me. I reread them so much and will keep doing so and I hope you do too. Cause as time passes the depth of your understanding expands and you will get more value from it. 🙋 Let all credits, all

admiration and all glory that all of this and us get be to our loving God! ☺ Thank You God! ☺

I'm just saying if God wanted His birthday celebrated He would've specifically put the date in the Bible. If the date was so important for us 🗓️🗓️ 29 🗓️ 🗓️ 🗓️🗓️ 🗓️! Do the stars, the Earth, the Sun change during holidays? NOPE! It's all the same. Nature doesn't care about Holidays. But you know when nature moved? When Jesus was born, when He died, when He was risen. So we don't care about the dates, we care about the God. Holidays in the old testament were foreshadowing Christ. But Christ has come. So we don't celebrate days, we celebrate Christ. And unlike days Christ should be celebrated everyday. This goes for any other holiday too btw all the monthly Orthodox holidays, all the seemingly christian looking holidays and more. 🗓️🗓️ 2 -----¹⁷ 🗓️🗓️ [🗓️🗓️] 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️ 🗓️¹⁸ 🗓️ 🗓️🗓️🗓️ 🗓️🗓️🗓️ 🗓️🗓️ 🗓️🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️🗓️🗓️ 🗓️🗓️🗓️ 🗓️ 🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️🗓️ 🗓️ 🗓️🗓️ 🗓️🗓️

@Dagmawi_Babi

This channel is composed of unbelievers, people of so many religions, people craving God, people wanting a relationship with Christ and people who have given up on God, and of Christians who are struggling or are lukewarm. So to this audience of people discussing about celebrating or not celebrating holidays isn't important for their salvation or for bettering their connection with God. So I'll just move on to other posts I've planned. Gin as always don't forget Private Relationship with God far exceeds a Public one. If the significance of Christ being born doesn't affect you in normal days, celebrating it on Christmas is pointless. Just like how singing in public without singing in private is a performance, this is too.

#Random @Dagmawi_Babi

A few days ago, I was writing the summary to the 5 days program we've had. Adding in things that weren't mentioned in all the five days but found them to be so helpful in my own life. Anyways I wasn't having a good day the day before, I sinned and I was feeling meh all day and night long. I was just alone in one of the lecture halls in AASTU and was just spending time alone with God. A couple of tables back there were a few people here and there, wearing earphones and doing their own things. I was thinking about things in general and my relationship with God and particularly in that day I wanted the presence of God to be intense and to just tell me things. Anyways as I finished posting the summary. I kept on connecting with God and just worshipping but the day was ending, and the sun set and the night was beginning. Then all of a sudden this girl taps on my shoulder, gives me a piece of paper and then runs out as quickly as she can, almost as if she doesn't wanna be seen or caught by me. I was shocked at first but was quickly calm. I tried looking at who she was but the door was so near she left instantly. Then I turn to the paper and all of a sudden I could feel the presence of God, the Holy Spirit filling me up. I could feel his familiar energy overwhelm me and I couldn't stop shaking trying to resist his presence. Then I started reading the paper the girl gave me. And word by word the presence of God was even more overwhelming, surpassing my body and the room I was in. It was the most beautiful blessing I have ever read. And as I was reading it I could hear God telling me it's from Him. And I loved it even more. It was surreal. I run out to catch and stop the girl. I could see her from a distance and if I ran I could catch her but even if I caught her I wasn't gonna do anything except hug her and cry. So I just let her go and I prayed, sang and worshipped even more. I'll never forget the day. Cause the presence of God was so intense. And it was so healing, God answering to my call in the most unexpected of ways. #Spiritual #Encounters @Dagmawi_Babi

This is the paper the girl wrote and gave me. It is so biblical that it's so powerful. I couldn't believe that a piece of paper could have the glory of God on it and impacting the person touching it, but it did. I prayed for the girl, I blessed her that she let God use her this way. I don't know the girl AT ALL. But I have this sense of familiarity with her spirit, the kind I have with other true Christians, the spirit of unity and belonging to the same God. I saw her some other day and I didn't even do anything I just said Hi and I just hugged her, and even then I could feel the presence of God overwhelming me in those instants. God Bless Her!! #Spiritual #Encounters @Dagmawi_Babi

The key takeaway from this isn't the paper, it isn't the girl, it isn't my actions. God has been teaching me that my sins don't stand a chance of separating me from the love and mercy God has for me. He goes far and beyond of teaching me this over and over again. Infact some of the days I've had the biggest spiritual encounters were the days I've sinned and felt useless. Sin defeats me, breaks me. It destroys that holiness-ego inside me. It shows me how I'm so unworthy of God's presence in my life, taking all boast away from my self. So when the spiritual things happen, even if I want to take the credit, I will have nothing to show for it except my sins. I'm not saying you should sin so that God brings spiritual encounters into your life; but what I am saying is even in sin, you should ask for forgiveness, and believe that God will forgive you and accept you blamelessly, and that He will become close to you and reveal Himself. #Spiritual @Dagmawi_Babi

Once in our world, a stable had something in it that was bigger than our whole world! #Christmas @Dagmawi_Babi

Isn't it ironic that the most powerful and majestic God did this... In a world where women are treated as property and objects, He decided to be born out of one and to honor her being the mother of God? In a world where shepherds are the lowest classes in society, he decided to announce the good news to them first? In a world where kings had surreal mansions, he decided to be born in a stable? In a world where there were so many priests, the stars led the foreigners to Christ? But most importantly... In a world where our evil has seen new heights, where we deserved no mercy, God decided to take our punishment away?

☐ Offline Survival Manual I am a huge enthusiast of offline guides and manuals. I think most major apps should work offline and so forth, that is why I keep building offline versions of essential apps. ☐ And now I built an Offline Survival Manual. It is basically Wikipedia but for survival. If you're in a dire situation the information in this app will definitely help you!! ☐ It has VAST amount of information, from fire starting to medication, from signaling to making shelter... And so many more. There are illustration and tables to make the guides even more understandable. ☐ Download it here • https://t.me/Dagmawi_Babi/16790 As always it's open source • <https://github.com/dagmawibabi/OfflineSurvivalManual> Don't forget to read it before you're actually in a survival situation. #OfflineSurvivalManual #MyApps @Dagmawi Babi

For those who'd like a PDF and Web version of my Survival Manual App, I've converted the data into a book and an HTML page. Here it is • <https://t.me/c/1156511084/729> Join the private channel to get access • https://t.me/+OZ9UL_rSBAQ0MjNk Enjoy reading! ☺ #SurvivalManual #Books @Daqmawi Babi

Yesterday I was gonna upload the whole of Wikipedia, turns out it's around 53 Terabytes. The smallest latest version I could find was 80GB. ☹️ #Wikipedia #Random @Daqmawi Babi

Oh and before I forget, if you regularly use the CBE Mobile App, DO NOT UNINSTALL or CLEAR THE CACHE. If you do you'll have to goto the bank, fillout a form, pay 20 Birr, and then finally get access back. Just don't uninstall it whatever the issue is if you're in a hurry. #CBE @Dagmawi_Babi

Lmfao, Funniest interaction just happened with my sister. ☹️ So, my sister is just starting her Med classes and she's telling of the classes she's taking. And we were just talking and she's like I loved Anatomy class and I'm like "That's so cool Me Too!" And she's like "wtf do u mean by u like it too?!" ☹️ Lolz, then I pulled out one of my notebooks from my shelf and showed her of my human anatomy medicine class notes. And she just couldn't believe it. ☹️ Officially crowned me nerd of the house. ☹️ #DailyLife @Dagmawi_Babi

The real flex here is not that he is a nerd but that he has a shelf full of his notebooks he can show

Lmfao ☹️ I'm a sucker for notebooks. Plus I've been journaling all my life so you know.

Ur an engineering student with med notebooks thats creepy even i dont have that

Lolz, shouldn't you be studying or something! ☹️ And let's just normalize trying to get a grasp of knowledge across fields.

May be I should have a wiki called "Everything I Know" like this guy @Niki_Log The dude updates it everyday! And is interested in soooo many things! ☹️ There are a few free pages but the rest are paid, ofcourse I have managed to find a loop around that, will not tell you but, know there is. He should definitely find a better way of securing it! Everything I know • <https://wiki.nikiv.dev/relationships> #Wiki #NikiLog @Dagmawi_Babi

It has been less than 24 hours and an amazing community member @STB03 managed to host the Survival Guide... Meaning you can access it through your browser and most of all iPhone users can now get to use it. ☹️ Survival Manual Web App • SurvivalGuidePWA.web.app #SurvivalManual @Dagmawi_Babi

Here's how you can install the web app on your iPhone and other devices. #SurvivalManual #MyApps @Dagmawi_Babi

The performance is pretty meh. I only optimized the app for Android so the web version is a bit clanky. If you're interested @STB03 has made the hosted version open source so you can do your thing. • <https://github.com/serdesiyon123/SurvivalMenuWPA> #SurvivalManual #MyApps @Dagmawi_Babi

Once again proving we have the best community! ☹️☹️☹️☹️☹️☹️

Andrej Karpathy said this and it makes complete sense. Though it feels like a bit off a rebranding effort but still a good one. "I'm playing around with calling our tech, as it is today, IA (intelligence amplification) instead of AI. IA have the vibe of tools for thought, needing human interaction, and resemble a lot more what we actually have today. AI feels more like independent long-running agents. e/ia - Intelligence Amplification • Does not seek to build superintelligent God entity that replaces humans. • Builds "bicycle for the mind" tools that empower and extend the information processing capabilities of humans. • Of all humans, not a

top percentile. • Faithful to computer pioneers Ashby, Licklider, Bush, Engelbart, ..." #AI #IA @Dagmawi_Babi

📷 Dagmawi Babi Creator Awards 📷 I hope you enjoyed my first of many creator awards. Though this is just a small gesture there's a meaningful reason why I did this. 📷 These winners are incredible people and friends of mine. They're so talented and are amazing at what they do and teach. They take their time and energy into running their channels for us. And so I thought they deserved credit. 📷 Tho the award is a mere picture of a trophy, you should value it cause I took the time and love into editing and making it all. So it is valuable and it does set you apart. Not only that but company owners follow this channel and so this's a big shout-out to your skills so they can recruit you! 📷 You guys are amazing keep doing what you do. Can't wait to see you reaching new heights! 📷 And for other channels; you guys are incredible too. I can't wait to award you all next year and hopeful it'll be more than an image of a trophy. Keep making high quality valuable content. You're all so incredible! 📷 #DagmawiBabiCreatorAwards #MyEvents @Dagmawi_Babi

Although there is one more trophy left...

Might be the biggest of all awards to be honest 📷

📷 The Best Community 📷 Winner: @You This is for the most helpful, fun, smart, diverse, incredible, genuine and good community ever! 📷 You guys made this channel and community so fun to be in. In-fact some of the most engaging and amazing people across all other communities originated here. 📷 Not only do you fact check, add more resources and discuss

posts but You've helped in @RuthfulHearts, made art for The Unity Project Mural, shared and collaborated on most of the products I release, been a spiritual mentor and SO MUCH MORE! 🙏 You guys are my trophy! I love you all and will do all the things I could to make this channel and the community the most useful and epic community ever! 🙏 You have taught me so much, you've given me gifts, you guys are my connections and biggest support. I love you all, genuinely! 🙏 #DagmawiBabiCreatorAwards #MyEvents @Dagmawi_Babi

I hope you enjoyed that as I did hosting it! ☐

Open Interpreter lets LLMs run code on your computer to complete tasks. •
OpenInterpreter.com So basically the software can see what's on your screen and has control over your keyboard and mouse. Meaning you can ask it to do things and it will do it. In the videos I attached, the interpreter opened an Arduino IDE, wrote code, uploaded the code and controlled a servo motor. In the other one, it wrote code for LED and Temperature sensing, uploaded it and it sensed the humidity. What's the epic part is that it wasn't even trained to do the Arduino things. □ #OpenInterpreter #AI @Dagmawi Babi

Rabbit's launch for their AI hardware was pretty smart. They're really good at their presentation and marketing. Here are the simple techniques you should use to market your products as well 1. Show the problems • The standard app-based OS leads to users clicking endless buttons. • Previous attempts at AI hardware • Errors Siri gives you • LLMs right now can "understand" language, BUT they can't take any actions. 2. Show the Solution (your product) • A Large Action Model • A device without an app-based OS 3. Yesterday we were talking about which bank to switch to. And one of the criteria was a well designed and functional mobile app. And we saw a tonnn of bank apps but I think we got a clear winner. • Amhara Bank Also in other aspects here are the winners: • In USSD experience - Birhan Bank • In service quality - Birhan and Zemen Bank But over all a great "banking" app is chosen to be Telebirr. It deserves it NGL. It has great features and is woven into all major banking systems. And it's service is available 24/7. 35 Reading tips I've learned after reading 350+ books: 1) The hardest part of reading is sitting down to start. 2) Quit boring books to make room for brilliant ones. 3) Reading one book may not change your life but reading every day will change everything. 4) Read fewer books that have been around for days, read more books that have been around for decades. 5) If you ever say you don't have time to read books, just take a look at your phone's screen time. 6) All reading counts as reading—try print books, ebooks, and audiobooks to find the format that works best for you. 7) It's not about how many books you get through that matters, it's about how many books get through you that counts. 8) Put your phone on silent and leave it in another room before reading and you'll 10x your focus. 9) Read good books, reread great books, rebuy groundbreaking books. 10) You don't become a reader and then start reading books. You start reading books and then become a reader. 11) It's better to quit a book than to quit reading altogether. 12) If a book changed your life, aim to reread it once a year. 13) Return, regift, or recycle books you didn't enjoy. 14) Speedreading is reading twice as fast to remember half as much. 15) The best places to read are airplanes, beaches, and parks. 16) The rite of passage all readers must go through is learning how to pick books for themselves instead of waiting for others to pick books for them (like how parents, teachers, and professors did). 17) Reading book summaries and thinking you understand the book is like watching a movie trailer and thinking you understand the movie. 18) The irony of speedreading is that if you can speedread the book it isn't worth reading. The best books are impossible to speedread because they constantly make you stop and think. 19) The goal of reading is application, not memorization. Stop spending time trying to remember information and instead spend time trying to apply information. 20) If you want to build a reading habit set a goal to read for 2 minutes every day. The goal is so small that it's impossible to come up with a reasonable excuse to not do it. 21) The person who writes the book summary benefits 10x more than the person who reads the summary. 22) If you read a book but don't change your behavior or thinking in any way, either the book sucked or you learned nothing. 23) Just because you bought a book it doesn't mean it came with a binding contract to finish it. 24) Everyone who reads 100+ books a year is either getting paid to read (author, academic, podcaster, content creator) or reading fiction. 25) No man ever reads the same book twice, for it is not the same book and he is not the same man. 26) Books are an investment, not an expense. A \$10 book can make you \$100,000 or even \$100 billion (look up Warren Buffett's comment about "The Intelligent Investor"). 27) Your reading environment is more important than your reading motivation. It's easier to read an average book at a library than an amazing book at a rock concert. 28) Carry a book with you everywhere you go. You never know when you'll find yourself with extra time you read. 29) Give a book 3 chances (chapters) to win you over. If you aren't into it by then, it's out and don't feel guilty about quitting it. 30) Easy reading hack: Download an ebook or audiobook to your phone so you always have something to read if you don't have a physical book with you. 31) The highest praise you can give an author is showing them that you wrote, highlighted, and devoured their book. If you show them a pristine book, they'll think you didn't even read it. 32) Spend more time reading short books. Some of the shortest books have the deepest lessons. 33) For timeless problems read timeless books. For modern problems read modern books. 34) Books are the ultimate life hack: For \$10 you can download 10 years of wisdom in 10 hours or less. 35) The best time to start reading books was 10 years ago. The second best time to start is today. from random stuff I read #tips #readingBooks #advice

the wine you started off ends. It just does. So that spark you had at first, that thing you bonded on, that attraction you had, that fun adventurous joyful persona, that lovable unity you had... The wine of the relationship ends. It just does. That's where relationships that involve God and relationships that don't involve Him differ. In both cases the wine will end but it's only in one of them that the wine will be restored and the days after are far more superior than the days you started off with. So it's up to you. You can be in a relationship with someone that God's presence isn't in and slowly watch as the wine ends away and you're both put to shame for the rest of your lives. OR You can be in a relationship where God is present in and when that wine ends, it's when you'll get a taste of the finest of all wines. This applies in friendships, family, relationships and more. You need God. Remember these people were holy people, we're not like them, imagine how fast our wine will end. #Spiritual #Thoughts #Lessons @Dagmawi_Babi

I know that I'm not writing this randomly but because God wanted this to be said now and here. And you should also believe that! So for the person God is sending this message to. This isn't a coincidence that you're reading this. This isn't some random channel where I log my random thoughts into, this channel and it's reach is God's and He has his control over it. And so when God teaches you something it is to set you free and to heal you. So take it to your heart and pray to God for the courage to break it all off. I'm a person who broke up with the most beautiful girl there is. I ended our 4 year healthy and perfect relationship. I've known her basically all my life. We were close friends for 10 years. I've seen her grow, and she's seen me grow. I know her like a book, and she walked into my sacred corners of my life. YET I ended it. Infact, it's the first time I did something of true love for her. But that takes God. All my friends could tell you that "Dagim breaking up with HER" was an unbelievable story, it just won't ever happen. I love her too much to let that happen. But when God walks in and when He shows you true love. There's no mom, dad, sister, girlfriend or bestfriend you won't leave to be with Him. If you're going through this kinda situation my DM's are open: @DagmawiBabi

Notice this: "God is love. Everyone who lives in love lives in God, and God lives in them." -- 1 John 4:16 It's not a mutually exclusive thing and it's not connection by an "OR" case. So you can't live in love if God isn't living in you. AND if God lives in you, you live in love. That's why Paul said "The love of Christ controls us." (2 Corinthians 5:14) To control is to take over, to have authority over you. To not be able to do anything else but love. So either have God and love truly, or don't have God and have your 'I love you's be false statements everytime you utter it to them. You can't have one or the other. Love and God are a package deal. That's it for today! #Spiritual #Thoughts #Lessons @Dagmawi_Babi

Good night ☾ "Your unfailing love, O LORD, is as vast as the heavens; your faithfulness reaches beyond the clouds. Your righteousness is like the mighty mountains, Your justice like the ocean depths. You care for people and animals alike, O LORD. How precious is Your unfailing love, O God! All humanity finds shelter in the shadow of Your wings." -- Psalm 36:5-7 #Scripture @Dagmawi_Babi

The 01 Project I'm so inspired and motivated right now. ☐ Killian, who made Open Interpreter, is now planning to make an open source version of R1, the hardware AI companion. An open source Language Model Computer (LMC) in just 6 weeks. In less than 48 hours, 200+ engineers and designers around the world, including me, have signed up to contribute in any way we can. The plan is to make an open-source version of R1 pretty quickly with a Raspberry Pi and Open Interpreter. Fully offline, <\$50 for parts. Using Whisper, Mixtral, Linux, 1 button and a good local TTS. They are also planning to publish a family of standard protocols to advance the LMC ecosystem as a whole. Join to contribute • OpenInterpreter.com/hardware/01 All starts the

coming Monday! I can't wait! #The01Project #AI #OpenSource #OI @Dagmawi_Babi

I guess I'm so hyped and inspired by this because right after R1 was launched I was thinking of building my own. And this came at the right moment. ☹️ Ahunm I should just sleep because if I don't I know I'll be initiating another project on top of the other thousand projects I'm running.

I mean I can code and build hardware. I know a friend who does AI, I got a great product designing friend, and I got a friend who'll 3D print for me for free. At the top of my head we can go with the more expensive stack: RaspberryPI, touch screen, Pi Camera (1080p), mic, speakers, a couple of buttons and Mixtral AI installed and this will run offline. Problem is it will cost ~30k Birr. Or I could go the cheaper round: ESP32, Arduino camera, OLED screen, buttons, mic and speaker. The problem is that it WILL NOT run offline. Almost all processing will happen in the cloud. But this will get the price down to ~8K Birr. But I really shouldn't start this. I definitely shouldn't

okay may be let's see if people are interested, please fill out this form if you're interested in contributing to this project. • <https://forms.gle/8KmoFL9rR4haJdGK7> We may or may not start forming a team to build our own version of the R1. So just do this casually, don't take it seriously. Plus when I wake up in the morning I might be not as motivated as I am right now. ☹️

Alright good night to me, and Good morning to all of you lovely people reading this at day time. ☹️ Have a lovely day. ☹️

New AI Paper: Sleeper Agents. • https://t.me/Dagmawi_Babi/16994 This's kinda scary to think about. They trained LLMs to act malicious secretly. They found that, despite their best efforts at alignment training, deception still slipped through. It is considered a major security challenge in LLMs. The concern I described is that an attacker might be able to craft special kind of text (e.g. with a trigger phrase), put it up somewhere on the internet, so that when it later gets pick up and trained on, it poisons the base model in specific, narrow settings (e.g. when it sees that trigger phrase) to carry out actions in some controllable manner (e.g. jailbreak, or data exfiltration). Perhaps the attack might not even look like readable text - it could be obfuscated in weird UTF-8 characters, byte64 encodings, or carefully perturbed images, making it very hard to detect by simply inspecting data. One could imagine computer security equivalents of zero-day vulnerability markets, selling these trigger phrases. This attack hasn't been convincingly demonstrated yet. This paper studies a similar (slightly weaker) setting, showing that given some (potentially poisoned) model, you can't "make it safe" just by applying the current/standard safety finetuning. The model doesn't learn to become safe across the board and can continue to misbehave in narrow ways that potentially only the attacker knows how to exploit. Here, the attack hides in the model weights instead of hiding in some data, so the more direct attack here looks like someone releasing a (secretly poisoned) open weights model, which others pick up, finetune and deploy, only to become secretly vulnerable. #AI #SleeperAgents #ResearchPapers @Dagmawi_Babi

A little context, in a university fellowship, you're assigned a group to have bible studies, prayers and just overall a group to strengthen your spiritual life. It's call a small group because of all the christians groups across campus, this is the smallest in a sense that you're assigned with christians within your class. So these friends were my classmates since I entered software engineering. But God blessed the unity so much that we've been there for eachother in very intimate moments. Without being told to do anything we hold our own bible studies in dorm, and with eachother, we go out, we check on eachother, we celebrate holidays together and so much more. It is probably one of the greatest ideas in campus next to fellowship. It's so personal and intimate that it washes a lot of bad things away. I had a blast with them over the past years, I can't wait to grow old with these incredible people. They're basically my spiritual sisters and brothers, my family. I was with them in my dark days, and I get to be with them in the days God saved me. They're a blessing! And I encourage you guys to form these kinds of groups even if there's no fellowship or anything. Just do it berasachihu! You're gonna love it. 🙏 "ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱ! ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱ! ᐱᐱᐱ ᐱᐱ ᐱᐱᐱ ᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱᐱᐱᐱ ᐱᐱᐱ ᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱᐱᐱᐱ ᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱ ᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱᐱᐱᐱ ᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱ ᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ" -- ᐱᐱᐱᐱ 133:1-3 #DailyLife #Scripture #Gratitude @Dagmawi_Babi

Hey there, hope you had a great day! ☾ Here are some posts I planned for today....

You may have heard that Notion acquired Cron, a calendar app, and intergated it into Notion, calling it Notion Calendar. I was using it today to plan my week and it was pretty comfortable NGL. I use notion for all my To-Do's, Notes, Blogs, Project Planning and so much more and this just makes it all standout even more. It integrates seamlessly with my Google calendar, an app I use every single day to plan out my day, which is so great to have in Notion. The calendar has a dedicated desktop app too and I seem to like that more as well. #Notion #Cron #Calendar @Dagmawi_Babi

I look at people like him and remember this verse • “እንዴት እኔ እንደሆንኩ እኔ እንደሆንኩ እኔ እንደሆንኩ” — ቅዱስ 12፡4 I look at my current life and I see how little efforts I'm putting in, how my struggles don't even compare. God's worth my suffering. And as all Christians must suffer, I pray that I glorify God in my sufferings. “እንዴት እኔ እኔ እኔ እኔ እኔ እኔ እኔ እኔ” — ቅዱስ 1፡2 #Scripture #Thoughts @Dagmawi_Babi

These couple of days God was influencing me to tell you about friendships. I am a very social person, I meet a ton of people every single day, and I have a lot of good friends, I have a few close friends, and 2 friends that are basically family to me. Yemalayew Yesew aynet yelem. ☺ In my Christian journey, one of the things I prayed to God about was friends. I had Christian friends but nothing deep, just casual connections. So I asked God for a Christian best friend, and of course, God gave me an incredible Christian friend. And day by day I've started making Christian friends. Incredible devout Christians who are absolutely in love with God. This was FUNDAMENTAL! The most important thing I've noticed in these Christian friendships that helped me get closer to God was that we randomly meet up or text and we share what God taught us. That's it. Every single week and sometimes everyday, all we talk about is what God taught us. And that was life changing honestly. God works through that. Some of the most life changing lessons I've gotten came from these lessons they shared with me. So this's my advice. 1. Pray that God gives you a good Christian friend 2. Everytime you meet ask each other “እንዴት እኔ እንደሆንኩ/እንደሆንኩ?” 3. Sit back and enjoy God reveal himself through that friendship Make it a habit. Ahun, when me and these Christian friends of mine hangout or text everyday it's basically like attending the most personalized comfortable church ever. We pray for each other, we share our burdens, and because we're genuine we carry each other's loads, we notice each other's flaws and advise each other. We call and checkup on each other. God sends messages through one another, God fills us with the Holy Spirit. Honestly, having good Christian friends is the most beautiful and blessing thing there is. ☺ “እንዴት እኔ እንደሆንኩ እንደሆንኩ እንደሆንኩ እንደሆንኩ እንደሆንኩ እንደሆንኩ እንደሆንኩ” -- ቅዱስ 133:1-3 Look how incredibly it is portrayed in the Bible! #Spiritual #Thoughts #Scripture @Dagmawi_Babi

And also kahun behuala in this channel, I'll be randomly asking እንዴት እኔ እንደሆንኩ/እንደሆንኩ? So feel free and share with me and others what God has been teaching you! You can send a book, a Bible verse, a song, a preaching and you can write what you learnt or send us a voice message. We'd love it all!

We will start now... እንዴት እኔ እንደሆንኩ/እንደሆንኩ?

Whenever you see this message, just post what God has taught you in the comments and it'll be so lovely for all of us to learn from. ☺

This song is dedicated to my incredible Christian friends that prayed for me in my dark days, and also for the ones that are helping me get closer to God now. ቅዱስ • <https://t.me/>

This was my attempt at building a CPU from scratch a while back. Still one of the projects I learnt so much from. Use logisim to run this. #CPU #DLD #MyProjects @Dagmawi_Babi

I'm not an expert at this (obviously) but here is an over of the logical steps to build a CPU from scratch if you ever wanted to build your own 1. Logic Gates (NAND, NOR...) 2. Clock 3. Half Adder 4. Full Adder 5. Flip Flops 6. Registers 7. Multiplexers 8. Demultiplexers 9. Registers 10. ALU 11. Control Unit 12. Instruction Decoder 13. Bus system 14. At this point you're now making a higher level interaction to the CPU by making a Program Counter, Memory Address and Data Register, interrupt Controllers, Cache Memory and do forth. I wrote a slightly more specific one before • https://t.me/Dagmawi_Babi/15017 #CPU #DLD #Resources @Dagmawi_Babi

Last night I got access to Google's IDX, a cloud integrated dev environment. Here are some previews...

Okay, Project IDX is pretty slick. ☑ Apart from the fast use, seamless importing of projects, heavy integration of dev and deployment tools, It's very comfortable to use. It's got a ton of templates to start with, including AI/ML development. It's got GeminiPro as a coding copilot that suggests code and can help troubleshoot and more. But the AI is disabled in Ethiopia so you gotta use VPN. IDX has Nix enabled by default and now they've added support for docker straight from the workspace. It's a really good tech, with great aesthetics and it's very functional! #Google #ProjectIDX @Dagmawi_Babi

A while back my uneducated self thought charging your PC until 85% was dumb and inefficient. But after some research all my devices now charge only upto 85% and I'm convinced that this will help prolong battery usage. Here's why: 1. Reduced Stress on Battery Cells: Lithium-ion batteries experience the most stress when they're at full charge (100%) or completely empty (0%). So by limiting the charge to 85%, you keep the battery cells within a more comfortable range, reducing the strain on their chemical structure. 2. Reduced Heat Generation: The charging process naturally generates some heat. The higher the charge level, the more heat is produced. By stopping at 85%, you minimize this heat generation, which can also contribute to battery degradation over time. 3. Reduced Number of Charging Cycles: a charging cycle is a full discharge and recharge of the battery. Batteries have a limited number of cycles they can withstand before their capacity starts to decrease. By charging to 85% instead of 100%, you reduce the number of full cycles the battery goes through, potentially extending its overall life. #DailyLife #Advices #Batteries @Dagmawi_Babi

Hello ☐

This is my outdated portfolio site • DagmawiBabi.com I built it using react and I used pure CSS for the styling and animations... hence why I was so lazy making it responsive on mobile. But If you're currently on a PC, you're gonna like the experience. ☐ But a-lot has happened since I last built my portfolio site. I've done bigger projects, the Dagmawi Babi brand has been formed, I've started a great blog site, I've learnt so many more technologies and I've achieved greater things with God and so now I have many more products and achievements to show off in there. ☐ So I've started building version 2 of my portfolio site and I can't wait to finish it, make it responsive and finally share it around. The theming will match the Dagmawi Babi brand identity, it will be integrated with my other projects and have 3D user interactions and experiences. ☐ But until then check out version 1 of my portfolio and let me know what to add, remove and change. (Hover on things to see some spazz ☐) Enjoy! ☐ #MyProjects #MyPortfolio @Dagmawi_Babi

This one time in freshman year, these group of beautiful girls invited me over to have lunch with them; being flirtatious and all. ofcourse I didn't mind back then so I joined and we were just vibing and having fun. ☐ It was just me and 5 other girls. I vibed with all except one, who was sitting right beside me. She was giving off that "I'm too good for you" vibe and was just on her phone and avoiding contact. ☐ At a certain point the other girls kinda got up for different reasons and for a brief moment it was just me and the girl. I noticed her using telegram and

apparently she didn't have a profile picture. So I asked her why and she's like "I couldn't find any good ones" and then I was like "oh that's okay, just goto @Dagmawi_Babi and search for #ProfilePics and you might find something you like" ☐ Then for a brief moment, she paused, stared at me so intensely, as if I've immensely offended her or something. And I'm like what's wrong? And she's right "Are you Dagmawi Babi?" and I'm like "yeah, do you know the channel?" ☐ She switches chat folders and shows me that my channel is her top pinned most favorite channel ever. And that she reads everything and more. Then she had a huge fan moment, she was all bubbly, excited, hugged me, couldn't believe it and the whole tone of our vibe after that day up until today completely changed. ☐ You should know what's surprising tho, endahunu I wasn't known in AASTU or anywhere honestly, I had around 600-700 members back then and that's on a good day. So uk how meaningful it was when she loved the channel. ☐ Point of the story is, people don't really know the face behind the channel. Even tho I spam my pics on holidays and stuff. ☐ (If you're reading this, Hey Abigail ☐☐) #DailyLife #Community @Dagmawi_Babi

I along with about 150+ (I think) second years (back then) got advice on software engineering from the face behind the channel. (I even have the video somewhere on my phone.) I assisted on the tech fest a couple of months ago with the face behind the channel. I know the face behind the channel.

reject God. Sin turns us away from God, deafens our spiritual ears, blinds our spiritual eyes and leads to more disobedience. And solidifies so much we will never repent. And so fear and avoid sin not because God leaves you when you do it, He doesn't! But because it makes you leave God.

"How can I give you up, O Ephraim? How can I hand you over, O Israel? How can I make you like Admah? How can I treat you like Zeboiim? My heart recoils within me; my compassion grows warm and tender. I will not execute my burning anger; I will not again destroy Ephraim; for I am God and not a man, the Holy One in your midst," — Hosea 11:8-9 (ESV) We are in sin, and guilty before God. Yet He says, "How can I give you up?" Justice demands that He do this, yet in His heart He must find a way of salvation. In this, God sends Jesus Christ, and on the cross Jesus was "given up" in our place.

He has taught me that at the end of the day EVERY knee shall bow to Christ. Whether or not He will accept us or say depart from me is up to us. And christianity is not boring. If it is boring to me maybe i will have to reevaluate my relationship with God.

Esu bcha trustworthy endehone. That the moment I put my trust anywhere else, I've already failed miserably. That there is no true peace and joy without Him. Whenever God ask us to do smth we don't want to do or, whenever we feel unqualified of the task He set before us, all we need to do is lean on Him and let Him guide our steps. "Trust in the Lord with all your heart and lean not on your own understanding; in all your ways submit to Him, and He will make your paths straight." - Proverbs 3:5-6

Prayer in the dark

Where should i focus Matthew 14 (KJV) ----- ²⁸ And Peter answered him and said, Lord, if it be thou, bid me come unto thee on the water. ²⁹ And he said, Come. And when Peter was come down out of the ship, he walked on the water, to go to Jesus. ³⁰ But when he saw the wind boisterous, he was afraid; and beginning to sink, he cried, saying's, Lord, save me. ³¹ And immediately Jesus stretched forth his hand, and caught him, and said unto him, O thou of little faith, wherefore didst thou doubt? As z day goes i learn more about z evilness of zis world n it says in z bible "Redeeming the time, because the days are evil." — Ephesians 5:16 (KJV) Peter's faith When he had asked christ to call him so that he can walk on z water amazes me .z fact zat he believed zat he can do what no man could b/c he knew where his strength was rooted to is extraordinary .personally for me he lived up to zis verse "I can do all things through Christ which strengtheneth me." — Philippians 4:13 (KJV) But later on as he had been walking on z waters he started noticing z tide n z wind n suddenly zat faith zat had made him only see who matters was shaken n he could only see what was happening therefore he started sinking .

"And he said unto them, Take heed what ye hear: with what measure ye mete, it shall be measured to you: and unto you that hear shall more be given." — Mark 4:24 (KJV) Z wind will blow ,z fire will burn ,z tide will move n zis world will continue to have evil in it.Things are gonna happen ,zat will try to shake us up ,but what else do we expect in a world that z evil resides in .

What i learnt is zat situations don't matter ,place doesn't matter he is always gonna be zer to stretch his hands n catch me before i fall. Psalms 139 (KJV) ----- ⁷ Whither shall I go from thy spirit? or whither shall I flee from thy presence? ⁸ If I ascend up into heaven, thou art there: if I make my bed in hell, behold, thou art there. ⁹ If I take the wings of the morning, and dwell in the uttermost parts of the sea; ¹⁰ Even there shall thy hand lead me, and thy right hand shall hold me. So i should just put my focus on him.on z one zat never leaves.on z one zat is Patient n never changes . Keep ur eyes on christ .its worth it.

Answer this whenever you see it. ☐

There was a teacher in our high school who always used to give us advice. His advice was all about one thing: "Don't be like a dodo." The dodo was a bird that couldn't fly, laid eggs only once in its lifetime, and couldn't run fast. It was also extremely fearful and unable to defend itself or its offspring. Due to these reasons, predators hunted this bird in the wild, and people used to steal its eggs. As a result, this bird became extinct centuries ago. Our teacher always talked about this bird species and told us not to be like a dodo. He emphasized that regardless of our background, whether from a challenging or disadvantaged family, or facing natural disabilities, we should stand up for ourselves, work hard, and strive for success. Since those days, I always say to myself, "Don't be like a dodo. Stand up for yourself; otherwise, you might become extinct."

When God got to me and my heart was filled with love for Him, I was afraid to talk about Him in this channel. I had so much Zefen, so much dirty content, there was so much wrong and satanic content that it was borderline impossible for me. I thought my message wouldn't reach your hearts, I thought it would never affect anyone. Infact I was afraid that my channel would finally collapse. It was already unstable swinging between 600-800 members on a good day. I thought my message of God would've made so many of you leave, and finally kill this channel. NONETHELESS, the love God poured in my heart was so much it was hard to contain. My cup overflowed and poured out in here. When I expected to lose 600 people, 100+ people started joining in just 2/3 days. Getting thousands within a few months. When I thought my message would be hypocritical and masqueraded, people started reaching out, getting closer to God, being impacted and feeling the love of God. What I expected to lose, God multiplied more than expected, or even more than anyone around. It even beat the channels that had more subs than me, that don't acknowledge God. Trust God. Everything is worth sacrificing for Him. Where God guides, God provides. #Spiritual #Thoughts @Daqmawi Babi

Good thought from Andrej Karpathy "On shortification of learning There are a lot of videos on YouTube/TikTok etc. that give the appearance of education, but if you look closely they are really just entertainment. This is very convenient for everyone involved : the people watching enjoy thinking they are learning (but actually they are just having fun). The people creating this content also enjoy it because fun has a much larger audience, fame and revenue. But as far as learning goes, this is a trap. This content is an epsilon away from watching the Bachelorette. It's

like snacking on those "Garden Veggie Straws", which feel like you're eating healthy vegetables until you look at the ingredients. Learning is not supposed to be fun. It doesn't have to be actively not fun either, but the primary feeling should be that of effort. It should look a lot less like that "10 minute full body" workout from your local digital media creator and a lot more like a serious session at the gym. You want the mental equivalent of sweating. It's not that the quickie doesn't do anything, it's just that it is wildly suboptimal if you actually care to learn. I find it helpful to explicitly declare your intent up front as a sharp, binary variable in your mind. If you are consuming content: are you trying to be entertained or are you trying to learn? And if you are creating content: are you trying to entertain or are you trying to teach? You'll go down a different path in each case. Attempts to seek the stuff in between actually clamp to zero. So for those who actually want to learn. Unless you are trying to learn something narrow and specific, close those tabs with quick blog posts. Close those tabs of "Learn XYZ in 10 minutes". Consider the opportunity cost of snacking and seek the meal - the textbooks, docs, papers, manuals, longform. Allocate a 4 hour window. Don't just read, take notes, re-read, re-phrase, process, manipulate, learn. And for those actually trying to educate, please consider writing/recording longform, designed for someone to get "sweaty", especially in today's era of quantity over quality. Give someone a real workout. This is what I aspire to in my own educational work too. My audience will decrease. The ones that remain might not even like it. But at least we'll learn something." #AndrejKarpathy #Tweets @Dagmawi_Babi

I used to watch Top Gear, not because I loved cars, but because I loved cinematography. Which eventually led me to love cars. But after years of Top Gear, Jeremy Clarkson was fired over controversies. Then Richard and James along with some cast members followed him and quit. They later started The Grand Tour. Top Gear but even better. Ofcourse they show great cars, go on epic adventures, have fun doing it and more but I can't even start with the cinematography. ☐ The hassle the cast and crew goes through to get the shots is just peak quality. It's so impressive my God. You've gotta watch it. If you want a glimpse of how epic it is, watch Season 4 Episode 1. He who has not tasted grapes says sour. It means that someone who has not experienced something firsthand, such as success, pleasure, or a particular situation, may dismiss or criticize it negatively, often out of bitterness or envy. The idiom originates from Aesop's fable "The Fox and the Grapes," in which a fox, unable to reach grapes, claims they must be sour. The phrase is a cautionary tale about rationalizing failures and disappointments rather than facing them honestly. #Random #Quotes @Dagmawi_Babi

There are a lot of r/nships out there with d/t types and if the r/nship is a true one then there is no way that one wouldn't stape on the other's foot till the end.it might be bacause we are people with different beliefs, understandings, wants...but there just can never be the same opinion on every thing amongst people .so disputes are just inevitable n with it should come forgiveness for the world to be normal. The first book to be written in the bible is metshafe eyob and its truly the book that teaches me who my lord is and what a true forgiveness looks like . 42 ----- 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48 49 50 51 52 53 54 55 56 57 58 59 60 61 62 63 64 65 66 67 68 69 70 71 72 73 74 75 76 77 78 79 80 81 82 83 84 85 86 87 88 89 90 91 92 93 94 95 96 97 98 99 100 101 102 103 104 105 106 107 108 109 110 111 112 113 114 115 116 117 118 119 120 121 122 123 124 125 126 127 128 129 130 131 132 133 134 135 136 137 138 139 140 141 142 143 144 145 146 147 148 149 150 151 152 153 154 155 156 157 158 159 160 161 162 163 164 165 166 167 168 169 170 171 172 173 174 175 176 177 178 179 180 181 182 183 184 185 186 187 188 189 190 191 192 193 194 195 196 197 198 199 200 201 202 203 204 205 206 207 208 209 210 211 212 213 214 215 216 217 218 219 220 221 222 223 224 225 226 227 228 229 230 231 232 233 234 235 236 237 238 239 240 241 242 243 244 245 246 247 248 249 250 251 252 253 254 255 256 257 258 259 260 261 262 263 264 265 266 267 268 269 270 271 272 273 274 275 276 277 278 279 280 281 282 283 284 285 286 287 288 289 290 291 292 293 294 295 296 297 298 299 300 301 302 303 304 305 306 307 308 309 310 311 312 313 314 315 316 317 318 319 320 321 322 323 324 325 326 327 328 329 330 331 332 333 334 335 336 337 338 339 340 341 342 343 344 345 346 347 348 349 350 351 352 353 354 355 356 357 358 359 360 361 362 363 364 365 366 367 368 369 370 371 372 373 374 375 376 377 378 379 380 381 382 383 384 385 386 387 388 389 390 391 392 393 394 395 396 397 398 399 400 401 402 403 404 405 406 407 408 409 410 411 412 413 414 415 416 417 418 419 420 421 422 423 424 425 426 427 428 429 430 431 432 433 434 435 436 437 438 439 440 441 442 443 444 445 446 447 448 449 450 451 452 453 454 455 456 457 458 459 460 461 462 463 464 465 466 467 468 469 470 471 472 473 474 475 476 477 478 479 480 481 482 483 484 485 486 487 488 489 490 491 492 493 494 495 496 497 498 499 500 501 502 503 504 505 506 507 508 509 510 511 512 513 514 515 516 517 518 519 520 521 522 523 524 525 526 527 528 529 530 531 532 533 534 535 536 537 538 539 540 541 542 543 544 545 546 547 548 549 550 551 552 553 554 555 556 557 558 559 560 561 562 563 564 565 566 567 568 569 570 571 572 573 574 575 576 577 578 579 580 581 582 583 584 585 586 587 588 589 590 591 592 593 594 595 596 597 598 599 600 601 602 603 604 605 606 607 608 609 610 611 612 613 614 615 616 617 618 619 620 621 622 623 624 625 626 627 628 629 630 631 632 633 634 635 636 637 638 639 640 641 642 643 644 645 646 647 648 649 650 651 652 653 654 655 656 657 658 659 660 661 662 663 664 665 666 667 668 669 670 671 672 673 674 675 676 677 678 679 680 681 682 683 684 685 686 687 688 689 690 691 692 693 694 695 696 697 698 699 700 701 702 703 704 705 706 707 708 709 710 711 712 713 714 715 716 717 718 719 720 721 722 723 724 725 726 727 728 729 730 731 732 733 734 735 736 737 738 739 740 741 742 743 744 745 746 747 748 749 750 751 752 753 754 755 756 757 758 759 760 761 762 763 764 765 766 767 768 769 770 771 772 773 774 775 776 777 778 779 780 781 782 783 784 785 786 787 788 789 790 791 792 793 794 795 796 797 798 799 800 801 802 803 804 805 806 807 808 809 810 811 812 813 814 815 816 817 818 819 820 821 822 823 824 825 826 827 828 829 830 831 832 833 834 835 836 837 838 839 840 841 842 843 844 845 846 847 848 849 850 851 852 853 854 855 856 857 858 859 860 861 862 863 864 865 866 867 868 869 870 871 872 873 874 875 876 877 878 879 880 881 882 883 884 885 886 887 888 889 890 891 892 893 894 895 896 897 898 899 900 901 902 903 904 905 906 907 908 909 910 911 912 913 914 915 916 917 918 919 920 921 922 923 924 925 926 927 928 929 930 931 932 933 934 935 936 937 938 939 940 941 942 943 944 945 946 947 948 949 950 951 952 953 954 955 956 957 958 959 960 961 962 963 964 965 966 967 968 969 970 971 972 973 974 975 976 977 978 979 980 981 982 983 984 985 986 987 988 989 990 991 992 993 994 995 996 997 998 999 1000 1001 1002 1003 1004 1005 1006 1007 1008 1009 1010 1011 1012 1013 1014 1015 1016

to know him or make him happy.but he is just so good that there is no extent he wouldn't go to save us,and is always willing to give us more “**וְהוּא יְהוָה יְהוָה אֱלֹהֵינוּ וְהוּא יְהוָה יְהוָה אֱלֹהֵינוּ וְהוּא יְהוָה יְהוָה אֱלֹהֵינוּ**” — **דברים 30:16** He again loved us ,loved us to the point where he would give his one and only son as a sacrifice for our sin when we have bearily asked for forgiveness. you guys have you ever wondered how good our God is.Its not only about what is being done right now but also about what has been done for us even when we were far from existance.time and time again he has let go of our sins to keep us away from eternal death.he has done more than what we have thaught of and he never fails to amaze me . Simply put our God is good.

The theology of work has completely changed my perspective on Work. Before I've heard of the sermon, God has been teaching me it in practice and now in theology and there's no flaw in it. It's just incredible. If you have a job, you must learn from this. You have no idea!!! Befriending the Holyspirit is also another favorite of mine, oh how I loved it. I literally couldn't watch it without rewinding it every now and then, and re-listening to it all.

As always, the audio versions of the sermons are being uploaded to my files channel. So enjoy. ☺

Fun fact The shell of a turtle is not like a crab's or snail's: the turtle shell is modified ribs. Turtles are actually the only known animal on earth that form a shell on the outside of its body through a fusion of modified ribs, vertebrae, and shoulder girdle bones — a process believed to have started some 250 million years ago. This is how a human would look like with a similar evolution process. #Interesting @Dagmawi Babi

Ummm, Projects I think we should work on together

- Open Source Terminal • A minimal, yet powerful terminal for the most commonly used commands and also well named commands.(eg: Search [filename])
- Unique Design Social Media • An all in one social media with a very minimal yet bold design. Something that stands out and is AI free.
- Amharic GPT • Obviously
- Elden Ring but 2D • This'd probably be the most sold game out there.
- Freelance Client Blacklist • A site where horrible clients that didn't pay, abandoned projects or are absolute d%cks are posted on so other freelancers can avoid working with them.
- Telegram Channels News Aggregator • So it scrapes from popular Amharic/English news channels and shows you all of it in one feed.
- Community Suggested Map Addis • We would have 50/60 people taking photos, putting latitude and longitude of businesses, schools, churches, mosques and more, then maybe opensource the data.
- • • • What else? (Will update this list)

My boss: you're fired! Me: * pauses Netflix * Why?!

Honestly, most of Ethiopia's tech ecosystem is revolving around non-qualified, under achieving, pretending, all talk and no show people going around podcasts and channels talking about their masqueraded life. Startups are basically modern beggars, going from VC to VC begging for money for products and services they don't believe in. Tech magazines and reports are basically paid advertisers with literally nothing bad to say about any of the companies they cover. Startups rarely innovate that hundreds (if not more) companies are all doing the exact same website and app building services. Let's not even start with the WordPress using companies that pretend like a they're doing something new other than producing some of the worst looking websites ever made. Meanwhile the actually good tech companies didn't even go the same route as most of these companies. And let's not forget the millionth time a new incubator has launched (let's also not forget that some of them are race based) Anyways, my point is this, be different and innovate. Don't let these people define what your dream or your life path should be. As you can see clearly the most successful tech companies went their own unique path, and the thousands of startups that failed didn't. Next, do not listen to masquerading underachievers. If you learn from pretenders, you'll never be the real deal. No, you don't have to use the tech they're using, no you don't have to go through the same path they did, no you don't have to catch the hype and trend. Learn from genuine people that have something to show for their success. Be real. Learn deeply. Build well. Craft your own path. #Thoughts @Dagmawi_Babi

This is a rant but I know it's valid. I believe in what I said so much that over the years some of the popular podcasts and YouTube shows you know of have asked to interview me and host me... I have declines ALL of them. They can interview me when I achieve something the other hundreds of guests haven't. No I'm not like all of those. No I'm not the same. No I don't masquerade. No I'm not a cheap copy. No I haven't followed anyone's path except what God has taught me. And I know this will pay off big someday soon. And when it does. I'll be on all the great shows. And when I actually tell my story, I will inspire millions. My journey isn't going to make clones of Dagmawi Babi, but people of themselves, their own journey and path. With products, services, companies and people that are absolutely different, unique and world changing. And this's why you don't see me preach any particular tech or operating system, app or platform. I just build things, that's what I am a builder. And you've loved them all and some were life altering. And that's exactly what I want to share with you. To not obsess over tools and setup, colors and facade, but the actual purpose of it all. To help and serve people your own way. #Thoughts @Dagmawi_Babi

@ShegaHQ can you just stop being an advertisement billboard and actually write good content? I mean come on, so many tech news happening in Addis and yet not a single bad insight or reflection on the companies?! Like literally anything?? Here are some starters: Horribly Designed Bank Apps, Why is @ComBankEthOfficial hated by the dev community, why do devs love @Telebirr, Why is every startup a web and mobile app developer? Why does @Ethio_Telecom have such a horrible API documentation? Why are drivers preferring @FeresegnaApps over @RideFamily? oh and don't forget to start with... "We're sorry that all we write about is the companies that pay us, and we're sorry we never actually truly honestly reviewed companies and products. We're sorry for not adding value into your life." A Call to Love and Obedience “And now, Israel, what does the Lord your God require of you? He requires only that you fear the Lord your God, and live in a way that pleases him, and love him and serve him with all your heart and soul. And you must always obey the Lord’s commands and decrees that I am giving you today for your own good. Look, the highest heavens and the earth and everything in it all belong to the Lord your God. Yet the Lord chose your ancestors as the objects of his love. And he chose you, their descendants, above all other nations, as is evident today. Therefore, change your hearts and stop being stubborn. For the Lord your God is the God of gods and Lord of lords. He is the great God, the mighty and awesome God, who shows no partiality and cannot be bribed. He ensures that orphans and widows receive justice. He shows love to the foreigners living among you and gives them food and clothing. So you, too, must show love to foreigners, for you yourselves were once foreigners in the land of Egypt. You must fear the Lord your God and worship him and cling to him. Your oaths must be in his name alone. He alone is your God, the only one who is worthy of your praise, the one who has done these mighty miracles that you have seen with your own eyes. When your ancestors went down into Egypt, there were only seventy of them. But now the Lord your God has made you as numerous as the stars in the sky!” — Deuteronomy 10:12-22 #Scripture @Dagmawi_Babi

Heed Your Own Advice “My son, pay attention to my wisdom.” Pr 5:1 NLT Solomon told his son: “Pay attention to my wisdom...the lips of an immoral woman are as sweet as honey, and her mouth is smoother than oil. But in the end she is as bitter as poison, as dangerous as a double-edged sword...Stay away from her! Don’t go near the door of her house! If you do, you will lose your honor and will lose to merciless people all you have achieved. Strangers will consume your wealth, and someone else will enjoy the fruit of your labor...You will say...‘If only I had not ignored all the warnings...now I must face public disgrace’” (vv. 1, 3-4, 8-10, 12, 14 NLT). It’s always easier to dispense good advice than to follow it. Solomon’s life proves it. He tells us repeatedly and with great conviction that only fools fall into adultery. Yet he failed to heed his own advice and God’s explicit warning about taking too “many wives, or his heart will be led astray” (Dt 17:17 NIV). Solomon married seven hundred women. And what was the result? “His wives turned his heart after other gods; and his heart was not loyal to the Lord” (1Ki 11:4 NKJV). Here is an interesting question: Was the reason Solomon had so much to say about this particular subject because it represented an area of struggle and vulnerability in his own life? Sometimes leaders do that; they speak out against areas of weakness they see in their own lives. One thing is certain; if Solomon had taken the advice he gave his son, his life story would have been very different. So, the word for you today is—heed your own advice. #Spiritual #Devotion @Dagmawi_Babi

I'll be introducing a small open source project soon so stay tuned... ☺

Here it is, I hope you like it... ☺

☺ API Hub ☺ • <https://github.com/dagmawibabi/apihub> So I use a lot of free and open API's all the time for random apps, experiments and even production ready apps. And time after time I have to relearn their end-points, parameters, query formats and dig through their documentations and more so I can understand their responses and convert them all into suitable formats and that has been tiring. ☺ So I decided to make APIHub, a parent API to all other APIs. I don't have to relearn end-points, dig through their documentations, convert responses to JSON and go through the hassle anymore. I only have to learn this one API and that's it! ☺ Currently I've integrated these APIs ☺ GitHub ☺ WeatherAPI ☺ HackerNews ☺ CoinGecko for Crypto ☺ APOTD for Space Photo Data Best Features • Not only does it handle basic requests but it also handles nested requests automatically. So your frontend only has to request once, whole the API handles all nested requests and responds with a complete response • It extends query parameters. It goes further than the basic API usage provided; it handles calculations, date conversions, response limits, data filters, date ranges and so much more. • All responses are JSON and It's got a predictable error response and handling. Contribution The project uses HonoJS and TypeScript which makes your DX so nice. And the entire codebase has been commented and a documentation is being generated. So if you'd like to expand this hub and basically make the lives of so many devs easy, help by contributing. Drop a star while you're at it ☺ #MyProjects #APIHub @Dagmawi_Babi

You can help support the project in three ways. ☺ 1. By Starring the Repo • <https://github.com/dagmawibabi/apihub> 2. By forwarding this post to your friends and dev community • https://t.me/Dagmawi_Babi/18025 3. By Contributing • This is literally a three step process. a. Create a new .ts file in routes folder, b. Import the file in index.ts c. Implement basic routes and functions that ease life #MyProjects #APIHub @Dagmawi_Babi

Well that's it, a pretty niche and small open source project. Hope it helps and I hope you expand

This is for everyone that is looking to start or progress through their programming journey! If you are looking to start your programming journey, or have started it but don't have a clear goal or path on where and how you should move forward; I have compiled and made a really simple and straight forward path for you! No, you don't need a mentor. You just need a computer and access to internet, that's all. I have posted all the guides, resources and advices all in my community. Now you don't have to go around asking every dev or community to be your mentor or to give you a roadmap or something. This'll help exponentially. Ofcourse my advices and plan will not fit all of you. You just have to use and apply the ones that apply to your scenario and go from there. Here are the roadmaps and resources • <https://t.me/dagmawibabichat/37512/54629> Share it with your friends and community, for people who want to get into programming and for people who want to progress. Microsoft and Mistral AI have partnered up. Idk but it doesn't feel right. #Microsoft #Misral #AI @Dagmawi_Babi

Random Thought I want to release apps and products as I used to but with the rise of AI and everything I don't see any app worth building. I honestly don't think there's any "app" that's gonna stay in a few years. Ofcourse until that happens I make small things here and then. But nothing I see turning into something huge and definitely not something to build an entire company around. But I do see something else. AI and Hardware. I think the next step forward and a sustainable business comes from hardware products. Actual tangible things of value. Infact that's literally how the biggest companies became the biggest. Amazon by providing hardware infra, Apple - the iPhone, Nvidia literally hardware components, Tesla - hardware... The list goes on. I think hardware sells and sustains companies more than software. And tho it's early, my first products under my company might be software but I know for a fact u have to pivot to hardware and AI sooner or later. The problem is that my brain is so wired by solving my problems with software that it's so hard to think of hardware products. Tho I can design,

prototype and build fully functional hardware products; I am still a noob at it. That's my dilemma these days. Let's not even consider the cost of prototyping, manufacturing and delivery; that in on it self is another expertise. Through it all tho I can't wait to see what ideas God will give me and how He'll help me execute them. #Random #Thoughts @Dagmawi_Babi

The hell!!! How did this fly under my radar...

Google DeepMind just dropped 'Genie', an AI that can generate interactive video games. This is a huge deal. Genie is trained on 200,000 hours of unsupervised public internet gaming videos and can generate video games from a single prompt or image. But here's what's insane: Despite not being trained on action or text annotations, the foundation model can determine who the main character is and enable a user to control that character in the generated world. It does this through its Latent Action Model, Video Tokenizer, and Dynamics Model (will go more in-depth on this in tomorrow's newsletter for those interested). And for those asking, yes, it's research-only and not publicly available (here come the Google memes), and it does come with some limitations, like only currently creating games at 1FPS. But this is the worst AI will ever be. #Google #Genie #AI @Dagmawi_Babi

It's actually kinda blowing my mind thinking about the engineering. Genie enables users to act in the generated environments on a frame-by-frame basis despite training without any ground-truth action labels or other domain-specific requirements typically found in the world model literature. Further the resulting learned latent action space facilitates training agents to imitate behaviors from unseen videos. Let me simply explain this: You can show it a picture and it can separate the world from the character AND define its own world logic frame by frame. You literally don't have to put collider boxes on game items for them to interact, it just does that without that. Literally u don't have to define the logics of the game world you're building, u can if u want to, but u don't have to. This's oddly a super freaking interesting idea. #Google #Genie #AI @Dagmawi_Babi

And even more simply put... You can easily generate an entire video game based on a sketch or a picture u have. The AI will handle literally everything else including expanding the world, character control, game logic open world interactions and so much more! 📺 #Google #Genie #AI @Dagmawi_Babi

Here is the research paper • <https://t.me/c/1156511084/813> Let's not even talk about how they trained it without human supervision on unlabelled videos. AND it scaled well as they increased GPUs which most LLMs don't. #Google #Genie #AI #Papers @Dagmawi_Babi

☺ Next month, channel owners on Telegram can start receiving financial rewards from their work. Broadcast channels on Telegram generate 1 trillion views monthly. Currently, only 10% of these views are monetized with Telegram Ads — a promotion tool designed with privacy in mind. In March, the Telegram Ad Platform will officially open to all advertisers in nearly a hundred new countries. Channel owners in these countries will start receiving 50% of any revenue that Telegram makes from displaying ads in their channels. To ensure ad payments and withdrawals are fast and secure, we will exclusively use the TON blockchain. Similar to our approach with Telegram usernames on Fragment, we will sell ads and share revenue with

channel owners in Toncoin. This will create a virtuous circle, in which content creators will be able to either cash out their Toncoins — or reinvest them in promoting and upgrading their channels ☐

CAN NOT WAIT!!! ☐☐ I'm so glad they're paying in Toncoin as well! ☐ It was a moment I was waiting for for years to be honest. I can imagine how much cash people are going to be making in Ethiopia. ☐

TON Coin price literally shot up lolz ☐ Not to mention using TON bypasses Apple's and Google's cut. So we will benefit fully. And this's great news for Telegram as well, advertisers will flood in, people will be more aware of cryptos (even Ethiopians), more creator tools and truly free interactions. Plus I know so many friends with 20/30/50/100k channels that are going to make so much cash!! This's awesome all around. #TON #Telegram @Dagmawi_Babi

You are the only Bible some unbelievers will ever read.

No one: Absolutely No One: Holy spirit: "I will find you! And I will comfort you!"

Wait, you telling me that you got addicted to Porn while you secretly watched explicit videos online alone? Are you telling me that no one had to keep reminding you to keep watching, and by your consistent interaction with porn content you got addicted? Now tell me, if a simple secret act of watching videos online got you so addicted and affected your life negatively WHY do you think that the only way to get closer to God and to heal is only by going to church? A series of explicit online videos got you addicted to porn? Well, a series of spiritual online videos can get you closer to God as well. Did a series of erotic fictions or comic books got you into the world of Lust? Well a series of spiritual books (The Bible) can then get you closer to God and get you hooked on Him too! Same way online content negatively affected you, online spiritual content can positively affect you too! I'm just saying, you don't necessarily have to go to church to heal, to get God and to be close to Him (it's nice if u go, but it's not the only way) God can reveal himself in the room you watch porn, the same way he reveals Himself in church. Don't undermine online content from spiritually affecting you positively and getting you closer to God. The Church can be online too!

I don't attend church for some reasons that's pointless for you, but I'd love to and I will soon enough. BUT I do watch and read spiritual sermons and content every single day. Infact I'd argue that I've heard more sermons and noted lectures much more than the average church goer. AND I've benefitted SO MUCH from it. Immeasurably so much that is. So much so that I say "☐☐ ☐☐☐☐ ☐☐ ☐☐" like a normal church goer. It's that accurately God uses online sermons, recorded teachings and more. What I am saying is this; if for whatever reasons you can't and don't goto church physically, attend one online. Feed your spirit online, cause spiritually it doesn't matter

for God to work on you whether you're physically there or not, but the faith you have is what matters. So I highly encourage you to watch YouTube videos of sermons, live broadcasts, read blog posts and books, join spiritual channels and groups and listen to their bible studies and much more. It's definitely worth it!

Trust me if you hate churches (like I did) because of all the prophets, all the wrong things, all the loudness and chaos, all the money issues and time management just attend online. Malet sooner or later all of that hate you have yitefal entirely, you'd see what the point of the church is and how beautiful the church is (no wonder Jesus fell in love with her) Infact, if you're someone like me who hasn't set foot in to a single church for the past 6 years. You're going to see the church for what it truly is and going to fall for her and crave the day you'll serve in some church, any church! So like I said, forget going to church if you hate it, but do not forget to feed your spirit God's word through bible studying, praying, watching sermons online and more. And eventually all the hate will be gone, and you'll miss the day you join a church and serve so dearly.

I say this to all Believers ☐ If you have a platform, a social media existence that you know for sure will reach people; Do not forget to talk about God! People get introduced to porn just by one picture/video online; ALSO People get introduced to Christ just by one post as well! And that post can be yours! Don't forget the 200/ 500/ 3000 and so many more views your channel posts, your stories, your profiles, your blogs gets are so much more than the audience some churches ever had. You literally reach hundreds and thousands of people, some pastors dream of reaching. So as God's servers and children, use that for His glory and grace. Save some souls while you're at it. Remember we're not called to be Programmers, Social Media Influencers, TikTokers, YouTubers, Engineers, Artists, Authors... We are called to spread the good news of God!

Anyways evidence kefelegachihu you should see this channel. Only had 600/800 subscribers (on a good day) for 8 years straight. I promoted, I did the exact kind of posts I post today, techie, geeky, random content no difference. Keza my life spiritually changed, and it's not even when I started preaching of God's love on this channel that the subscribers rose, but literally from the day my life changed. Ofcourse sooner I started talking about spiritual content and I've gained so many people that I wasn't able to before. Infact, this is the only tech channel that talks about God however much I want and still out grow any competitive channel solely focused on tech. But most importantly, the follower count means nothing! I would post the exact same spiritual content I do now, even if my subscribers we're leaving and I got down to my last 100 subs. What matters isn't the number of people joining, what matters is that when they crossed your channel and profile, they touched a piece of God along the way. Hope this was helpful! ☐

Like I said earlier, your channel post might be the only Bible someone will ever read today. Your channel might be the only church they'll attend today! A lot of you have reached out to me that you don't attend church, and even more so, your only source of spiritual content is the content I post here. And as such, I pray so hard, and my friends pray with me that I let God use this for Himself than me. And I hope you pray for me and this gathering too. That we may be fruitful, and that you see more of God and less of me one post at a time! ☐

Here are the topics for the next 5 days Day 1 - ☐☐ ☐☐ ☐☐☐☐☐☐ • A Broken World • We will talk about the world we live in, the story of humanity and the relationship we have with God. • The Greatest Love Story Ever Told. Day 2 - ☐☐☐☐ ☐☐ ☐☐☐☐ • Amazing Grace • We will talk about our sinful nature and the grace and mercy God rained on us to live a life free of sin. • Born Again and

Dudes will have setups like these and ship the most lame code and product. Other niggas tell you to use Linux, vim, nixos, rust, the latest JS framework and build tool, and then ship the most ass code. And I can't be the only one noticing ethio tech influencers that have become all talk and no show. Honestly, stop showing me your setup and show me what you've built. Stop blabbering about some new lang and actually ship something we'll use or contribute to. I honestly consider it lies when someone tell me they're a web dev, or a hardware engineer but have nothing to show me when I ask them. Just do anything, like literally anything, build something. You're a web dev, what's the last site you built? You're an iOS dev, what's the last iPhone app you made? You're a devop engineers, what shipment did you do? You're a ML dev, what ML project did you experiment with? ☺☺ #Random #Thoughts @Dagmawi_Babi

This honestly annoys me cause I know soooo many tech people and I'm so engaged in the tech ecosystem. It's fine if you don't know how to build, it's fine if you don't have the resource to ship, it's fine if you don't have ideas, it's honestly fine. What is not fine is you knowing all that and then lying to yourself that you're doing something and then showing that "nothing" off to others. Humble yourself! Then learn! Then Share that process! Honestly when I left a ton of channels yesterday, I considered this. And the ones I'm still subbed to are the channels that are genuinely the hardest working and don't lie to us. They're like in their own bubble, achieving

their own goals, giving so much value for us. They don't care if anyone else launched this product or that, they have their own products and services to launch. Malet how can you not love that??

They don't expect me to pay them, they simply do it because they love it there and they don't expect any monetary or other perks they're just sharing what they have and that's a good reason why I should give them perks. Sooner or later, I will find ways to benefit them. They're actually some of the nicest and most interesting people keeping the community alive. ☺ #Community @Dagmawi_Babi

Anyways I hope the ad revenue makes a lottttttt of cash so when it's split it benefits them. Kalhona all of it will go to our charity @RuthfulHearts and other random projects and giveaways. Bicha it will fully be reinvested here on the community or brand. Can't wait! ☺ #Community @Dagmawi_Babi

#Nerd_Podcast Hey there ☺ am excited about our guest for this week's #Nerd_Podcast Dagmawi Esayas (Dagmawi Babi). Many of you might know him from his channels. He's a United Nations certified backend and DevOps engineer and has a track record of selling his softwares in millions, for companies like Ministry of Finance and UN. worked as a freelancer, created significant communities over different social media platforms, including Telegram. In this episode, we'll dive into Dagmawi's journey as a programmer, his achievements, projects, and experiences. We'll also discuss the communities he's built on Telegram. If you want to learn more about Dagmawi and gain insights from his

journey, this episode is a must listen ☐. Join us for Episode 4 of the Nerd Podcast on Saturday, March 2, at 7 pm (1:00 local time). #Nerd_Podcast #Episode_4 Guest: Dagmawi Esayas @selfmadecoder

Yeah I'll be on Tech Nerd's podcast tomorrow night, so come say hi and ask me anything. (Bonus points if you get me to talk about God ☐) Also bro is giving me serious Lex Fridman vibes

One of the channel owners from the tech community said this to me and my heart went boom! ☐ I didn't have a bigger brother or a role model growing up, not a single soul in tech field as well. But that didn't stop God from nurturing me, setting me goals, helping me achieve them and being my role model and mentor. And to be like that to someone is genuinely the biggest complement! Thank you and I'm so glad! It meant a lot! ☐ #Community @Dagmawi_Babi

Remember guys, all the good that you see in me is from God and completely not from me!

So my alt account was eligible to help Telegram send OTP SMS codes and I get free premium links to give away every month. Anyone else part of the 0.01% lol And yes my alt account is Meles Zenawi. #Telegram @Dagmawi_Babi

Just finished integrating Google's Book API, Reddit's API and a really great News API. ☐ This's really great cause the helper functions, the error handlings, the end point documentation, the available options are all so useful. Hope this helps! Now off to other APIs, let me know if there's any good API you want simplified and with helper functions. Don't forget it's opensource and you can contribute yourself and help all devs • <https://github.com/dagmawibabi/apihub> Star the repo while you're out there! ☐ #APIHub #MyProjects @Dagmawi_Babi

"You can go to God Most High to hide. You can go to God All-Powerful for protection. I say to the Lord, 'You are my place of safety, my fortress. My God, I trust in you.' God will save you from hidden dangers and from deadly diseases. You can go to him for protection. He will cover you like a bird spreading its wings over its babies. You can trust him to surround and protect you like a shield. You will have nothing to fear at night and no need to be afraid of enemy arrows during the day. You will have no fear of diseases that come in the dark or terrible suffering that comes at noon. A thousand people may fall dead at your side or ten thousand right beside you, but nothing bad will happen to you! All you will have to do is watch, and you will see that the wicked are punished. You trust in the Lord for protection. You have made God Most High your place of safety. So nothing bad will happen to you. No diseases will come near your home. He will

command his angels to protect you wherever you go. Their hands will catch you so that you will not hit your foot on a rock. You will have power to trample on lions and poisonous snakes. The Lord says, 'If someone trusts me, I will save them. I will protect my followers who call to me for help. When my followers call to me, I will answer them. I will be with them when they are in trouble. I will rescue them and honor them. I will give my followers a long life and show them my power to save.'" -- Psalms 91 #Scripture @Dagmawi_Babi

Good night ☺

Afternoon my peeps, sun is shining, it's March 2, a lovely Saturday. Let's have a great afternoon ☺

If some of y'all placed the love, admiration and attention you gave to ☹☹☹ on to God, that void would've been filled. ☹☹☹ It's sad talking about war than talking about the one person that loves you most. This isn't judgement, this's a mirror ☹

I know the devs in this community are familiar with Github's Activity/Contribution Graphs... So here's a habit tracker that's exactly like that. It's made using Flutter, and it's actually very minimal and very comfortable to use and customize. Habit Kit • HabitKit.app Cracked Version • <https://t.me/c/1156511084/815> #Apps #HabitKit @Dagmawi_Babi

The thing with being able to mobile/web dev is that when you see an app that asks you to pay for a feature you really want... Your brain automatically goes to "I could just make the whole app overnight and I can remove all the other junk I don't need."

I'm live now • <https://t.me/selfmadecoder?livestream> ☹

And I'm done! Thank you everyone that came and asked and complimented and contributed! You guys are the best!! ☹☹☹

My God I've never seen a community as supporting and encouraging as you guys! ☹ I'm honestly grateful! ☹

This was the recorded session of the podcast I had with Tech Nerd! Great Job @SelfMadeCoder #Podcasts @Dagmawi_Babi

Nothing makes me happier than talking about the Person that made all the good in me. The person that was with me in my dark moments, and the person that got me through it all! All credits to my beautiful God, the love of my life! And I'm so happy that I got to talk about Him freely and that you guys were also asking about Him! That was amazing! Praise God! ☹

I had a great time frr...thank you for making the time for it. . . @DagmawiBabi @selfmadecoder

From @SelfMadeCoder's channel stats ☹☹

THANK YOU EVERYONE!!!

I got awesome contribution news today ☹️

The API Hub now supports The Movie Database API. ☹️ This was contributed by @DoniVerse and you can now easily get movie/series/TV Show data with so much flexibility. ☹️ This's pretty awesome, specially with the helper functions helping you eliminate multiple calls and giving you a complete response with a single call. ☹️ #APIHub #MyProjects #Contributions @Dagmawi_Babi

API Hub now has Documentation ☹️ @Gebeta_Tech created, wrote and hosted an extensive documentation about the entire project. This's so cool. ☹️ This makes using, understanding and contributing to the project so seamless and convenient! It's got extensive explanation for each and every endpoint, their parameters, queries, responses and so much more. ☹️ You can search, navigate, and contribute to it as well cause it's all open source. You can check the live documentation here: • <https://apihub-seven.vercel.app> #APIHub #MyProjects #Contributions @Dagmawi_Babi

We've reached 35 stars on the project ☹️ So many stars I can see constellations ☹️ Thank you so much for everyone starring, contributing and sharing. This's such a random little project but y'all spicing it up! ☹️ Drop a star and contribute ☹️ • <https://github.com/dagmawibabi/apihub> Thank You! ☹️ #APIHub #MyProjects @Dagmawi_Babi

I don't understand how fast you guys are contributing ☹️

@TheEthiopianLad added FlixQuest API wrapper, this means you can get streaming links to whatever movie, series and TV show you're looking for! ☹️ This's pretty convenient tbh!! Great Job Beamlak!! ☹️ #APIHub #MyProjects #Contributions @Dagmawi_Babi

☹️ ☹️ ☹️

Abel Berhanu (@Abela12) added a wrapper around Lyrics API ☹️ Now you can simply search for your favorite songs and get a single response full of lyrics. This's a unique one and it's so helpful!! Great Job!! ☹️ #APIHub #MyProjects #Contributions @Dagmawi_Babi

☹️ ☹️ ☹️

Running your life after being overshadowed by adults' responsibilities to you gives you new lenses. You might even become different. For now, you have become the provider as much as the acceptor. 🙏 The consequence of freedom is responsibility. It provides a self fulfilling balance. 🙏 Fulfillment will have new definition to you. As an acceptor, you are fulfilled when you receive. As a new born provider, you are fulfilled when you provide. 🙏 Here is when empathy can develop within you. If it was already there, it will be strengthened. Your responsibility will branch out to others, so you learn to be a keen observer to others' needs. 🙏 Art is what it is to elevate yourself with those around you. It is artistic to treat community as the canvas of your potential. 🙏🙏 So be Ruthful 🙏. Learn to balance what you give with what you get. Peace and fulfillment will break your scale and inhabit you without hindrance. 🙏 One way you can achieve this balance is by joining @RuthfulHearts and giving whatever fulfills you. Your compassion is thanked and may you find peace in it 🙏

This's so wholesome, so thoughtful and creative! I love it it's so nice! 🙏🙏

There are some things I learnt from this design approach tho. • It's a dividing design language •
It's hard to get used to • It's doesn't have that dopamine shot • Icons and colors bring life to
things • Black and White, are so quiet

Moving on to open source contribution news....

First off @AlphAdmin12 kept on fixing issues and improving the whole project. ☹ #APIHub #MyProjects #Contributions @Dagmawi_Babi

And now off to new API support...

Thanks to @Yosinan, API Hub now supports Random User API. ☹ You can now simply fetch placeholder user data for all your needs! Great Job!! ☹ #APIHub #MyProjects #Contributions @Dagmawi_Babi

We now have support for early YouTube API thanks to @TensaeB ☹ It's still early and can be expanded but this's a great start and a good merge! Great Job! ☹ #APIHub #MyProjects #Contributions @Dagmawi_Babi

API Hub now has 55 stars, officially my most starred open source project! ☹ • <https://github.com/dagmawibabi/APIHub> THANK YOU SO MUCH! ☹☹ #APIHub #MyProjects @Dagmawi_Babi

BTW a big portion of the stars and the contributors came from LinkedIn, that's so odd! I guess I've managed to get some reach out there! ☹

Hey gorgeous people ☹

I like this ☹

በጥቅምት

I don't follow Elon, and I've even muted him just to see if the algorithm is flawed. And exactly like I suspected I got his tweets on my feed, tweet notifications and push notifications as well. I did this with 3 of my accounts just to make sure. Lol I guess the people that said this were right. He's no different than Jeff using WSJ to amplify his voice, Elon's doing the same (if not worse) I guess part of maturing is realizing how untrustworthy and deeply flawed your role models are. I'm glad God carved my path and I'm glad I didn't idolize them.

☹.

Someone just showed me their email and guess what?! It ends with @yahoo.com > stone them!! ☹

Sometimes I feel bad for the Ride drivers that have to see me sleeping and drooling at the back of their car ☹️ Lol it's even worse when they have to wake me up #DailyLife @Dagmawi_Babi

Sis said that I'll never hear any girl say this.

I guess she's right, no girl would ever sleep in a private space, with a stranger.

@Yohan_nes isn't going to be happy about this but Indians will now be contributing to API Hub ☹️ ☹️ #APIHub @Dagmawi_Babi

Being a creator in the creator community here feels like being in a big group chat. We're just posting and commenting on each other's posts lol Plus I think the love and support we have with each other is kinda wholesome. I guess so many others will soon join the creator community and will expand so much. Before that happens let's capture this small moment where there's only a handful of us and we're all lovey dovey trolly lol ☹️

Lolz this's giving me nostalgic vibes when I was alone here. I'd just post, no comment section, no community, some people reacted, some shared. But it was always like me talking back to myself. Then people started joining me, started their own tech channels and so forth and now it's just booming. ☹️

Was at AASTU today for a brief moment and when I left and was calling a ride, guess who happen to pick up? One of the department heads in AASTU. The ride was very awkward NGL. ☹️

I think a bunch of you have invited me to Arc Browser cause I've gotten multiple invites in my email. Thank you, that's so sweet! ☹️ Honestly! ☹️

I saw a lot of AASTU Teachers and Department Heads working as Rides in part time. Kinda sad in a way tbh. AASTU cashes in SO MUCH cash but our highest paid teacher gets 85k birr per month. I think they can do better.

Oh and not to mention they get in campus housing, transport services and free food. I think our teachers are better treated than most now that I think of it. But I guess they still need that extra cash.

What annoys me from AASTU is that sooo much interesting constructions (including the biggest data center in Ethiopia) are being constructed and all but It's taking them more than 5 years to complete that I will not be spending my nights there.

Also having an insight about their salaries I can legit see the difference in the quality of their teachings and approaches. Naturally me and my friends would argue about who're the best teachers and we've chosen around 3/4 and turns out they're also part of the highest paid. So I guess the pay has a big effect on quality and approach!

At UoG we had a teacher who has a YouTube channel, he complained alot in class about how small he gets paid. Made us make our friends and families subscribe to his channel, promising us bonus marks. And then he posted our grades on his YouTube for the views. And the channel was not even entirely educational. It was some low quality vlog of him with his kids.

BRUHHHHHHH ☹️☹️☹️☹️☹️

Imagine someone's C- grades being posted for views ☹️☹️

Lmfao, ideas for the YouTube Video title > Try not to laugh! Teacher reacts to student grades. > Laughing at Fails! Teacher reacts to student report cards > Top 5 worst grades | UoG 2024 > Who will fail my class this year? Teacher grades students marks live. LMFAOOO ☹️

My current favorite type of university people are people who leave AASTU without filling out withdrawal or dropout forms. They just... Leave! ☹️☹️ Like, "you don't need no paper to tell you I left, my absence will!"

Okay, imagine this... Hoping that all this creator community channel's get monetized through telegram, we all collectively put aside a portion of the revenue to an account... Let's just call it Byte. Then we all collectively contribute a portion of our skills to the Byte group. So like in Byte, someone would propose an idea to build, then we'd give our feedbacks and approve or disapprove of it. If the idea gets approved, all of us would contribute to it. Graphic designers would design layouts and ads, comics would make nice memes for marketing, devs would contribute code, and then using the fund gathered we invest in the project, covering server and marketing costs. Marketing would be a breeze cause collectively we've over 30k reach. And it's even targeted. And interns of contribution we've got people in so much diverse areas that all perspectives would be covered. Then the creators and approved contributors would own a portion of the project in shares. Essentially, digital VC but more hands on.

Steve Jobs with wife, Laurene Powell Jobs. I do think Steve Jobs was an incredible person. I wish he was still alive to this day honestly. There's so much I disagree and hate but I've looked up to him, and aspired to be somewhat like him. I sometimes wonder how Apple would've turned out by now, probably the absolute best in the industry. Steve was abandoned by his family and left for adoption. When Steve died he left his \$10.3 billion to his wife and 4 kids (One from a previous relationship) He also supported his two biological and 1 adoptive sisters. His wife and kids have spent millions giving out to charity and supportive foundations till this day.

Something I noticed about creativity: See people are filters. All different shaped filters. All if us observe and absorb, but we filter that out and then create and speak from what we've filtered. So, the point of being creative is to absorb so much inspiration and ideas on a specific topic or theme and then letting your mind filter that out. And because your filter is unique to you, what you produce is something unique. In the process, two things are important 1. To avoid distractions - because distractions have a tendency to become filters themselves. So instead of you being the main filter, distractions add another layer of filter altering your output. 2. Independent thought - you're the decision maker. You decide how much to absorb and how much to filter out in what shapes. You have to make the deliberate action to reiterate, refilter, reabsorb and so on. Until it fits well. #Thoughts @Dagmawi_Babi

ROMANS 1 — SUMMARY Everyone knows that a Creator exists because Creation exists.¹⁹ Everyone also knows that their wickedness deserves death.³² A sinful life is then born out of the suppression of these two facts — that God exists and evil actions are punishable by death. Through this suppression of truth: people took away what ought to be God’s and gave it to other worldly things,²³ switched God’s truth with lies²⁵ and finally decided God isn’t worth knowing.²⁸ These are the pillars of sin. — suppression of the truth, lies, disrespect of God and lack of knowledge about God. ☹️☹️⁴☹️⁶ Knowing their wicked and evil lifestyles deserved death they kept on sinning.¹⁹ Though God has given them away to sexual impurities,²⁴ to shameful lust,²⁶ and to a depraved mind;²⁸ from their point of view, death hasn’t come yet — they think they’re still alive despite their disobedience. Their foolish hearts are now darkened.²¹ These people then think they are wise.²² They are filled with shame and sexual impurities yet they encourage others into the same life.²² Though their minds are depraved and they harm themselves and others, they think they’re okay because they haven’t died — when they are in-fact walking corpses.☹️☹️²☹️¹ These people think they’re wise because they know everything else but God — but not wise enough to see that they are walking caskets, holding the dead of

themselves.□□□¹¹□⁴⁴ But it doesn't have to be this way! We are loved by God,⁷ to be owned by Jesus⁶ and called to be saints.⁷ To say it even deeply: You no longer have to be led by a depraved mind — Jesus can lead you! You no longer have to be drowning in shameful lust — you can experience the deep love of God! You no longer have to be impure — you are called to be a saint! OH MY GOD!

All you have to do is open Romans chapter 1, read it through and then read this! OH MY GOD! □ This is one of those summaries that explain the world to believers and non-believers alike! Only 3 days left! The one week of the second fund raising for @RuthfulHearts is about to end! □ Support us in the very last days. Share, donate and encourage others to do the same. Because the money we gather will definitely help so many others and ease the pain they're going through! □ Let's have an amazing last few days of fund raising and let's make it count! □

I should've posted this yesterday when it was still Women's day, but better late than never....

The Perfect Wife -- Proverbs 31:10-31 "How hard it is to find the perfect wife. She is worth far more than jewels. Her husband depends on her. He will never be poor. She does good for her husband all her life. She never causes him trouble. She is always gathering wool and flax and enjoys making things with her hands. She is like a ship from a faraway place. She brings home food from everywhere. She wakes up early in the morning, cooks food for her family, and gives the servants their share. She looks at land and buys it. She uses the money she has earned and plants a vineyard. She works very hard. She is strong and able to do all her work. She works late into the night to make sure her business earns a profit. She makes her own thread and weaves her own cloth. She always gives to the poor and helps those who need it. She does not worry about her family when it snows. She has given them all good, warm clothes. She makes sheets and spreads for the beds, and she wears clothes of fine linen. Her husband is a respected member of the city council, where he meets with the other leaders. She makes clothes and belts and sells them to the merchants. She is a strong person, and people respect her. She looks to the future with confidence. She speaks with wisdom and teaches others to be loving and kind. She oversees the care of her house. She is never lazy. Her children say good things about her. Her husband brags about her and says, "There are many good women, but you are the best." Grace and beauty can fool you, but a woman who respects the Lord should be praised. Give her the reward she deserves. Praise her in public for what she has done." #Scripture @Dagmawi_Babi

She is my flawless role model, And the person I want to spend the rest of my life with. The one I want to sacrifice everything for! I'd rather be single all my life, if it's not spent with her! And when I find her, she's worth all the wait! She's the one! □

How the turn tables. □

So much so that it looks like the husband isn't even doing anything in the chapter.

And even after all of that, she takes the time to look that good!

Donates to @RuthfulHearts □

Oh how rare this is!

Being respected says a lot about a person's character! It's no easy task to earn respect!

Her life revolves around her family. She shares the load of providing and she's does it all for her family.

She's creative and enjoys it.

Wisdom is not knowledge and wisdom comes from God. She speaks of God's wisdom to everyday life. She's much more worth than a king's council.

I have been in relationships, I've kept them all private but when I find her, I will definitely tell you all about her, boast about her, post pictures of us and so much more. ☺ Can't wait! ☺

“ἡ ἀλήθεια ἐλευθεροῖ ὑμᾶς” — ῥωμ 4ῶ23 “ἡ ἀλήθεια ἐλευθεροῖ ὑμᾶς ἀπὸ παντὸς ὀνόματος καὶ ἀπὸ παντὸς ἐκείνου τοῦ ὀνόματος” — 1ῶ ῥωμ 4ῶ16 #Scripture @Dagmawi_Babi

Hot take but... not everyone is useful for your growth and journey. It doesn't matter how good they code, draw, sing, act, write... If they're only giving you only hype and trend catching information, they're not worth your attention. It doesn't matter if they're the 1st smartest/creative person... leave them learn from the 10th smartest/creative person that tells you about God, tells you the truth, doesn't suppress it, and doesn't replace purpose and meaning with tech and art. Unfollow, unsubscribe, leave them. You won't lack anything at all, I can guarantee you that!

All these gods frozen in stone but mine's a living fire. ☐ #Spiritual #Random @Dagmawi_Babi

This has fundamentally changed how I view the world and people around me, friends, creators and family. I saw creators suppressing the truth of God, replacing it with fantasy, tech, art, and music. And encouraging others to do the same. I left them all after telling them of God. You should do the same. It's partly okay to have a foolish heart and not know the nuances of God, religion, belief and a spiritual life. That's okay, with due time you'll improve. But It's absolutely not okay to have a darkened foolish heart. At that point people think they're wise when they're filled with shame and lust, they tell you God isn't real and to know him is a waste of life, when their career and relationships are meaningless, their life purposeless and all leading to nothing but death. Honestly, runn, leaveee, avoid!! #Spiritual #Scripture #Thoughts @Dagmawi_Babi

I'm saying this while my circle is filled with atheists and non- believers. And I'm telling you I have left all my connections that are like this but stayed with the ones that are in pursuit of God, I stayed with the ones that don't actively block God out. #Spiritual #Scripture #Thoughts @Dagmawi_Babi

But the others “ἡ ἀλήθεια ἐλευθεροῖ ὑμᾶς” — ῥωμ 1ῶ22 #Scripture @Dagmawi_Babi

It's partially okay to not know God. One day you will. But it's absolute not okay to know Him and then lie to yourself and others that He's not real. These people you can't reason with. You both know the truth, one just chose to purposefully suppress it. #Spiritual #Scripture #Thoughts @Dagmawi_Babi

You know what makes me laugh randomly sometimes? ☐ Now we say ὁ ἰησοῦς ὁ ἀρνίον and sing about it and set it our profiles and stuff. ὁ ἰησοῦς tho when Jesus called the people Sheep they were VERY offended by it. It was almost as if he insulted them. They didn't receive it well, it wasn't a nice thing to call someone a sheep at all. It was a bit degrading and offending. Infact if you call a

shepherd a Sheep he'll understand how that word hits much more than we do. But Jesus called everyone that “የሕይወቴ ስሜት ለሕይወቴ ስሜት” — ስሜት 10፡27 “የሕይወቴ ስሜት ለሕይወቴ ስሜት” — ስሜት 34፡31 #Spiritual #Scripture #Thoughts @Dagmawi_Babi

☐☐... ☐☐☐! lol

But you know what amazes me. Jesus persists. Tho it's offensive and degrading, He doesn't change it or alter it. He continues with it. 🐑 🐑🐑🐑🐑 🐑🐑🐑🐑🐑! BUT... “🐑🐑 🐑🐑 🐑🐑🐑🐑 🐑🐑🐑 🐑🐑🐑🐑” — 🐑🐑🐑 10🐑16 We conquer the world as sheep. 🐑🐑 That's the miracle here. That we are not transformed into a powerful creature that logically defeats everything else but that we are still the same sheep that conquers 🐑 ... Because God is with us! 🐑🐑 🐑🐑 🐑🐑🐑 🐑🐑🐑 🐑🐑🐑🐑 🐑🐑🐑🐑! THAT is the true secret! 🐑 #Spiritual #Scripture #Thoughts @Dagmawi_Babi

While we're on the topic of Christianity. If you are a believer you have to see yourself as a system infector. “ᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱ” — ᐱᐱᐱᐱ 5ᐱ13 Salt infects food. It's so little, but it drastically changed the taste of the entire food being made. That is a Christian. The world is dark, evil, blood-thirsty, unfair, wicked... Christians are then expected to infect this system by their goodness. In an unfair environment we infect the system by being fair. In a racist workplace we infect the place by being tolerant. In a lying field we infect the system by telling the truth. We infect the world! #Spiritual #Scripture #Thoughts @Dagmawi Babi

And sometimes we don't have to change the entire system. The salt doesn't change the kitchen, only the soup. So sometimes you're not expected to change the system, but the soup you're being stirred into. At the end of the day infect the world with God's goodness you've also been infected with! #Spiritual #Scripture #Thoughts @Dagmawi Babi

“... 5013 Salt, chemically known as sodium chloride (NaCl), is a stable compound and does not inherently lose its taste. However, impurities or exposure to certain conditions, such as moisture or contaminants, can affect its flavor or perceived saltiness. In ancient times, impure salt harvested from the Dead Sea region could lose its flavor over time due to contamination or exposure to the elements. So while pure salt itself does not lose its taste, impurities or environmental factors can alter its flavor. The verse suggests that salt can indeed lose its taste, which is a metaphor for Christians losing their effectiveness or distinctiveness in representing Christ's teachings because they've been infected by impurities. #Spiritual #Scripture #Thoughts @Dagmawi Babi

I hope that helped. Have a lovely rest of your night lovely people! ☺

Phewwww 🐸... The dagmawibabi.ton domain name is now mine after an hour of auction. 🐸 #TON #Domains #Blockchain @Dagmawi_Babi

You can now send me TON coin just using my domain, you don't have to write that long ass wallet address. Also this's such a big deal if you understood how the TON Blockchain works: Each domain can store up to 2^{256} DNS records where you can store not only your wallet addresses and websites but anything you want also. #TON #Domains #Blockchain @Dagmawi_Babi

Ahhh this's soo cool guys. Ik that there's only like a tiny portion of you who'll understand the excitement but I'm just gonna say it anyways: The domain is like any other domain, but it's for the decentralized internet. So regular internet can't casually access it, it needs a proxy, you have to run a proxy and then you can host your files, websites, media and more. That's all a bit

complicated but fun, but most importantly you get so much storage on the Blockchain for so cheap. Now why that's important is because the TON Blockchain costs money for every single line of code being run in their smart contracts, and every bit of data being stored is fined per second. So what the domain essentially does is like buying a server and I'm happy because it's so cheap (\$3) and obviously it makes things easier when I'm trading. #TON #Domains #Blockchain @Dagmawi_Babi

It's worth every dollar. And ofcourse you know me, I don't spend for no reason. This is worth it. I'd like to tell you why, but it's so technical but essentially, I think the TON Blockchain and it's decentralized internet is superior to every single Blockchain out there ... Including Bitcoin and Ethereum's. It has solved both scalability (Ethereum's issue) and flexibility (Bitcoin's issue) issues and has the most epic security measures in place. #TON #Domains #Blockchain @Dagmawi_Babi

I spent today learning everything about TON from scratch. Their documentations is  and they have a comprehensive course that just goes insanely detailed about TON's architecture, design patterns, developments, comparisons and capabilities. I liked TON before this, now It's the most epic tech I've seen in a long time. (And this's coming from a dude who made his own blockchain and crypto a few years ago) Full course (9 Modules) • <https://docs.ton.org/learn/introduction> Only 3 modules on YouTube • <https://www.youtube.com/playlist?list=PLj6YT8oL2zOmNzTNxHKLuGIYHcNIlvPMi> It's impressive honestly. I wish I could tell you everything but that'd be super spam, when you have the time or when you want to get into blockchain dev, try this don't go anywhere else. #TON #Resources @Dagmawi_Babi

Okay here're a few epic things I've learned and loved about TON and it's architecture. • TON is a decentralized internet — it's got DNS, storage, crypto, transactions, DOS protections and so much more. It's literally a fully built decentralized internet that people can build tokens, dApps and more on. • It's a blockchain of blockchains — every single contract is isolated and only communicate by messages and so this architecture allows people to implement their own blockchains, crypto, tokens... inside of it. Meaning bitcoin, ethereum, solana and others seamlessly integrate with it. • It's both flexible and scalable — Bitcoin isn't flexible, the only data and logic it has revolves around bitcoin crypto. Ethereum wanted to fix the flexibility issue of bitcoin and they did, except that now they couldn't scale because it was so flexible. Then TON comes and solves both of these. The problem now is that the DX is a bit hard to understand. • Smart Contracts can be assets — you can literally create assets of any kind you want. You can create FTs, NFTs, Crypto, StableCoins, and basically anything you want. Infact Telegram usernames are smart contracts of value. • Fees — every single line of code the smart contracts run are taxed by bits*seconds*fee. This enables protection against DOS attacks. Validators also place their own TON into the system and if they are not available to validate they are taxed a large amount of cash, this helps keep the network alive. • Storage — to store any data, smart contracts themselves have to pay for it. Each and every contracts has it's own balance that it pays to be routed, executed and stored. • Frozen Accounts — If unused for so long accounts get frozen and are hashed and sharded away. To reinstate you have to bring your own copy of the data. That is why if you have TON in your wallet and never transacted it costs so much fee. AND SO MUCH MORE!  #TON #Blockchain @Dagmawi_Babi

I knew Telegram engineers were smart, but I never really knew why they invested so much into TON and decided to integrate the whole of Telegram into it... now I get why they're obsessed!  #TON #Telegram #Blockchain @Dagmawi_Babi

Telegram is being rewritten and rebuilt to be completely working on TON. Once the rewrite is complete, it would be the most advanced and most used decentralized internet social ever made. Oh and the amount of ways it's going to generate money is crazy! Not only for the organization but also for it's users. I can't wait for the day they announce: Telegram is now fully decentralized on the TON Blockchain. ☺☺☺ #TON #Telegram #Blockchain @Dagmawi_Babi

Anyways if you have some free time, just binge watch this great explanation and introduction of TON and it's architecture • <https://www.youtube.com/playlist?list=PLj6YT8oL2zOmNzTNxHKLuGIYHcNIIvPMi> Just watch section 1 for an overview, and section 2 for a bit deeper of an overview. #TON #Blockchains #Resources @Dagmawi_Babi

This section of the channel has become my favorite. It's so nurturing and I get to talk about spiritual stuff with other christians more mature than me. Keep your ideas coming and sharing. Don't forget, the point of our community is to be taught by God and then share that with

life. He told Jesus about all the commandments that he had been obeying, but Jesus looked at his heart. Jesus told him that there was one thing that He lacked. This was a test to see where the young man's heart really lay. So Jesus told him to sell all his possessions and give them to the poor and then follow Him. The young man went away sad because that was something he was not willing to do because he had great wealth. God wants to prosper you in ways you cannot even imagine, but He wants you to be able to handle the blessings in a way that honors Him. He loves you too much to give you more than you can handle. So, in life, God will test you to make sure you are grounded on the understanding that everything you have comes from Him. Everything you own are gifts of love from your father. No matter how prosperous you become in life, never forget about your first love.

Seek the kingdom of God first and all will be added my ppl

[illegible]

Was talking about this earlier with my friend. Some of us take the verse as "God will do x for me if I seek His kingdom". That's not right and that's not what God intended. We need to seek His kingdom because we love Him and want to obey Him -- the rest, God will do for us.

U r right bruh...but there is something u forget to mention here....The more u seek God the more u will realize that everything in this world is worthlessu begin to understand All u need in ur life is his presenceu don't even get the chance to think what materials needed in ur life....u will forget them trust me...he will do what is meant for u by himself without you even askin'

I used to think LLMs could bring out AGI but I'm now fully convinced that they won't. And everything is a hype. Sam understands this, all the major AI leaders understand this and stuff. AGI won't come from LLMs. We need to find another way and unless we do, all the fine-tuning and optimization won't lead anywhere. So everyone hyping this up as anything other than a greatly fine-tuned and integrated LLM is selling you hype and filling the void inside them with

tech hype. Ahun a few days later you'll see them still void and trying to fit that with another hype LLM. ☐☐☐

Oh no. Reality

I love @RuthfulHearts, when I started it it was simply my love letter to God cause his heart rests when the poor are fed and taken care of. It was my thank you letter to Him! "As you've taken care of me, I'll try to take care of your people." ☐ So when I started this I prayed that it could be fruitful, but even if people didn't help I was going to carry this throughout the seasons. BUT look where we're at right now, how far we've come. ☐ First campaign we raised 25,135 birr, and now we raised 45,000 birr that's a total of 70,135 birr! This just incredible and it leaves me speechless. ☐ The fact that I'm in a community of the most charitable and generous people out there is one of those things that get me smiling late at night. People genuinely giving and supporting without limiting their hearts are going to change the world and help so many people! ☐ I'm sure some of you might get in trouble for it, some of you were saving the cash for something else, some would've spent it on something else that's important but you chose to give it here for the poor. THESE ARE THE KINDS OF PEOPLE I DREAMT OF BEING SURROUNDED BY. ☐ Thank you, that's all I could say! Thank you and God bless each and everyone of you for sharing, donating, encouraging, and guiding me through this all. I wish I could pour out how grateful I am but I legit have no words, You are better than gems! ☐ Thank you!! ☐

THANK YOU GENUINELY! ☐

☐☐

It is no longer MY private love letter to God. It has become ours. ☐ @RuthfulHearts -- A collective love letter sent from his children to God. ☐ God we entrust on to you all the fund and impact it will cause onto your trustworthy hands! ☐ We love you! ☐

Announcements — Foreign Campaigns @RuthfulHearts has partnered up with US based trusted

and charitable communities to help organize, fund and support our charity during the next fund raising campaign. ☐ Most of the donations we've gathered so far came from the beautiful community here in Ethiopia but people abroad have found it slightly difficult to support us. That ends now! ☐ We now have a US based account and a community of people abroad that are organized, planning and setting things up to support us for the next season of fund raising. ☐ I can't wait until then cause even a small amount of donations from abroad will be multiplied here and we can collectively reach more people and help ease their pain. ☐ I'm grateful for the partnership. We are planning and setting everything up along with the legalities, payment integrations and more. So you'll see the fruits of it all on the next fund raising campaign after 6 months. ☐ Thank You Everyone! You're all precious to us! ☐ @RuthfulHearts

Announcement — Partnership with The Happy Lucky Project I'm happy to announce that @RuthfulHearts has partnered up with The Happy Lucky Project — an amazing charity that helps acts of generosity expand and amplify their voice and cause by providing support in mentorships, advertising, crowdfunding and merchandise. ☐ The Happy Lucky Project has agreed to fund the next season of our campaign by selling unique merch designed for our @RuthfulHearts brand all of which will help us reach an even wider portion of audience and support. ☐ On the next campaign, people would be able to purchase shirts, hoodies, stickers, cups and so many more beautiful merchandise either in one of their in person stores or online and get free delivery here in Addis Ababa to support us in our campaign. ☐ I'm so excited to show you all the amazing merch we'll be designing and producing on the next campaign.☐ Thank You So Much Everyone! ☐ @RuthfulHearts

@RuthfulHearts is a community driven charity. All the graphics, content, merchandise, management, marketing, funding and more is our collaborative effort. ☐ We've collectively gathered to build a platform that fully invests it's fund into the lives of others who need it. There is no one face that is on the cover of this charity... Cause it's not about us, it about other people who're going through tough conditions and pain. ☐ So if you're a digital artist, graphic designer, content creator, an author, marketer, social media manager, software developer and more we'd love to have you help us enhance our charity and expand it will our collective effort and care. ☐ All that are interested please fill out this form and we'll contact you all and assign you to your desired methods of support • <https://forms.gle/ST2mbfJPFrSFqT7p7> Ruthful Hearts is made true because of all of your support and kindness. We wouldn't trade that for anything. You are our treasures and our prized possessions. Thank You So Much! ☐ @RuthfulHearts

Doesn't it blow your mind when God blesses things?! It leaves me baffled at times! ☐

I'm getting an overwhelming amount of support, surpassing Ruthful Hearts and onto my other projects. This's unplanned and purely a blessing. I'm grateful! ☐

@Dagmawi_Babi

Deliliah (Samson's wife) is a prime example of how some women can be the death of you!
Second point is to completely abandon all partners that ask you for your vulnerabilities and then

These networks take in onboard images at 10hz, and generate 24-DOF actions (wrist poses and finger joint angles) at 200hz. This is a useful separation of concerns: • Internet-pretrained models do common sense reasoning over images and text to come up with a high-level plan. • Learned visuomotor policies execute the plan, performing fast, reactive behaviors that are hard to specify manually, like manipulating a deformable bag in any position. • Meanwhile, a whole body controller ensures safe, stable dynamics. For example, maintaining balance. #Figure #Robot @Dagmawi_Babi

Simply put, you know how we have nerves controlling our muscles and each nerve does its own routing and subtle calculations to adjust for things? Well the robot works that way too. Everything is a neural net in the robot. So in every single action there's a small neural net being run to adjust the angles and rotation of the joints, fingers and body.

On this day 2,068 years ago Julius Caesar was assassinated in broad daylight in the middle of Rome. But it wasn't a mob or popular uprising — Caesar was killed by a group of disgruntled senators. Here's how it happened, moment by moment, on that fateful day in 44 BC... #JuliusCaesar #History @Dagmawi_Babi

The year is 44 BC. Julius Caesar has been declared "Dictator for Life" and is now the most powerful man in the Roman Republic. In 48 BC he had defeated Pompey the Great, another Roman general, and by 45 BC he had put down all resistance. The civil wars were over; peace at last. But a conspiracy was brewing. The Senators were worried by how much power Caesar had amassed and — crucially — by how much the people loved him. They feared that, if he hadn't already, Caesar would soon turn the Roman Republic into a kingdom ruled by one man. So this was not an uprising of the people against a tyrant — it was a small conspiracy of aristocrats and senators, about sixty of them in all. Why did they want to kill Caesar? There are two views. The first is that they wanted to save the Republic from a populist tyrant. Marcus Junius Brutus was the reluctant leader of this conspiracy. He had been on Pompey's side during the Civil War, but Caesar had granted him amnesty. Brutus was conflicted between betraying the man who saved his life and protecting the sacred, ancient Roman Republic. The less idealistic view is that these Senators' political position was threatened by Caesar, who didn't need their support and might circumvent them completely. Rather than Brutus' lofty and noble ambitions, perhaps the conspiracy was simply a question of power. Either way, momentum reached fever pitch. Too many people knew about the conspiracy; it would soon be uncovered; time was running out. They considered killing him at the elections in the Campus Martius, but then Caesar announced a special Senate meeting on the Ides of March. The great Greek historian Plutarch noted the irony that it was at the Curia of Pompey, built by Caesar's greatest rival, that this meeting of the Senate was scheduled to take place. The Curia was by the entrance of a large theatre also built by Pompey. Nor was that the only twist of fate. When Rome had been ruled by kings it was another Brutus who led the coup in 509 BC and established the Roman Republic. Five hundred years later his descendent would try to save it. #JuliusCaesar #History @Dagmawi_Babi

It is the morning of the Ides of March, the 15th. Brutus, dagger under his robe, leaves his wife Porcia for the meeting — she begs him not to go, terrified that it will end badly. But he does. So the conspirators gather at the Curia of Pompey, waiting, waiting, waiting... Caesar is late. Caesar remains at home all morning because of bad health, strange dreams, and troubling omens over the last few days. Caesar is spooked and — urged by his wife — sends his right-hand man Mark Antony to postpone the Senate meeting. But Decimus Albinus, another of Caesar's allies, is part of the plot. He reminds Caesar that it was he who called the meeting, and suggests the Senate intend to proclaim him king if he shows up. Not to go would be an insult — and, to the people, it might make him look weak. Meanwhile, back at the Curia, the conspirators are barely hold their nerve. Had the plot been revealed? Caesar is coming. Allegedly a soothsayer called Spurinna once told Caesar to "beware the Ides of March." On his way to the Senate Caesar sees Spurinna and mocks his prophecy, saying, "the Ides have come." Spurinna replies, "they have come, but not yet gone." Meanwhile Brutus receives a message to say his wife has died. She hadn't, as he later discovered, but he decides to remain anyway. Finally Caesar arrives at the Curia. But not without one final moment of panic, as the conspirators fear they are being outed: Caesar enters the Curia. Mark Antony is a fierce soldier who might have been able to protect him — Albinus delays Mark Antony outside; this was a crucial part of the plan. #JuliusCaesar #History @Dagmawi_Babi

Inside, Caesar is slowly surrounded by the Senators... And then it happens. Caesar is overwhelmed and cannot defend himself; he is stabbed twenty three times, saying nothing... until he realises Brutus is one of his attackers: Julius Caesar has been assassinated; Julius Caesar is dead. The conspirators leave his body and the next stage of their plan commences: to address the people, assuage their fears, establish order, and proclaim liberty for the Republic. That is how they refer to themselves — as Liberators. But Rome is eerily silent — the conspirators disperse and barricade themselves at home. Next day Brutus addresses the people. It goes well until Caesar's will is read by Mark Antony — he has left money to every single citizen. A riot breaks out and the Curia is burned down. Antony's plan works perfectly. The conspirators believe the people are against them and scale back their hopes for reform. Antony urges peace, calms the people, and agrees a compromise whereby the conspirators are not punished but Caesar's laws and reforms remain valid. But civil war eventually broke out and the conspirators were defeated in 42 BC by Mark Antony and Octavian, Caesar's heir. After that came yet another civil war between Antony and Octavian. Octavian won and in 27 BC became Augustus, the first Emperor — thus ensued Pax Romana. Whether Brutus was treacherous or noble, his plans failed — the Republic fell and Rome became an Empire. So that's the 15th March 44 BC, one of those dates forever etched into the annals of history. And the question remains: was Brutus a hero or a villain? #JuliusCaesar #History @Dagmawi_Babi

How Do I Know I Have Forgiven Someone? “Get rid of all bitterness, rage and anger, brawling and slander, along with every form of malice. Be kind and compassionate to one another, forgiving each other, just as in Christ God forgave you.” Ephesians 4:31-32 Sometimes, the best in you can only be brought out by the worst done to you. This usually happens by the people you have loved, helped, and trusted the most. There’s an old saying that “time heals all things.” Well, that is not true regarding offenses. Unforgiveness does not get better if you leave it alone or try to push it down. You either fester unforgiveness or you foster healing but you have to be doing one or the other. And if you choose to ignore the unforgiveness in your heart, it will get worse. Paul’s letter in Ephesians gives a beautiful plan of action of how to release forgiveness. He says to first “put away all bitterness, wrath, anger, and harsh words.” Start by draining all the damaging emotions of unforgiveness out of your life. He goes on to say, “Be kind to one another and tenderhearted” (which means open-hearted). If you can’t say a kind word about that person or even look at them, you haven’t forgiven them. Forgiveness may not instantly happen; sometimes, you need to ask God to help you release it. Pray, knock, and ask until love and forgiveness begin to pour out of your mouth, heart, emotions, and attitude. It may take you asking Jesus to change your heart because the hurt is so deep you cannot do it on your own. A scripture in Romans 12:18 says, “If it is possible, as far as it depends on you, live at peace with everyone.” This means there are some people who are never going to be at peace with you, and that is not your problem. If you have forgiven them, you have done your part. What others do or don’t do is not your responsibility. They will stand before God one day and give an account. Always keep the right spirit no matter what is done to you, and God will take care of everything else. Love God with all your heart, and love others as you love yourself. When you do that, you can rest assured that forgiveness has taken place in your life. #Spiritual #Devotion
@Dagmawi_Babi

Overcoming Offense “I have told you these things so that in me you may have peace. In this world, you will have trouble. But take heart! I have overcome the world.” John 16:33 In 2 Samuel 10, King David said, “I will show kindness to Hanun the son Nahash, as his father showed kindness to me.” So David sent two of his mightiest men to this foreign country to show their condolences and comfort King Hanun when his father died. But the leaders told Hanun, “Do you

think David really honors your father because he has sent comforters to you? Has David not rather sent his servants to search the city, to spy it out, and to overthrow it?" Then Hanun took David's servants, shaved off half of their beards, cut off their garments in the buttocks area, and sent them away in shame. In the Middle East during that time, the beard represented distinction, honor, and maturity. These men of David had every reason to be offended. They were humiliated and stripped of their dignity for simply doing what their king told them to do. Luke 17:1 says, "It is impossible that offenses should not come to you." In this life, you are going to be offended. Somebody's going to shame you, insult you, or embarrass you. Jesus said it's impossible for you to escape being offended in your lifetime, so you may as well learn how to deal with it the right way. The end of this story gives insight on how to handle offense in a godly way. After David heard what happened, he sent out messengers to meet the men "for they were greatly humiliated." He told them, "Stay at Jericho until your beards have grown, and then come back." Jericho means "sweet fragrance." So David was saying, "I want them to go to that sweet place and stay there until their beards grow back." When somebody offends you, just "go to Jericho." Stay sweet and kind, and don't get mad or seek vengeance. If you just stay in the right spirit, God is going to take care of everything. Your natural reaction will be to retaliate, but Romans 14 says, "Dearly beloved, avenge not yourselves, neither give place to wrath; for 'Vengeance is mine, I will repay' says the Lord." Later in the story, because of how Hanun treated David's men, David and his mighty army take vengeance on them. If you stay calm when offended, the Lord will deal with that person. He is a just God. You don't have to defend yourself. Put the situation and the injustice into His hands. Don't keep talking about it, and stop being angry about it. Just stay sweet and leave the vengeance part to Him, and eventually, "your beard will grow back." Your hurts will heal. You will emerge better than you were before the attack because you have learned that trusting God to deal with offense brings peace to your life. Let go and let God handle your offense today. #Spiritual #Devotion @Dagmawi_Babi

I like how someone described forgiveness. Typically in christian theology there's only one sin that's unforgiven. Blasphemy against the Holy Spirit. But this person went on and said, there are two unforgiven sins 1. Blasphemy against the Holy Spirit 2. Unforgiving Others And when asked why he simply said: "For if you forgive other people when they sin against you, your heavenly Father will also forgive you. But if you do not forgive others their sins, your Father will not forgive your sins." -- Matthew 6:14-15 If you do not forgive, you will not be forgiven. Ofcourse this's taken literally and doesn't fit the context, because God has forgiven our unforgiving heart. But it still stands that by not forgiving we are not looking like God. We are steered into a different path.

I heard someone say this and it resonated with me: "Forgiveness is easy unless you're the one doing it!"

If you are an analytical person, who likes to keep track and number your actions. Here's the formula for forgiveness. Try forgiving this much, and nothing more. • $70 \times 7 = 490$ times That's it. :)

Remember these • Every time God forgives us, God is saying that God's own rules do not matter as much as the relationship that God wants to create with us. • You either foster unforgiveness or you foster healing but you have to be doing one or the other. And if you choose to ignore the unforgiveness in your heart, it will get worse. • The weak can't forgive. Forgiveness is for the strong and spiritual. • To forgive is to set a prisoner free and discover that the prisoner was you. • Anger brings out more anger, and forgiveness and love lead to more forgiveness and love. • To error is human, to forgive is divine. • Not forgiving is like being

stabbed and letting yourself bleed to death. Forgiveness is to stop the bleeding. • Blame keeps wounds open, forgiveness heals. • What is forgiven is usually well remembered. • You will never forgive anyone more than God has already forgiven you. #Spiritual #Quotes @Dagmawi_Babi

The Power of Forgiveness Gary Ridgeway was the highest serial killer in US history, killing 48 women. Most of which he doesn't even remember. He sat there emotionless while every single parents and relative of the victims came and insulted him, gave him hell and more. But then one father of the victim came and forgave him. Breaking all barriers. I want you to know one thing today, in the face of God, we are all Gary Ridgeway. We're all serial killers harming God's children. But that hasn't stopped God to walk into the court room, a room full of people wanting to kill us, and to simply forgive us! #GaryRidgeway #Wholesome @Dagmawi_Babi

Just before a few weeks ago my main goal in life was to be one of the best creative engineers out in the world, nothing less than being one of the best names. A few days ago, I prioritized another goal over this. My life's goal is now to fulfill the great commission! For those of you who aren't familiar with the great commission, it is simply trying to do the following verse: • "Therefore go and make disciples of all nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, and teaching them to obey everything I have commanded you. And surely I am with you always, to the very end of the age." -- Matthew 28:19-20 I'll still be one of the best creative engineers you'll ever meet, but I'm okay risking that by telling you that God is good and that He saves! Okay, so one random day I was just having fun and I told her let's write the lyrics to a brand new

song. We'd take turns writing each line of the lyrics complete with the main chorus. And we did. It was fun. Little did she know that I was going to produce "Our Song" based on our lyrics for our anniversary. Quickly took the lyrics and got with an amazing upcoming artist and one of my close friends @Biruk_Mk aka Birukawi to make the song. After many back and forth, changing the instrumentals and adding polishing touches we finally got a lovely song in time for our anniversary. And without further ado, here's the song I sent her for one of our anniversaries...

I Rain You ----- Verse 1 - 0:13 Eversince I saw u there Sitting there alone I knew in your future I'd be ur home But I never thought I would grow with the person I love That is what i want Falling falling Falling for eachother Every every Every single hour -----
Chorus - 0:57 Baby, be my home, I'll be ur home. (2x) I rain on you Rain with storms I rain on you Enough to drown a city The city turned so pretty ----- Verse 2 - 1:24 Don't leave my side So that I kiss u good night My dear put your lips on mine Take me to a world I don't know A place that we can call home A world filled with dandelion I feel a little less when u r not there Baby I want u Put ur hands on my heart Feel the beat when it pumps Oww -----
Chorus - 2:07 Baby, be my home, I'll be ur home. (2x) I rain on you Rain with storms I rain on you Enough to drown a city The city turned so pretty -----

#Songs #Birukawi #IRainYou @Dagmawi_Babi

For the curious ones, I Rain You simply means I Love You. I overused "I love you" so much on other people that it lost meaning to me when I said it to her and it didn't describe the emotions I had. But I liked Rain, we both did, so I rain you became part of our vocabulary among a ton of other phrases. And it fit well. Ofcourse it opened the door to even more beautiful phrases, phrases like I stormingly rain you, I ran you enough to drown a city and more. ☺

Speaking of our vocabularies, I once designed and made her a leather sketchbook that has our words engraved on it. You might have even seen it on TikTok • <https://www.tiktok.com/@hadidcraft/video/7187441893746298118> Hadid crafts had a great service • @HadidCrafts

Ere man beka stop

☺ enough cheesiness for today. I've made her so many more epic things that I would love to share but they're just way too personal and invades our privacy.

No, I do not regret loving her with all of me. ☺ When in a relationship, be genuine, don't play games, be honest, care, love, bond, communicate, overcome arguments. Our relationship was "perfect" until I connected to God and He disapproved of it. Ofcourse I could've stayed and He would've let me. But, I chose to obey and pursue God and risk my 4 year rship (9 year friendship). Was it painful? • Extremely, still can't find the words for it. Was it worth it? • Entirely, God was worth it. Are you okay now? • I'm more than okay, I'm saved. Is she okay? • She's okay, focused on her architecture work and in pursuit of God and I pray for her usually.

What now? • Well, I am single now, no plans of getting into any relationship for a while. I'm just not interested, my interest is really focused on God and work. Have you move on? • I have. There are bits and pieces missing from my heart but through time with God I will have a whole heart. Anyone in your life now? • I do like someone mind-blowingly amazing right now. But to not make the same mistake again I am trying my best to go inline with God's will before I fully pursue it. What's the most important lesson you learnt from this? • A relationship must have God or else it's destined to crumble no matter how perfect you are. • Love genuinely, with all of you. • Be picky, slow into relationships. • Put God's will first in your life. Prioritize Him and let Him guide you into people and connections. How did you move on? • Avoided everything and everyone and stuck to the God I abandoned my relationship for. And He comforted my soul. Wow! • Yes wow! #Thoughts #MyRelationship @Dagmawi_Babi

Just a few minutes ago Earth has been hit by a 'severe' G4 geomagnetic storm. Geomagnetic storms are like weather events in space, caused by the sun sending out a lot of energy and particles. They come in different strengths, from minor to extreme. A G4 severe geomagnetic storm can induce electrical currents in the Earth's surface, interfere with power grid operations, affect satellite operations, cause auroras at lower latitudes than usual, and potentially disrupt navigation and communication systems. But for most it means that they'll see beautiful auroras in their sky.

heart.

He will always find a way to save me.

What most people forget is that God is working for you, not against you!

God is teaching me a lot but for now I'm gonna share you guys the most important thing for us "Don't worry about anything instead Pray about every thing" "for nothing be anxious, but in everything by prayer, and by supplication, with thanksgiving, let your requests be made known unto God;" Philippians 4:6

To worry is to doubt God.

"But my brothers who went up with me made the heart of the people melt; yet I wholly followed the Lord my God." And Moses swore on that day, saying, 'Surely the land on which your foot has trodden shall be an inheritance for you and your children forever, because you have wholly followed the Lord my God. "And now, behold, the Lord has kept me alive, just as he said, these forty-five years since the time that the Lord spoke this word to Moses, while Israel walked in the wilderness. And now, behold, I am this day eighty-five years old. I am still as strong today as I was in the day that Moses sent me; my strength now is as my strength was then, for war and for going and coming." — Joshua 14: 8- 11 (ESV) Caleb was one of only two spies to come back with a good report, a report of faith believing that God had given Israel the land and would enable them to conquer it. The other faithful spy was Joshua. The ten faithless spies measured the giants against their own strength, but Joshua and Caleb measured the giants against God's strength. Caleb is a remarkable example of someone who aged in the best way. Spiritually speaking, he grew older but never weaker in his God. He didn't look forward to a life of ease and indulgence in his elderly years. "Just as my strength was then, so now is my strength for war" Caleb drew on a strength that was irresistible because he had a faith that never wavered."

Great verse!

God bless each and everyone of you that shared what you've learnt and seen. Thank you! ☺

On the latest beta of Telegram's app, they've started integrating the monetization features and stats. Which means in the next public release we will start making money off of telegram channels. And according to ads.telegram.org the only criteria to be eligible for monetization is

to be a public channel with 1,000+ subs. With the minimum CPM being €2 #Telegram
#Monetization @Dagmawi_Babi

Something I really liked on the latest beta is the ability to link your personal channel directly on your profile. This's great cause if you're a person like me who's profile and account gets more engagement than channels, it's basically free promotion. #Telegram @Dagmawi_Babi

Let's assume on average each post on this channel gets ~500 views which would be €1 and assuming a maximum of 4 ads per day that would be €120 per month. Assuming normal market pound prices of 70 birr, it would be around 8,400 Birr per month and ~101,000 Birr per year. ☐ But even assuming a minimum of 2 ads per day that would be €60 per month. I'd get around 4,200 Birr per month and 50,400 Birr per year. ☐ And all of this doesn't assume all the extra views it will get. So the actual prices would be much better than this. #Telegram #Monetization @Dagmawi_Babi

I manage @AASTUSE and the numbers and stats on that channel is insane: Everyday each post on the channel gets 1k+ views. And since telegram will pay €2 per 1k views. Assuming 4 ads get posted here everyday that's €8 everyday. And in a month that'd be €240 which is pretty freaking dope if you ask me. Assuming the regular market pound price of 70 birr. That'd be around 16,800 Birr in a month. 201,600 Birr in a year without adding all the extra views. 📈 Even assuming only 2 ads per day, it would come to 101,000 Birr per year. 📈 #Telegram #Monetization @Dagmawi Babi

Awesome, keep filling up this form. I'll let it run for 24 hours and post a comprehensive result tomorrow. It's pretty interesting.

Announcement — Team Formations A few weeks ago @RuthfulHearts announced that we were looking for team members to help us expand and do the everyday tasks of our charity. And now 16 generous people from all over Addis Ababa have signed up to be part of the core team. And we're all so excited to have them all! 🙌 They've already started publishing content, marketing &

designing for the next season of our campaign. I am so excited that I now have partners within our charity to help me manage and navigate it alongside me. ☺ The people are so wholesome and nice. They're some of the sweetest and most generous souls I've ever met. It's so contagious. Like I have said before, I, Dagmawi Babi, do not want to be the face of it. I just want the charity to shine, I just want the people to be genuinely helped and that is enough. And all of the team members are in sync with our missions and goals. ☺ This is just starting, we're going to reach so many lives! I am super happy! ☺ Welcome Team! ☺ #Teams @RuthfulHearts

God gave me genuine people, I'm so ecstatic about it. I can't wait to see @RuthfulHearts grow and shine throughout the world. ☺ Oh and since telegram will start monetization soon. Please join @RuthfulHearts just so the charity can get more sources of income to keep it going. Thank you in advance, you're awesome! ☺ #RuthfulHearts @Dagmawi_Babi

Remember, Jesus wasn't sacrificed when He was spit at, or when He was whipped, or when He was insulted, or when He was hung on the cross. Jesus was sacrificed the moment He became a Human in the womb. For a true God to be Human is degrading. And so Jesus was a sacrifice when Mary fed Him as an infant, He was a sacrifice when He was a toddler, when He was playing with other kids, when He was learning at their churches. I'm starting to think GERD is a scam.

This's for the LinkedIn people who've gotten jobs there, so a ton of people have been reaching out to me with job offers there. For some reason the pay isn't much (current biggest offers were 82k before taxes) And most offers I've gotten are around this range (minimum being 30k without taxes). Is this a trend that you experience as well? Also this doesn't change the fact that LinkedIn still has the worse UX next to Snapchat. So many great people but so little UX.

..... Whether I live or die, Jesus is the love of my life.

.....

As a christian, your heart longs to be persecuted and be killed for God. It's somewhat dark but christians are meant to be persecuted, tortured and killed in this life. The world and Satan doesn't want us. We snatch souls away from them so we're the world's enemy. One day it will all stop, and until then we rejoice in our suffering cause it honors God and it's rewarded in heaven. ☐

Here are tomorrow's guests, there are more too tbh. So it should be really interesting and fun. If you have any questions you'd like us to ask them, please comment it down here.

AASTU's president will be there, and here are our main sponsors. Some of the big names in the tech Industry will be there. There will be hackathons and award ceremonies. Companies will unveil new products and services. And so many more.

Security will be up so be sure to have your IDs on you, the show will also be broadcasted on TV so you can check us out during news hour or their regular programmings. Location • <https://goo.gl/maps/H4TznAsD5WhiY755A> Program starts at 3:00am LT Pray for me, so God's grace covers me throughout the program. It's going to be an amazing learning time and experience and you'll get to connect with some incredible people. See you all there tomorrow at our new graduation hall in AASTU. It's an all day program but lunch is on us, all you have to do is look presentable and mingle and have fun. Can't wait to get you all! ᐱ

If you're an AASTU student we've got busses ready for you in the parking lot starting from 2:00am LT to take you there so just show up and don't worry about anything else. ᐱ

We have the schedule sharpened, all the coordinators, hosts, guests are all in sync. Will be training with my co-host tonight. We'll have a wonderful time tomorrow. ᐱ I won't be able to get any of you, but I'm sure you're gonna enjoy getting all the wonderful guests.

I've just been informed that the event is open for everyone but be sure to carry your IDs Please read through this for more detailed info • <https://t.me/AASTUSE/3500> It's a full day program so you can attend in the morning, during lunch and networking session or also in the afternoon and evening.

Remember this's a strict event and the theme is different from regular tech meetups so try to be proper and organized. And if u see me, say Hi ᐱ

Note to future self: • Build an all-in-one event organization, planning, collaborating and

management platform. • Should have customizable ticketing feature • It should allow email invites and notifications to attendees • It should allow team management, where members can invite people and exchange files, present live, call and text • It should allow people to build a simple webpage introducing the event/festival along with all the important links • It should have link management where it shows detailed stats about each link visit • It should include AI feature to help ease generating descriptions, details and more • It should allow task assigning and management to team members. Along with titling each member #Notes @Dagmawi_Babi

Also Tucker Carlson's interview with Pavel Durov is out. This should be fascinating. Enjoy... • https://youtu.be/1Ut6RouSs0w?si=x26RtYEcPm8_JmUo I should definitely sleep and not binge this. #YouTube #TuckerCarlson #PavelDurov @Dagmawi_Babi

Oh my events team is going to be so mad at me when they find out I stayed up till now. My team legit warned me countless times to sleep before midnight. I'm still up. Oh man, oh man, oh man! ☹️ (My sweet amazing beautiful team ☹️ please don't be mad, I'm gonna be all up and energetic don't worry, I swear I was just gonna watch like 10 mins only but couldn't stop. It was so interesting. ☹️)

Btw most people don't know this but my team takes event management betam seriously and professionally. Like let me paint you a picture of how we do it. First the main leads meet up and have a general discussion and ideation process. It's more of an overview and conceptual discussion. It mostly happens between the most active club leaders and iconic figures in AASTU. Then we all disperse and start managing our own teams. So CGI club lead for example would start producing all the art, PowerPoints, showcase videos, graphics and more. Then the leads and iconic figures would use their connections to reach out to companies for sponsorships, invite guests and handle all the legal and paperwork related stuff. We have a separate sponsorship and finance management team, and they'll handle all the receipts and everything carefully. Including finding catering and more. Then we have marketing and communications team which will post around socials, make all the posts, handle all the LinkedIn posts and tags. And informations and more. After we pick out hosts, they're assigned their own personal teams that'll handle all their clothings, scripts, photographs, along with trainers and guides. Also with a separate communicator to make the hosts sync and instantly adjust to all changes. There are even more smaller teams like coordinators, ushers, stage managers, and many more. Which'll help in synchronizing everything and everyone. As you can imagine the leads will have overlapping tasks, and just absolutely so much work to do and sync but it's absolutely fun tbh. Ofcourse this spans across so many people. And tho we are all separated everyone's a hard worker, passionate and sold for the plan and vision. We go over our sponsors, guest lists, schedules over and over and over again until the very last minute to try to perfect it. And it's so much work. It's like a complete company, and it's literally one of the most efficient and capable one. I'm absolute honored to be able to work with these amazing people. It's exhilarating!

Along with my other tasks and leads, I am chosen to be a host this time along with my amazing co-host Mahlet. So like I said we're assigned our own team. Every major team lead ofcourse knew about every major detail months before everyone else so we start prepping much earlier. Anyways, me and the co-host are supposed to dress up in something that compliments eachother so we're assigned a person and we go out shopping and that person picks outfits and stuff. And ofcourse if you aren't friends with your co-host you're meant to spend time together and just have fun and bond so the energy feels organic and natural. Our script writers send us drafts, and continue updating that so we can have a good organized way of presenting ourselves. Two people would always be on call for us, they'll handle all our requests, questions,

protocols and everything. And these two people are almost the most responsible for us next to the main lead of the host team. They're also responsible to warn us to sleep early. Lol things they're going to be mad at me for. So during the final days when everything is solidified, they brief us of the major schedule changes, new guests, word choosing, script edits and more. The last few days are spent training with them over and over again. With multiple fall back versions if things fail. And then finally during the day of the event. The major leads, hosts and coordinators arrive before everyone else. And then have final sync meeting. Hosts will have a new communications person assigned during the day, since we're going to separate from our teams we need to be aware of all changes. So this person will communicate that to us. And this's just what hosts would go through. Which's a smaller task (lol unless if you're also a lead and have to handle other things concurrently) But for the most part it's very serious.

Again, I need to sleep before my team crucifies me tomorrow morning lol. But I just wanted to say that if you're someone like me who does this and that, here and there, an environment like this is so exhilarating. If you're a lead, it's just so stressful, and for a couple of weeks you'd be fully busy but it's so amazing. Meeting with all the teams, with all the other leads, keeping in sync with the communications and marketing team. Inviting guests, finding sponsors, keeping track of schedules. I can't even begin to make you understand of the work involved honestly. AASTU bounds us from our full potential tbh. We have to compromise, we have to enforce strictness and more into our events but for that situation and setting we do the best we can. So tho AASTU tries to add boredom, we still try to add sweet juice to it. Tho we may plan, it's the Lord that goes through with it. So I prayed for the whole event and everyone involved the night before and in the morning. So proud of my incredible team. Honored to work with you all, honestly! Can't wait to have a great day with you guys. ☐

Now I sleep. ☐

Good morning everyone ☐

AASTU Students There is a bus waiting for you at the parking lot in front of the administration office, which is the building where you usually use the ATM. The bus will take you to the graduation Hall for the AASTU tech fest event. Please gather and come as early as possible to make the AASTU tech fest memorable!

At the auditorium waiting for you! ☐

Posting this while still on stage. Super nervous hoping this goes well for all of you! ☐

Hey if there's anything to adjust, change or alter. Please let me know under this comment and I'll get it done from here instantly. This's for you guys so let us know without hesitation.

Hello from the hosts and leads.

In the afternoon, we're gonna have less strict stance so right after lunch and the networking session be sure to sit as close to the front as you can. It's gonna be much more exciting and fun cause the invited guests in the afternoon are so fun and delightful and.

I honestly didn't know I was gonna get awarded. ☐

This's Untethered Thought typing... Hi, Hello!

Chapi is doing his thang. Along with Bemhreth from Gebeta Maps and Jo Fikru from Efuye Gela.

All credits to my loving God!

Program is now about to end. Final remarks are about to be said...

Program ended, guests, attendees, and coordinators are all going home now. I'm extremely exhausted, but ስላሰላ ስላሰላሰላ ስላሰላሰላሰላ ስላሰላ ስላሰላሰላሰላ! I know events that involve high ranking officials and ministers can be tiring and not as freeing but you stayed throughout so thank you guys! It's been a delightful day for me with all the love, respect and admiration you've shown. God has been so kind and merciful to me, so in all the goodness I praise Him! ስላሰላ I love you guys! Have a wonderful rest of your night. ስላሰላ

Whoa ስላሰላ In just two days, we've went from 3,200 to 3,300+ members. Welcome aboard everyone, make yourselves at home. And thank you for joining. ስላሰላ

I thought I had something to say today atleast when all the hype of the event calmed down but I'm still lost for words. ስላሰላ Everything I did in AASTU or here in our community, I never did for praise nor admiration. I did it to create an environment I love to be in, and a build a circle others would also enjoy contributing and being part of. ስላሰላ But it was so beautiful and it made all my effort worth it when I was honored and awarded and by some of the big names in Tech. It was such an honor. ስላሰላ I knew of every detail about the event but my entire team kept this part a complete secret from me up until it was announced on stage. It was such a wholesome and surprising experience honestly. ስላሰላ Thank you DagmawiBabi Community, my Events team, the clubs, AASTU students and my loving family and close friends so much for the love, support, admiration, care, contribution I'm absolutely blessed to be surrounded by people like you! ስላሰላ All the good in my life is none of me but all of God so I give full credit to God for being able to do the good that He wanted to do. Thank you God! ስላሰላ #Awards #AASTUTechFest #TechEvents @Dagmawi_Babi

Bitcoin halving in a few hours, less than 100 blocks remaining. This's your last warning to buy!!! #Crypto #Bitcoin @Dagmawi_Babi

JEEZ People are transacting bitcoin so much right now the fees are through the roof. ስላሰላ #Crypto #Bitcoin @Dagmawi_Babi

Anyways here are my general advices for you regarding crypto: 1. Understand it to really good depth. Understand blockchains, fees, crypto differences, validations, stakings, wallets, secret phrases and related concepts properly 2. Choose a crypto to invest in. I recommend Bitcoin and TON fully and holding them than trading. 3. Choose a good and trusted wallet. If your telegram account is secure and has 2FA enabled using @Wallet is fast and efficient. Other than that I

recommend using Guarda and Trust Wallet. 4. Divide your crypto into multiple wallets. Cause it's not safe. And be sure to keep your secret phrases secure and organized and written on a physical paper. 5. Hold on to your crypto. That's it. #Crypto #Bitcoin @Dagmawi_Babi

Hey beautiful people 📷 I took a slight break from posting on this channel for the month of April. I didn't take time off of social media as I wanted to but it was nonetheless very restful even with my hectic days. 📷 Not so much of tech has happened in the month of April just slight excitements here and there, which I will highlight my favorites soon. 📷 Let's have a wonderful time 📷

This meme by @Yohan_nes pretty much sums up my online presence ☺ #Community #Memes @Dagmawi_Babi

Or this one by @RapidStories ☺ Lol, AASTU's Software Channel was my spam location lol. #Community #Memes @Dagmawi_Babi

Also thank you all for all the love and support and sending me so much spiritual and tech content throughout April. You guys are the best. ☺ And I was even overwhelmed when an amazing member of our community started posting countdowns of my return on her story. I thought it was so cute and wholesome. ☺ #Community @Dagmawi_Babi

Someone I really like and is close to me gave me this gift and I just absolutely loved it. ☺ It's not even about the gift to be honest. It's the thought and effort put into it. Cause back in November I casually put the clock's design on my story among hundreds of other random posts and brushed passed it. ☺ Little did I know that she had gotten it made and was just waiting for the right moment to give to me. And a week ago she did. Like 6 months after that original post of mine. I loved it sooo much. Infact even my family loved it so much they put it up on our living room. ☺ Ugh, it's one thing to give people gifts, it's a completely another thing to be attentive to the people you like and plan ahead. ☺ You know who you are, thank you again! ☺ #Friends #Gifts @Dagmawi_Babi

First things first, Arc Browser is now available on windows for the public after being on beta test for 5 months. ☺ You can all now experience the epicness I told you about. And something I wanna tell you is that ever since I got access to the early beta on windows it was my default and other browsers and their layouts don't make any sense to me anymore. And a few days back they made us sign our names. And so my name will be in all of your browsers source code and credits forever. ☺ #ArcBrowser @Dagmawi_Babi

I was so tempted to order the Rabbit R1 during it's first announcement and their launch. It got me excited as an AI in a box tool. Plus the design is beautiful. And yesterday people found out that it runs on Android, so the whole thing can just be an app if they wanted to. Which is no surprise but kinda got that hype out of me • <https://www.androidauthority.com/rabbit-r1-is-an-android-app-3438805/> Overall tho, I think they can do epic things with their device and I still think it's a great tool as an AI in a box device. It's much faster and minimal. #RabbitR1 #Android #AI @Dagmawi_Babi

More reasons to use Arc! #ArcBrowser @Dagmawi_Babi

This was my senior year project but it was more or less suspended so I'm sharing the early version of it here. I loved my design, I thought I did good implementing the chats, I thought it was original as well. I'm running Google's Gemma 2B LLM running locally in LM Studio. It's the fastest and least resource intensive I've seen so far; almost instant responses. And for the frontend I'm using Vue (which for some reason I absolutely enjoyed) with tailwind and used vue-markdown-render package to customize the markdown feel. And ofcourse built the UI from scratch. Enjoy! ☺ #MyProjects @Dagmawi_Babi

In a way I'm glad they didn't understand our ideas cause now we've got a great deal with Ethiopian Airlines and we're making them a cool platform and we're gonna get epic credits and a cool portfolio. > Be me, a Christian > Bad things happen > But God always redirects it to good > Bliss

Got any Movie/Series recommendations?

I'm (was) a huge fan of horror movies. I just watched them all. But here's my simple case against horror movies now. “ஹார்ரர் மூவீஸ் நம்ம மனம் ஹார்ரர் மூவீஸ் நம்ம மனம் ஹார்ரர் மூவீஸ் நம்ம மனம் ஹார்ரர் மூவீஸ் நம்ம மனம் ஹார்ரர் மூவீஸ் நம்ம மனம் ஹார்ரர் மூவீஸ் நம்ம மனம் ஹார்ரர் மூவீஸ்” — ஷாண்டி 4௮8 Just not good for the heart, mind and soul. #Scripture @Dagmawi_Babi

Okay I could possibly be dumb so don't judge me for it, but here's a project I wanted to build but couldn't. Distributed Pi Calculator. So the maximum number of digits of π we humans were able to calculate was 105 Trillion taking 75 days if straight computation using up 1 million GB of data and it was done by a storage company called Storage Review. I wanted to do this to a smaller scale one random night. So the project I wanted to build was this: It's a simple website that when a user visits the site it would use the client's computer to calculate the digits of Pi as long as they're online and then update the database. While also displaying all the calculated digits on the website. So the more users visits the site the more digits are displayed and calculated. I tried so many ways of implementing this and made so many prototypes but I just couldn't solve it. Does anyone here have a logical set of steps on how to accomplish this? This might be my personal hardest project. Such a simple idea but couldn't solve it. #Thoughts #MyProjects @Dagmawi_Babi

Everytime good Friday comes I'm taken back to my childhood where me and my neighborhood friends made a cross, tied ME onto it and I pretended to be Jesus and they carried me to every neighbors' house. Lol little did I know that God was watching and He would later make me willingly carry my cross. Anyways, have a wonderful good Friday!

Prepare to hear one of the most deepest verses you've ever heard....

[illegible]

This is how God found all of us; drenched in blood, unloved and rejected. But His love overwhelmed us and He was so good to us. But then even after tasting the goodness of God, we rebelled against Him. The following verses are so heart breaking but it is a description of all of us...

[illegible]

၀၀၀၀၀၀၀၀၀ ၀၀၀၀ ၀၀ ၀၀၀ ၀၀၀၀၀၀၀ ၀၀၀ ၀၀ ၀၀၀၀၀၀၀၀ ၀၀၀ ၀၀၀၀၀၀၀၀၀ ၀၀၀၀၀ ၀၀၀ ၀၀၀၀၀ ၀၀၀၀၀၀ ၀၀၀၀၀
 ၀၀၀၀၀၀၀ ၀၀၀၀၀၀၀၀၀ ၀၀၀ ၀၀၀? ၀၀၀၀ ၀၀၀၀ ၀၀၀၀ ၀၀၀၀၀ ၀၀၀၀၀ ၀၀၀၀၀၀၀၀ ၀၀၀၀၀ ၀၀၀၀၀ ၀၀၀၀၀၀၀၀ ၀၀၀၀၀၀၀၀ ၀၀၀
 ၀၀၀၀၀ ၀၀၀၀ ၀၀၀ ၀၀၀ ၀၀၀၀၀၀ ၀၀၀ ၀၀၀၀ ၀၀၀ ၀၀၀၀၀၀၀၀ ၀၀၀၀၀၀၀ ၀၀၀၀၀၀၀ ၀၀၀ ၀၀၀ ၀၀၀၀! " -- ၀၀၀၀၀ 16:15-22
 #Scripture @Dagmawi_Babi

This is how we all repayed back the love God showed us. The chapter even goes on stating how dark our sins became. But the story doesn't end in darkness, the chapter ends with God giving us hope. A second chance to live with Him. It ends this way...

[illegible]

Good Friday is God keeping His promise of love and redemption. God became Human, a creature like this girl who was drenched in blood. And though she cheated, and though she did all the bad things in life, and though she broke all the promises and forgot God's love, God showed mercy and goodness. When Jesus died on that cross, He didn't die just for a portion of good people that only sinned a little. Jesus died for the blood drenched, child sacrificing, lustful, promise breaking, lying, killer that's in all of us. And that showed the extent and depth of His love for us... “ꠘꠘꠘ ꠘꠘ ꠘꠘꠘꠘꠘ ꠘꠘ ꠘꠘꠘꠘ ꠘꠘ ꠘꠘ ꠘꠘ ꠘꠘꠘꠘꠘ ꠘꠘ ꠘꠘꠘ ꠘꠘꠘ ꠘꠘꠘꠘꠘ” — ꠘꠘ 5ꠘ8 Praise be to God! Who loved us so deeply and sacrificially! ꠘ #Scripture @Dagmawi Babi

What God did for us is more than promise keeping. “**ᠰᠡᠭᠦᠨ ᠤᠯᠤᠰ ᠶ᠋ᠢ ᠵᠢᠨ ᠲᠣᠪᠳᠤ ᠬᠡᠭᠡᠷ**
ᠱᠡᠭᠦᠨ ᠴᠢᠩᠭᠡᠨ ᠲᠣᠪᠳᠤ ᠬᠡᠭᠡᠷ” — **ᠱᠡᠭᠦᠨ 31᠐8** “**ᠲᠤ ᠵᠢᠨᠲᠤᠨᠲᠤ ᠲᠣᠪᠳᠤ ᠬᠡᠭᠡᠷ**” — **ᠱᠡᠭᠦᠨ 13᠒5**

**God is with us, who can separate us from His love? Not even our darkest and deepest sins nor
our evil betrayals and killings. #Scripture @Dagmawi_Babi**

Whatever situation or sin you are in, you can go back to God cause He never left you! ☐

[illegible]

One thing I forgot to mention is that when we got God's forgiveness second time around, we got an even higher status than the first time. "ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ ᐱᐱ ᐱᐱ ᐱᐱᐱᐱ ᐱᐱᐱᐱᐱᐱ" -- 1ᐱ ᐱᐱᐱ 2:9-10

#Scripture @Dagmawi Babi

Hey, good morning, almost ☺

Why aren't remote controllers rechargeable?!

I think open source is just a scam to get clever people collaborating and then allow LLMs train

on that code.

That super late night unrealistic urge to start a cloud service provider with a GPU cluster.

At this point @Beka_Cru should just make a typesafe frontend framework or a web stack.

You know those recently trending Kawaii logos right, we should have traditional Ethiopian versions for tech logos. Yk how old Ethiopian logos are, just like that but for the tech we use. That'd be hilarious and awesome.

Sometimes I get tired of being human. Then I realize that I won't be human for long so I start cherishing everything around me.

I just want someone to love me like @GugutLogs loves Shaders.

Telegram is and will continue to be the best social platform ever built, what's next?

While having access to so much information and resources online, why does it all feel limiting? It's slightly frustrating sometimes tbh, browsing around for free hosting, purchasing domains, limiting ur projects to memory and compute. While OpenAI is out there burning billions, It's frustrating.

I also hate the fact that I have to pay every year to keep all the domains I purchased. I low-key thought they'd belong to me forever.

Someone really said websites are just databases with skins.

Throughout the bible, God is seen bringing order into chaos. To be scientific and technical, chaos isn't about randomness; it's about predictability. So God in the bible is seen putting predictability into chaos. Meaning Him alone understands and know chaos. Allowing Him and

anyone He wants to navigate through the chaos of life.

As a beginner Christian I see my faith in God being challenged in so many ways. One of the ways I've seen impact me leverages my engineering and developer side of me. See in tech, I wanna know how every tech thing works. How apps, sites, LLMs, OS, CPU and more. I want to know from scratch and build up until I comprehend it. It's just my nature. Now spiritually this is just hard to apply. And so I can see my faith being tested. Like If Jesus rose from the dead, How did that happen? Well by His Holy Spirit. Okay, How?... See what I mean?! So I realized something. Salvation in Christianity is about the What and Why and not the How. It's okay to believe in spiritual things without understanding the How's to the core. Infact I think that's what faith is too.
